MATHEMATICS—Continued.

PECK'S ARITHMETICS.

By the Prof. of Mathematics at Columbia College, New York.

1. Peck's First Lessons in Numbers, . . . \$0 25

Embracing all that is usually included in what are called Primary and Intellectual Arithmetics; proceeding gradually from object lessons to abstract numbers; developing Addition and Subtraction simultaneously: with other attractive novelties.

2. Peck's Manual of Practical Arithmetic, . . . 50

An excellent "Brief" course, conveying a sufficient knowledge of Arithmetic for ordinary business purposes.

It is thoroughly "practical," because the author believes the Theory cannot be studied with advantage until the pupil has acquired a certain facility in combining numbers, which can only be had by practice.

3. Peck's Complete Arithmetic, 90

The whole subject—theory and practice—presented within very moderate limits. This author's most remarkable faculty of mathematical treatment is comprehended in three words: System, Conciseness, Lucidity. The directness and simplicity of this work cannot be better expressed than in the words of a correspondent who adopted the book at once, because, as he said, it is "free from that *juggling with numbers*" practiced by many authors.

From the "Galaxy," New York.

In the "Complete Arithmetic" each part of the subject is logically developed. First are given the necessary definitions; second, the explanations of such signs (if any) as are used; third, the principles on which the operation depends; fourth, an exemplification of the manner in which the operation is performed, which is so conducted that the reason of the rule which is immediately thereafter deduced is made perfectly plain; after which follow numerous graded examples and corresponding practical problems. All the parts taken together are arranged in logical order. The subject is treated as a whole, and not as if made up of segregated parts. It may seem a simple remark to make that (for example) addition is in principle one and the same everywhere, whether employed upon simple or compound numbers, fractions, etc., the only difference being in the *unit* involved; but the number of persons who understand this practically, compared to the number who have studied arithmetic, is not very great. The student of the "Complete Arithmetic" cannot fail to understand it. All the principles of the science are presented within moderate limits. Superfluous matter—to supplement defective definitions, to make clear faulty demonstrations and rules expressed either inaccurately or obscurely, to make provision for a multiplicity of cases for which no provision is requisite—has been carefully avoided. The definitions are plain and concise; the principles are stated clearly and accurately; the demonstrations are full and complete; the rules are perspicuous and comprehensive; the illustrative examples are abundant and well fitted to familiarize the student with the application of principles to the problems of science and of every-day life.

☞ The Definitions constitute the power of the book. We have never seen them excelled for clearness and exactness.—*Iowa School Journal.*

MATHEMATICS—Continued.

PECK'S HIGHER COURSE.

Peck's Manual of Algebra, - - - - - \$1 60

Bringing the methods of Bourdon within the range of the Academic Course.

Peck's Manual of Geometry, - - - - - In Press.

By a method purely practical, and unembarrassed by the details which rather confuse than simplify science.

Peck's Practical Calculus, - - - - - 1 75

Peck's Analytical Geometry, - - - - - 1 75

Peck's Elementary Mechanics, - - - - - 2 00

Peck's Mechanics, with Calculus, - - - - - 2 25

The briefest treatises on these subjects now published. Adopted by the great Universities; Yale, Harvard, Columbia, Princeton, Cornell, &c.

ARITHMETICAL EXAMPLES.

Reuck's Examples in Denominate Numbers, - - - - - 50

Reuck's Examples in Arithmetic, - - - - - 1 00

These volumes differ from the ordinary arithmetic in their peculiarly *practical* character. They are composed mainly of examples, and afford the most severe and thorough discipline for the mind. While a book which should contain a complete treatise of theory and practice would be too cumbersome for every-day use, the insufficiency of *practical* examples has been a source of complaint.

HIGHER MATHEMATICS.

Macnie's Algebraical Equations, - - - - - 2 50

Serving as a complement to the more advanced treatises on Algebra, giving special attention to the analysis and solution of equations with numerical coefficients.

Church's Elements of Calculus, - - - - - 2 50

Church's Analytical Geometry, - - - - - 2 50

Church's Descriptive Geometry, 2 vols., - - - - - 4 00

These volumes constitute the "West Point Course" in their several departments.

Courtenay's Elements of Calculus, - - - - - 3 00

A standard work of the very highest grade.

Hackley's Trigonometry, - - - - - 2 50

With applications to navigation and surveying, nautical and practical geometry and geodesy.

The National Series of Standard School-Books.

BARNES' ONE-TERM HISTORY—Continued.

From PROF. WM. F. ALLEN, *State Univ. of Wisconsin.*
I think the author of the new "Brief History of the United States" has been very successful in combining brevity with sufficient fullness and interest. *Particularly*, he has avoided the excessive number of names and dates that most histories contain. Two features that I like *very much* are the *anecdotes* at the foot of the page and the "Historical Recreations" in the Appendix. The latter, I think, is quite a new feature, and the other is *very well* executed.

From S. G. WRIGHT, *Assist.-Supt. Pub. Inst., Kansas.*
It is with extreme pleasure we submit our recommendation of the "Brief History of the United States." It meets the needs of young and older children, combining concision with perspicuity, and if "brevity is the soul of wit," this "Brief History" contains not only that well-chosen ingredient, but wisdom sufficient to enlighten those students who are wearily longing for a "new departure" from certain old and uninteresting presentations of fossilized writers. We congratulate a progressive public upon a progressive book.

From HON. NEWTON BATEMAN, *Supt. Pub. Inst., Illinois.*
Barnes' One-Term History of the United States is an exceedingly attractive and spirited little book. Its claim to several new and valuable features seems well founded. Under the form of six well-defined Epochs, the History of the United States is traced tersely, yet pithily, from the earliest times to the present day. A good map precedes each epoch, whereby the history and geography of the period may be studied together, *as they always should be.* The syllabus of each paragraph is made to stand in such bold relief, by the use of large, heavy type, as to be of much *mnemonic* value to the student. The book is written in a sprightly and piquant style, the interest never flagging from beginning to end—a rare and difficult achievement in works of this kind.

From the "*Chicago Schoolmaster*" (Editorial).
A thorough examination of Barnes' Brief History of the United States brings the examiner to the conclusion that it is a superior book in almost every respect. The book is neat in form, and of good material. The type is clear, large, and distinct. The facts and dates are correct. The arrangement of topics is just the thing needed in a history text-book. By this arrangement the pupil can see at once what he is expected to do. The topics are well selected, embracing the leading ideas or principal events of American history. . . . The book as a whole is much superior to any I have examined. So much do I think this, that I have ordered it for my class, and shall use it in my school.
(Signed) B. W. BAKER.

A Brief History of France, - - - - - \$1 50

By the author of the "Brief United States," with all the attractive features of that popular work (which see), and new ones of its own.

It is believed that the history of France has never before been presented in such brief compass, and this is effected without sacrificing one particle of interest. The book reads like a romance, and, while drawing the student by an irresistible fascination to his task, impresses the great outlines indelibly upon the memory.

Gilman's First Steps in General History, - - - - - 1 25

A "suggestive outline" of rare compactness. Each country is treated by itself, and the United States receive special attention. Frequent Maps, contemporary events in Tables, References to Standard Works for fuller details, and a minute Index constitute the "Illustrative Apparatus." From no other work that we know of can so succinct a view of the world's history be obtained. Considering the necessary limitation of space, the style is surprisingly vivid, and at times even ornate. In all respects a charming, though not the less practical, text-book.

Gilman's "Seven Historic Ages," - - - - - 1 00

This book is written in the style used by a father talking with his children on the progress of history. As one Age after another is taken up, the author brings before the young reader the prominent men and characteristic events by which it is to be remembered. The object is to stimulate the pupil in school or the child at home to study history, to think of it as a lively picture of the doings of men, and not as a dead list of uninteresting dates.

Baker's Brief History of Texas, - - - - - 1 25

On the plan of "Barnes' Brief Histories," with Constitution of the State, for schools.

The National Series of Standard School-Books.

DRAWING.

Chapman's American Drawing Book, . . . \$6 00

The standard American text-book and authority in all branches of art. A compilation of art principles. A manual for the amateur, and basis of study for the professional artist. Adapted for schools and private instruction.
CONTENTS.—"Any one who can Learn to Write can Learn to Draw."—Primary Instruction in Drawing.—Rudiments of Drawing the Human Head.—Rudiments in Drawing the Human Figure.—Rudiments of Drawing.—The Elements of Geometry.—Perspective.—Of Studying and Sketching from Nature.—Of Painting.—Etching and Engraving.—Of Modeling.—Of Composition—Advice to the American Art-Student.
The work is of course magnificently illustrated with all the original designs.

Chapman's Elementary Drawing Book, . . . 1 50

A Progressive Course of Practical Exercises, or a text-book for the training of the eye and hand. It contains the elements from the larger work, and a copy should be in the hands of every pupil; while a copy of the "American Drawing Book," named above, should be at hand for reference by the class.

The Little Artist's Portfolio, . . . \$5 00

25 Drawing Cards (progressive patterns), 25 Blanks, and a fine Artist's Pencil, all in one neat envelope.

Clark's Elements of Drawing, . . . \$1 00

A complete course in this graceful art, from the first rudiments of outline to the finished sketches of landscape and scenery.

Fowle's Linear and Perspective Drawing, . \$6 00

For the cultivation of the eye and hand, with copious illustrations and directions for the guidance of the unskilled teacher.

Monk's Drawing Books—Six Numbers, per set, \$2 25

Each book contains eleven large patterns, with opposing blanks. No. 1. Elementary Studies. No. 2. Studies of Foliage. No. 3. Landscapes. No. 4. Animals, I. No. 5. Animals, II. No. 6. Marine Views, etc.

Allen's Map-Drawing, . . . 25 cts.; Scale, 25

This method introduces a new era in Map-Drawing, for the following reasons:—
1. It is a system. This is its greatest merit.—2. It is easily understood and taught.—3. The eye is trained to exact measurement by the use of a scale.—4. By no special effort of the memory, distance and comparative size are fixed in the mind.—5. It discards useless construction of lines.—6. It can be taught by any teacher, even though there may have been no previous practice in Map-Drawing.—7. Any pupil old enough to study Geography can learn by this System, in a short time, to draw accurate maps.—8. The System is not the result of theory, but comes directly from the school-room. It has been thoroughly and successfully tested there, with all grades of pupils.—9. It is economical, as it requires no mapping plates. It gives the pupil the ability of rapidly drawing accurate maps.

Ripley's Map-Drawing, . . . 1 25

Based on the Circle. One of the most efficient aids to the acquirement of a knowledge of Geography is the practice of map-drawing. It is useful for the same reason that the best exercise in orthography is the *writing* of difficult words. Sight comes to the aid of hearing, and a double impression is produced upon the memory. Knowledge becomes less mechanical and more intuitive. The student who has sketched the outlines of a country, and dotted the important places, is little likely to forget either. The impression produced may be compared to that of a traveler who has been over the ground, while more comprehensive and accurate in detail.

NATURAL SCIENCE.

FAMILIAR SCIENCE.

Norton & Porter's First Book of Science, . \$1 75

By eminent Professors of Yale College. Contains the principles of Natural Philosophy, Astronomy, Chemistry, Physiology, and Geology. Arranged on the Catechetical plan for primary classes and beginners.

Chambers' Treasury of Knowledge, 1 25

Progressive lessons upon—*first*, common things which lie most immediately around us, and first attract the attention of the young mind; *second*, common objects from the Mineral, Animal, and Vegetable kingdoms, manufactured articles, and miscellaneous substances; *third*, a systematic view of Nature under the various sciences. May be used as a Reader or Text-book.

NATURAL PHILOSOPHY.

Norton's First Book in Natural Philosophy, 1 00

By Prof. NORTON, of Yale College. Designed for beginners. Profusely illustrated and arranged on the Catechetical plan.

Peck's Ganot's Course of Nat. Philosophy, . 1 75

The standard text-book of France, Americanized and popularized by Prof. PECK, of Columbia College. The most magnificent system of illustration ever adopted in an American school-book is here found. For intermediate classes.

Peck's Elements of Mechanics, 2 00

A suitable introduction to Bartlett's higher treatises on Mechanical Philosophy, and adequate in itself for a complete academical course.

Bartlett's SYNTHETIC, AND ANALYTIC, Mechanics, . each 5 00

Bartlett's Acoustics and Optics, 3 50

A system of Collegiate Philosophy, by Prof. BARTLETT, of West Point Military Academy.

Steele's 14 Weeks Course in Philos. (see p. 34) 1 50

Steele's Philosophical Apparatus, *125 00

Adequate to performing the experiments in the ordinary text-books. The articles will be sold separately, if desired. See special circular for details.

GEOLOGY.

Page's Elements of Geology, 1 25

A volume of Chambers' Educational Course. Practical, simple, and eminently calculated to make the study interesting.

Emmons' Manual of Geology, 1 25

The first Geologist of the country has here produced a work worthy of his reputation.

Steele's 14 Weeks Course (see p. 34) 1 50

Steele's Geological Cabinet, *40 00

Containing 125 carefully selected specimens. In four parts. Sold separately, if desired. See circular for details.

NATURAL SCIENCE—Continued.

CHEMISTRY.

Porter's First Book of Chemistry, - - - - \$1 00

Porter's Principles of Chemistry, - - - - 2 00

The above are widely known as the productions of one of the most eminent scientific men of America. The extreme simplicity in the method of presenting the science, while exhaustively treated, has excited universal commendation.

Darby's Text-Book of Chemistry, - - - - 1 75

Purely a Chemistry, divesting the subject of matters comparatively foreign to it (such as heat, light, electricity, etc.), but usually allowed to engross too much attention in ordinary school-books.

Gregory's Chemistry, (Organic and Inorganic, each) 2 50

The science exhaustively treated. For colleges and medical students.

Steele's Fourteen Weeks Course, - - - - 1 50

A successful effort to reduce the study to the limits of a single term. (See page 34.)

Steele's Chemical Apparatus, - - - - *20 00

Adequate to the performance of all the important experiments.

BOTANY.

Thinker's First Lessons in Botany, - - - - 40

For children. The technical terms are largely dispensed with in favor of an easy and familiar style adapted to the smallest learner.

Wood's Object-Lessons in Botany, - - - - 1 50

Wood's American Botanist and Florist, - - - - 2 50

Wood's New Class-Book of Botany, - - - - 3 50

The standard text-books of the United States in this department. In style they are simple, popular, and lively; in arrangement, easy and natural; in description, graphic and strictly exact. The Tables for Analysis are reduced to a perfect system. More are annually sold than of all others combined.

Wood's Plant Record, - - - - *75

A simple form of Blanks for recording observations in the field.

Wood's Botanical Apparatus, - - - - *8 00

A portable Trunk, containing Drying Press, Knife, Trowel, Microscope, and Tweezers, and a copy of Wood's Plant Record—composing a complete outfit for the collector.

Willis's Flora of New Jersey, - - - - 1 25

"*Catalogus Plantarum in Nova Caesarea repertarum.*" This remarkable flora is of great interest to all botanists, and the Jersey Pines have been termed "the Mecca to which every young botanist hopes some day to make a pilgrimage." This work is indispensable to those botanizing on the ground, and is the most useful book of reference ever published for collectors in all parts of the country. It contains also a Botanical Directory, with addresses of living American botanists.

Young's Familiar Lessons, - - - - 2 00

Combining simplicity of diction with some degree of technical and scientific knowledge for intermediate classes. Specially adapted for Texas and the Southwest.

Darby's Southern Botany, - - - - 2 00

Embracing general Structural and Physiological Botany, with vegetable products, and descriptions of Southern plants, and a complete Flora of the Southern States.

NATURAL SCIENCE—Continued.

PHYSIOLOGY.

Jarvis' Elements of Physiology, \$ 75

Jarvis' Physiology and Laws of Health, . 1 65

The only books extant which approach this subject with a proper view of the true object of teaching Physiology in schools, viz., that scholars may know how to take care of their own health. In bold contrast with the abstract Anatomies, which children learn as they would Greek or Latin (and forget as soon), to discipline the mind, are these text-books, using the science as a secondary consideration, and only so far as is necessary for the comprehension of the laws of health.

Hamilton's Vegetable & Animal Physiology, 1 25

The two branches of the science combined in one volume lead the student to a proper comprehension of the Analogies of Nature.

Steele's Fourteen Weeks Course (see p. 34), . 1 50

ASTRONOMY.

Steele's Fourteen Weeks' Course, 1 50

Reduced to a single term, and better adapted to school use than any work heretofore published. Not written for the information of scientific men, but for the inspiration of youth, the pages are not burdened with a multitude of figures which no memory could possibly retain. The whole subject is presented in a clear and concise form. (See p. 34.)

Willard's School Astronomy, 1 00

By means of clear and attractive illustrations, addressing the eye in many cases by analogies, careful definitions of all necessary technical terms, a careful avoidance of verbiage and unimportant matter, particular attention to analysis, and a general adoption of the simplest methods, Mrs. Willard has made the best and most attractive elementary Astronomy extant.

McIntyre's Astronomy and the Globes, . . 1 50

A complete treatise for intermediate classes. Highly approved.

Bartlett's Spherical Astronomy, 5 00

The West Point course, for advanced classes, with applications to the current wants of Navigation, Geography, and Chronology.

NATURAL HISTORY.

Carll's Child's Book of Natural History, . . 0 50

Illustrating the Animal, Vegetable, and Mineral Kingdoms, with application to the Arts. For beginners. Beautifully and copiously illustrated.

ZOOLOGY.

Chambers' Elements of Zoology, 1 50

A complete and comprehensive system of Zoology, adapted for academic instruction, presenting a systematic view of the Animal Kingdom as a portion of external Nature.

LITERATURE.

Gilman's First Steps in English Literature, - - \$1 00

The character and plan of this exquisite little text-book may be best understood from an analysis of its contents:

INTRODUCTION. Chapter I, Historical; II, Definition of Terms; III, Languages of Europe, with Chart.

PERIOD OF IMMATURE ENGLISH, with Chart. Chapter IV, Original English; V, Broken English; VI, Dead English; VII, Reviving English.

PERIOD OF MATURE ENGLISH, with Chart. Chapter VIII, The Italian Influence; IX, Puritan Influence; X, French Influence; XI, Age of Pope; XII, Age of Johnson; XIII, Age of Poetical Romance; XIV, Age of Prose Romance.

The volume concludes with a Chart of Bible Translations, a Bibliography or Guide to General Reading, and other aids to the student.

Cleveland's Compendiums, - - - - each *2 50

ENGLISH LITERATURE. AMERICAN LITERATURE.
ENGLISH LITERATURE OF THE XIXTH CENTURY.

In these volumes are gathered the cream of the literature of the English-speaking people for the school-room and the general reader. Their reputation is national. More than 125,000 copies have been sold.

Boyd's English Classics, - - - - each *1 25

MILTON'S PARADISE LOST. THOMSON'S SEASONS.
YOUNG'S NIGHT THOUGHTS. POLLOK'S COURSE OF TIME.
COWPER'S TASK, TABLE TALK, &c. LORD BACON'S ESSAYS.

This series of annotated editions of great English writers, in prose and poetry, is designed for critical reading and parsing in schools. Prof. J. R. Boyd proves himself an editor of high capacity, and the works themselves need no encomium. As auxiliary to the study of Belles Lettres, etc., these works have no equal.

Pope's Essay on Man, - - - - *20

Pope's Homer's Iliad, - - - - *80

The metrical translation of the great poet of antiquity, and the matchless "Essay on the Nature and State of Man," by ALEXANDER POPE, afford superior exercise in literature and parsing.

ÆSTHETICS.

Huntington's Manual of the Fine Arts, - - - *1 75

A view of the rise and progress of Art in different countries, a brief account of the most eminent masters of Art, and an analysis of the principles of Art. It is complete in itself, or may precede to advantage the critical work of Lord Kames.

Boyd's Kames' Elements of Criticism, - - - *1 75

The best edition of this standard work; without the study of which none may be considered proficient in the science of the Perceptions. No other study can be pursued with so marked an effect upon the taste and refinement of the pupil.

CLEVELAND'S COMPENDIUMS.

TESTIMONIALS.

From the New Englander.

This is the very best book of the kind we have ever examined.

From GEORGE B. EMERSON, Esq., Boston.

The Biographical Sketches are just and discriminating; the selections are admirable, and I have adopted the work as a text-book for my first class.

From PROF. MOSES COIT TYLER, of the Michigan University.

I have given your book a thorough examination, and am greatly delighted with it; and shall have great pleasure in directing the attention of my classes to a work which affords so admirable a bird's-eye view of recent "English Literature."

From the Saturday Review.

It acquaints the reader with the characteristic method, tone, and quality of all the chief notabilities of the period, and will give the careful student a better idea of the recent history of English Literature than nine educated Englishmen in ten possess.

From the Methodist Quarterly Review, New York.

This work is a transcript of the best American mind; a vehicle of the noblest American spirit. No parent who would introduce his child to a knowledge of our country's literature, and at the same time indoctrinate his heart in the purest principles, need fear to put this manual in the youthful hand.

From REV. C. PEIRCE, Principal, West Newton, Mass.

I do not believe the work is to be found from which, within the same limits, so much interesting and valuable information in regard to English writers and English literature of every age, can be obtained; and it deserves to find a place in all our high schools and academies, as well as in every private library.

From the Independent.

The work of selection and compilation—requiring a perfect familiarity with the whole range of English literature, a judgment clear and impartial, a taste at once delicate and severe, and a most sensitive regard to purity of thought or feeling—has been better accomplished in this than in any kindred volume with which we are acquainted.

POLITICAL ECONOMY.

Champlin's Lessons on Political Economy, - - - \$1 25

An improvement on previous treatises, being shorter, yet containing everything essential, with a view of recent questions in finance, etc., which is not elsewhere found.

From J. L. BOTHWELL, Prin. Public School No. 14, Albany, N. Y.

I have examined Champlin's Political Economy with much pleasure, and shall be pleased to put it into the hands of my pupils. In quantity and quality I think it superior to anything that I have examined.

From PRES. N. E. CORLEIGH, East Tennessee Wesleyan University.

An examination of Champlin's Political Economy has satisfied me that it is the book I want. For brevity and compactness, division of the subject, and clear statement, and for appropriateness of treatment, I consider it a better text-book than any other in the market.

From the Evening Mail, New York.

A new interest has been imparted to the science of political economy since we have been necessitated to raise such vast sums of money for the support of the government. The time, therefore, is favorable for the introduction of works like the above. This little volume of two hundred pages is intended for beginners, for the common school and academy. It is intended as a basis upon which to rear a more elaborate superstructure. There is nothing in the principles of political economy above the comprehension of average scholars, when they are clearly set forth. This seems to have been done by President Champlin in an easy and graceful manner.

MIND AND MORALS.

Mahan's Intellectual Philosophy \$1 75

The subject exhaustively considered. The author has evinced learning, candor, and independent thinking.

Mahan's Science of Logic 2 00

A profound analysis of the laws of thought. The system possesses the merit of being intelligible and self-consistent. In addition to the author's carefully elaborated views, it embraces results attained by the ablest minds of Great Britain, Germany, and France, in this department.

Boyd's Elements of Logic 1 25

A systematic and philosophic condensation of the subject, fortified with additions from Watts, Abercrombie, Whately, &c.

Watts on the Mind 50

The Improvement of the Mind, by Isaac Watts, is designed as a guide for the attainment of useful knowledge. As a text-book it is unparalleled; and the discipline it affords cannot be too highly esteemed by the educator.

Peabody's Moral Philosophy 1 25

A short course; by the Professor of Christian Morals, Harvard University—for the Freshman Class and for High Schools.

Fletcher's Practical Ethics 1 00

A topical analysis of each of the Virtues and Graces, furnishing outlines for the pupil to illustrate from his own experience or reading.

Alden's Text-Book of Ethics 60

For young pupils. To aid in systematizing the ethical teachings of the Bible, and point out the coincidences between the instructions of the sacred volume and the sound conclusions of reason.

Willard's Morals for the Young 75

Lessons in conversational style to indicate the elements of moral philosophy. The study is made attractive by narratives and engravings.

GOVERNMENT.

Howe's Young Citizen's Catechism 75

Explaining the duties of District, Town, City, County, State, and United States Officers, with rules for parliamentary and commercial business.

Young's Lessons in Civil Government 1 25

A comprehensive view of Government, and abstract of the laws showing the rights, duties, and responsibilities of citizens.

Mansfield's Political Manual 1 25

This is a complete view of the theory and practice of the General and State Governments, designed as a text-book. The author is an esteemed and able professor of constitutional law, widely known for his sagacious utterances in the public press.

Martin's Civil Government 1 25

Emanating from Massachusetts State Normal School. Historical and statistical. Each chapter summarized by a succinct statement of underlying principles on which good government is based.

GERMAN.

A COMPLETE COURSE IN THE GERMAN.

By JAMES H. WORMAN, A. M.

Worman's Elementary German Grammar . \$1 50

Worman's Complete German Grammar . 2 00

These volumes are designed for intermediate and advanced classes respectively. Though following the same general method with "Otto" (that of 'Gaspey'), our author differs essentially in its application. He is more practical, more systematic, more accurate, and besides introduces a number of invaluable features which have never before been combined in a German grammar.

Among other things, it may be claimed for Prof. Worman that he has been the first to introduce in an American text-book for learning German, a system of analogy and comparison with other languages. Our best teachers are also enthusiastic about his methods of indicating the art of speaking, of understanding the spoken language, of correct pronunciation; the sensible and convenient original classification of nouns (in four declensions), and of irregular verbs, also deserves much praise. We also note the use of heavy type to indicate etymological changes in the paradigms and, in the exercises, the parts which specially illustrate preceding rules.

Worman's Elementary German Reader . . . 1 25

Worman's Collegiate German Reader . . . 2 00

The finest and most judicious compilation of classical and standard German Literature. These works embrace, progressively arranged, selections from the masterpieces of Goethe, Schiller, Korner, Senne, Uhland, Freiligrath, Heine, Schlegel, Holty, Lenan, Wieland, Herder, Lessing, Kant, Fichte, Schelling, Winkelmann, Humboldt, Ranke, Raumer, Menzel, Gervinus, &c., and contains complete Goethe's "Iphigenie," Schiller's "Jungfrau," also, for instruction in modern conversational German, Benedix's "Eigensinn."

There are besides, Biographical Sketches of each author contributing, Notes, explanatory and philological (after the text), Grammatical References to all leading grammars, as well as the editor's own, and an adequate Vocabulary.

Worman's German Echo 1 25

Consists of exercises in colloquial style entirely in the German, with an adequate vocabulary, not only of words but of idioms. The object of the system developed in this work (and its companion volume in the French) is to break up the laborious and tedious habit of translating the thoughts, which is the student's most effectual bar to fluent conversation, and to lead him to think in the language in which he speaks. As the exercises illustrate scenes in actual life, a considerable knowledge of the manners and customs of the German people is also acquired from the use of this manual.

Worman's German Copy-Books, 3 Numbers, each 15

On the same plan as the most approved systems for English penmanship, with progressive copies.

THE CLASSICS.

L A T I N.

Silber's Latin Course, \$1 25

The book contains an Epitome of Latin Grammar, followed by Reading Exercises, with explanatory Notes and copious References to the leading Latin Grammars, and also to the Epitome which precedes the work. Then follow a Latin-English Vocabulary and Exercises in Latin Prose Composition, being thus complete in itself, and a very suitable work to put in the hands of one about to study the language.

Searing's Virgil's Æneid, 2 25

It contains only the first six books of the Æneid. 2. A very carefully constructed Dictionary. 3. Sufficiently copious Notes. 4. Grammatical references to four leading Grammars. 5. Numerous Illustrations of the highest order. 6. A superb Map of the Mediterranean and adjacent countries. 7. Dr. S. H. Taylor's "Questions on the Æneid." 8. A Metrical Index, and an Essay on the Poetical Style. 9. A photographic fac simile of an early Latin M.S. 10. The text according to Jahn, but paraphrased according to Ladewig. 11. Superior mechanical execution.

Blair's Latin Pronunciation, 1 00

An inquiry into the proper sounds of the Language during the Classical Period. By Prof. Blair, of Hampden Sidney College, Va.

Andrews & Stoddard's Latin Grammar, *1 50

Andrews' Questions on the Grammar, . *0 15

Andrews' Latin Exercises, *1 25

Andrews' Viri Romæ, *1 25

Andrews' Sallust's Jugurthine War, &c. *1 50

Andrews' Eclogues & Georgics of Virgil, *1 50

Andrews' Cæsar's Commentaries, *1 50

G R E E K.

Crosby's Greek Grammar, 2 00

Crosby's Xenophon's Anabasis, 1 25

M Y T H O L O G Y.

Dwight's Grecian and Roman Mythology.

School edition, \$1 25; University edition, *3 00

A knowledge of the fables of antiquity, thus presented in a systematic form, is as indispensable to the student of general literature as to him who would peruse intelligently the classical authors. The mythological allusions so frequent in literature are readily understood with such a Key as this.

MUSIC.

The National School Singer, - - - - \$0 75

Bright, new music for the day school, embracing Song Lessons, Exercise Songs, Songs of Study, Order, Promptness and Obedience, of Industry and Nature, Patriotic and Temperance Songs, Opening and Closing Songs; in fact, everything needed in the school-room. By an eminent Musician and Composer.

Jepson's Music Readers. 3 vols. - - - Each 75

These are not books from which children simply learn songs, parrot-like, but teach the subject progressively—the scholar learning to read music by methods similar to those employed in teaching him to read printed language. Any teacher, however ignorant of music, provided he can, upon trial, simply sound the scale, may teach it without assistance, and will end by being a good singer himself. The "Elementary Music Reader," or first volume, fully develops the system. The two companion volumes carry the same method into the higher grades, but their use is not essential.

The First Reader is also published in three parts, at 30 cents each, for those who prefer them in that form.

Bartley's School Hymn and Tune Book. - - - 90

A selection of appropriate Hymns, of an unsectarian character, carefully classified and set to popular and "singable" Tunes, for opening and closing exercises. The National, Anniversary, and Parting Hymns form a valuable feature.

Nash & Bristow's Cantara, - No. 1, \$1 15; No. 2, 1 40

The first volume is a complete musical text-book for schools of every grade. No. 2 is a choice selection of Solos and Part Songs. The authors are Directors of Music in the public schools of New York City, in which these books are the standard of instruction.

Curtis' Little Singer, 60 cents; School Vocalist, - 1 00

Kingsley's School-Room Choir, - - - - 60

Kingsley's Young Ladies' Harp, - - - - 1 00

Hager's Echo, - - - - 75

Perkins' Sabbath Carols (for Sunday-Schools), - - - 35

Phillips' Singing Annual do. do. - - - 25

DEVOTION.

Brooks' School Manual of Devotion, - - - - \$0 75

This volume contains daily devotional exercises, consisting of a hymn, selections of Scripture for alternate reading by teacher and pupils, and a prayer. Its value for opening and closing school is apparent.

Brooks' School Harmonist, - - - - *75

Contains appropriate tunes for each hymn in the "Manual of Devotion" described above.

THE TEACHERS' LIBRARY.

Object Lessons—Welch *\$1 00

This is a complete exposition of the popular modern system of "object-teaching," for teachers of primary classes.

Theory and Practice of Teaching—Page . . . *1 50

This volume has, without doubt, been read by two hundred thousand teachers, and its popularity remains undiminished—large editions being exhausted yearly. It was the pioneer, as it is now the patriarch of professional works for teachers.

The Graded School—Wells *1 25

The proper way to organize graded schools is here illustrated. The author has availed himself of the best elements of the several systems prevalent in Boston, New York, Philadelphia, Cincinnati, St. Louis, and other cities.

The Normal—Holbrook *1 50

Carries a working school on its visit to teachers, showing the most approved methods of teaching all the common branches, including the technicalities, explanations, demonstrations, and definitions introductory and peculiar to each branch.

The Teachers' Institute—Fowle *1 25

This is a volume of suggestions inspired by the author's experience at institutes, in the instruction of young teachers. A thousand points of interest to this class are most satisfactorily dealt with.

Schools and Schoolmasters—Dickens . . . *1 55

Appropriate selections from the writings of the great novelist.

The Metric System—Davies *1 50

Considered with reference to its general introduction, and embracing the views of John Quincy Adams and Sir John Herschel.

The Student—The Educator—Phelps . each, *1 50

The Discipline of Life—Phelps *1 75

The authoress of these works is one of the most distinguished writers on education; and they cannot fail to prove a valuable addition to the School and Teachers' Libraries, being in a high degree both interesting and instructive.

A Scientific Basis of Education—Hecker . . *2 50

An aptation of study and classification by temperaments.
