

DAVIES' SYSTEM OF MATHEMATICS.

MATHEMATICAL WORKS,

DESIGNED FOR SCHOOLS, ACADEMIES, AND COLLEGES.

BY CHARLES DAVIES, LL.D.

PUBLISHED BY A. S. BARNES & CO.,

51 JOHN-STREET, NEW YORK.

ELEMENTARY COURSE.

DAVIES' PRIMARY TABLE BOOK
DAVIES' FIRST LESSONS IN ARITHMETIC
DAVIES' SCHOOL ARITHMETIC *New Edition,*
KEY TO DAVIES' SCHOOL ARITHMETIC
DAVIES' UNIVERSITY ARITHMETIC *12mo. sheep,*
KEY TO DAVIES' UNIVERSITY ARITHMETIC
DAVIES' ELEMENTARY ALGEBRA *12mo. sheep,*
KEY TO DAVIES' ELEMENTARY ALGEBRA
DAVIES' ELEMENTARY GEOMETRY *12mo. sheep,*
DAVIES' DRAWING AND MENSURATION *12mo. sheep,*

ADVANCED COURSE.

DAVIES' BOURDON'S ALGEBRA—Being an abridgment of the work
of M. Bourdon *8vo. sheep,*
DAVIES' LEGENDRE'S GEOMETRY AND TRIGONOMETRY—
Being an abridgment of the work of M. Legendre *8vo. sheep,*
DAVIES' ELEMENTS OF SURVEYING—With a description and Plates
of the Theodolite, Compass, Plane Table, and Level *8vo. sheep,*
DAVIES' ANALYTICAL GEOMETRY—Embracing the Equations of
the Point and Straight Line; a System of Conic Sections; the Equations
of the Line and Plane in Space, &c. *8vo. sheep,*
DAVIES' DIFFERENTIAL AND INTEGRAL CALCULUS—Embracing
the Rectification and Quadrature of Curves, the Mensuration of
Surfaces, and the Cubature of Solids *8vo. sheep,*
DAVIES' DESCRIPTIVE GEOMETRY—With its application to Spheri-
cal Projections *8vo. sheep,*
DAVIES' SHADES, SHADOWS, AND LINEAR PERSPECTIVE—
With numerous Plates *8vo. calf back,*
(a)

TO THE FRIENDS OF EDUCATION.

The publishers of this series of mathematical works by Professor CHARLES DAVIES, beg leave respectfully to ask of teachers and the friends of education a careful examination of these works. It is not their intention to commend, particularly, this Course of Mathematics to public favor; and especially, it is not their design to disparage other works on the same subjects. They wish simply to explain the leading features of this system of Text-Books—the place which each is intended to fill in a system of education—the general connection of the books with each other—and some of the advantages which result from the study of a uniform series of mathematical works.

It may, perhaps, not be out of place, first, to remark, that the author of this series, after graduating at the Military Academy, entered upon the duties of a permanent instructor in that institution in the year 1816, and was employed for the twenty following years in the departments of scientific instruction. At the expiration of that period he visited Europe, and had a full opportunity of comparing the systems of scientific instruction, both in France and England, with that which had been previously adopted at the Military Academy.

This series, combining all that is most valuable in the various methods of European instruction, improved and matured by the suggestions of more than thirty years' experience, now forms the only complete consecutive course of Mathematics. Its methods, harmonizing as the works of one mind, carry the student onward by the same analogies and the same laws of association, and are calculated to impart a comprehensive knowledge of the science, combining clearness in the several branches, and unity and proportion in the whole. Being the system so long in use at West Point, and through which so many men, eminent for their scientific attainments, have passed, it may be justly regarded as our NATIONAL SYSTEM OF MATHEMATICS. Scholars and students who have pursued this course, will everywhere stand on the highest level with reference to the estimates which themselves and others will form of this part of their education.

The series is divided into three parts, viz. : First—ARITHMETICAL COURSE FOR SCHOOLS. Second—ACADEMICAL COURSE. Third—COLLEGIATE COURSE
