HENRY C. LEA'S SON & CO'S
CLASSIFIED CATALOGUE
OF
MEDICAL AND SURGICAL
PUBLICATIONS.

The publishers of the works advertised in the following pages, the publishers would state that no pains are spared to secure a continuance of the confidence earned for the publications of the house by their careful selection and accuracy and finish of execution.

The large number of inquiries received from the profession for a finer class of bindings than is usually placed on medical books has induced us to put certain of our standard publications in half Russia; and, that the growing taste may be encouraged, the prices have been fixed at so small an advance over the cost of sheep as to place it within the means of all to possess a library that shall have attractions as well for the eye as for the mind of the reading practitioner.

The printed prices are those at which books can generally be supplied by booksellers throughout the United States, who can readily procure for their customers any works not kept in stock. Where access to bookstores is not convenient, books will be sent by mail postpaid on receipt of the price, and as the limit of mailable weight has been removed, no difficulty will be experienced in obtaining through the post-office any work in this catalogue. No risks, however, are assumed either on the money or on the books, and no publications but our own are supplied, so that gentlemen will in most cases find it more convenient to deal with the nearest bookseller.

Nos. 706 and 708 Sansom St., Philadelphia, October, 1883.

PROSPECTUS FOR 1884.

A NEW WEEKLY MEDICAL JOURNAL.

SUBSCRIPTION RATES.

THE MEDICAL NEWS Five Dollars.
THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES Five Dollars.

COMMUTATION RATES.

THE MEDICAL NEWS } Nine Dollars per
THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES } annum, in advance.

THE MEDICAL NEWS.

A National Weekly Periodical, of from 28 to 32 Quarto Pages, containing more Reading Matter than any other Weekly Medical Journal in America.

The hearty welcome extended to THE MEDICAL NEWS from all parts of the country is gratifying to all concerned in its publication, since it justifies their belief that the profession felt the need of and would generously support a weekly journal, national in the fullest sense of the word, devoted to the best interests of medical science, and conducted with the forethought to devise and the energy and ability necessary to execute every available plan for enhancing its usefulness. Encouraged by this approbation, those in charge of THE NEWS will make renewed efforts to strengthen in every way its hold upon the respect and esteem of the

profession. Advocating the highest standard of morals and honor, THE NEWS will be an unsparing opponent of quackery in its countless forms. As the recognized national organ of the profession, it is the chosen vehicle for the conveyance of the most important intelligence from all parts of the country.

The general plan of THE NEWS affords ample space for the presentation of articles upon all branches of medical science. The opening pages are devoted to **Original Lectures** by the ablest teachers of the day, which are invariably revised by their authors before publication, thus insuring an authenticity and exactitude otherwise unattainable. In the department of **Original Articles**, THE NEWS will endeavor, as heretofore, to surpass its contemporaries in the intrinsic value of its contributions. Under the caption of **Hospital Notes** is laid open the vast and rich store of clinical information developed in the chief hospitals of the globe. The department of **Medical Progress** consists of condensations of articles of importance appearing in the leading medical, pharmaceutical and scientific journals of the world. The **Editorial Articles** are from the pens of a large and able EDITORIAL BOARD, and discuss living subjects in all departments of medical science in a thoughtful, independent and scholarly manner. Important subjects, requiring unusually elaborate consideration, are treated in **Special Articles**. The **Proceedings of Societies** in all parts of the country afford a means of imparting valuable information, for which due space is reserved. For the collection of **News Items**, and for **Correspondence**, THE NEWS enjoys an organization similar to that of a daily newspaper, and by mail and telegraph receives notice of all professional events of interest through special correspondents, located in the following cities:—In the United States: Portland, Boston, New York, Baltimore, Pittsburgh, Washington, Charleston, New Orleans, Cincinnati, Chicago, Detroit, Kansas City and San Francisco. In Canada: Montreal. In Great Britain: London and Edinburgh. In Continental Europe: Paris, Berlin, Vienna and Florence. In Asia: Yokohama, Canton, Hong Kong and Calcutta. In South America: Rio Janeiro and Valparaiso. In Cuba: Havana. Due attention will be paid to **New Publications**, **New Instruments** and **New Pharmaceutical Preparations**, and a column will be devoted to **Notes and Queries**. Space is reserved each week for accurate reports of all changes in the **Army and Navy Medical Service**.

THE MEDICAL NEWS appears in a double-columned quarto form, printed by the latest improved Hoe speed presses, on handsome paper, from a clear, easily read type, specially cast for its use.

It will thus be seen that THE MEDICAL NEWS employs all the approved methods of modern journalism in its efforts to render itself indispensable to the profession; and, in the anticipation of an unprecedented circulation, its subscription has been placed at the exceedingly low rate of \$5 per annum, in advance. At this price it ranks as the cheapest medical periodical in this country, and when taken in connection with THE AMERICAN JOURNAL at NINE DOLLARS per annum, it is confidently asserted that a larger amount of material of the highest class is offered than can be obtained elsewhere, even at a much higher price.

THE AMERICAN JOURNAL of the MEDICAL SCIENCES,

Edited by I. MINIS HAYS, A. M., M. D.,

Is published Quarterly, on the first days of January, April, July and October, each Number containing over Three Hundred Octavo Pages, fully Illustrated.

Founded in 1820, THE AMERICAN JOURNAL closes with 1883 its sixty-fourth consecutive year of faithful and honorable service to the profession. Being the only

periodical in the English language capable of presenting elaborate articles—the form in which the most important discoveries have always been communicated to the profession—THE AMERICAN JOURNAL cannot fail to be of the utmost value to physicians who would keep themselves *au courant* with the medical thought of the day. It may justly claim that it numbers among its contributors all the most distinguished members of the profession, that its history is identified with the advances of medical knowledge, and that its circulation is co-extensive with the use of the English language.

During 1884 THE JOURNAL will continue to present those features which have long proved so attractive to its readers.

The **Original Department** will consist of elaborate and richly illustrated articles from the pens of the most eminent members of the profession in all parts of the country.

The **Review Department** will maintain its well-earned reputation for discernment and impartiality, and will contain elaborate reviews of new works and topics of the day, and numerous analytical and bibliographical notices by competent writers.

Following these comes the **Quarterly Summary of Improvements and Discoveries in the Medical Sciences**, which, being a classified and arranged condensation of important articles appearing in the chief medical journals of the world, furnishes a compact digest of medical progress abroad and at home.

The subscription price of THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES has never been raised during its long career. It is still sent free of postage for Five Dollars per annum in advance.

Taken together, the JOURNAL and NEWS combine the advantages of the elaborate preparation that can be devoted to a quarterly with the prompt conveyance of intelligence by the weekly; while, by special management, duplication of matter is rendered impossible.

It will thus be seen that for the very moderate sum of NINE DOLLARS in advance the subscriber will receive free of postage a weekly and a quarterly journal, both reflecting the latest advances of the medical sciences, and containing an equivalent of more than 4000 octavo pages, stored with the choicest material, original and selected, that can be furnished by the best medical minds of both hemispheres. It would be impossible to find elsewhere so large an amount of matter of the same value offered at so low a price.

The safest mode of remittance is by bank check or postal money order, drawn to the order of the undersigned; where these are not accessible, remittances for subscriptions may be made at the risk of the publishers by forwarding in *registered* letters. Address,

HENRY C. LEA'S SON & Co., Nos. 706 and 708 Sansom St., Philadelphia, Pa.

* * * Communications to both these periodicals are invited from gentlemen in all parts of the country. Original articles contributed exclusively to either periodical are liberally paid for upon publication. When necessary to elucidate the text, illustrations will be furnished without cost to the author.

All letters pertaining to the *Editorial Department* of THE MEDICAL NEWS and THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES should be addressed to the EDITORIAL OFFICES, 1004 Walnut Street, Philadelphia.

All letters pertaining to the *Business Department* of these journals should be addressed exclusively to HENRY C. LEA'S SON & Co., 706 and 708 Sansom Street, Philadelphia.

DUNGLISON, ROBLEY, M. D.,*Late Professor of Institutes of Medicine in the Jefferson Medical College of Philadelphia.*

MEDICAL LEXICON; A Dictionary of Medical Science: Containing a concise explanation of the various Subjects and Terms of Anatomy, Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Pharmacy, Surgery, Obstetrics, Medical Jurisprudence and Dentistry, Notices of Climate and of Mineral Waters, Formulæ for Official, Empirical and Dietetic Preparations, with the Accentuation and Etymology of the Terms, and the French and other Synonymes, so as to constitute a French as well as an English Medical Lexicon. A new edition, thoroughly revised, and very greatly modified and augmented. By RICHARD J. DUNGLISON, M. D. In one very large and handsome royal octavo volume of 1139 pages. Cloth, \$6.50; leather, raised bands, \$7.50; very handsome half Russia, raised bands, \$8.

The object of the author, from the outset, has not been to make the work a mere lexicon or dictionary of terms, but to afford under each word a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of medical science. Starting with this view, the immense demand which has existed for the work has enabled him, in repeated revisions, to augment its completeness and usefulness, until at length it has attained the position of a recognized and standard authority wherever the language is spoken. Special pains have been taken in the preparation of the present edition to maintain this enviable reputation. The additions to the vocabulary are more numerous than in any previous revision, and particular attention has been bestowed on the accentuation, which will be found marked on every word. The typographical arrangement has been greatly improved, rendering reference much more easy, and every care has been taken with the mechanical execution. The volume now contains the matter of at least four ordinary octavos.

A book of which every American ought to be proud. When the learned author of the work passed away, probably all of us feared lest the book should not maintain its place in the advancing science whose terms it defines. Fortunately, Dr. Richard J. Dunglison, having assisted his father in the revision of several editions of the work, and having been, therefore, trained in the methods and imbued with the spirit of the book, has been able to edit it as a work of the kind should be edited—to carry it on steadily, without jar or interruption, along the grooves of thought it has travelled during its lifetime. To show the magnitude of the task which Dr. Dunglison has assumed and carried through, it is only necessary to state that more than six thousand new subjects have been added in the present edition.—*Philadelphia Medical Times*, Jan. 3, 1874.

About the first book purchased by the medical student is the Medical Dictionary. The lexicon explanatory of technical terms is simply a *sine qua non*. In a science so extensive and with such collaterals as medicine, it is as much a necessity also to the practising physician. To meet the wants of students and most physicians the dictionary must be condensed while comprehensive, and practical while perspicacious. It was because Dunglison's met these indications that it became at once the dictionary of general use wherever medicine was studied in the English language. In no former revision have the alterations and additions been so great. The chief terms have been set in black letter, while the derivatives follow in small caps; an arrangement which greatly facilitates reference.—*Cincinnati Lancet and Clinic*, Jan. 10, 1874.

As a standard work of reference Dunglison's

HOBLYN, RICHARD D., M. D.

A Dictionary of the Terms Used in Medicine and the Collateral Sciences. Revised, with numerous additions, by ISAAC HAYS, M. D., late editor of *The American Journal of the Medical Sciences*. In one large royal 12mo. volume of 520 double-columned pages. Cloth, \$1.50; leather, \$2.00.

It is the best book of definitions we have, and ought always to be upon the student's table.—*Southern Medical and Surgical Journal*.

RODWELL, G. F., F. R. A. S., F. C. S.,*Lecturer on Natural Science at Clifton College, England.*

A Dictionary of Science: Comprising Astronomy, Chemistry, Dynamics, Electricity, Heat, Hydrodynamics, Hydrostatics, Light, Magnetism, Mechanics, Meteorology, Pneumatics, Sound and Statics. Contributed by J. T. Bottomley, M. A., F. C. S., William Crookes, F. R. S., F. C. S., Frederick Guthrie, B. A., Ph. D., R. A. Proctor, B. A., F. R. A. S., G. F. Rodwell, Editor, Charles Tomlinson, F. R. S., F. C. S., and Richard Wornell, M. A., B. Sc. Preceded by an Essay on the History of the Physical Sciences. In one handsome octavo volume of 702 pages, with 143 illustrations. Cloth, \$5.00.

work has been well known for about forty years, and needs no words of praise on our part to recommend it to the members of the medical, and likewise of the pharmaceutical, profession. The latter especially are in need of a work which gives ready and reliable information on thousands of subjects and terms which they are liable to encounter in pursuing their daily vocations, but with which they cannot be expected to be familiar. The work before us fully supplies this want.—*American Journal of Pharmacy*, Feb. 1874.

Particular care has been devoted to derivation and accentuation of terms. With regard to the latter, indeed, the present edition may be considered a complete "Pronouncing Dictionary of Medical Science." It is perhaps the most reliable work published for the busy practitioner, as it contains information upon every medical subject, in a form for ready access, and with a brevity as admirable as it is practical.—*Southern Medical Record*, Feb. 1874.

A valuable dictionary of the terms employed in medicine and the allied sciences, and of the relations of the subjects treated under each head. It well deserves the authority and popularity it has obtained.—*British Med. Jour.*, Oct. 31, 1874.

Few works of this class exhibit a grander monument of patient research and of scientific lore.—*London Lancet*, May 13, 1875.

Dunglison's Dictionary is incalculably valuable, and indispensable to every practitioner of medicine, pharmacist and dentist.—*Western Lancet*, March, 1874.

It has the rare merit that it certainly has no rival in the English language for accuracy and extent of references.—*London Medical Gazette*.

HARTSHORNE, HENRY, A. M., M. D.,*Lately Professor of Hygiene in the University of Pennsylvania.*

A Conspectus of the Medical Sciences; Containing Handbooks on Anatomy, Physiology, Chemistry, Materia Medica, Practice of Medicine, Surgery and Obstetrics. Second edition, thoroughly revised and greatly improved. In one large royal 12mo. volume of 1028 pages, with 477 illustrations. Cloth, \$4.25; leather, \$5.00.

The work is intended as an aid to the medical student, and as such appears to fulfil admirably its object by its excellent arrangement, the full compilation of facts, the perspicuity and terseness of language, and the clear and instructive illustrations.—*American Journal of Pharmacy*, July, 1874.

The object of this manual is to afford a convenient work of reference to students during the brief moments at their command while in attendance upon medical lectures. It is a favorable sign that it has been found necessary, in a short space of time, to issue a new and carefully revised edition. The illustrations are very numerous and unusually clear, and each part seems to have received

its due share of attention. We can conceive such a work to be useful, not only to students, but to practitioners as well. It reflects credit upon the industry and energy of its able editor.—*Boston Medical and Surgical Journal*, Sept. 3, 1874.

We can say, with the strictest truth, that it is the best work of the kind with which we are acquainted. It embodies in a condensed form all recent contributions to practical medicine, and is therefore useful to every busy practitioner throughout our country, besides being admirably adapted to the use of students of medicine. The book is faithfully and ably executed.—*Charleston Medical Journal*, April, 1875.

STUDENTS' SERIES OF MANUALS.

A Series of Fifteen Manuals, for the use of Students and Practitioners of Medicine and Surgery. They will be written by eminent Teachers or Examiners, and will be issued in pocket-size 12mo. volumes of 300-500 pages, richly illustrated and at a low price. The following volumes may now be announced: KLEIN'S *Elements of Histology* (Just ready,) PEPPER'S *Surgical Pathology*, TREVES' *Surgical Applied Anatomy*, POWER'S *Human Physiology*, RALFE'S *Clinical Chemistry*, and CLARKE and LOCKWOOD'S *Dissectors' Manual* (Ready shortly); ROBERTSON'S *Physical Physiology*, BRUCE'S *Materia Medica and Therapeutics*, BELLAMY'S *Operative Surgery*, and BELL'S *Comparative Physiology and Anatomy*, (In active preparation for early publication.) For separate notices see index on last page.

NEILL, JOHN, M. D., and SMITH, F. G., M. D.,*Late Surgeon to the Penna. Hospital.**Prof. of the Institutes of Med. in the Univ. of Penna.*

An Analytical Compendium of the Various Branches of Medical Science, for the use and examination of Students. A new edition, revised and improved. In one very large royal 12mo. volume of 974 pages, with 374 woodcuts. Cloth, \$4; strongly bound in leather, raised bands, \$4.75.

LUDLOW, J. L., M. D.,*Consulting Physician to the Philadelphia Hospital, etc.*

A Manual of Examinations upon Anatomy, Physiology, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Chemistry, Pharmacy and Therapeutics. To which is added a Medical Formulary. Third edition, thoroughly revised, and greatly extended and enlarged. In one handsome royal 12mo. volume of 816 large pages, with 370 illustrations. Cloth, \$3.25; leather, \$3.75.

The arrangement of this volume in the form of question and answer renders it especially suitable for the office examination of students, and for those preparing for graduation.

WILSON, ERASMUS, F. R. S.

A System of Human Anatomy, General and Special. Edited by W. H. GOBRECHT, M. D., Professor of General and Surgical Anatomy in the Medical College of Ohio. In one large and handsome octavo volume of 616 pages, with 397 illustrations. Cloth, \$4.00; leather, \$5.00.

SMITH, H. H., M. D., and HORNER, WM. E., M. D.,*Emeritus Prof. of Surgery in the Univ. of Penna., etc.**Late Prof. of Anat. in the Univ. of Penna.*

An Anatomical Atlas, Illustrative of the Structure of the Human Body. In one large imperial octavo volume of 200 pages, with 634 beautiful figures. Cloth, \$4.50.

CLELAND, JOHN, M. D., F. R. S.,*Professor of Anatomy and Physiology in Queen's College, Galway.*

A Directory for the Dissection of the Human Body. In one 12mo. volume of 178 pages. Cloth, \$1.25.

BELLAMY, EDWARD, F. R. C. S.,*Senior Assistant-Surgeon to the Charing-Cross Hospital, London.*

The Student's Guide to Surgical Anatomy: Being a Description of the most Important Surgical Regions of the Human Body, and intended as an Introduction to Operative Surgery. In one 12mo. volume of 300 pages, with 50 illustrations. Cloth, \$2.25.

HARTSHORNE'S HANDBOOK OF ANATOMY AND PHYSIOLOGY. Second edition, revised. In one royal 12mo. volume of 310 pages, with 220 woodcuts. Cloth, \$1.75.

SARPEY AND QUAIN'S HUMAN ANATOMY. Revised by JOSEPH LEIDY, M. D., Prof. of Anat. in Univ. of Penna. In two octavo volumes of about 1300 pages, with 511 illustrations.

HORNER'S SPECIAL ANATOMY AND HISTOLOGY. Eighth edition, extensively revised and modified. In two octavo volumes of 1007 pages, with 320 woodcuts. Cloth, \$6.00.

HEATH'S PRACTICAL ANATOMY. From second London edition, with additions by W. W. KEEN, M. D. In one 12mo. volume of 578 pages, with 247 woodcuts.

ALLEN, HARRISON, M. D.,*Professor of Physiology in the University of Pennsylvania.*

A System of Human Anatomy, Including Its Medical and Surgical Relations. For the use of Practitioners and Students of Medicine. With an Introductory Chapter on Histology. By E. O. SHAKESPEARE, M. D., Ophthalmologist to the Philadelphia Hospital. In one large and handsome quarto volume of about 600 double-columned pages, with 380 illustrations on 109 lithographic plates, many of which are in colors, and about 100 engravings in the text. In six Sections, each in a portfolio. Section I. HISTOLOGY (*Just Ready*). Section II. BONES AND JOINTS (*Just Ready*). Section III. MUSCLES AND FASCLE (*Just Ready*). Section IV. ARTERIES, VEINS AND LYMPHATICS (*Just Ready*). Section V. NERVOUS SYSTEM (*Nearly Ready*). Section VI. ORGANS OF SENSE, OF DIGESTION AND GENITO-URINARY ORGANS (*In Press*). Price per Section, \$3.50. For sale by subscription only.

EXTRACT FROM INTRODUCTION.

It is the design of this book to present the facts of human anatomy in the manner best suited to the requirements of the student and the practitioner of medicine. The author believes that such a book is needed, inasmuch as no treatise, as far as he knows, contains, in addition to the text descriptive of the subject, a systematic presentation of such anatomical facts as can be applied to practice.

A book which will be at once accurate in statement and concise in terms; which will be an acceptable expression of the present state of the science of anatomy; which will exclude nothing that can be made applicable to the medical art, and which will thus embrace all of surgical importance, while omitting nothing of value to clinical medicine,—would appear to have an excuse for existence in a country where most surgeons are general practitioners, and where there are few general practitioners who have no interest in surgery.

Among other matters, the book will be found to contain an elaborate description of the tissues; an account of the normal development of the body; a section on the nature and varieties of monstrosities; a section on the method of conducting post-mortem examinations; and a section on the study of the superficies of the body taken as a guide to the position of the deeper structures. These will appear in their appropriate places, duly subordinated to the design of presenting a text essentially anatomical.

A book like this is an ideal rarely realized. It will do, we have no doubt, what its accomplished author hopes: "make anatomy what unfortunately it rarely is—an interesting study." It has long been an opprobrium to America that our anatomical text-books were all foreign, but this work will remove the stigma. It is a mine of wealth in the information it gives. It differs from all preceding anatomies in its scope, and in, we believe, a vast improvement upon them all. The chief novelty about the book, and really one of the greatest needs in anatomy, is the extension of the text to cover not only anatomical descriptions, but the uses of anatomy in studying disease. This is done by stating the narrower topographical relations, and also the wider clinical relations, of the more remote parts, by giving a brief account of the uses of the various organs, and by quoting cases which illustrate the "localization of diseased action." The plates are beautiful specimens of work by one who long since won a deserved reputation as an artist.—*The Medical News*, October 21, 1882.

The appearance of the book marks an epoch in medical literature. It is the first important work on human anatomy that has appeared in America; and, more than this, its scope is new and original. It is intended to be both descriptive and topographical, scientific and practical, so that while satisfying the anatomist it will be of value to the practising physician. Such a work is certainly novel, and it will bring the greatest honor to the author. The illustrations of the bones are very fine. The names of the parts, muscular attachments, etc., are printed either on the figure or close beside, so that they are easily recognized. Dr. Allen's treatment of the joints is admirable, and the illustrations made from the author's dissections deserve the highest praise. They bear witness to his skill with the scalpel and to that of the artist with his pencil. They are well conceived and well executed, handsome artistically and clear anatomically. As the author points out, such a work as he has undertaken is necessarily encyclo-

pædic, and the result shows that he has brought to it a mind well prepared for the task by extensive reading, critical judgment and literary ability. We can cordially recommend the work to the profession, believing that it is suited not only to those of scientific tastes, but that it will be of use to the practising physician.—*Boston Medical and Surgical Journal*, Jan. 11, 1883.

It has fallen to the lot of the fortunate publishers to be able to bring out the best anatomy yet produced in America, and one which will prove much more useful to the general practitioner than the foreign works now accepted as standard. The descriptions are clear, tersely expressed and well up to date. The work, as a whole, shows a great amount of research, and reflects credit upon its author.—*New York Medical Journal and Obstetrical Review*, Nov. 1882.

It is to be considered a study of applied anatomy in its widest sense—a systematic presentation of such anatomical facts as can be applied to the practice of medicine as well as of surgery. Our author is concise, accurate and practical in his statements, and succeeds admirably in infusing an interest into the study of what is generally considered a dry subject. The department of Histology is treated in a masterly manner, and the ground is travelled over by one thoroughly familiar with it. The illustrations are made with great care, and are simply superb. It would be impossible, except in a general way, to point out the excellence of the work of the author in the second Section—that devoted to the consideration of the Bones and Joints. There is as much of practical application of anatomical points to the every-day wants of the medical clinician as to those of the operating surgeon. In fact, few general practitioners will read the work without a feeling of surprised gratification that so many points, concerning which they may never have thought before, are so well presented for their consideration. It is a work which is destined to be the best of its kind in any language.—*Medical Record*, Nov. 25, '82.

CLARKE, W. B., F. R. C. S. & LOCKWOOD, C. B., F. R. C. S.*Demonstrator of Anatomy at St. Bartholomew's Hospital Medical School, London.*The Dissector's Manual. *Shortly.* See *Students' Series of Manuals*, page 5.**TREVES, FREDERICK, F. R. C. S.,***Senior Demonstrator of Anatomy and Assistant Surgeon at the London Hospital.*Applied Anatomy. *Shortly.* See *Students' Series of Manuals*, page 5.**GRAY, HENRY, F. R. S.,***Lecturer on Anatomy at St. George's Hospital, London.*

Anatomy, Descriptive and Surgical. The Drawings by H. V. CARTER, M. D., and Dr. WESTMACOTT. The dissections jointly by the AUTHOR and Dr. CARTER. With an Introduction on General Anatomy and Development by T. HOLMES, M. A., Surgeon to St. George's Hospital. Edited by T. Pickering Pick, F. R. C. S., Surgeon and Lecturer on Anatomy at St. George's Hospital, London, Examiner in Anatomy, Royal College of Surgeons of England. A new American from the tenth enlarged and improved London edition. To which is added the second American from the latest English edition of LANDMARKS, MEDICAL AND SURGICAL, by LUTHER HOLDEN, F. R. C. S., author of "Human Osteology," "A Manual of Dissections," etc. In one imperial octavo volume of 1023 pages, with 564 large and elaborate engravings on wood. Cloth, \$6.00; leather, \$7.00; very handsome half Russia, raised bands, \$7.50. *Just ready.*

This work covers a more extended range of subjects than is customary in the ordinary text-books, giving not only the details necessary for the student, but also the application of those details to the practice of medicine and surgery. It thus forms both a guide for the learner and an admirable work of reference for the active practitioner. The engravings form a special feature in the work, many of them being the size of nature, nearly all original, and having the names of the various parts printed on the body of the cut, in place of figures of reference with descriptions at the foot. They thus form a complete and splendid series, which will greatly assist the student in forming a clear idea of Anatomy, and will also serve to refresh the memory of those who may find in the exigencies of practice the necessity of recalling the details of the dissecting-room. Combining, as it does, a complete Atlas of Anatomy with a thorough treatise on systematic, descriptive and applied Anatomy, the work will be found of great service to all physicians who receive students in their offices, relieving both preceptor and pupil of much labor in laying the groundwork of a thorough medical education.

Landmarks, Medical and Surgical, by the distinguished Anatomist, Mr. Luther Holden, has been appended to the present edition as it was to the previous one. This work gives in a clear, condensed and systematic way all the information by which the practitioner can determine from the external surface of the body the position of internal parts. Thus complete, the work, it is believed, will furnish all the assistance that can be rendered by type and illustration in anatomical study.

This well-known work comes to us as the latest American from the tenth English edition. As its title indicates, it has passed through many hands and has received many additions and revisions. The work is not susceptible of more improvement. Taking it all in all, its size, manner of make-up, its character and illustrations, its general accuracy of description, its practical aim, and its perspicuity of style, it is the Anatomy best adapted to the wants of the student and practitioner.—*Medical Record*, Sept. 15, 1883.

There is probably no work used so universally by physicians and medical students as this one. It is deserving of the confidence that they repose in it. If the present edition is compared with that issued two years ago, one will readily see how much it has been improved in that time. Many pages have been added to the text, especially in those parts that treat of histology, and many new cuts have been introduced and old ones modified.—*Journal of the American Medical Association*, Sept. 1, 1883.

ALSO FOR SALE SEPARATE—

HOLDEN, LUTHER, F. R. C. S.,*Surgeon to St. Bartholomew's and the Foundling Hospitals, London.*

Landmarks, Medical and Surgical. Second American from the latest revised English edition, with additions by W. W. KEEN, M. D., Professor of Artistic Anatomy in the Pennsylvania Academy of the Fine Arts, formerly Lecturer on Anatomy in the Philadelphia School of Anatomy. In one handsome 12mo. volume of 148 pages. Cloth, \$1.00.

This little book is all that can be desired within its scope, and its contents will be found simply invaluable to the young surgeon or physician, since they bring before him such data as he requires at every examination of a patient. It is written in language so clear and concise that one ought almost to learn it by heart. It teaches diagnosis by external examination, ocular and palpable, of the body, with such anatomical and physiological facts as directly bear on the subject. It is eminently

the student's and young practitioner's book.—*Physician and Surgeon*, Nov. 1881.

To the student or young surgeon this is practically a most useful little book. We heartily recommend this work to all students and young practitioners, for whom it has been written, and who by its aid will readily be able to make thorough and intelligent examination, or in surgical operations to cut down upon any part with confidence.—*Medical and Surgical Reporter*, Sep. 3, 1881.

DALTON, JOHN C., M. D.,*Professor of Physiology in the College of Physicians and Surgeons, New York.*

The Topographical Anatomy of the Brain. In one very handsome quarto volume of about 200 pages of descriptive text. Illustrated with forty-nine life-size photographic illustrations of Brain Sections, with a like number of outline explanatory plates, as well as many carefully-executed woodcuts through the text. *In press.*

ELLIS, GEORGE VINER,*Emeritus Professor of Anatomy in University College, London.*

Demonstrations of Anatomy. Being a Guide to the Knowledge of the Human Body by Dissection. From the eighth and revised London edition. In one very handsome octavo volume of 716 pages, with 249 illustrations. Cloth, \$4.25; leather, \$5.25.

Ellis' Demonstrations is the favorite text-book of the English student of anatomy. In passing through eight editions it has been so revised and adapted to the needs of the student that it would seem that it had almost reached perfection in this

special line. The descriptions are clear, and the methods of pursuing anatomical investigations are given with such detail that the book is honestly entitled to its name.—*St. Louis Clinical Record*, June, 1879.
