

## THE BALTIMORE MEDICAL SCHOOL.

PRELIMINARY FALL COURSE begins September 1.  
REGULAR WINTER COURSE begins October 1.  
*Excellent teaching facilities; capacious hospital;  
large clinics.*

Send for catalogue, and address

DAVID STREETT, M.D., Dean,  
403 N. Exeter St., Baltimore, Md.

## THE BALTIMORE UNIVERSITY SCHOOL OF MEDICINE.

Lectures will begin October 3, 1892, and terminate on or about April 1, 1893. Full course of Didactic Lectures given. Clinical advantages unsurpassed.

For future information regarding terms, etc., address

PROF. E. W. EILAN, M.D., Dean,  
No. 1523 E. Baltimore Street.

## NEW MEDICAL PUBLICATIONS

FOR THE STUDENT AND  
PRACTITIONER.

### *NERVES OF THE HUMAN BODY.*

With Diagrams. By ALFRED R. HUGHES, Bachelor of Medicine and Master in Surgery of the University of Edinburgh, etc. 4to. Cloth, thirty-two pages, \$3.00.

### *HYDATID DISEASE IN ITS CLINICAL ASPECTS.*

By JAMES GRAHAM, M.A., M.D., late Demonstrator of Anatomy, Sydney University. Two hundred and four pages. With thirty-four full-page colored plates from original drawings. 8vo. Cloth, \$4.50.

If not obtainable at your Bookseller's send direct to the Publishers, who will forward the books, post-paid, on receipt of the price.

J. B. LIPPINCOTT COMPANY,  
PUBLISHERS,  
715 and 717 Market St., Philadelphia.

## UNIVERSITY OF MARYLAND,

FACULTY OF PHYSIC,

Corner of Greene and Lombard Streets,

BALTIMORE, MD.

The eighty-sixth annual session will begin on October 1, 1892. Full didactic course with ample clinical facilities:

For Catalogue and further information, address

I. E. ATKINSON, M.D., Dean,  
605 Cathedral Street,  
BALTIMORE, MD.

## COLLEGE OF PHYSICIANS AND SURGEONS,

BALTIMORE, MARYLAND.

The Preliminary Lectures will begin September 15, 1892.

The Regular Lecture Course will begin October 1, 1892, and continue six months.

The Clinical facilities and equipment of this school are unsurpassed.

Write for a catalogue to

DR. THOMAS OPIE, Dean,  
Cor. Calvert and Saratoga Sts.

FOR SALE ONLY BY SUBSCRIPTION.

## REGIONAL ANATOMY

IN ITS RELATION TO

MEDICINE AND SURGERY.

By GEORGE McCLELLAN, M.D.,

Lecturer on Descriptive and Regional Anatomy at the Pennsylvania School of Anatomy; Professor of Anatomy at the Pennsylvania Academy of the Fine Arts; Member of the Association of American Anatomists, Academy of Natural Sciences, Academy of Surgery, College of Physicians, etc., of Philadelphia.

ILLUSTRATED.

WITH ABOUT ONE HUNDRED FULL-PAGE FAC-SIMILE CHROMO-LITHOGRAPHIC PLATES, REPRODUCED FROM PHOTOGRAPHS TAKEN BY THE AUTHOR OF HIS OWN DISSECTIONS, EXPRESSLY DESIGNED AND PREPARED FOR THIS WORK, AND COLORED BY HIM AFTER NATURE.

COMPLETE IN TWO QUARTO VOLUMES OF ABOUT FOUR HUNDRED PAGES EACH.

Price per Volume: Cloth, \$7.50; Half Russia, \$8.50.

From Gaillard's Medical Journal, New York, February, 1892.

"As the work of a single man,—dissections, photographs, and colored sketches,—it stands without a parallel in anatomical literature, and attests as nothing else can the wonderful practicability of the author and the work. The idea has been to reproduce as nearly as art can do so the exact appearances of the dissected parts, not what they might be, or should be, but what they actually were, and this is done to a degree of faithfulness and accuracy that is only explained by the conscientious enthusiasm of the author."

From the British Medical Journal, February 6, 1892.

"The illustrations are perfectly correct anatomical studies, and do not reproduce the inaccuracies which experience has taught us to look for in works of a similar kind. Some of the plates, especially those of the anatomy of the chest, are of great excellence. The book is written in a clear and simple style, and references to medical and surgical bearings of facts have not been omitted. Professor McClellan has produced a very creditable work."

SPECIMEN PLATE, WITH DESCRIPTIVE CIRCULAR, SENT ON APPLICATION.

J. B. LIPPINCOTT COMPANY,  
715 and 717 Market St., Philadelphia, Pa.

FOR SALE BY SUBSCRIPTION ONLY.

CYCLOPÆDIA  
OF THE  
DISEASES OF CHILDREN,  
MEDICAL AND SURGICAL.

BY AMERICAN, BRITISH, AND CANADIAN AUTHORS.

Edited by **JOHN M. KEATING, M.D.**

ILLUSTRATED.

Complete in Four Handsome Imperial Octavo Volumes of about 1000 Pages Each.

J. B. LIPPINCOTT COMPANY, Publishers,

715 and 717 Market Street, Philadelphia, Pa.

INTERNATIONAL  
MEDICAL MAGAZINE.

A MONTHLY,  
DEVOTED TO  
MEDICAL AND SURGICAL SCIENCE.

EDITED BY  
JUDSON DALAND, M.D.

Subscription, \$4.00 per year. Single numbers, 35 cents.

Each number of the magazine contains more than one hundred pages, and is made up of original contributions, clinical lectures, review of medicine, and book reviews. The enormous mass of contemporaneous medical literature is carefully read, and contributions possessing real worth are reviewed in a crisp and concise manner.

All important articles appearing in German, French, Italian, and Spanish medical periodicals, as well as in English, receive careful attention in the following departments: THERAPEUTICS, MEDICINE, NEUROLOGY, PEDIATRICS, SURGERY, GENITO-URINARY SURGERY, ORTHOPÆDICS, GYNÆCOLOGY AND OBSTETRICS, OPHTHALMOLOGY, LARYNGOLOGY AND RHINOLOGY, DERMATOLOGY, PATHOLOGY, HYGIENE AND BACTERIOLOGY, CLIMATOLOGY, and FORENSIC MEDICINE.

Each number will be illustrated with reproductions from photographs or original drawings, wherever their presence will serve to explain the text and help the reader to a ready and accurate apprehension of the subject-matter.

The hearty commendation accorded by physicians to the efforts of the publishers in this direction in the past, encourages them to spare neither money nor skill where illustrations will lighten the labor of the practitioner, or add to the attractive appearance of the magazine.

SAMPLE COPY SENT ON APPLICATION

## *Diseases of the Nervous System.*

By JEROME K. BAUDUY, M.D., LL.D. *Second Edition.* 8vo. Cloth. \$3.00.

"This well-written work is a complete revision of a volume of clinical lectures on diseases of the nervous system published in 1876, and long out of print. The author's style is so flowing and lucid that the reader is loath to lay the book down after he has begun its perusal. We are not surprised that former pupils should have requested a republication. A number of interesting and important lectures are devoted to the subject of insanity. The author has succeeded in compressing a wonderful amount of information into a volume of very moderate size. The successful accomplishment of this task deserves the thanks of his readers."—*Philadelphia Medical Bulletin.*

## *Manual of Hypodermatic Medication.*

The Treatment of Disease by the Hypodermatic or Subcutaneous Method. By ROBERTS BARTHOLOW, A.M., M.D., LL.D. *Fifth Edition.* Revised and Enlarged. 542 pages. 12mo. Cloth. \$3.00.

"The book has been enlarged and improved in every way, and we cannot speak too highly either of the get-up or of the material contained in it. Thoroughly up to date, we find in it directions as to the dosage and mode of use of many of the new drugs, of which the general practitioner has hardly had time to learn the names. . . . It would be presumptuous to say more about such a monument of learning and research as this; it merits nothing but praise."—*Edinburgh Medical Journal.*

## *The Diseases of the Mouth in Children.*

(Non-Surgical.) By F. FORCHHEIMER, M.D. 12mo. Cloth. \$1.25.

"The appearance of this little book, the first exclusively upon this subject in the English language, is evidence that pediatrics is receiving an increasing amount of attention at the hands of the profession. The fact that it is published by the same house which so recently issued the admirable 'Cyclopædia of the Diseases of Children,' edited by Keating, is also significant; evidently they find a good market for pediatric literature. The book is the result of careful study, is practical—as the work of a clinical teacher is apt to be—and is systematic. It will fill a niche heretofore vacant in the library. It will be consulted not only by the pediatricist, but by the family physician, who is continually meeting sore-mouthed children, and he will find better points on their diagnosis and management than are commonly in use."—*Cleveland Medical Gazette.*

## *The International Magazine Visiting List.*

Thirty and Sixty Patients each week. 1893. Arranged for the Use of Practitioners. By J. C. WILSON, M.D. Pocket-book form. Thirty patients, \$1.25. Sixty patients, \$1.50.

\*\*For sale by all Booksellers, or will be sent, free of expense, by the Publishers, on receipt of price.

J. B. LIPPINCOTT COMPANY,  
715 and 717 Market Street, Philadelphia.

## *Mother and Child.*

Part I., MOTHER. By EDWARD P. DAVIS, A.M., M.D. Part II., CHILD. By JOHN M. KEATING, M.D., LL.D. Crown 8vo. Cloth. \$2.50.

"The aim of this instructive and readable manual has been not to supplant the physician, but to supplement his advice and render intelligible those matters that mothers and nurses find difficult to understand. As the result of large experience, the views of the authors are necessarily definite and positive; but the experience of others causes them to differ in many points of detail and management, and, in order to make the book cover as large a field as possible, they have added much material from the writings of other physicians whose opinions have great weight and whose advice is of incalculable value."—*Preface.*

## *Practical Pathology.*

A Manual for Students and Practitioners. By G. SIMS WOODHEAD, M.D., F.R.C.P. Ed., etc. With 195 Colored Illustrations. *Third Edition.* Greatly Enlarged and Revised. 8vo. Cloth. \$7.00. Sheep. \$8.00.

During the last decade great advances have been made in the methods of studying pathology; students are more thoroughly grounded and trained in practical work, and the general standard of pathological knowledge is now certainly much higher than it was even ten years ago. It is therefore the more necessary that any one essaying to offer instruction in practical pathology should take the greatest care to bring his descriptions into line with the results obtained by modern methods. A sense of this responsibility and further experience in teaching, and of the needs of both student and teacher, have impelled the author to enlarge the scope of the work and to alter it very materially in several respects. The chapter on Methods has been brought well up to date; a chapter on Inflammation and Healing of Wounds has been added, and other matter, especially as regards the naked eye appearances of diseased organs, has been introduced. Special attention has been paid to arrangement, much repetition has been avoided, and the references to methods of Hardening, Preparing, and Staining have been so arranged as to interfere as little as possible with the continuity of the text. In short, the work has been almost entirely rewritten, and so recast as to make it available not only as a practical hand-book for the classroom and laboratory, but also as a book useful for home study in connection with practical work. The number of illustrations has been increased from 162 to 195, and many of the original figures have been redrawn or replaced by drawings of more typical specimens.

## *Hydatid Disease in its Clinical Aspects.*

By JAMES GRAHAM, M.A., M.D., late Demonstrator of Anatomy, Sydney University. Two hundred and four pages. With thirty-four full-page colored plates from original drawings. 8vo. Cloth. \$4.50.

This work was originally undertaken as a thesis for the degree of doctor of medicine, and the profession is indebted to Dr. Graham for the excellent manner in which he has presented the various manifestations of this most interesting disease. The author's description of the prophylaxis, propagation, and mode of infection by the *Tænia echinococcus*, as well as the chapter on hydatid cysts, is remarkably terse, clear, and forcible. Too much cannot be said in praise of the thirty-four colored plates showing most of the organs affected with this disease, many of which are executed so artistically as to compel the reader's admiration.

\*\*For sale by all Booksellers, or will be sent, free of expense, by the Publishers, on receipt of price.

J. B. LIPPINCOTT COMPANY,  
715 and 717 Market Street, Philadelphia.

## *Nerves of the Human Body.*

With Diagrams. By ALFRED R. HUGHES, Bachelor of Medicine and Master in Surgery of the University of Edinburgh, etc. 4to. Cloth. Thirty-two pages. \$3.00.

The object of this work is to lighten the task of the students of medicine in acquiring a knowledge of the nerves of the human body. The diagrams are neatly and carefully drawn, and some of the plates are printed in colors, so that the nerves entering into the formation of the plexuses may be distinguished. The letter-press is concise, and purports to give a simple statement of the origins and distributions of the various nerves.

## *Complete Medical Pocket Formulary,*

AND PHYSICIAN'S VADE-MECUM. Containing upwards of 2500 Prescriptions, collected from the Practice of Physicians and Surgeons of Experience, American and Foreign, arranged for Ready Reference under an Alphabetical List of Diseases. Also a Special List of New Drugs, with their Dosage, Solubilities, and Therapeutical Applications; together with a Table of Formulæ for Suppositories; a Table of Formulæ for Hypodermic Medication; a List of Drugs for Inhalation; a Table of Poisons, with their Antidotes; a Posological Table; a List of Incompatibles; a Table of Metric Equivalents; a Brief Account of External Antipyretics, Disinfectants, Medical Thermometry, the Urinary Tests; and much other useful information. Collated for the Use of Practitioners by J. C. WILSON, A.M., M.D. 262 pages. Bound in leather, pocket-book form. \$2.00. (Size of book, 3¾ x 8 inches.)

"This is a compact and exhaustive compilation of the favorite prescriptions of physicians eminent in their profession, and must prove of inestimable value to practitioners who find little time for the thorough reading of large text-books. The author is clearly to be congratulated on his presentation of the subject-matter and on his judicious selection of formulas. It contains a fairly full list of the solubilities and therapeutic applications of new drugs, besides a brief account of external antipyretics and urinary tests. The book is one which can be recommended with confidence to all desirous of rendering themselves familiar with the application and posology of special and general medicaments."—*Pharmaceutical Record, New York.*

## *Diseases of the Kidneys and Bladder.*

A Text-Book for Students of Medicine. By W. F. McNUTT, M.D., M.R.C.S. Ed., L.R.C.P. Ed., Professor of the Principles and Practice of Medicine, University of California. Crown 8vo. Cloth. \$2.50.

The medical student alone will value at its full worth this exhaustive text-book on a topic scarcely ever before treated with such thoroughness. There have been innumerable writers on special diseases of the kidneys, and the subject necessarily forms a part of all comprehensive works on pathology. But a single volume devoted to this theme in all its varying phases, and prepared by an eminent specialist, is a convenience which every owner of a medical library will consider essential to his collection, no matter how full his shelves may be of the less complete material.

\*For sale by all Booksellers, or will be sent, free of expense, by the Publishers, on receipt of price.
