MONTGOMERY'S FRENCH HISTORY

By D. H. MONTGOMERY,
Author of "The Leading Facts of History Series."

12mo. Cloth. 295 + xxix pages, with maps, black and colored,
and full tables. For introduction, \$1.12.

THE object of this volume is to present the most important events of the history of France, selected, arranged, and treated according to the soundest principles of historical study, and set forth in a clear and attractive narrative.

The work is based on the highest French authorities, — Guizot, Rambaud, Martin, and Duruy, — but all points demanding special consideration have been carefully compared with the views of the best English writers on France.

The attention of teachers is called especially to the following summary: —

The respective influences of the Celtic race and of the Roman and the German conquest and occupation of Gaul are clearly shown.

Charlemagne's work and the subsequent growth of feudal institutions are next considered.

The breaking up of the feudal system, with the gradual consolidation of the provinces into one kingdom, and the development of the sentiment of nationality are traced and illustrated.

The growth of the absolutism of the crown, the interesting and important relations of France to America, and the causes of the French Revolution are fully presented.

The career of Napoleon and its effects on France and Europe are carefully examined.

Finally, a sketch is given of the stages of the historical progress of France in connection with the state of the Republic to-day.

MONTGOMERY'S Leading Facts of American History

By D. H. MONTGOMERY
Author of the "Leading Facts of History Series"

Cloth. xii + 406 + 82 pages. With full maps, both black and in color, full-page illustrations, appendices, etc. List price, \$1.00; mailing price, \$1.15.

THE author of this book is Mr. D. H. Montgomery, the eminent and successful writer of historical text-books. Its general plan and style will be found similar to the other histories by this author.

The greatest merit of the book is in the judgment with which the leading events in the development of our country have been selected and the vividness with which they are placed before the reader's mind.

It has been written and not merely compiled. Hence it has an interest and charm like that of a story told by an eyewitness of the events.

Not only are the important events clearly and luminously sketched, but their causes are fully traced and the results of all important events adequately shown.

The author has treated all subjects impartially, following the course of events as an eyewitness elevated above the plane of contention.

Accuracy has been diligently and patiently studied, and investigations of original documents have been made where leading authorities have been found to disagree.

Every section ends with a brief summary. Copious notes are added, with many cross references. The book contains an unusually large number of maps, besides numerous fine engravings carefully selected as historical illustrations. Chronological and statistical tables, a list of reference books, index, questions, the Declaration of Independence, and the Constitution have been added.

Montgomery's Leading Facts of American History is full of thought and intellectual life. It has been pronounced by the educational jury the best text-book on the subject,—accurate, philosophical, unprejudiced, of rare interest, easily handled by teachers, and easily grasped by children.

THE STUDENT'S AMERICAN HISTORY

FOR HIGH SCHOOLS AND COLLEGES.

By D. H. MONTGOMERY,
Author of "The Leading Facts of History Series."

12mo. Cloth. 523 pages, with an Appendix of 55 pages of supplementary material. Illustrated. For introduction, \$1.40.

THIS work follows the same general lines as the "Leading Facts of American History." It differs, however, from that manual in several important respects:

It is substantially a new work and not simply an expansion of the smaller one.

It is much fuller in its treatment of political and constitutional history and of all the chief events in the nation's development.

In all practicable cases it quotes the exact words of original documents, authorities, and standard writers on the points of greatest interest to the student and the teacher, the object being to let the history of our country speak for itself.

It furnishes many hundreds of references to authorities—giving volume and page—so that they may be readily consulted, besides giving great numbers of cross-references from subject to subject.

When constitutional points have arisen in debate on important questions, reference is made to the articles of the Constitution, given in the Appendix.

The Appendix contains a carefully prepared list of the best books, classified according to periods, relating to American history.
