DR. PHIL WALTER LUKAS

## B I O G R A F I A

El Dr. Phil Walter Lukas, nacido en Engerau, Austria, estudió química y minerología en la Universidad de Innsbruck recibiendo su doctorado en 1967. Actualmente trabaja en la Facultad de Ingeniería Civil y Arquitectura de la Universidad de Innsbruck. Es miembro del Instituto para el Ensayo de Materiales para la Construcción. Su ramo de investigación es el de materias primas y cemento, teniendo en proceso varios proyectos de investigación como son el de reciclado de ceniza y el de escoria de alto horno para productos puzolánicos.
