

A DICTIONARY OF PRACTICAL SURGERY. By Various British Hospital Surgeons. Edited by CHRISTOPHER HEATH, F.R.C.S., Holme Professor of Clinical Surgery in University College, London; and Surgeon to University College Hospital.

One volume. 8vo. Upward of two thousand pages. Cloth, \$7.50; sheep, \$8.50.

This work will not only prove to be of great service to the student of surgery, but supply a want in the library of the busy practitioner, who necessarily frequently meets with cases of surgical disease or injury on which he desires to have immediate information as to diagnosis and treatment. The Dictionary of Practical Surgery is printed from the original plates of the English edition.

TESTIMONIALS.

"An investigation of special topics leads us to believe that the editor has been fully alive to the necessity of securing recent and fresh work, fully up to the busy times in which we live, when too often the carefully-wrought work of to-day is eclipsed by the work of to-morrow. As a dictionary of surgery the editor has taken a broad view of his work, and has made the field as wide as possible."—*Therapeutic Gazette*.

"The articles in this extensive work have been prepared by various British surgeons, all within the last two years, and from the well-known names which are appended to the articles, it is evident that no pains have been spared to secure the best talent, and thus render the treatise one of the first order of merit. It is well calculated to attain the object desired,—that is, to provide the busy practitioner with immediate information as to the diagnosis and treatment of surgical diseases and injuries."—*Philadelphia Medical and Surgical Reporter*.

"I have examined quite carefully the Dictionary of Practical Surgery, and find it fills a felt need in many a busy physician's library. The author's name is sufficient to guarantee its accurate and practical nature, and the work itself is a fulfilment of that pledge. Many of the articles are models of condensation with clearness."—JOHN E. JAMES, M.D., *Professor Hahnemannian College, Philadelphia*.

DISEASES OF THE SKIN. A Manual for Practitioners and Students. By W. ALLAN JAMIESON, M.D., F.P.C., P.E., Physician for Diseases of the Skin, Edinburgh Royal Infirmary, etc.

Illustrated with wood-cuts and colored plates. 8vo. Extra cloth, \$6.50.

For the last ten years the progress of dermatology has been rapid; fresh discoveries as to the essence of cutaneous diseases and the improved modes of treating them have followed closely on each other. This elegant volume is intended to reflect the teaching of the present day on the various subjects, and presents data and conclusions drawn from individual experience.

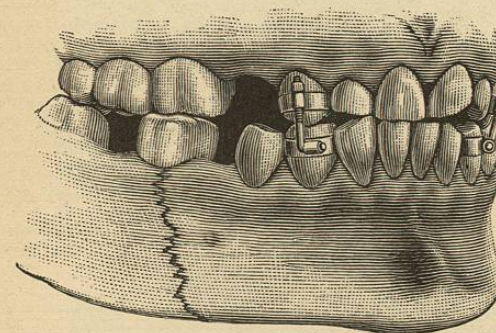

PRESS COMMENTS.

"It covers the whole field of skin diseases as considered in text-books. Facts are stated positively, and opinions are well guarded by personal experience. It is a systematic work that is adapted to the wants of the student as well as practitioner."—*Richmond Medical Monthly*.

"As a whole the book deserves a place by the side of the best manuals on skin diseases. It will be found, on careful examination, that the author has gathered up and presented in good form the principal known facts respecting affections of the skin as they are observed in general practice."—*Detroit American Lancet*.

A SYSTEM OF ORAL SURGERY. Being a Treatise on the Diseases and Surgery of the Mouth, Jaws, Face, Teeth, and Associate Parts. By JAMES E. GARRETSON, A.M., M.D., D.D.S, President of the Medico-Chirurgical Hospital, and Emeritus Professor of Oral and General Clinical Surgery in the Medico-Chirurgical College; Dean of the Philadelphia Dental College, etc.

Illustrated with steel plates and numerous wood-cuts. Fifth Edition, thoroughly revised, with important additions. 8vo. Cloth, \$9.00; sheep, \$10.00.

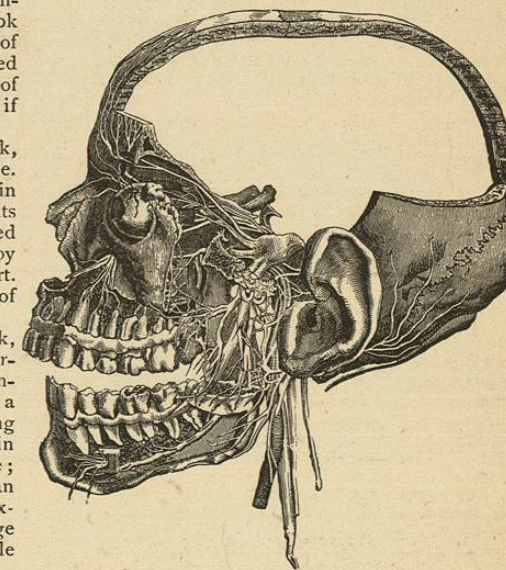

The interim between the present and the immediately preceding edition of this book has been a continuation of work by its author with view to enlarging and elaborating experiences that might prove of benefit to his patients, his students, and himself. An observer, in looking over the volume in hand, and comparing it, even with the last of former issues, will find continued increase in the way of new chapters, together with many added illustrations, while alterations and interpolations will meet his eye on almost every page. This new matter and manner replaces, in no sense, the old, for the writer happily is without occasion to change any opinion or judgment that has been advanced. The meaning of the additions lies with the rapid growth and advance of the specialty. As to change of manner to be seen.

As to change of manner to be seen. this is with view to a still further condensation of the matter of the book and to such elaboration in way of presentation of the subjects treated in it as shall make them easier of comprehension by a student, and, if possible, more practical.

Oral surgery, twenty years back, was without so much as a name. To-day, oral surgery, as a specialty in medicine, is not surpassed as to its range and as to requirements looked for on the part of its practitioners, by any department of the healing art. It has become what it is by reason of the need for its existence.

As expounded in the present work, and as the specialty might not otherwise have existence, oral surgery includes dentistry; it includes it in a purely surgical sense, thus assuming dentistry to be not a profession in itself, but part of medicine at large; such assumption being founded on an experience which clearly enough exhibits that where medical knowledge is lacking dentistry is of very little use to a community.

What oral surgery is, and what dentistry is when practised from the stand-point of oral surgery, it is left to the volume to show.

NEW ENCYCLOPÆDIA OF CHEMISTRY. Theoretical, Practical, and Analytical, as Applied to the Arts and Manufactures. By Writers of Eminence.

Illustrated with numerous wood-cuts and steel-plate engravings. In two imperial octavo volumes. Price per set: Cloth, \$15.00; library sheep, \$18.00; half Turkey, \$20.00.

The plan of the New Encyclopædia of Chemistry formed on the lines of its well-known predecessor (Dr. Muspratt's "Chemistry as Applied to the Arts and Sciences," published now upward of twenty years ago) includes such novel features as are likely to make it even more convenient and valuable than was that work in its day.

It being manifest that the infinite variety of subjects now embraced in such a work could be adequately treated by

no one writer, however learned or painstaking, the publishers in carrying forward their enterprise have availed themselves of the assistance of the leading chemists of the present day, as well as of writers who are practically acquainted with all the details of our great manufactures; while no expense has been spared to add to the clearness and usefulness of the articles by means of copious illustrations. This department of the work will be found to comprise, besides very numerous wood-cuts in the text, a series of highly-finished plate engravings of the most important or elaborate manufacturing plant in use at the present time,—a feature, it is hoped, which will add greatly to its value and interest.

PRESS COMMENTS.

"This valuable work has been published in parts, and has recently been completed, making a work in two volumes very fully and neatly illustrated, and bringing the account of practical chemistry down to the most recent times. There is no branch of science that has made greater advances than chemistry within the last twenty years, and hence the need for such an encyclopædia as this, which succeeds the well-known work of the late Dr. Muspratt."—*Philadelphia Ledger*.

"The 'New Encyclopædia of Chemistry' will take the place of the late Dr. Sheridan Muspratt's great work on Chemistry, published twenty years ago, and is a decided improvement upon that, which is out of print as well as out

of date. In this new encyclopædia everything is brought down to date, and there is, all through it, a combination of what is practical and what is scientific. The work is complete in two volumes of over a thousand pages, royal 8vo, each, in which the alphabetical arrangement has been observed, with the addition of copious analytical indexes for ready reference."—*Phila. Press*.

"The work has already won its way to the fullest recognition for its breadth of scope, its thoroughness both of text and illustration, and its exceeding accuracy. It now represents, in compact shape, the latest accepted result of research, and the latest teachings with respect to practical methods in applied chemistry."—*New York Evening Post*.

A CLINICAL MANUAL OF THE DISEASES OF THE EAR. By LAURENCE TURNBULL, M.D., Ph.G., Aural Surgeon to the Jefferson Medical College Hospital, Philadelphia; President of the Subsection of Otology of the British Medical Association at Cork; author of a work on Hygiene of the Ear, etc., etc.

With a colored lithographic plate, and numerous illustrations on wood. Revised edition. 8vo. Extra cloth, \$4.00.

PRESS COMMENTS.

"The author has greatly improved his work in this edition, and it will meet a greater demand than ever. It is well issued, and worthy a place in the library of all practitioners."—*American Lancet*, Detroit.

"It is the most thorough treatise on diseases of the ear that it has been our pleasure to read. Every physician is in need of such a work, whether he has any other work on the subject or not."—*St. Louis Medical Brief*.

"There are, in this book, a great many most valuable observations and suggestions personal

to the author, and they have been extensively quoted in otological literature. All persons that pay more than a passing interest to aural surgery will be amply rewarded by reading Turnbull's book, which gives full information on some important subjects that are scarcely mentioned in others."—*N. Y. Archives of Otology*.

"We cheerfully commend the work, not only to the specialist, but to the general practitioner, as one of the best treatises yet issued upon diseases of the ear."—*Nashville Journal of Medicine and Surgery*.

HAND-BOOK OF NURSING. For Family and General Use. Published under the auspices of the Connecticut Training-School for Nurses, State Hospital, New Haven, Connecticut.

12mo. Extra cloth, \$1.25.

PRESS COMMENTS.

"It is evidently prepared by some one who has had long experience, and who has a natural vocation for nursing. There is scarcely a question that a new and inexperienced nurse would ask which is not here intelligibly answered. It is especially a book for the family, giving valuable hints to every one who undertakes the care of the sick, even where nothing but care and proper attention is required."—*Harper's Weekly*.

"A clear, practical, common-sense book on hygiene, no less serviceable to the mother and house-keeper than to those who make a business of nursing, for whom it is more particularly intended. It consists of three parts. The first describes medical and surgical nursing, with

notes on baths, rubbing, disinfection, and the use of the medical thermometer; the second is devoted to monthly nursing; and the third to the practical hygiene of house-keeping, cleaning, ventilation, care of the nursery, sleeping-rooms, kitchen, cellar, wash-tubs, and closets. It should be the commonplace-book of every household, and the hand-book of every nurse."—*New York Sanitarium*.

"This is probably the best work of the kind ever given to the world, and we thoroughly assent to the endorsement of President Porter, of Yale College, that, though brief in language and simple in its form, it is the fruit of the experience of years in the supervision of hospital cases and duties."—*Philadelphia Press*.

DISEASES OF THE MOUTH, THROAT, AND NOSE.

Including Rhinoscopy and the Methods of Local Treatment. For Practitioners and Students. By Dr. PHILIP SCHECH. Translated by R. H. BLAIKIE, M.D., F.R.C.S.E.

With illustrations. 8vo. Extra cloth, \$3.00.

This translation was undertaken with the idea of presenting to the profession a short and concise work on the subjects with which it deals. The very favorable criticisms of the book in the German medical journals show that it is one deserving the attention of all interested in this branch of medical science. The author in his preface says, "There are certainly many good works and writings on these subjects already, but most of them seem to be either too voluminous or too short. I have therefore very gladly complied with the request of the publishers to write a short but exhaustive treatise on the subjects, all the more because, having worked for twelve years at the literature as well as the practice of these diseases, I have now come to know exactly what the practitioner requires."

PRACTICAL LESSONS IN NURSING.

12mo. Extra cloth, \$1.00 each.

I.—THE NURSING AND CARE OF THE NERVOUS AND THE INSANE.

By CHAS. K. MILLS, M.D., Professor of Diseases of the Mind and Nervous System in the Philadelphia Polyclinic and College for Graduates in Medicine; Neurologist to the Philadelphia Hospital, etc.

PRESS COMMENTS.

"The book is a valuable one, and should be read by every nurse as well as by physicians who realize the importance of extra-medical influences and agencies in the cure of disease."—N. Y. Medical Digest.

"This work may be perused with advantage, not only by professional nurses, but also by medical men, who, it must be admitted, are not

too familiar with the proper management of many of the nervous diseases met with in general practice."—Canadian Practitioner.

"I consider it a most valuable addition to a nurse's library, and shall advise all nurses under my charge to obtain it."—Jennie Dalziel, Head Nurse at Philadelphia Hospital.

II.—MATERNITY; INFANCY; CHILDHOOD. The Hygiene of Pregnancy; the Nursing and Weaning of Infants; the Care of Children in Health and Disease. Adapted Especially to the Use of Mothers or Those Intrusted with the Bringing up of Infants and Children, and Training Schools for Nurses, as an Aid to the Teaching of the Nursing of Women and Children. By JOHN M. KEATING, M.D.

PRESS COMMENTS.

"The first part of this book is intended for mothers,—giving them just that sound, practical advice they so much need, the observance of which must result in healthier women and offspring. For her own sake and for the sake of her child, we wish every mother had a copy of this book."—Practice, Richmond.

"Dr. Keating, in a simple, easy manner, tells the story of what to do, and how to do it; so that any one can readily catch the author's meaning. We know of no better book on the subject. We commend it most cordially."—Philadelphia Medical Register.

"It is probable that every physician has many times realized the need of such a work as this, which, while giving the necessary information to those having the care of children or of the mother during maternity, does not trench upon the duties of the physician. It is manifestly impossible for the physician to be always at hand to direct the nurse, or to provide for all possible emergencies by any set of directions, short of systematic instruction; but what he cannot do this little work does admirably, as a glance at the list of contents will show."—Archives of Gynecology, N. Y.

III.—OUTLINES FOR THE MANAGEMENT OF DIET; or, The Regulation of Food to the Requirements of Health and the Treatment of Disease. By E. T. BRUEN, M.D.

PRESS COMMENTS.

"It is an excellent book for its many hints regarding the action of foods, regulation of diet, etc. It will be of great service to young nurses on account of its numerous suggestions concerning the preparation of various articles of food for the sick-room. It is worthy also of a place on the physician's table, among those books which are aptly called hand-books, for it contains many important details, too easily forgotten amid the pressure of more serious considerations, which can thus be recalled and grasped at a moment's notice."—N. Y. Medical Journal.

"The work is well arranged, well written, and forms a small but excellent addition to the literature of dietetics."—Chicago Medical Journal and Examiner.

"Physicians cannot be cooks, but have a right to expect nurses to know how to prepare the proper food as well as druggists should know how to compound medicines. For this reason the little book will serve a valuable purpose and cannot be recommended too highly."—Cincinnati Lancet-Clinic.

IV.—FEVER-NURSING. Designed for the Use of Professional and Other Nurses, and especially as a Text-Book for Nurses in Training. By J. C. WILSON, A.M., M.D., Visiting Physician to the Philadelphia Hospital and to the Hospital of the Jefferson College; Fellow of the College of Physicians, Philadelphia; Member of the American Association of Physicians, etc.

PRESS COMMENTS.

"Dr. J. C. Wilson has the happy faculty of writing a book which his readers can comprehend without an effort. His style is clear and com-

prehensive, and while brief in his explanations, he always covers the ground intended without missing a point."—N. Y. Health.

PRESS COMMENTS ON FEVER-NURSING.—Continued.

"Such books as constitute this series are invaluable in the training of nurses, and should be added to the reading course for nurses in all our hospitals.

Dr. Wilson's treatise keeps the series up to the high standard of its predecessors."—Indianapolis Medical Journal.

"A cursory reading of the several chapters has convinced us that this hand-book contains much that will be of interest to the practising physician, and especially those of our school, many of whom, alas! are woefully deficient in aught save the application of remedial measures. We commend the work."—N. Y. Homœopathist.

V.—DISEASES AND INJURIES OF THE EAR: Their Prevention and Cure.

By CHARLES H. BURNETT, A.M., M.D., Aural Surgeon to the Presbyterian Hospital, and one of the Consulting Aurists to the Pennsylvania Institution for the Deaf and Dumb, Philadelphia; Lecturer on Otology, Women's Medical College of Pennsylvania, etc.

PRESS COMMENTS.

"The instructions contained in these books are applicable to almost any form of disease, excepting surgical cases. They can be recommended in the strongest terms to nurses and to physicians, and are well written and very handsomely printed."—Philadelphia Medical and Surgical Reporter.

"This series of Practical Lessons in Nursing

should be in the library of every physician, and could be given by him to the nurse as a means of carrying his patient through successfully, and save him many words and valuable time in explaining to the person in charge just what to do and what to avoid. There are now five of these little works, and the price is within the reach of all."—St. Louis Medical Brief.

[SPECIMEN ILLUSTRATION.]

With 73 designs fully illustrating the process of bandaging. 12mo. Cloth, flexible, \$1.25.

PRESS COMMENTS.

"This is a very clear and satisfactory treatise on the subject. The text is framed without waste of words, and the illustrations are excellent. As a text-book for the student, and as a guide to the practitioner in a most important department of professional work, it is destined to do good service."—Louisville Medical News.

"The book is of value to the early beginner in surgical dressing, and may be read with advantage by older men, for good bandaging is an exceedingly important adjunct of good surgery."—Philadelphia Medical and Surgical Reporter.

"Books on bandaging are not numerous, and such as are extant are profusely adorned with fancy diagrammatic drawings, which, on attempted application, will be found impossible of accomplishment. The diagrams in this work are extremely realistic, and have the appearance of bandages as they are seen in application. The author, in his preface, states that these diagrams are intended to do the teaching, rather than by elaborate descriptions, which are usually mystifying. He has succeeded most admirably. We can commend this work to those who feel the need of a compendium on roller dressings."—Philadelphia Polyclinic.

"Every student and every physician not thoroughly conversant with the various methods of applying the roller bandage should not fail to buy a copy of the above work. It contains cuts upon almost every page, illustrating the various methods of applying the bandage, is printed on heavy paper, neatly bound, and in size is convenient to carry in the pocket."—Indiana Medical Journal.

[SPECIMEN ILLUSTRATION.]

THE PRACTICE OF PHARMACY. A Treatise on the Modes of Making and Dispensing Official, Unofficial, and Extemporaneous Preparations, with Descriptions of their Properties, Uses, and Doses, Intended as a Hand-Book for Pharmacists and Physicians and a Text-Book for Students. *Second Edition. Enlarged and Thoroughly Revised.* By JOSEPH P. REMINGTON, Ph.M., F.C.S., Professor of Theory and Practice of Pharmacy and Director of the Pharmaceutical Laboratory in the Philadelphia College of Pharmacy, etc.

Containing over 1300 pages and 630 illustrations. 8vo. Cloth, extra, \$6.00; sheep, \$6.50.

Remington's Percolating Stand.

The value of the method of proving progress in knowledge by answering questions has been recognized in this edition, and a series of questions on the subjects embraced has been appended to each chapter.

After the chapter on Metrology, typical pharmaceutical problems and exercises in alligation have been inserted. Part V., treating of Magistral Pharmacy, and Part VI., containing the Formulary of Unofficial Preparations, have been revised and greatly extended. More than one hundred illustrations and fifty pages have been

added to Part V. Fac-similes of one hundred autograph and questionable prescriptions, selected to demonstrate how various difficulties occurring in daily practice may be overcome, and accompanied by running comments, constitute the most important addition to this portion of the work. These have been printed upon enamelled paper with special care, in order that the originals may be faithfully reproduced. By the incorporation of the National Formulary, the elision of those formulas which might conflict with this authority, and the addition of others, it is believed that greater usefulness in this Part will be secured. The additions represent a net increase of two hundred pages, the illustrations numbering six hundred and thirty-nine, or one hundred and forty more than were in the first edition. A very complete and useful index has been added.

TESTIMONIALS.

"I do not hesitate to say it is the most complete book on Pharmacy that can be had. By the excellent arrangement the editor has adopted at the end of each chapter, students can avail themselves of a self-examination which can only result to their good, and give them a better understanding of Pharmacy in all its branches. I can conscientiously say that no druggist or druggist's clerk should be

without a copy."—*Edward W. Runyon, Dean of the Faculty, College of Pharmacy, San Francisco, Cal.*

"It is not too much to say that 'Remington's Practice' is the greatest and most comprehensive exponent of the science and the art from the time of Paracelsus to the present day."—*Western Druggist, Chicago, Ill.*

DOCTOR AND PATIENT. By S. WEIR MITCHELL, M.D., LL.D., Harv., author of "Fat and Blood, and How to Make Them," "Wear and Tear; or, Hints for the Overworked," etc.

12mo. Extra cloth, \$1.50.

PRESS COMMENTS.

"Dr. Mitchell's papers on 'Doctor and Patient' seem to us admirable. They embody the teachings of a remarkably broad experience, and contain strongly-presented warnings against the modern tendency to seek protection against nervous complaints and pain in opiates. . . . In all respects the little book is meritorious and one which may be most profitably studied by all."—*New York Tribune.*

"While in sympathy with all sufferers, and

especially those with nervous ills, he writes with a vigor and discernment that carry conviction to the invalid. We wish the chapters on Nervousness, Pain and its Consequences, and The Moral Management of Invalid Children, could be read by every man and woman that has had experience in these directions. We commend the book as a valuable addition to the many excellent writings of the author."—*N. Y. Independent.*

WEAR AND TEAR; OR, HINTS FOR THE OVERWORKED. By S. WEIR MITCHELL, M.D., LL.D., Harv., Member of the National Academy of Sciences, President of the College of Physicians of Philadelphia, etc.

Fifth edition, thoroughly revised. 16mo. Cloth, \$1.00.

PRESS COMMENTS.

"It is a physician's duty and a layman's privilege to instruct himself from this little work, so wise in matter, so graceful in style, on a subject vital to both profession and laity."—*New England Medical Gazette.*

"The author's position on the subject of overwork is moderate and reasonable, and the book contains many valuable hints worthy the attention of every one."—*Popular Science News.*

"Dr. Mitchell's excellent little work is, in its new edition, a repetition and re-enforcement of the remonstrance made by the author in previous editions against the wear and tear of overwork, so characteristic of us as individuals and as a people. The advice and suggestions are always timely, and commend themselves to physician and laity alike, for the spirit of unrest is not limited to class, sect, or sex."—*Philada. College and Clinical Record.*

FAT AND BLOOD. An Essay on the Treatment of Certain Forms of Neurasthenia and Hysteria. By S. WEIR MITCHELL, M.D., author of "Doctor and Patient," "Wear and Tear," etc.

Third edition, revised, with additions. 12mo. Extra cloth, \$1.50.

PRESS COMMENTS.

"A most practicable, sensible, and well-written monograph on a very important subject. Doctor Mitchell deserves the gratitude and thanks of every medical man for his original and practical treatment upon neurasthenia and hysteria."—*St. Louis Medical Brief.*

"If properly heeded it can do more good in proportion to its pages than almost any volume which has recently come under our notice."—*Boston Post.*

"We cannot too highly recommend Dr. Mitchell's book to the attention of our readers. In order to understand the mode of carrying out the treatment, all its details must be studied carefully, and in the pleasantly and clearly written pages of the work under notice such a detailed account will be found as to enable any one to select his cases and direct their treatment with success."—*Dublin Journal of Medical Science.*

INJURIES OF THE NERVES AND THEIR CONSEQUENCES. By S. WEIR MITCHELL, M.D., author of "Fat and Blood," "Wear and Tear," etc.

8vo. Cloth, \$3.00.

PRESS COMMENTS.

"It is certainly one of the most valuable contributions to modern medical science."—*Pacific Medical Journal.*

"The work is evidently a contribution of

great value to the profession. We know of no other in the English language at once so complete, so original, and so readable."—*Detroit Review of Medicine and Surgery.*

NERVOUS DISEASES AND THEIR DIAGNOSIS. A Treatise upon the Phenomena Produced by Diseases of the Nervous System, with Especial Reference to the Recognition of their Causes. By H. C. WOOD, M.D., LL.D., author of "Thermic Fever," "On Fever," etc.

8vo. Extra cloth, \$4.00; sheep, \$4.50.

PRESS COMMENTS.

"Dr. Wood has added a very important work to American medical literature, a book which shows progress in the most difficult branch of the profession, and of which he may justly feel a pride in being the author."—*Philadelphia Medical News*.

"Dr. Wood is an able clinician, and this makes the book valuable. His observations are practical and to the point, and show careful study of the large number of cases which have fallen under his care."—*New York Medical Journal*.

"Lucid language, clear type, a full index, and, above all, the presentation of late advances

in this department of science, constitute the truly great attractions of this book. The distinguished author is widely recognized as one competent for his task."—*Albany Medical Annals*.

"It is at once a substantial contribution to neurology, and a trustworthy guide."—*London Practitioner*.

"The honest effort of one who never writes without teaching, and who always writes and teaches well."—*New York Journal of Insanity*.

"As a text-book for students and practitioners we most cordially recommend it."—*St. Louis Medical Journal*.

A TEXT-BOOK OF CLINICAL DIAGNOSIS. The Chemical, Microscopical, and Bacteriological Evidence of Disease. By Dr. RUDOLPH VON JAKSCH, of the University of Prague. Translated from the *Second Edition* by JAMES CAGNEY, M.A., M.D. With Additions by WM. STIRLING, M.D., Sc.D., Professor of Physiology, Owens College, Manchester. With numerous Illustrations in color. Medium 8vo. Cloth, \$6.50.

"The American practitioner and student has now the opportunity of adding a very valuable work to his library, and one that he will often consult with due advantage."—*Medical Brief, St. Louis*.

"The book prepared by this intellectual trio of men, who possess a practical and a world-wide reputation, will be of assistance to the author, student, and practitioner."—*Medical Bulletin, Philadelphia*.

THE PARASITES OF MAN, AND THE DISEASES WHICH PROCEED FROM THEM. A Text-Book for Students and Practitioners. By Professor RUDOLF LEUCKART. Translated from the German, with the co-operation of the author, by WILLIAM E. HOYLE, M.A. (Oxon.), M.R.C.S., F.R.S.E.

Large 8vo. Illustrated with over 400 figures. Extra cloth, \$9.00.

PRACTICAL HISTOLOGY. A Text-Book of Practical Histology, with Outline Plates. By WILLIAM STIRLING, M.D., Sc.D., F.R.S.E., Regius Professor of the Institutes of Medicine in the University of Aberdeen.

With 30 outline plates, 1 colored plate, and 27 wood-engravings. Quarto. Extra cloth, \$4.50.

"The author has endeavored to give a faithful account of the methods which he has found to be the most useful for the preparation of each of the tissues and organs of the body for microscopic purposes. No method is introduced which he has not found from repeated trials to be successful. The methods described are those which, after nine years' experience in the teaching of practical histology, he has found to be really reliable."—PREFACE.

HYPODERMATIC MEDICATION. The Treatment of Diseases by the Hypodermatic or Subcutaneous Method. By ROBERTS BARTHOLOW, M.A., M.D., LL.D., Professor of Materia Medica, General Therapeutics, and Hygiene in the Jefferson Medical College of Philadelphia; Fellow of the College of Physicians of Philadelphia, etc.

NEW EDITION. Entirely revised and enlarged. With Illustrations. 12mo. 542 pages. Cloth, \$3.00.

PRESS COMMENTS.

"This is now the most complete work upon the subject of subcutaneous medication."—*Gaillard's Medical Journal, N. Y.*

"The information it gives cannot elsewhere be obtained. . . . It is the authority upon the subject upon which it treats, a subject that is growing in extent and importance every day, and it is indispensable to every physician who would keep abreast with medical progress and discovery."—*Maryland Medical Journal*.

"A complete presentation of the subject of hypodermatic medication. It has been brought well up to the present year, embodying the latest

results of bacteriological research as far as this form of treatment is affected thereby, and includes all of the later additions to the materia medica which are capable of use in this manner. Pyoktanin, cantharidin, creolin, etc., among the late antiseptics are given careful review. There would seem to be nothing omitted which the practitioner may desire to investigate, and we can commend the work to our readers as embodying in complete form the very latest researches into this important field of medication."—*Cincinnati Lancet-Clinic*.

THE REFRACTION AND ACCOMMODATION OF THE EYE AND THEIR ANOMALIES. By E. LANDOLT, M.D., Paris. Translated under the author's supervision by C. M. CULVER, M.A., M.D., Albany, N. Y.

With 147 illustrations. 8vo. Extra cloth, \$7.50.

This work was first published in the French language. The present English edition has, however, been considerably modified by the author's experience since its first publication.

It is divided into Three Portions, or Divisions, as follows: I. PHYSICAL PORTION. II. THEORETICAL PORTION. III. CLINICAL PORTION. And also contains a Complete Index.

PRESS COMMENTS.

"There is no work which the beginner in the study of refraction can read to greater profit than this one of Dr. Landolt's. The author has a happy faculty of simplifying things, and it finds nowhere a more appropriate field for its employment than in the dominion of refraction. Dr. Culver has done his work as a translator well."—*Archives of Ophthalmology, N. Y.*

"We have no hesitation in saying that, since

the appearance of Donders's great work, no book upon this important branch of ophthalmology has been published which can at all compare with the work before us. It contains less of mathematical and more of the clinical element than Donders's book, and will, we believe, on that account, to a great extent, replace in this country the latter as a book of reference."—*London Medical Record*.

WILSON'S CLINICAL CHART, DESIGNED FOR THE CONVENIENT, ACCURATE, AND PERMANENT DAILY RECORDING OF CASES IN HOSPITAL AND PRIVATE PRACTICE. By JAMES C. WILSON, M.D., Physician to the Philadelphia Hospital, and to the Hospital of the Jefferson College.

50 Charts, in tablet form. Size, 8½ x 11 inches. Price, 50 cents per block of 50 Charts.

PRESS COMMENTS.

"This Chart, designed for the convenient, accurate, and permanent daily recording of cases in hospital and private practice, is so arranged as to be an invaluable aid to all practitioners who desire to avail themselves of every opportunity to improve themselves and thereby benefit their patient. Every practitioner should

keep such a record of his cases as will enable him to review them at any time; in doing so he always benefits himself. While this chart would not answer the purposes of the specialist, yet it is the best we have seen for the general practitioner."—*St. Louis Medical and Surgical Journal*.
