

HARPER'S NEW MISCELLANY
OF
POPULAR STERLING LITERATURE.

"Books that have an aim and meaning in them."

Now in course of publication, a new and attractive library of sterling books, elegantly printed in duodecimo, on fine paper, and bound in extra muslin gilt, fitted for permanent preservation.

PRICE FIFTY CENTS A VOLUME.

The cheapest Popular Series of Works yet Published.

I. II.

Elements of Morality and Polity.

BY WILLIAM WHEWELL, D.D.,

AUTHOR OF "HISTORY AND PHILOSOPHY OF THE INDUCTIVE SCIENCES," &c.

2 vols. 12mo, Muslin, extra gilt, \$1 00.

Dr. Whewell's work ought to be read, because it can not be read without advantage: the age requires such books.—*London Athenaeum*.

A text-book of simple truths, from which, by induction, a complete system of morality is constructed, applicable to all the relations and circumstances of life, and embracing every department of human action. The reader who shall carefully study these volumes—and a more inviting page, clear and legible, the eye does not often rest upon—will find his labor more than rewarded.—*New York Commercial Advertiser*.

Professor Whewell's "Elements of Morality" have been universally received in England as a contribution of rare value to the department of moral and political science.—*Baltimore American*.

A splendid production by one of the most distinguished of the scientific men of the age. This is a book, not to be read merely, but to be re-perused and patiently studied; we have heard it pronounced by no mean critic the most complete and lucid work on ethical philosophy ever produced. We commend this work to the especial notice of thinkers and readers, to scholars and schools generally, as a most admirable text-book.—*Sun*.

The style of the work, though simple, is extremely clear, strong, and eloquent. It is a book to be studied rather than superficially read, and can not fail to be of the very highest importance in instructing and disciplining the public mind.—*American Patriot*.

This is beyond all comparison the most complete, comprehensive, and luminous treatise on the important subjects it discusses, that is to be found in the language, and its careful study is indispensable to every one who would obtain true and definite notions in regard to the principles of public and private morals. It is profoundly learned and philosophical, but the writer thinks logically and clearly, and is therefore at all times lucid and comprehensible.—*Buffalo Commercial Advertiser*.

III.

The Philosophy of Mystery.

BY WALTER COOPER DENDY.

12mo, Muslin, extra gilt, 50 cents.

This is a learned and elaborate work, in which the writer goes into the investigation of all the phenomena of mind in the erratic operations and phantasies of ghost seeing and spectral hallucinations, and aims to give the true philosophy of all such delusions. He is a medical man of considerable eminence, and has spared no pains in his researches, giving a great number of facts and cases to illustrate his philosophy. The volume will be much sought for, as it is really a desideratum in the world of literature. We know of no work on this subject which lays the same just claim to public attention, or the study of the philosopher.—*Christian Advocate and Journal*.

The volume before us is both instructive and amusing, and at this particular time, when the extremes of superstition and philosophy have shaken hands, it will be likely to effect an inconceivable amount of good, if properly studied. It is one of the most remarkable productions of the day, and must create an extraordinary degree of interest in the public mind.—*Merchant's Magazine*.

It belongs to that class of writings which you can take up and put down at pleasure, and which may be subjected to repeated readings. The work is pleasant, however, in spite of this—pleasant because of its facts, its numerous details of mystery, its vast collection of anecdote, its developments of *diablerie*, its tidings from the spiritual world, and the many cases which it brings together of the curious and the wonderful in nature and art, which former ages, and ignorance and superstition, have concluded to consider supernatural. Where science and modern speculation furnish the solution to the mystery, Mr. Dendy couples it with the statements, and the book is thus equally valuable and amusing.—*Charleston Transcript*.

Here lies a remarkable work; beautiful in its style, and wondrous in its matter. The work is strictly philosophical in its tendency, yet more amusing than a novel.—*True American*.

This is a book for the lovers of marvels and of mysteries. It contains an immense collection of anecdotes of spectral apparitions, of illusions of vision or of hearing, of striking phenomena exhibited in dreams, in insanity, in trance, or in magnetism, and furnishes many very valuable hints to aid in the solution of these mysteries, by which so many have been bewildered or affrighted. It is written in a style of great ease and elegance, and can not fail to find a very wide circle of welcoming readers.—*Albion*.

This unique and remarkable book has just been placed on our table; we know its reputation of old; it is an admirable discourse on the subject of supernaturalisms, such as mental illusions, dreams, ghosts, mesmeric phenomena, &c. If any one will but read the first half dozen pages, we will vouch for it he will not neglect the rest of the volume: it is one of the best written books on one of the most curious range of topics that could engage the pen of a writer, or the attention of a reader. It is, in fact, one of the most curious volumes ever perused, upon a series of the most singular subjects, and, in this new and neat form, it will command a vast number of readers.—*Sunday Times*.

"The Philosophy of Mystery" is an exceedingly able work; far better, we think, than the "Natural Magic" of Brewster, a book of identical purpose, carried out in a totally different way. The "Natural Magic" is the more ratiocinative, Mr. Dendy's essay the more poetical, the more imaginative, and to us the more interesting.—*National Press*.

IV.

The Life of Mozart:

INCLUDING HIS CORRESPONDENCE.

BY EDWARD HOLMES,

AUTHOR OF "A RAMBLE AMONG THE MUSICIANS OF GERMANY," &c.

12mo, Muslin, extra gilt, 50 cents.

It is written in a beautiful, narrative style, and can not but be every where acceptable. To all who appreciate the extraordinary genius of Mozart, the delicate structure of his mind, the incidents of his life, and his romantic death, this volume will indeed be a treasure.—*Boston Gazette*.

It contains, in addition to much of his interesting correspondence, and other papers, a detailed account of his life, adventures, and rise as an artist, and a discriminating sketch of his character, the peculiarities of which are happily illustrated by anecdotes. Many things of him, unknown even to his admirers, are here given to the world, and his biographer, fully appreciating the artist, has yet, not like a flatterer, but with true independence, spoken candidly of the faults of the man.—*Merchant's Magazine*.

Of this far-famed life of Mozart it is scarcely necessary for us to say a word; the foreign reviews have been so unanimous in their encomiums, that we suppose few will be found insensible to the strong inducement of its perusal, especially as the work may be obtained at the trifling cost of half a dollar, and in so beautiful a guise. We have looked into the biography but slightly, yet find it redolent with interest, and fully sustaining the high estimate placed upon the work by the *London Athenaeum* and *Blackwood*. If the Harpers continue to fill their new library with sterling works like the present, it will present the most truly valuable series, yet the cheapest, ever attempted in any age or country.—*Evening Gazette*.

The only authentic biography of the great composer that is extant in the English language, and the events of his career are replete with useful admonitions and warning to the sons of genius, and they whisper to those whose present claims are not allowed that there is a future full of promise. In his life Mozart was neglected and impoverished, and he went to his grave with more than the bitterness of death crowding on his thoughts, but fame has taken possession of his memory, and among those who move as gods in musical art, few are equal to him, none are superior. This biography possesses an interest for all who feel interested in the great men of the earth. It is not only remarkably well written, but has a completeness about it we have never found before in any life of Mozart.—*Louisville Journal*.

There is such a charm in this narrative, that the lovers of good biography can not hear of it too soon. We can not conceive a more fascinating story of genius. To a style which would alone have sufficed to the production of an interesting and striking narrative, Mr. Holmes unites a depth of knowledge and musical appreciation very rare and remarkable. We thank him cordially for a most pleasing addition to our standard biographical literature.—*Examiner*.

The book is one of extraordinary interest, not merely to the lovers of music and appreciators of the great composer, but to the general reader, as a vivid picture of the life of a man of genius, who encountered all the difficulties, trials, and sufferings usually the lot of genius when it comes before a world incapable of appreciating it, and indifferent to its welfare. The domestic portions of the book are invaluable; his relations to his father and his wife are very beautiful. The work is admirably executed, as well in the scientific as anecdotal passages, and is worthy of the widest sale.—*News*.

V.

The Practical Astronomer:

COMPRISING ILLUSTRATIONS OF LIGHT AND COLORS;
PRACTICAL DESCRIPTIONS OF ALL KINDS OF TEL-
ESCOPIES, &c., WITH DESCRIPTIVE ACCOUNTS OF
THE EARL OF ROSSE'S LARGE TELESCOPES, AND
OTHER TOPICS CONNECTED WITH ASTRONOMY.

BY THOMAS DICK, LL.D.,

AUTHOR OF THE "CHRISTIAN PHILOSOPHER," "CELESTIAL SCENERY,"
"THE SIDEREAL HEAVENS," &c.

100 Engravings. 12mo, Muslin, extra gilt, 50 cents.

The name of the distinguished author of this work is a sufficient passport to public favor and a sure guarantee to its sterling value, and those who have read Dr. Dick's former works will need no recommendation of this book by us. He is not only an original and profound observer of nature, but truly a most excellent *Christian* philosopher, whose powers of intellect and expanded views of the character of the great Architect of the universe are so eminently calculated to direct the mind not alone to the grandeur, the magnificence, and sublimity of the laws and principles of the material world, but to look through nature up to "Nature's God." It is truly a valuable work.—*Farmer and Mechanic*.

The merits of this work are of the highest order; Dick is one of the profoundest and purest of modern philosophers.—*Western Continent*.

Here is the ninth volume presented by this gifted author to the public; the aim of all of which has been to simplify sciences which before have been too often considered as every way *above*, and therefore unworthy of the attention of ordinary readers. It is specially addressed to private students and the higher schools, and comprises a large amount of new and valuable matter connected with astronomy, and pointing out ways in which the more humble student can in the best way improve the advantages placed in his way.—*Auburn Journal*.

Let not the inquisitive fear that the intricacies of science or the technicalities of language will obstruct the pleasure they will derive from the study of this book; for the clearness of the author's style, and the elucidation of the one hundred engravings, render it within the scope and comprehension of every intelligent student.—*Industrial Record*.

The copious use of engravings and of pictorial illustrations, together with the plain, popular explanations, render this book a truly *practical* work. Dr. Dick is not only thoroughly scientific, but he knows well how to render his acquisitions available to the great body of common readers, by his accurate method and clear descriptions.—*Watchman*.

We have always been an admirer of the writings of this gentleman, and popularity keeps on his side wherever he is known. He is a profound thinker and a devout Christian. His works all tend to illustrate the simple as well as the sublimest principles of philosophy, and while they instruct, can not fail to enlighten. The present volume comprises illustrations of light and colors, practical descriptions of all kinds of telescopes, the use of the equatorial-transit, circular, and other astronomical instruments, and other topics connected with astronomy. It is illustrated by 100 engravings, and will be found a most valuable book for all classes, but particularly as a work of instruction for youth.—*Illustrated Magazine*.

VI, VII.

The Life of Paul Jones.

BY ALEXANDER SLIDELL MACKENZIE, U. S. N.

2 vols. 12mo, Portrait, Muslin, extra gilt, \$1 00.

The history of the naval adventures and victories of Paul Jones forms one of the most romantic chapters in the record of great deeds, and can not fail to attract general and ardent attention, since it relates to the very beginning of the American navy.—*Commercial Advertiser*.

The various biographies of Paul Jones now extant have been carefully searched by Mr. Mackenzie; as also the log books of Jones's various cruises and papers in possession of his heirs, with a view to procure a full and authentic collection of facts and incidents for the present work. Thus industriously compiled and stored, and that by an able hand, this edition must necessarily, as it does, possess considerable merit.—*Philadelphia Chronicle*.

Paul Jones will always be regarded as one of the most daring and gallant heroes who ever made the ocean the theater of their exploits. Such a name can never be forgotten by Americans, nor can the services which he rendered to the cause of American liberty, in its infant struggles, ever pass into oblivion. No better biographer for such a character could have been found than Captain Mackenzie. Familiar with all the details of seamanship, possessing the same bold patriotism which made the career of his hero so illustrious, and being an accomplished and vigorous writer, he has given us a most admirable biography.—*Courier and Enquirer*.

This is a capital American biography, of an American naval hero, scarcely less renowned and no less gallant and gifted with an heroic spirit than Nelson, the great British admiral. There is scarcely a more stirring life in the whole compass of literature than that of Jones; and the important part he played in giving force and almost life itself to the American navy, then in its earliest infancy, renders his history peculiarly interesting and attractive. No man certainly ever performed more gallant exploits, and few have rendered more important service to the cause of freedom than he. Many of his actions for bravery, skill, and the performance of almost incredible deeds, by apparently the most inadequate means, are scarcely rivalled by anything in the records of naval history. His life should be familiar to American readers; and in the elegant, forcible, and graphic style of Commander Mackenzie it can not fail to be universally read.—*True Sun*.

We are glad to see the life of this celebrated man by one competent to write it. His adventures border so much on the marvelous that one is glad to be sure of reading only what is authentic, and that written in a style and language becoming the subject. There is a good moral lesson conveyed in this life of Paul Jones.—*Christian Advocate and Journal*.

The name and achievements of Paul Jones are indissolubly connected with American history; and his renowned deeds, which made him the terror of the coast of Britain, are among the most romantic in the annals of naval warfare, and impart to this work the highest interest. This is the most complete and authentic biography of Commodore Jones ever published, as all accessible materials have been collected, and are used by Commander Mackenzie with the ability and tact which he possesses as an accomplished scholar and an officer, accomplishments which peculiarly qualify him to write naval biography. A fine portrait of this true naval hero will be found in the first volume.—*Baltimore American*.

We have read it with some care, and compared it with other biographies, and think it greatly superior to any yet published. It contains a full narrative of all the important events in Jones's eventful career, and yet is less voluminous than previous works.—*Highland Courier*.

VIII.

The Ascent of Mount Ararat,

(ACHIEVED FOR THE FIRST TIME).

BY DR. FRIEDRICH PARROT.

TRANSLATED BY W. D. COOLEY.

12mo, Map and Wood-cuts, Muslin, extra gilt, 50 cents.

This is a most interesting book, both in its description of the country and inhabitants of Central Asia, and in its connection with the remarkable event of our world—the Flood. Mount Ararat, which was ascended by M. Parrot, must ever possess to the Biblical reader most intense interest, as the resting place of the ark after the universal deluge.—*Pittsburgh Chronicle*.

A work destined, from the intrinsic interest of the subject, and the fullness of detail which is spread before the reader, to a very wide circulation. The idea of ascending Mount Ararat seems to have risen with the traveler to a passion; previous travelers had never accomplished it; the natives of the region looked upon it as impossible; their superstition regarded the inaccessible summit as the mysterious resting place of the ark to this day. How Dr. Parrot approached the region, what adventures he met with by the way, what manners and customs he witnessed, how he twice essayed to reach the sacred peak and turned back, and how on a third attempt he accomplished the feat through difficulties the recital of which has led scientific men still to doubt if the ascent were really performed—may all be read in this compact volume, illustrated by maps and engravings, with every aid to the reader's comprehension.—*Notes*.

Hardly a subject could have been selected more stirring in its character than "A Journey to Ararat." Held in equal veneration by Jew, Christian, and Mohammedan, and regarded with superstitious feelings even by the pagan, that mountain has always enjoyed a degree of celebrity denied to any other. Sinai, and Horeb, and Tabor may have excited holier musings; but Ararat "the mysterious"—Ararat, which human foot had not trod after the restorer of our race, and which, in the popular opinion, no human foot would be permitted to tread till the consummation of all things—Ararat the holy, which winged cherubim protected against the sacrilegious approach of mortals, and which patriarchs only were permitted to revisit, appeared in many respects an object of curiosity as unique as it was exciting.—*London Athenaeum*.

It is a highly entertaining work, embodying much historical, geographical, and scientific information, and conveying a knowledge of the character, habits, and manners of the people among whom the author traveled. The ascent of Mount Ararat is so very difficult that many persons have doubted whether the feat was accomplished by Dr. Parrot, but his acknowledged integrity ought to place his claims in this respect above suspicion. The integrity of bold adventure will find in this volume much to gratify their peculiar taste, and the general reader can hardly fail to be pleased with it.—*New York Tribune*.

This volume has claims upon the public, as a scientific and truly valuable work, which have been possessed by few others. It is, in fact, the condensed narrative of an exploring expedition sent out by the Russian government into the region about Mount Ararat, a region which possesses more interest for scientific men, perhaps, than any other in the world which has been so little explored.—*New York Courier*.

It reads more like the travels of Von Humboldt than any book we have lately read. The writer is a man of science and observation, and the book we recommend to the public.—*Lowell Courier*.

IX.

Remarkable Criminal Trials.TRANSLATED FROM THE GERMAN OF FEUERBACH,
BY LADY DUFF GORDON.

12mo, Muslin, extra gilt, 50 cents.

A book of thrilling interest; one that can not fail to be read with avidity.—*New York Courier*.

This work abounds with singular cases of criminal jurisprudence in Bavaria, of the most astounding and thrilling interest, the details of which are of remarkable character, and differ essentially from those hitherto familiar to the public in England or this country. They are fully equal, in their absorbing interest, to anything in the famous "Causes Celebres" of France; and, perhaps, for their unique and striking features, are unexcelled by any delineations of crime elsewhere on record.—*True Sun*.

Public attention was first drawn to this work by an able and interesting article in the Edinburgh Review. They are all narratives of marvelous interest—more strange and wonderful, many of them, than any work of fiction, and giving to the reader a clear view of the nature and peculiarities of the criminal jurisprudence of Germany.—*N. Y. Commercial Advertiser*.

Its illustration of the many curious customs of German criminal jurisprudence will be sufficiently startling to the English reader; but, apart from this, the extraordinary subtle discrimination thrown into the narrative of each particular crime gives to the volume, as a mere story book, the intellectual interest, the passion, and all the rich and various coloring of a philosophical romance. The translation is excellent, and a judicious compression of the original has added much to the effect.—*London Examiner*.

The narratives abound with thrilling interest, setting forth the constant recurrence of crime, detection, and punishment, in which the attention of the reader is roused by the novelty of the scene, and rewarded by the light thrown upon the darkest portion of human nature.—*New Bedford Mercury*.

This work has been so highly extolled by the Edinburgh Foreign Quarterly and other reviews, that not much need be said of its character and claims to public notice. It presents some of the most remarkable stories of horrible crimes and their exposure we have ever met, and gives a very clear and vivid conception of the peculiarities of German criminal jurisprudence. It is a book which will be universally read, as one of the most thrilling and absorbing interest. The translator has given in the preface a very good account of the criminal law of Germany, and has selected only those portions of the original work which will have the greatest value and interest.—*Mirror*.

This book is of an entirely different character from works of a similar title that have hitherto appeared. It contains an account of fourteen trials for murder in Germany, and the object of it is to show the peculiar mode of trial instituted by the Bavarian code.—*Evening Gazette*.

The records of crime are not usually a profitable kind of reading. The contagion of the example is generally greater than the warning of the fate of the criminal; and many a villain has been made by the very means taken to keep him from crime. But as much depends on the manner of the narrative, and as it is possible to extract some of the gravest lessons of virtue and wisdom from the misdeeds of others, it gives us pleasure to state that the present work is unexceptionable in this respect, while the cases possess extraordinary interest, and are replete with instruction. They afford much insight of human motives, and teach impressive lessons of the retributive justice of Providence, and the misery and evil of sin.—*Biblical Repository*

X., XI.

Journal of Researches

INTO THE NATURAL HISTORY AND GEOLOGY OF THE
COUNTRIES VISITED DURING THE VOYAGE OF H.
M. S. BEAGLE ROUND THE WORLD.

BY CHARLES DARWIN, M.A., F.R.S.

2 vols. 12mo, Muslin, extra gilt, \$1 00.

This is another most valuable contribution to the cause of popular education, issued in Harper's New Miscellany; a series that bids fair to surpass even their Family Library in the sterling excellence and popularity of the works which it renders accessible to all classes of the community. The work contains, in a condensed and popularized form, the results of the British Exploring Expedition, which Mr. Darwin accompanied at the special instance of the lords of the Admiralty. The voyage consumed several years, and was performed at a very heavy expense on the part of the British government. Yet here we have its most important results, divested of all scientific technicalities, and presented in a form at once attractive and accurate. The work is entitled to secure a very wide circulation. It contains an immense amount of information concerning the natural history of the whole world, and is superior, in point of interest and value, to any similar work ever published.—*New York True Sun*.

A work very neatly issued, and has the interest of a leading subject well developed, the unerring secret of producing a book of character. In the present state of the world, when new countries are opening every day to the great conqueror, Commerce, such publications are of unusual importance. Perhaps no information, just now, can be of more consequence to us than that which puts us in possession of the movements of English discovery.—*News*.

This is a most valuable and a most interesting work; one which combines true scientific worth with the graces of style suited to render it popular, better than almost any similar work which has recently come under our notice. The voyage of the Beagle was, in truth, a scientific exploring expedition; and Mr. Darwin accompanied it at the special request of the lords of the Admiralty. Its results have been published in several very elaborate, extensive, and costly volumes in England; but as these were entirely beyond the reach of the great mass of the reading public, Mr. Darwin prepared these volumes, in which all the important results of the expedition are fully, clearly, and distinctly presented, interwoven with a most entertaining narrative of personal incident and adventure.—*N. Y. Courier*.

This is a work of remarkable interest and value. The author, in circumnavigating the world, under commission of the British government, for scientific and exploring purposes, visited nearly every country on the globe, and preserved in this brief, simple, but beautiful narrative all the singular facts of a scientific, social, or geographical nature which are of general interest. The amount of information condensed in these volumes is incredible; and the skill with which the useful and interesting is selected from that which is unimportant or well known is admirable. We admire the style, the straightforward sincerity of the writer, the apparent candor, and the erudite research which he uniformly exhibits. Without one quarter of the bulk or pretension of our famous exploring expedition, the present work is hardly inferior to it in value and interest. This series is gaining a fine character, of which we hope the publishers will be jealous.—*New York Evangelist*.
