on receipt of one-half the price.*

SCHOOL AND COLLEGE TEXT-BOOKS

PUBLISHED BY

SHELDON AND COMPANY,

NEW YORK.

BULLIONS' SERIES OF GRAMMARS, ETC.

Practical Lessons in English Grammar and Composition
For young beginners, (introductory to "Principles of English Grammar.") 40 cents.

Principles of English Grammar. A brief but comprehensive work for Common Schools. 70 cents.

Introduction to Analytical English Grammar. This little work is the Practical Lessons, so enlarged as to be what its title implies. 40 cents.

Analytical and Practical English Grammar. A larger work for Academies, High Schools, etc. 75 cents.

Progressive Exercises in Analysis and Parsing. Adapted to both Grammars. 18 cents.

Latin Lessons, with Exercises in Parsing. 75 cents. Prepared by GEORGE SPENCER, A.M., as introductory to

Principles of Latin Grammar. New edition. \$1.25.

Latin Reader. With Introduction on Latin Idioms, an Improved Vocabulary, etc. \$1.25.

Exercises in Latin Composition. Adapted to the Latin Grammar. \$1.25.

Key, separate, for Teachers only. 60 cents.

Cæsar's Commentaries. With Notes and References revised. \$1.25.

Sallust. With Notes and References. \$1.12.

Cicero's Orations. With Notes and References to Andrews' and Stoddard's, as well as to Bullions' Grammar. \$1.25.

Latin-English Dictionary. With Synonyms. 1014 pages. \$3.00.

First Lessons in Greek. Introductory to the Grammar. 85 cts.

Principles of Greek Grammar. New Edition. \$1.50.

Greek Reader. With Introduction on Greek Idioms, Improved Lexicon, etc. \$1.75.

Cooper's Virgil. With valuable English Notes. \$2.00.

The books of Dr. Bullion's Series have been several years before the public, and have met with the approval of most competent judges. They are favorite text-books in schools, academies, and colleges throughout the United States and Canada.

"Bullions' Grammar, after a careful examination, has been adopted as a text-book in our school. It seems to be a most thorough and practical treatise on English Grammar, and by its arrangement well adapted for the instruction of large classes. Our good opinion of this book, we confidently expect, will be confirmed by the impartial trial in the class-rooms to which we intend to subject it."—*John G. McNary, Principal of New York Grammar School No. 11.*

NORMAL MATHEMATICAL SERIES.

Stoddard's Juvenile Mental Arithmetic, by JOHN F. STODDARD, A.M., for Primary Schools. 72 pp. Price 22 cents.

Stoddard's American Intellectual Arithmetic, by the same. 164 pp. Price 35 cents.

Stoddard's Rudiments of Arithmetic, by the same. 190 pp. Price 40 cents.

Stoddard's Practical Arithmetic, by the same. 299 pp. Price 70 cents.

Key to Stoddard's Intellectual and Practical Arithmetics, in one book. Price 60 cents.

Schuyler's Higher Arithmetic. A new and original work for Colleges, Seminaries, Academies, and High Schools, by A. SCHUYLER, of Ohio. Price 90 cents.

Stoddard and Henkle's Elementary Algebra, for the use of Common Schools and Academies, by JOHN F. STODDARD, A.M., and Professor W. D. HENKLE, of Ohio Southwestern Normal School. Price \$1.00.

Key to Stoddard and Henkle's Elementary Algebra. Price \$1.00.

Stoddard and Henkle's University Algebra, for High Schools, Academies, and Colleges, by JOHN F. STODDARD, A.M., and Professor W. D. HENKLE. 528 pp. Price \$1.75.

Key to Stoddard and Henkle's University Algebra. Price \$1.75.

"I have examined Stoddard and Henkle's University Algebra. It is a thorough and elaborate work. It combines clearness and simplicity in its method and illustrations, and constitutes a valuable addition to the mathematical works of the day."—*Cyrus Nutt, A.M., Prof. of Mathematics in the Indiana Ashbury University.*

"I have examined 'Stoddard's American Intellectual Arithmetic,' and cheerfully recommend it to teachers and parents as a valuable elementary work, and one well adapted to the wants of pupils in the first stages of arithmetic. It is constructed upon sound and practical principles, and will be found an important addition to the text-books now in use in our Common Schools."—*Hon. Samuel S. Randall, Supr. of New York City Schools.*

"Stoddard's Arithmetical Series is now in general use in the schools of this county. They have stood the test for four years as the text-books in Arithmetic in our schools, and are considered by our teachers superior to any others now before the public."—*Mr. S. A. Torril, late Superintendent of Public Schools of Wayne County, Pa.*

BROCKLESBY'S ASTRONOMIES.

Brocklesby's Common School Astronomy. 12mo. 173 pp. Price 70 cents.

Brocklesby's Elements of Astronomy. By JOHN BROCKLESBY, Trinity College, Hartford, Conn. 12mo. Fully illustrated. 321 pp. Price \$1.50.

"We take great pleasure in calling the attention of teachers and students to this truly excellent book. It contains 321 pages, and is printed from fair type and on good paper. Both the plan and execution of the whole are equally admirable. It is not a milk-and-water compilation, without principles and without demonstration. It contains the elements of the science in their proper integrity and proportions. Its author is a learned man and a practical instructor, as the author of every school-book should be. The style is a model for a text-book, combining in a high degree perspicuity, precision, and vivacity. In a word, it is the very best elementary work on Astronomy with which we are acquainted."—*Connecticut Common School Journal.*

"This is a compact treatise of 320 pages, containing the elements and most of the important facts of the science clearly presented and

systematically arranged; it is very finely illustrated. It is worthy of a careful examination by all who wish to secure the best text-books."
—*Ohio Journal of Education*.

"A beautiful text-book of a noble science! The beauty and ingenuity of the numerous illustrations must captivate every reader's attention. We commend it to the examination of those who are seeking a text-book for their classes."—*Michigan Journal of Education*.

KEETELS' FRENCH METHOD.

A New Method of Learning the French Language. By JEAN GUSTAVE KEETELS, Professor of French and German in the Brooklyn Polytechnic Institute. 12mo. Price \$1.50.

A Key to the New Method in French. By J. G. KEETELS. 1 vol. 12mo. Price 50 cents.

This work contains a clear and methodical *exposé* of the principles of the language, on a plan entirely new. The arrangement is admirable. The lessons are of a suitable length, and within the comprehension of all classes of students. The exercises are various, and well adapted to the purpose for which they are intended, of reading, writing, and speaking the language. The Grammar part is complete, and accompanied by questions and exercises on every subject. The book possesses many attractions for the teacher and student, and is destined to become a popular school-book. It has already been introduced into many of the principal schools and colleges in the country.

The following testimonials have lately been received

"I have examined several works designed for pupils studying the French language, and among them 'Keetels' New Method of the French.' The last work I consider superior to any other which I have examined, and shall use it in my classes as the best text-book upon the subject."—*S. A. Furrand, Trenton, N. J.*

"I take great pleasure in adding my testimony to the value of 'Keetels' New Method of Learning the French Language, as a school-book. It will make its way, successfully, among the multitude of similar books, as well by its typographic as its scholastic merits. I shall introduce it next term into my school."—*Joseph McKee, Teacher of French, Newark, N. J.*

"I have examined 'Keetels' New Method of Learning the French Language,' and take pleasure in recommending it as a work admirably adapted for the purpose."—*John Early, Pres. of Yorktown College.*

PEISSNER'S GERMAN GRAMMAR.

A Comparative English-German Grammar, based on the affinity of the two languages. By Professor ELIAS PEISSNER, late of the University of Munich, now of Union College, Schenectady. New edition, revised. 316 pp. Price \$1.50.

The author of this popular book has, during a long experience in teaching, deduced principles on which are prepared this Grammar of the German language. For the direct attention requisite to learn a new language, one point at a time is clearly presented to, and impressed on, the mind by examples and exercises.

As the student will naturally express ideas in the German language similar to the manner of his own, the study of the German is made *comparative*, and guided, when possible, by rules formed on its relation to the English Grammar.

The general desire to read in the language being studied, is provided for immediately after the second part by interesting sentences, in which occur only principles already explained, and thus the attention is directed to etymology. Each division of this reading-matter is followed by a *conversation*, with only such words as have just been given in order to fix in the memory words which are most frequently used.

HOOKE'S PHYSIOLOGIES.

Hooker's First Book in Physiology. For Public Schools. Price 75 cents.

Hooker's Human Physiology and Hygiene. For Academies and general reading. By WORTHINGTON HOOKER, M.D., Yale College. Price \$1.50.

A few of the excellences of these books, of which teachers and others have spoken, are: 1st. Their clearness, both in statement and description. 2d. The skill with which the *interesting* points of the subject are brought out. 3d. The exclusion of all useless matter. Other books on this subject having much in them which is useful only to medical students. 4th, the exclusion, so far as is possible, of strictly technical terms. 5th. The adaptation of each book to its particular purpose, the smaller work preparing the scholar to understand the full development of the subject in the larger one. 6th. In the larger work the science of Physiology is brought out as it *now* is, with its recent important discoveries. 7th. Some exceedingly interesting and important subjects are fully treated, which, in other books of a similar character, are either barely hinted at or are entirely omitted. 8th. These works are not mere compilations, but have the stamp of *originality*, differing in some essential points from all other works of their class. 9th. In beauty and clearness of style, which are qualities of no small import

ance in books for instruction, *they will rank as models*. 10th. The subject is so presented that there is nothing to offend the most refined taste or the most scrupulous delicacy.

There is added to the larger book a full chapter on *Hygiene*, questions for the use of teachers who desire them, and also a complete Index. The incidental remarks on Hygiene, occurring in the book, and the concluding chapter on that subject, present together a more thorough view of it than is given in any other School Physiology.

These books are text-books almost wherever they are known. The "First Book" is a text-book in the public schools of Boston, New York, Buffalo, and San Francisco.

"Professor Hooker's work on Physiology has been in use for the last year in the Normal School in this city, and it gives me great pleasure to express my convictions of its excellence as a text-book. In the course of my experience as a teacher I have used the books of various authors on the subject of Physiology, but the work of Professor Hooker satisfies me much more fully than any other that I have used. It has the double advantage of being accurately scientific in its matter and arrangement, and of being expressed in correct and elegant English, a combination of the highest importance, and yet seldom attained to the extent exhibited in this book. I know of no book for which I would be willing to exchange it."—*Richard Edwards, Esq., Principal of St. Louis Normal School.*

FITCH'S MAPPING PLATES.

Designed for Learners in Geography, being a Collection of Plates prepared for Delineating Maps of the World, and Countries forming its principal subdivisions, viz.: 1. The World, 2. United States. 3. North America. 4. South America. 5. A State. 6. Mexico and Guatemala. 7. Great Britain and Ireland. 8. Europe. 9. Southern Europe. 10. Germany. 11. Africa. 12. Asia. 13. Atlantic Ocean. 14. Pacific Ocean. By GEORGE W. FITCH. Price 60 cents.

The attention of the public is respectfully called to the above plates, and to the advantages they are calculated to afford in the study of Geography. They are prepared with the suitable and requisite lines of latitude and longitude, for maps of the world, and the countries forming its principal subdivisions, and are designed to be used in connection with the school atlases in common use, as well as with outline maps. With these plates, the pupil is able to commence, at once, the delineation of maps, without the difficult and perplexing labor of drawing the meridians and parallels—a labor which generally consumes the time of both teacher and scholar, to an extent entirely disproportionate to any good which may be derived thereby.

THOMSON'S LAWS OF THOUGHT.

An Outline of the Necessary Laws of Thought: A TREATISE ON PURE AND APPLIED LOGIC. By WILLIAM THOMSON, D.D., Provost of the Queen's College, Oxford. 1 vol. 12mo. Cloth. Price \$1.50.

This book has been adopted as a regular text-book in Harvard, Yale, Rochester, New York University, etc.

"I am glad to see an American edition of 'Thomson's Outline of the Laws of Thought,' and one, too, which equals, even in outward appearance, the English copy. In my opinion, it is the most useful and satisfactory of the many treatises on logic which have appeared within the last few years. Though not expressly designed and arranged for use as a text-book, few teachers will object to it on this account; many, indeed, will prefer it, as it has less the character of a book made to order."—*James Walker, Ex-Pres. of Harvard College.*

"It is one of the most important treatises upon logic that have appeared in England during the present century, and as such received the high commendation of so severe a critic as the late Sir William Hamilton. Clear, comprehensive, and accurate, it is admirably adapted for use as a manual of instruction, while it contains enough of the fruits of successful research and original speculation to give its author rank among the discoverers in science. Four editions of the work have already appeared in England, where it has also been adopted in many seminaries as a text-book; and it needs only to be known in order to be received with equal favor in the United States."—*Francis Bowen, Prof. of Logic, etc., in Harvard College.*

WHATELY'S ELEMENTS OF LOGIC.

By RICHARD WHATELY, D.D., Archbishop of Dublin. New revised Edition, with the Author's last Additions. Large 12mo. 484 pp. Price \$1.50.

"This work (Elements of Logic) has long been our text-book here. The style in which you have published this new edition of so valuable a work leaves nothing to be desired in regard of elegance and convenience."—*Professor Dunn, Brown University.*

"Its merits are now too widely known to require an enumeration of them. The present American edition of it is conformed to the ninth English Edition, which was revised by the author, and which contains several improvements on the former issues."—*North American Review.*

Questions Adapted to Whately's Elements of Logic, for the use of Schools and Colleges. Prepared by a Teacher. 12mo. In paper covers. Price 15 cents.

WHATELY'S ELEMENTS OF RHETORIC.

Comprising an Analysis of the Laws of Moral Evidence and of Persuasion, with Rules for Argumentative Composition and Elocution. New Edition, revised by the Author. Large 12mo. 546 pp. Price \$1.50.

"The Elements of Rhetoric has become so much a standard work that it might seem superfluous to speak of it. In short, we should not dream of teaching a College class from any other book on Rhetoric. Communion with Whately's mind would improve any mind on earth."
—*Presbyterian Quarterly Review*.

Questions Adapted to Whately's Elements of Rhetoric, for the use of Schools and Colleges. Prepared by a Teacher. In paper covers. 12mo. Price 15 cents.

The above are the editions formerly published by JAMES MUNROE & Co., Boston, and the best in the market. They are used in all the principal Colleges and Academies of the United States.

THE ELEMENTS OF INTELLECTUAL PHILOSOPHY.

By FRANCIS WAYLAND, D.D. 1 vol. 12mo. Price \$1.50.

This clearly written book, from the pen of a scholar of eminent ability, and who has had the largest experience in the education of the human mind, is unquestionably at the head of text-books in Intellectual Philosophy. It contains the substance of Lectures during several years, delivered to the classes in Intellectual Philosophy in Brown University. Being intended to serve the purposes of a text-book, the important truths of the science have been presented and illustrated, rather than the inferences which may be drawn from them, or the doctrines which they may presuppose. The compass of the volume is adapted to the time usually allotted to the study of this subject in the colleges and higher seminaries of our country. It is divided into eight chapters on the following subjects: The Perceptive Faculties—Consciousness, Attention, and Reflection—Original Suggestion, or the Intuitions of the Intellect—Abstraction—Memory, Reasoning—Imagination—Taste—also an Appendix of interesting matter. The author's practical suggestions on the cultivation of the several faculties of the mind, aiding the student's efforts to discipline and strengthen his intellectual energies, and the numerous references to books of easy access, specifying the places where topics treated of are more fully discussed, make this book a valuable addition to the readable books of any teacher or professional man.
