

You will see the author's name on the top line of the author card, with the last name first. The information below may include the title of the book, location and name of the publisher, publication date, number of pages, whether or not there are illustrations and a brief summary of the contents. An author card is filed alphabetically by the author's last name.

On the title card, the title of the book is given on the top line and is followed by the same information that appears on the author card. This card is filed alphabetically by the first word in the title unless that word is A, An, or The, in which case the card is filed by the second word in the title.

The number in the upper left - hand corner of the card is the call number assigned to the subject in one commonly used systems of classifying books. This call number appears on each card filed in the card catalog for the book as well as on the spine, or narrow back edge of the book itself.

The books are arranged numerically from left to right by call numbers. The numbers at the end of each row indicate the call number of all the books on the shelves in that row.

Some times the book you are looking for is missing from the shelf on which it belongs, because it has been taken out by someone else. In that case, you can put your name on a waiting list for the book by filling out a reserve card and leaving it with the librarian. When the book is returned to the library and your turn comes to read it, you will be notified.
