

cure at Gleichenberg, at Roznau, Meran, and in northern Italy, a corresponding dietetic treatment, and such medicine as the symptoms require. If in addition we get gastric troubles in chronic pyelo-nephritis, such as loss of appetite, imperfect digestion, eructations, nausea, and vomiting, they are apt to be the symptoms of chronic uræmia; and even if we can not hope for any permanent relief from any kind of treatment, it may be as well to state that the mineral acids taken internally can banish these troublesome symptoms for a time at least. We usually prescribe dilute hydrochloric acid in doses of ten to twenty drops, taken three times a day, after each meal; or phosphoric acid, five grammes during the day in a sirup, and pure carbonated water in a siphon to drink.

THE END.

## MEDICAL WORKS.

### PYURIA; OR, PUS IN THE URINE, AND ITS TREATMENT: Comprising the Diagnosis and Treatment of Acute and Chronic Urethritis, Prostatitis, Cystitis, and Pyelitis, with Especial Reference to their Local Treatment.

By Dr. ROBERT ULTMANN,  
Professor of Genito-Urinary Diseases in the Vienna Poliklinik.

Translated, by permission,  
By Dr. WALTER B. PLATT, F. R. C. S. (Eng.).

12mo.

### ANALYSIS OF THE URINE. With Special Reference to the Diseases of the Genito-Urinary Organs.

By M. B. HOFFMAN,  
Professor in the University of Gratz; and

R. ULTMANN,  
Docent in the University of Vienna.

Translated from the German edition under the special supervision of  
Dr. Ultmann,

By T. BARTON BRUNE, A. M., M. D.,  
Resident Physician Maryland University Hospital; and

H. HOLBROOK CURTIS, Ph. B.

With Eight Lithographic Colored Plates from Ultmann and Hoffman's Atlas, and from Photographs furnished by Dr. Ultmann, which do not appear in the German edition or any other translation.

8vo. Cloth, \$2.00.

"It well deserves the reputation it has already obtained abroad. It is eminently practical, and adapted, as the authors claim, to the wants of the physician and student rather than of the medical chemist, although the latter can ill afford to dispense with it."—*Philadelphia Medical Times*.

### MANUAL OF CHEMICAL EXAMINATION OF THE URINE IN DISEASE. With Brief Directions for the Examination of the most Common Varieties of Urinary Calculi, and an Appendix containing a Diet-Table for Diabetics.

By AUSTIN FLINT, JR., M. D.

Sixth edition, revised and corrected. 12mo. Cloth, \$1.00.

The chief aim of this little work is to enable the busy practitioner to make for himself, rapidly and easily, all ordinary examinations of Urine; to give him the benefit of the author's experience in eliminating little difficulties in the manipulations, and in reducing processes of analysis to the utmost simplicity that is consistent with accuracy.

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## THE NEW YORK MEDICAL JOURNAL.

A Weekly Review of Medicine. The features of this journal are:

**LECTURES.**—The frequent publication of material of this sort is a prominent feature, and pains are taken to choose such as will prove valuable to the reader.

**ORIGINAL COMMUNICATIONS.**—In accepting articles of that class, regard is had more particularly to the wants of the general practitioner, and all the special branches of medicine are duly represented.

**BOOK NOTICES.**—Current publications are noticed in a spirit of fairness, and with the sole view of giving information to the reader.

**CLINICAL REPORTS** are also a regular feature of the Journal, embracing clinical records from the various hospitals and clinics, not only of New York, but of various other cities, together with clinical contributions from private practice.

**EDITORIAL ARTICLES** are numerous and carefully written.

**MINOR PARAGRAPHS.**—Under this heading are given short comments and notes on passing events.

**NEWS ITEMS** contain the latest news of interest to the profession.

**OBITUARY NOTES** announce the deaths which occur in the ranks of the profession, with a brief history of each individual when practicable.

**SOCIETY PROCEEDINGS** are given promptly, and those of a great number of societies figure. At the same time, we select for publication only such as we think profitable to our readers.

**REPORTS ON THE PROGRESS OF MEDICINE** constitute a feature of the Journal which we have reason to think is highly valued by our readers.

**MISCELLANY** includes matter of general interest, and space is also given for

**NEW INVENTIONS and LETTERS TO THE EDITOR.**

The Journal has gained rapidly in public favor, and every effort is made to maintain the high standard of excellence which has always characterized it. As an advertising medium it stands second to no journal, as is evinced by the quality and increasing quantity of its advertisements.

Price, \$5.00 per annum; single copy, 12 cents.

"New York Medical Journal" and "Popular Science Monthly" to one address, \$9.00 (full price, \$10.00).

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## THE POPULAR SCIENCE MONTHLY.

CONDUCTED BY E. L. AND W. J. YOUMANS.

THE POPULAR SCIENCE MONTHLY will continue, as heretofore, to supply its readers with the results of the latest investigation and the most valuable thought in the various departments of scientific inquiry.

Leaving the dry and technical details of science, which are of chief concern to specialists, to the journals devoted to them, the MONTHLY deals with those more general and practical subjects which are of the greatest interest and importance to the public at large. In this work it has achieved a foremost position, and is now the acknowledged organ of progressive scientific ideas in this country.

The wide range of its discussions includes, among other topics:

The bearing of science upon education;

Questions relating to the prevention of disease and the improvement of sanitary conditions;

Subjects of domestic and social economy, including the introduction of better ways of living, and improved applications in the arts of every kind;

The phenomena and laws of the larger social organizations, with the new standard of ethics, based on scientific principles;

The subjects of personal and household hygiene, medicine, and architecture, as exemplified in the adaptation of public buildings and private houses to the wants of those who use them;

Agriculture and the improvement of food-products;

The study of man, with what appears from time to time in the departments of anthropology and archæology that may throw light upon the development of the race from its primitive conditions.

Whatever of real advance is made in chemistry, geography, astronomy, physiology, psychology, botany, zoölogy, paleontology, geology, or such other department as may have been the field of research, is recorded monthly.

Special attention is also called to the biographies, with portraits, of representative scientific men, in which are recorded their most marked achievements in science, and the general bearing of their work indicated and its value estimated.

The volumes begin with the May and November numbers, but subscriptions may begin at any time.

Terms: \$5.00 per annum; single copy, 50 cents.

New York: D. APPLETON & CO., Publishers, 1, 3, & 5 Bond Street.

## TEXT-BOOK OF HUMAN PHYSIOLOGY,

for the Use of Students and Practitioners of Medicine.

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology and Physiological Anatomy in the Bellevue Hospital Medical College, New York; Fellow of the New York Academy of Medicine, etc.

Third edition, revised and corrected. In one large 8vo volume of 978 pp., elegantly printed on fine paper, and profusely illustrated with three Lithographic Plates and 315 Engravings on Wood. Cloth, \$6.00; sheep, \$7.00.

"The author of this work takes rank among the very foremost physiologists of the day, and the care which he has bestowed in bringing this third edition of his text-book up to the present position of his science is exhibited in every chapter."—*Medical and Surgical Reporter (Philadelphia)*.

"In the amount of matter that it contains, in the aptness and beauty of its illustrations, in the variety of experiments described, in the completeness with which it discusses the whole field of human physiology, this work surpasses any text-book in the English language."—*Detroit Lancet*.

"We have not the slightest intention of criticising the work before us. The medical profession and colleges have taken that prerogative out of the hands of the journalists by adopting it as one of their

standard text-books. The work has very few equals and no superior in our language, and everybody knows it."—*Hahnemannian Monthly*.

"The student and the practitioner, whose sound practice must be based on an intelligent appreciation of the principles of physiology, will herein find all subjects in which they are interested fully discussed and thoroughly elaborated."—*College and Clinical Record*.

"We need only say that in this third edition the work has been carefully and thoroughly revised. It is one of our standard text-books, and no physician's library should be without it. We treasure it highly, shall give it a choice, snug, and prominent position on our shelf, and deem ourselves fortunate to possess this elegant, comprehensive, and authoritative work."—*American Specialist*.

## THE SOURCE OF MUSCULAR POWER.

Arguments and Conclusions drawn from Observations upon the Human Subject under Conditions of Rest and of Muscular Exercise.

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology in the Bellevue Hospital Medical College, New York, etc., etc.

8vo, 103 pp. Cloth, \$1.00.

## ON THE PHYSIOLOGICAL EFFECTS OF SEVERE AND PROTRACTED MUSCULAR EXERCISE. With

Special Reference to its Influence upon the Excretion of Nitrogen.

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology in the Bellevue Hospital Medical College, New York, etc., etc.

8vo, 91 pp. Cloth, \$1.00.

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## LECTURES UPON DISEASES OF THE

RECTUM AND THE SURGERY OF THE LOWER BOWEL.

Delivered at the Bellevue Hospital Medical College

By W. H. VAN BUREN, M. D.,

Late Professor of the Principles and Practice of Surgery in the Bellevue Hospital Medical College, etc., etc.

Second edition, revised and enlarged. 8vo, 412 pp., with 27 Illustrations and complete Index. Cloth, \$3.00; sheep, \$4.00.

"The reviewer too often finds it a difficult task to discover points to praise, in order that his criticisms may not seem one-sided and unjust. These lectures, however, place him upon the other horn of the dilemma, viz., to find somewhat to criticise severely enough to clear himself of the charge of indiscriminating laudation. Of course, the author upholds some views which conflict with other authorities, but he substantiates them by the most powerful of arguments, viz., a large experience, the results of which are enunciated by one who elsewhere shows that he can appreciate, and accord the due value to, the work and experience of others."—*Archives of Medicine*.

"The present is a new volume rather than a new edition. Both its size and material are vastly beyond its predecessor. The same scholarly method, the same calm, convincing statement, the same ease, carefully matured counsel, pervade every paragraph. The discomfort and dangers of the diseases of the rectum call for greater consideration than they usually receive at the hands of the profession."—*Detroit Lancet*.

"These lectures are twelve in number, and may be taken as an excellent epitome of our present knowledge of the diseases of the parts in question. The work is full of practical matter, but it owes not a little of its value to the original thought, labor, and suggestions as to the treatment of disease, which always characterize the productions of the pen of Dr. Van Buren."—*Philadelphia Medical Times*.

"Taken as a whole, the book is one of the most complete and reliable ones extant. It is certainly the best of any similar work from an American author. It is handsomely bound and illustrated, and should be in the hands of every practitioner and student of medicine."—*Louisville Medical Herald*.

"The most attractive feature of the work is the plain, common-sense manner in which each subject is treated. The author has laid down instructions for the treatment, medicinal and operative, of rectal diseases in so clear and lucid style as that any practitioner is enabled to follow it. The large and successful experience of the distinguished author in this class of diseases is sufficient of itself to warrant the high character of the book."—*Nashville Journal of Medicine and Surgery*.

"... We have thus briefly tried to give the reader an idea of the scope of this work: and the work is a good one—as good as either Allingham's or Curling's, with which it will inevitably be compared. Indeed, we should have been greatly surprised if any work from the pen of Dr. Van Buren had not been a good one; and we have to thank him that for the first time we have an American text-book on this subject which equals those that have so long been standards."—*New York Medical Journal*.

"Mere praise of a book like this would be superfluous—almost impertinent. The author is well known to the profession as one of our most accomplished surgeons and ablest scientific men. Much is expected of him in a book like the one before us, and those who read it will not be disappointed. It will, indeed, be widely read; and, in a short time, take its place as the standard American authority."—*St. Louis Courier of Medicine*.

"The work is enriched with twenty-seven illustrations and a complete index. It is perhaps no exaggeration to say that no single work on the same subject has yet appeared in this or any foreign country, which is superior to it. Dr. Van Buren's great reputation alone is a guarantee of its excellence; and it is evident that he has spared no pains in revising and enlarging the present edition."

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## THE SCIENCE AND ART OF MIDWIFERY.

By WILLIAM THOMPSON LUSK, M. A., M. D.,

Professor of Obstetrics and Diseases of Women and Children in the Bellevue Hospital Medical College; Obstetric Surgeon to the Maternity and Emergency Hospitals; and Gynecologist to the Bellevue Hospital.

Complete in one volume 8vo, with 226 Illustrations. Cloth, \$5.00; sheep, \$6.00.

"It contains one of the best expositions of the obstetric science and practice of the day with which we are acquainted. Throughout the work the author shows an intimate acquaintance with the literature of obstetrics, and gives evidence of large practical experience, great discrimination, and sound judgment. We heartily recommend the book as a full and clear exposition of obstetric science and safe guide to student and practitioner."—*London Lancet*.

"Professor Lusk's book presents the art of midwifery with all that modern science or earlier learning has contributed to it."—*Medical Record, New York*.

"This book bears evidence on every page of being the result of patient and laborious research and great personal experience, united and harmonized by the true critical or scientific spirit, and we are convinced that the book will raise the general standard of obstetric knowledge both in his own country and in this. Whether for the student obliged to learn the theoretical part of midwifery, or for the busy practitioner seeking aid in the face of practical difficulties, it is, in our opinion, the best modern work on midwifery in the English language."—*Dublin Journal of Medical Science*.

"Dr. Lusk's style is clear, generally concise, and he has succeeded in putting in less than seven hundred pages the best exposition in the English language of obstetric science and art. The book will prove invaluable alike to the student and the practitioner."—*American Practitioner*.

"Dr. Lusk's work is so comprehensive in design and so elaborate in execution that it must be recognized as having a status peculiarly its own among the textbooks of midwifery in the English language."—*New York Medical Journal*.

"The work is, perhaps, better adapted to the wants of the student as a text-book, and to the practitioner as a work of reference, than any other one publication on

the subject. It contains about all that is known of the *ars obstetrica*, and must add greatly to both the fame and fortune of the distinguished author."—*Medical Herald, Louisville*.

"Dr. Lusk's book is eminently viable. It can not fail to live and obtain the honor of a second, a third, and nobody can foretell how many editions. It is the mature product of great industry and acute observation. It is by far the most learned and most complete exposition of the science and art of obstetrics written in the English language. It is a book so rich in scientific and practical information, that nobody practicing obstetrics ought to deprive himself of the advantage he is sure to gain from a frequent recourse to its pages."—*American Journal of Obstetrics*.

"It is a pleasure to read such a book as that which Dr. Lusk has prepared; everything pertaining to the important subject of obstetrics is discussed in a masterly and captivating manner. We recommend the book as an excellent one, and feel confident that those who read it will be amply repaid."—*Obstetric Gazette, Cincinnati*.

"To consider the work in detail would merely involve us in a reiteration of the high opinion we have already expressed of it. What Spiegelberg has done for Germany, Lusk, imitating him but not copying him, has done for English readers, and we feel sure that in this country, as in America, the work will meet with a very extensive approval."—*Edinburgh Medical Journal*.

"The whole range of modern obstetrics is gone over in a most systematic manner, without indulging in the discussion of useless theories or controversies. The style is clear, concise, compact, and pleasing. The illustrations are abundant, excellently executed, remarkably accurate in outline and detail, and, to most of our American readers, entirely fresh."—*Cincinnati Lancet and Clinic*.

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## EMERGENCIES, AND HOW TO TREAT

THEM. The Etiology, Pathology, and Treatment of Accidents, Diseases, and Cases of Poisoning, which demand Prompt Action. Designed for Students and Practitioners of Medicine.

By JOSEPH W. HOWE, M. D.,

Clinical Professor of Surgery in the Medical Department of the University of New York, etc., etc.

Third edition. 8vo, 265 pp. Cloth, \$2.50.

"To the general practitioner in towns, villages, and in the country, where the aid and moral support of a consultation can not be availed of, this volume will be recognized as a valuable help. We commend it to the profession."—*Cincinnati Lancet and Observer*.

## THE BREATH, AND THE DISEASES

WHICH GIVE IT A FETID ODOR. With Directions for Treatment.

By JOSEPH W. HOWE, M. D.,

Clinical Professor of Surgery in the Medical Department of the University of New York, etc.

Second edition, revised and corrected. 12mo, 108 pp. Cloth, \$1.00.

"This little volume well deserves the attention of physicians, to whom we commend it most highly."—*Chicago Medical Journal*.

"To any one suffering from the affection, either in his own person or in that of

his intimate acquaintances, we can commend this volume as containing all that is known concerning the subject, set forth in a pleasant style."—*Philadelphia Medical Times*.

## A PRACTICAL TREATISE ON TUMORS

OF THE MAMMARY GLAND: embracing their Histology, Pathology, Diagnosis, and Treatment.

By SAMUEL W. GROSS, A. M., M. D.,

Surgeon to, and Lecturer on Clinical Surgery in, the Jefferson Medical College Hospital and the Philadelphia Hospital, etc.

In one handsome 8vo vol. of 246 pp., with 29 Illustrations. Cloth, \$2.50.

"The work opportunely supplies a real want, and is the result of accurate work, and we heartily recommend it to our readers as well worthy of careful study."—*London Lancet*.

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## TREATISE ON MATERIA MEDICA AND

THERAPEUTICS. Revised and enlarged. Edition of 1883, with Complete Index and Table of Contents.

By ROBERTS BARTHOLOW, M. A., M. D., LL. D.,

Professor of Materia Medica and Therapeutics in the Jefferson Medical College; formerly Professor of the Theory and Practice of Medicine, and of Clinical Medicine, and Professor of Materia Medica and Therapeutics in the Medical College of Ohio, etc.

8vo. Cloth, \$5.00; sheep or half russia, \$6.00.

The work of Dr. Bartholow has commanded to an unusual degree the favor of the medical profession. Three editions were printed from the plates in the first year. In the new and revised edition a great many additions to the text have been made at various points, and a number of new articles have been inserted. Although the work is comprised within six hundred pages, it will be found that it embraces everything of importance. Obsolete theories and chemical and botanical details, properly in the domain of pharmacy, have no place in this practical treatise. No details of any value to the physician are omitted.

One of the most important innovations on existing methods in the department of materia medica made in Dr. Bartholow's treatise is his chapter on Alimentation. The introduction of this subject, and its skillful handling, have been especially commended by the critics and by medical readers generally. That no subject has failed to receive adequate attention, is evident enough on perusal of the Table of Contents, which will be sent to any address upon application to the publishers.

"He is well known as a zealous student of medical science, an acute observer, a good writer, a skilled practitioner, and an ingenious, bold, though sometimes reckless investigator. His present book will receive the cordial welcome which it deserves, and which the honorable position that he has won entitles him to demand for it. . . . Dr. Bartholow's treatise has the merit—and a great merit it is—of including diet as well as drugs. . . . His work does not ignore or depreciate the value of the empirical facts of a well-grounded and rational professional experience, but, as far as possible, it bases the therapeutical action of remedies upon their physiological behavior."—*American Journal of the Medical Sciences.*

"After looking through the work, most readers will agree with the author, whose long training shows itself on every page.

Dr. Bartholow, like another experienced teacher—Professor von Schroff, of Vienna—picks out the most important physiological and therapeutical actions of each drug, and gives them in a short and somewhat dogmatic manner. Having formed his own conclusions, he gives them to the public, without entering so fully as Wood into the experiments on which they are founded."—*Practitioner (London).*

"We may admit, however, that Dr. Bartholow has, to a great extent, successfully coped with the difficulties of his classification, and his book has also other merits to commend it. It is largely original. By this we mean that it gives the results of the author's own study and observation, instead of a catalogue of the contending statements of his predecessors."—*The Doctor (London).*

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## A TREATISE ON THE PRACTICE OF MEDICINE, for the Use of Students and Practitioners.

By ROBERTS BARTHOLOW, M. A., M. D., LL. D.,

Professor of Materia Medica and General Therapeutics in the Jefferson Medical College of Philadelphia; recently Professor of the Practice of Medicine and of Clinical Medicine in the Medical College of Ohio, in Cincinnati, etc., etc.

Fifth edition, revised and enlarged. 8vo. Cloth, \$5.00; sheep or half russia, \$6.00.

The same qualities and characteristics which have rendered the author's "Treatise on Materia Medica and Therapeutics" so acceptable are equally manifest in this. It is clear, condensed, and accurate. The whole work is brought up on a level with, and incorporates, the latest acquisitions of medical science, and may be depended on to contain the most recent information up to the date of publication.

"Probably the crowning feature of the work before us, and that which will make it a favorite with practitioners of medicine, is its admirable teaching on the treatment of disease. Dr. Bartholow has no sympathy with the modern school of therapeutical nihilists, but possesses a wholesome belief in the value and efficacy of remedies. He does not fail to indicate, however, that the power of remedies is limited, that specifics are few indeed, and that routine and reckless medication are dangerous. But throughout the entire treatise in connection with each malady are laid down well-defined methods and true principles of treatment. It may be said with justice that this part of the work rests upon thoroughly scientific and practical principles of therapeutics, and is executed in a masterly manner. No work on the practice of medicine with which we are acquainted will guide the practitioner in all the details of treatment so well as the one of which we are writing."—*American Practitioner.*

"The work as a whole is peculiar in that it is stamped with the individuality of its author. The reader is made to feel that the experience upon which this work is based is real, that the statements of the writer are founded on firm convictions, and that throughout the conclusions are eminently sound. It is not an elaborate treatise, neither is it a manual, but halfway between; it may be considered a thoroughly useful, trustworthy, and practical guide for the general practitioner."—*Medical Record.*

"It may be said of so small a book on so large a subject, that it can be only a sort of compendium or *valde mecum*. But this criticism will not be just. For, while the author is master in the art of condensation, it will be found that no essential points have been omitted. Mention is made at least of every unequivocal symptom in the narration of the signs of disease, and characteristic symptoms are held well up in the foreground in every case."—*Cincinnati Lancet and Clinic.*

"Dr. Bartholow is known to be a very clear and explicit writer, and in this work, which we take to be his special life-work, we are very sure his many friends and admirers will not be disappointed. We can not say more than this without attempting to follow up the details of the plan, which, of course, would be useless in a brief book-notice. We can only add that we feel confident the verdict of the profession will place Dr. Bartholow's 'Practice' among the standard text-books of the day."—*Cincinnati Obstetric Gazette.*

"The book is marked by an absence of all discussion of the latest, fine-spun theories of points in pathology; by the clearness with which points in diagnosis are stated; by the conciseness and perspicuity of its sentences; by the abundance of the author's therapeutic resources; and by the copiousness of its illustrations."—*Ohio Medical Recorder.*

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

## THE APPLIED ANATOMY OF THE

NERVOUS SYSTEM, being a Study of this Portion of the Human Body from a Stand-point of its General Interest and Practical Utility, designed for Use as a Text-Book and as a Work of Reference.

By AMBROSE L. RANNEY, A. M., M. D.,

Adjunct Professor of Anatomy and late Lecturer on the Diseases of the Genito-Urinary Organs and on Minor Surgery in the Medical Department of the University of the City of New York, etc., etc.

8vo. Profusely illustrated. Cloth, \$4.00; sheep, \$5.00.

"This is a useful book, and one of novel design. It is especially valuable as bringing together facts and inferences which aid greatly in forming correct diagnoses in nervous diseases."—*Boston Medical and Surgical Journal*.

"This is an excellent work, timely, practical, and well executed. It is safe to say that, besides Hammond's work, no book relating to the nervous system has hitherto been published in this country equal to the present volume, and nothing superior to it is accessible to the American practitioner."—*Medical Herald*.

"There are many books, to be sure, which contain here and there hints in this field of great value to the physician, but it is Dr. Ranney's merit to have collected these scattered items of interest, and to have woven them into an harmonious whole, thereby producing a work of wide scope and of correspondingly wide usefulness to the practicing physician.

"The book, it will be perceived, is of an eminently practical character, and, as such, is addressed to those who can not afford the time for the perusal of the larger text-books, and who must read as they run."—*New York Medical Journal*.

"Professors of anatomy in schools and colleges can not afford to be without it. We recommend the book to practitioners and students as well."—*Virginia Medical Monthly*.

"It is an admitted fact that the subject treated of in this work is one sufficiently obscure to the profession generally to make any work tending to elucidation most welcome.

"We earnestly recommend this work as one unusually worthy of study."—*Buffalo Medical and Surgical Journal*.

"A useful and attractive book, suited to the time."—*Louisville Medical News*.

"Dr. Ranney has firmly grasped the essential features of the results of the latest study of the nervous system. His work will do much toward popularizing this study in the profession.

"We are sure that all our readers will be quite as much pleased as ourselves by its careful study."—*Detroit Lancet*.

"Our impressions of this work are highly favorable as regards its practical value to students, as well to educated medical men."—*Pacific Medical and Surgical Journal*.

"The work shows great care in its preparation. We predict for it a large sale among the more progressive practitioners."—*Michigan Medical News*.

"We are acquainted with no recent work which deals with the subject so thoroughly as this; hence, it should commend itself to a large class of persons, not merely specialists, but those who aspire to keep posted in all important advances in the science and art of medicine."—*Maryland Medical Journal*.

"This work was originally addressed to medical under-graduates, but it will be equally interesting and valuable to medical practitioners who still acknowledge themselves to be students. It is to be hoped that their number is not small."—*New Orleans Medical and Surgical Journal*.

"We think the author has correctly estimated the necessity for such a volume, and we congratulate him upon the manner in which he has executed his task.

"As a companion volume to the recent works on the diseases of the nervous system, it is issued in good time."—*North Carolina Medical Journal*.

"Dr. Ranney has done his work well, and given accurate information in a simple, readable style."—*Philadelphia Medical Times*.

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.
