

LEA BROTHERS & CO'S

CLASSIFIED CATALOGUE

OF

MEDICAL AND SURGICAL Publications.

IN ASKING the attention of the profession to the works advertised in the following pages, the publishers would state that no pains are spared to secure a continuance of the confidence earned for the publications of the house by their careful selection and accuracy and finish of execution.

The printed prices are those at which books can generally be supplied by booksellers throughout the United States, who can readily procure for their customers any works not kept in stock. Where access to bookstores is not convenient books will be sent by mail by the publishers postpaid on receipt of the printed price, and as the limit of mailable weight has been removed, no difficulty will be experienced in obtaining through the post-office any work in this catalogue. No risks however are assumed either on the money or on the books, and no publications but our own are supplied, so that gentlemen will in most cases find it more convenient to deal with the nearest bookseller.

THE MEDICAL NEWS.

BY KEEPING closely in touch with the needs of the active practitioner, THE NEWS has achieved a reputation for utility so extensive as to render practicable its reduction in price from five to **Four Dollars** per annum. It is now by far the cheapest as well as the best large weekly medical journal published in America. Employing all the recognized resources of modern journalism, such as the cable, telegraph, resident correspondents, special reporters, etc., THE NEWS supplies in the 28 quarto pages of each issue the latest and best information on subjects of importance and value to practitioners in all branches of medicine. The foremost writers, teachers and practitioners of the day furnish original articles, clinical lectures and notes

The New

THE MEDICAL NEWS---Continued.

on practical advances; the latest methods in leading hospitals are constantly reported; a condensed summary of progress is gleaned each week from a large exchange list, comprising the best journals at home and abroad; a special department is assigned to abstracts requiring full treatment for proper presentation; editorial articles are secured from writers able to deal instructively with questions of the day; books are carefully reviewed; society proceedings are represented by the pith alone; regular correspondence is furnished from important medical centres, and minor matters of interest are grouped each week under news items. In a word THE MEDICAL NEWS is a crisp, fresh, weekly professional newspaper and as such occupies a well-marked sphere of usefulness, distinct from and complementary to the ideal monthly magazine, THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES.

The American Journal of the Medical Sciences

Published Monthly
at \$4.00
Per Annum.

THE AMERICAN JOURNAL entered with 1894 upon its seventy-fifth year, still maintaining the foremost place among the medical magazines of the world. A vigorous existence during two and a half generations of men amply proves that it has always adapted itself to meet fully the requirements of the time.

Being the medium chosen by the best minds of the profession during this period for the presentation of their ablest papers, THE AMERICAN JOURNAL has well earned the praise accorded it by an unquestioned authority—"From this file alone, were all other publications of the press for the last fifty years destroyed, it would be possible to reproduce the great majority of the real contributions of the world to medical science during that period." Original Articles, Reviews and Progress of the Medical Sciences constitute the three main departments of this ideal medical monthly.

COMMUTATION RATE.

Taken together, THE JOURNAL and THE NEWS afford to medical readers the advantages of the monthly magazine and the weekly newspaper. Thus all the benefits of medical periodical literature can be secured at the low figure of \$7.50 per annum.

Subscribers can obtain, at the close of each volume, cloth covers for THE JOURNAL (one annually), and for THE NEWS (one annually), free by mail, by remitting Ten Cents for THE JOURNAL cover, and Fifteen Cents for THE NEWS cover.

The Medical News Visiting List for 1894

Is published in four styles, Weekly (dated for 30 patients); Monthly (undated, for 120 patients per month); Perpetual (undated, for 30 patients weekly per year); and Perpetual (undated, for 60 patients weekly per year). The 60-patient Perpetual consists of 256 pages of assorted blanks. The first three styles contain 32 pages of important data and 176 pages of assorted blanks. Each style is in one wallet-shaped book, leather-bound, with pocket, pencil, rubber, and catheter-scale. Price, each, \$1.25.

This list is all that could be desired. It contains a vast amount of useful information, especially for emergencies, and gives good tables of doses and therapeutics.—*Canadian Practitioner.*

Its compactness and simplicity are such as to indicate that the highest point of perfection has been reached in works of this class.—*University Medical Magazine.*

The new issue maintains its previous reputation. It adapts itself to every style of book-keeping; there is space for all kinds of professional records; it is furnished with a ready reference thumb-letter index, and has a most valuable text.—*Medical Record.*

For convenience and elegance it is not surpassable.—*Obstetric Gazette.*

SPECIAL COMBINATIONS WITH THE VISITING LIST, see p. 1.

The safest mode of remittance is by bank check or postal money order, drawn to the order of the undersigned; where these are not accessible, remittances for subscriptions may be sent at the risk of the publishers by forwarding in registered letters addressed to the Publishers (see below).

The Medical News Physicians' Ledger.

Containing 300 pages of fine linen "ledger" paper ruled so that all the accounts of a large practice may be conveniently kept in it, either by single or double entry, for a long period. Strongly bound in leather, with cloth sides, and with a patent flexible back which permits it to lie perfectly flat when opened at any place. Price, \$4.00.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

THE STUDENTS' DICTIONARY OF MEDICINE AND THE ALLIED SCIENCES,

COMPRISING THE PRONUNCIATION, DERIVATION AND FULL EXPLANATION OF MEDICAL TERMS; TOGETHER WITH MUCH COLLATERAL DESCRIPTIVE MATTER, NUMEROUS TABLES, ETC.

By ALEXANDER DUANE, M. D.,

Assistant Surgeon to the New York Ophthalmic and Aural Institute; Reviser of Medical Terms for Webster's International Dictionary.

In one square octavo volume of 658 pages. Cloth, \$4.25; half leather, \$4.50; full sheep, \$5.00. Just ready. Thumb-letter Index for quick use, 50 cents extra.

Dr. Duane has spared no time, pains or expense in his endeavor to bring before the profession, and especially the students of medicine, a book embodying completeness and explicitness. The vocabulary is abundant and its fulness is paralleled by the explanation accorded each word. It also contains extensive tables. Each word is followed by its correct pronunciation, a new feature in works of this kind, given by means of a simple and obvious phonetic spelling. Derivation, the greatest aid to memory, is fully treated of, and for the convenience of those who do not understand Greek, the English letters are substituted for those of the Greek in giving the roots of the words derived from that language. The author's experience as a lexicographer is fully attested by his position as Reviser of Medical Terms for Webster's International Dictionary. We predict that this will become a standard and favorite work of its class.—*Medical Portnightly*, March, 1894.

From A. L. LOCKIE, M. D., Professor Pathology and Practice of Medicine, Medical Department, University City of New York, New York.

It seems to me entirely satisfactory for the purpose for which it is intended.

From J. C. WILSON, M. D., Professor of Medicine, Jefferson Medical College, Philadelphia.

It appears to be well suited to the purposes of the medical student, being simple as regards derivations and pronunciation, explicit yet sufficiently comprehensive in definitions, and thoroughly up to the times.

From JAMES T. WHITTAKER, M. D., Professor Theory and Practice of Medicine, Medical College of Ohio, Cincinnati, O.

I find it admirably adapted to the wants of students, and thoroughly modern in every particular in which I have taken occasion to consult it. I shall certainly recommend it to my class.

THE STUDENTS' QUIZ SERIES.

A NEW Series of Manuals, comprising all departments of medical science and practice, and prepared to meet the needs of students and practitioners. Written by prominent medical teachers and specialists in New York, these volumes may be trusted as authoritative and abreast of the day. Cast in the form of suggestive questions, and concise and clear answers, the text will impress vividly upon the reader's memory the salient points of his subject. To the student these volumes will be of the utmost service in preparing for examinations, and they will also be of great use to the practitioner in recalling forgotten details, and in gaining the latest knowledge, whether in theory or in the actual treatment of disease. Illustrations have been inserted wherever advisable. Bound in limp cloth, and in size suitable for the hand and pocket, these volumes are assured of enormous popularity, and are accordingly placed at an exceedingly low price in comparison with their value. For details of subjects and prices see below.

ANATOMY (Double Number)—By FRED J. BROCKWAY, M. D., Assistant Demonstrator of Anatomy, College of Physicians and Surgeons, New York, and A. O'MALLEY, M. D., Instructor in Surgery, New York Polytechnic. \$1.75.

PHYSIOLOGY—By F. A. MANNING, M. D., Attending Surgeon, Manhattan Hosp., N. Y. \$1.

CHEMISTRY AND PHYSICS—By JOSEPH SCRUTHERS, Ph. B., Columbia College School of Mines, N. Y., and D. W. WARD, Ph. B., Columbia College School of Mines, N. Y., and Chas. H. Willmarth, M. S., N. Y. \$1.

HISTOLOGY, PATHOLOGY AND BACTERIOLOGY—By BENNETT S. BRACH, M. D., Lecturer on Histology, Pathology and Bacteriology, New York Polytechnic. \$1.

DISEASES OF CHILDREN—By C. A. RHODES, M. D., Instructor in Diseases of Children, New York Post-Graduate Medical College. \$1.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

NEW (21st) EDITION. THOROUGHLY REVISED. JUST READY.

Dunlison's Dictionary OF MEDICAL SCIENCE.

With the Pronunciation, Accentuation and Derivation of the Terms.

Containing a full Explanation of the various Subjects and Terms of Anatomy, Physiology, Medical Chemistry, Pharmacology, Pharmacy, Therapeutics, Medicine, Hygiene, Dietetics, Surgery, Ophthalmology, Otology, Laryngology, Dermatology, Gynecology, Obstetrics, Pediatrics, Medical Jurisprudence and Dentistry, etc., etc. By ROBLEY DUNLISON, M. D., late Professor of Institutes of Medicine in the Jefferson Medical College of Philadelphia. New (21st) edition, thoroughly revised and greatly enlarged. With the Pronunciation, Accentuation and Derivation of the Terms, by RICHARD J. DUNLISON, A. M., M. D. In one very large and handsome royal octavo volume of 1191 pages. Cloth, \$7.00; leather, raised bands, \$8.00. Thumb-letter Index for quick use, 75 cents extra.

THIS great medical dictionary, which has been for more than two generations the standard of the English speaking race, is now issued in a thoroughly revised and greatly enlarged and improved edition. The new words and phrases aggregate by actual count over 44,000. Though the new edition contains far more matter than its predecessor, the whole is accommodated within a volume convenient for the hand.

The revision has not only covered every word, but it has resulted in a number of important new features designed to confer on the work the utmost usefulness, and to make it answer the most advanced demands of the times.

Pronunciation has been introduced throughout by means of a simple and obvious system of phonetic spelling. At a glance the proper sound of a word is clearly indicated, and thus a most important desideratum is supplied.

Derivation affords the utmost aid in recollecting the meanings of words, and gives the power of analyzing and understanding those which are unfamiliar. It is indicated in the simplest manner. Greek words are spelled with English letters, and thus placed at the command of those unfamiliar with the Greek alphabet.

Definitions, the essence of a dictionary, are clear and full, a characteristic in which this work has always been preëminent. In this edition much explanatory and encyclopedic matter has been added, especially upon subjects of practical importance. Thus under the various diseases will be found their symptoms, treatment, etc.; under drugs their doses and effects, etc., etc. A vast amount of information has been clearly and conveniently condensed into tables in the alphabet.

In a word, *Dunlison's Medical Dictionary*, in its remodelled and enlarged shape, is equal to all that the student and practitioner can expect from such a work.

The new "Dunlison" is now indeed. The vast amount of new matter and the thoroughness with which the work has been brought down to date cannot fail to strike even the least observant reader. The immense advances made in all branches of medical science here find representation. A prominent and very useful feature of the old book is retained and amplified in this—we mean the tables, which recur with great frequency and represent a vast amount of condensed information. In respect to accuracy the book quite equals and usually surpasses any of its contemporaries that we are acquainted with. *The American Journal of the Medical Sciences*, Jan., 1894.

Covering the entire field of medicine, surgery and the collateral sciences, its range of usefulness can scarcely be measured. Perhaps the most valuable feature in the present work is the addition of a vast amount of practical matter. The type is commendably clear. *Medical Record*, Feb. 24, 1894.

The new subjects and terms treated are no less than forty-four thousand, sufficient in themselves to form a large volume. There has been a praise-

The National Medical Dictionary,

Including English, French, German, Italian and Latin Technical Terms used in Medicine and the Collateral Sciences, and a Series of Tables of Useful Data. By JOHN S. BILLINGS, M. D., LL. D., Edin. and Harv., D. C. L., Oxon., member of the National Academy of Sciences, Surgeon U. S. A., etc. In two very handsome royal octavo volumes containing 1574 pages, with two colored plates. Per volume—cloth, \$6.00; leather, \$7.00; half morocco, marbled edges, \$8.50. Subscription only. Address the publishers.

The work is remarkable for its fulness. It presents to the English reader a thoroughly scientific mode of acquiring a rich vocabulary and offers an accurate and ready means of reference in consulting works in any of the three modern continental languages which are richest in medical literature. Apart from the boundless stores of information

worthy attempt to render the work an epitome of the existing condition of medical science. Thus, under the heading *Hernia*, besides the definition of the condition, a condensed table is given of the various forms, and a brief résumé is given of the therapeutical indications. Under the heading *Murmurs*, besides a description of the various forms, a table is given of the significance of the murmurs of valvular origin. Under *Bacteria* the leading classifications are recorded, and a paragraph is devoted to the question of the determination of the pathogenic properties, and another to modes of culture of the bacteria. In addition, the work is for the first time made a pronouncing dictionary.—*The Montreal Med. Journal*, June, 1894.

So fully have derivations and definitions been considered, and so great is the amount of practical matter, such as symptoms, treatment and prognosis of many of the diseases described, that the volume is entitled to be called an encyclopedia rather than a dictionary.—*The Brooklyn Medical Journal*, June, 1894.

which may be gained by the study of a good dictionary, one is enabled by the work under notice to read intelligently any technical treatise in any of the four chief modern languages. There cannot be two opinions as to the great value of this dictionary as a book of ready reference for all sorts and conditions of medical men.—*London Lancet*, Apr., '90.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

NEW (THIRTEENTH) EDITION. JUST READY.

GRAY'S ANATOMY IN COLORS OR IN BLACK.

Anatomy, Descriptive and Surgical, BY HENRY GRAY, F. R. S.,

LECTURER ON ANATOMY AT ST. GEORGE'S HOSPITAL, LONDON.

EDITED BY T. PICKERING PICK, F. R. C. S.,

Surgeon to and Lecturer on Anatomy at St. George's Hospital, London, Examiner in Anatomy, Royal College of Surgeons of England.

A new American from the thirteenth enlarged and improved London edition. In one imperial octavo volume of 1118 pages, with 636 large and elaborate engravings on wood. Price, with illustrations in colors, cloth, \$7; leather, \$8. Price, with illustrations in black, cloth, \$6; leather, \$7.

SINCE 1857 Gray's Anatomy has been the standard work used by students of medicine and practitioners in all English-speaking races. So preëminent has it been among the many works on the subject that thirteen editions have been required to meet the demand. This opportunity for frequent revisions has been fully utilized and the work has thus been subjected to the careful scrutiny of many of the most distinguished anatomists of a generation, whereby a degree of completeness and accuracy has been secured which is not attainable in any other way. In no former revision has so much care been exercised as in the present to provide for the student all the assistance that a text-book can furnish. The engravings have always formed a distinguishing feature of this work, and in the present edition the series has been enriched and rendered complete by the addition of many new ones. The large scale on which the illustrations are drawn and the clearness of the execution render them of unequalled value in affording a grasp of the complex details of the subject. As heretofore the name of each part is printed upon it, thus conveying to the eye at once the position, extent and relations of each organ, vessel, muscle, bone or nerve with a clearness impossible when figures or lines of reference are employed. Distinctive colors have been utilized to give additional prominence to the attachments of muscles, the veins, arteries and nerves. For the sake of those who prefer not to pay the slight increase in cost necessitated by the use of colors, the volume is published also in black alone.

The illustrations thus constitute a complete and splendid series, which will greatly assist the student in forming a clear idea of Anatomy, and will also serve to refresh the memory of those who may find in the exigencies of practice the necessity of recalling the details of the dissecting room. Combining as it does a complete Atlas of Anatomy with a thorough treatise on systematic, descriptive and applied Anatomy, the work covers a more extended range of subjects than is customary in the ordinary text-books. It not only answers every need of the student in laying the groundwork of a thorough medical education, but owing to its application of anatomical details to the practice of medicine and surgery, it also furnishes an admirable work of reference for the active practitioner.

We always had a kindly regard for the illustrations in Gray, where each organ, tissue, artery, and nerve bear their respective names, and in this edition color has been worked to advantage in bringing out the relationship of vessel and nerve. Of late years, many works on anatomy have been introduced to the profession, but as a reference book for the practical everyday physician, and as a text-book for the student, we think it will be difficult to supplant Gray.—*Buffalo Med. and Surg. Jour.*, Jan., 1894. It has thoroughly and completely established itself as the anatomy, par excellence.—*Brooklyn Medical Journal*, June, 1894.

It embraces the whole of human anatomy, and it particularly dwells on the practical or applied part of the subject, so that it forms a most useful, intelligible and practical treatise for the student and general practitioner.—*Dublin Journal of Medical Science*, December, 1893.

In modern times no book on any medical subject has held the position of a standard so long as Gray's Anatomy. For logical arrangement, clear, terse, pointed, and yet full description, it is the peer of any work on any scientific subject. A pioneer in helpful drawings, it is still in the van and leads in every improvement. Indeed, it is of

itself a complete atlas of anatomy. Dear to so many thousands for old and helpful associations, it will be no hard task for Gray to remain in the lead so long as it shall find revisers comparable in aptitude to the present editor. The physician or student who requires but one work on anatomy will not need to ask which, nor will those who will have more than one need to ask which one to add. The work is admitted to be easily first on anatomy in any language.—*The American Practitioner and News*, June, 1894.

Gray's has been the unvarying standard for anatomical study by the vast majority of English-speaking medical students for so long that it would seem an anomaly to see a student acquire such knowledge from some other source.—*Medical Fortnightly*, February, 1894.

Few treatises can claim such a record of endurance of usefulness. To say that it still maintains its reputation is to give it the highest compliment within the range of the critic's privilege. It has grown and strengthened with the advancements and requirements of the modern knowledge of anatomy, enlarging its scope for newer adaptations in surgery and physiology.—*Medical Record*, March 3, 1894.

HOBLYN'S DICTIONARY OF MEDICINE. A Dictionary of the Terms Used in Medicine and the Collateral Sciences. By RICHARD D. HOBLYN, M. D. In one large royal 12mo. volume of 620 double-columned pages. Cloth, \$1.50; leather, \$2.00.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

HUMAN MONSTROSITIES

BY BARTON C. HIRST, M. D., AND GEORGE A. PIERSOL, M. D.

Professor of Obstetrics in the University of Pennsylvania.

Professor of Anatomy and Embryology in the University of Pennsylvania.

Magnificent folio, containing 220 pages of text, illustrated with engravings, and 39 full-page, photographic plates from nature. In four parts, price, each, \$5. Complete work just ready. Limited edition, for sale by subscription only. Address the Publishers.

We have before us the fourth and last part of the latest and best work on human monstrosities. This completes one of the masterpieces of American medical literature. Typographically and from an artistic standpoint, the work is unexceptionable. In this last and final volume is presented the most complete bibliography of teratological literature extant. No library will be complete without this magnificent work.—*Journal of the American Medical Assoc.*, May 6, 1893.

Altogether, *Human Monstrosities* is a satisfactory production. It will take its place as a standard work on teratology in medical libraries, and it

must always retain the honor of being the first of its kind written in the English language.—*The British Medical Journal*, May 27, 1893.

This work promises to be one for which a place must be found in the library of every anatomist, pathologist, obstetrician and teratologist. It is the joint production of an obstetrician, and an embryologist, and histologist, and this fact makes it certain that both the obstetric and anatomical sides of the subject will be fully represented and described. The book promises to be one of the greatest value to the English-speaking medical world.—*Edinburgh Medical Journal*, April, 1892.

Allen's System of Human Anatomy.

A System of Human Anatomy, Including Its Medical and Surgical Relations. For the use of Practitioners and Students of Medicine. By HARRISON ALLEN, M. D., Professor of Physiology in the University of Pennsylvania. With an Introductory Section on Histology by E. O. SHAKESPEARE, M. D., Ophthalmologist to the Philadelphia Hospital. Comprising 813 double-columned quarto pages, with 380 illustrations on 109 full page lithographic plates, many of which are in colors, and 241 engravings in the text. In six Sections, each in a portfolio. Price per Section, \$3.50; also bound in one volume, cloth, \$23.00; very handsome half Russia, raised bands and open back, \$25.00. For sale by subscription only. Address the Publishers.

Holden's Landmarks, Medical and Surgical.

Landmarks, Medical and Surgical. By LUTHER HOLDEN, F. R. C. S., Surgeon to St. Bartholomew's Hospital, London. Second American from the third and revised English ed., with additions by W. W. KEEN, M. D., Professor of Artistic Anatomy in the Penna. Academy of Fine Arts. In one 12mo. volume of 148 pages. Cloth, \$1.00.

Clarke & Lockwood's Dissector's Manual.

The Dissector's Manual. By W. B. CLARKE, F. R. C. S., and C. B. LOCKWOOD, F. R. C. S., Demonstrators of Anatomy at St. Bartholomew's Hospital Medical School, London. In one pocket-size 12mo. volume of 396 pages, with 49 illustrations. Limp cloth, red edges, \$1.50. See *Students' Series of Manuals*, page 30.

Messrs. Clarke and Lockwood have written a book that can hardly be rivalled as a practical aid to the dissector. Their purpose, which is "how to describe the best way to display the anatomical structure," has been fully attained. They excel in a lucidity of demonstration and graphic terseness of expression, which only a long training and

intimate association with students could have given. With such a guide as this, accompanied by so attractive a commentary as Treves' *Surgical Applied Anatomy* (same series), no student could fail to be deeply and absorbingly interested in the study of anatomy.—*New Orleans Medical and Surgical Journal*, April, 1894.

Treves' Surgical Applied Anatomy.

Surgical Applied Anatomy. By FREDERICK TREVES, F. R. C. S., Senior Demonstrator of Anatomy and Assistant Surgeon at the London Hospital. In one pocket-size 12mo. volume of 540 pages, with 61 illustrations. Limp cloth, red edges, \$2.00. See *Students' Series of Manuals*, p. 30.

Bellamy's Surgical Anatomy.

The Student's Guide to Surgical Anatomy: Being a Description of the most Important Surgical Regions of the Human Body, and intended as an Introduction to Operative Surgery. By EDWARD BELLAMY, F. R. C. S., Senior Assistant-Surgeon to the Charing-Cross Hospital. In one 12mo. vol. of 300 pages, with 50 illus. Cloth, \$2.25.

Wilson's Human Anatomy.

A System of Human Anatomy, General and Special. By ERASMUS WILSON, F. R. S. Edited by W. H. GOBRECHT, M. D., Professor of General and Surgical Anatomy in the Medical College of Ohio. In one large and handsome octavo volume of 616 pages, with 397 illustrations. Cloth, \$4.00; leather, \$5.00.

HARTSHORNE'S HANDBOOK OF ANATOMY AND PHYSIOLOGY. Second edition, revised. 12mo., 810 pages, 220 woodcuts. Cloth, \$1.75.

HORNER'S SPECIAL ANATOMY AND HISTOL-

OGY. Eighth edition. In two octavo volumes of 1907 pages, with 320 woodcuts. Cloth, \$6.00.
CLELAND'S DIRECTORY FOR THE DISSECTION OF THE HUMAN BODY. 12mo., 178 pp. Cloth, \$1.25.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Draper's Medical Physics.

Medical Physics. A Text-book for Students and Practitioners of Medicine. By JOHN C. DRAPER, M. D., LL. D., Prof. of Chemistry in the Univ. of the City of New York. In one octavo vol. of 734 pages, with 376 woodcuts, mostly original. Cloth, \$4.

No man in America was better fitted than Dr. Draper for the task he undertook and he has provided the student and practitioner of medicine with a volume at once readable and thorough. Even to the student who has some knowledge of physics this book is useful, as it shows him its applications to the profession that he has chosen. Dr. Draper, as an old teacher, knew well the diffi-

culties to be encountered in bringing his subject within the grasp of the average student, and that he has succeeded so well proves once more that the man to write for and examine students is the one who has taught and is teaching them. The book is well printed and fully illustrated, and in every way deserves grateful recognition.—*The Montreal Medical Journal*, July, 1890.

Reichert's Physiology.—Preparing.

A Text-Book on Physiology. By EDWARD T. REICHERT, M. D., Professor of Physiology in the University of Pennsylvania, Philadelphia. In one very handsome octavo volume of 800 pages, fully illustrated.

Power's Human Physiology.—Second Edition.

Human Physiology. By HENRY POWER, M. B., F. R. C. S., Examiner in Physiology, Royal College of England. Second edition. In one 12mo. vol. of 509 pp., with 68 illustrations. Cloth, \$1.50. See *Students' Series of Manuals*, p. 30.

Robertson's Physiological Physics.

Physiological Physics. By J. MCGREGOR ROBERTSON, M. A., M. B., Muirhead Demonstrator of Physiology, University of Glasgow. In one 12mo. volume of 587 pages, with 219 illus. Limp cloth, \$2. See *Students' Series of Manuals*, page 30.

The title of this work sufficiently explains the nature of its contents. It is designed as a manual for the student of medicine, an auxiliary to his text-book in physiology, and it would be particularly useful as a guide to his laboratory experi-

ments. It will be found of great value to the practitioner. It is a carefully prepared book of reference, concise and accurate, and as such we heartily recommend it.—*Journal of the American Medical Association*, Dec. 6, 1884.

Dalton on the Circulation of the Blood.

Doctrines of the Circulation of the Blood. A History of Physiological Opinion and Discovery in regard to the Circulation of the Blood. By JOHN C. DALTON, M. D., Professor Emeritus of Physiology in the College of Physicians and Surgeons, New York. In one handsome 12mo. volume of 293 pages. Cloth, \$2.

Dr. Dalton's work is the fruit of the deep research of a cultured mind, and to the busy practitioner it cannot fail to be a source of instruction. It will inspire him with a feeling of gratitude and admir-

ation for those plodding workers of olden times, who laid the foundation of the magnificent temple of medical science as it now stands.—*New Orleans Medical and Surgical Journal*, Aug. 1885.

Bell's Comparative Anatomy and Physiology.

Comparative Anatomy and Physiology. By F. JEFFREY BELL, M. A., Professor of Comparative Anatomy at King's College, London. In one 12mo. vol. of 561 pages, with 229 illustrations. Limp cloth, \$2. See *Students' Series of Manuals*, page 30.

The manual is preëminently a student's book—clear and simple in language and arrangement. It is well and abundantly illustrated, and is readable and interesting. On the whole we consider

it the best work in existence in the English language to place in the hands of the medical student.—*Bristol Medical-Chirurgical Journal*, Mar. 1886.

Ellis' Demonstrations of Anatomy.—Eighth Edition.

Demonstrations of Anatomy. Being a Guide to the Knowledge of the Human Body by Dissection. By GEORGE VINER ELLIS, Emeritus Professor of Anatomy in University College, London. From the eighth and revised London edition. In one very handsome octavo volume of 716 pages, with 249 illus. Cloth, \$4.25; leather, \$5.25.

Roberts' Compend of Anatomy.

The Compend of Anatomy. For use in the dissecting-room and in preparing for examinations. By JOHN B. ROBERTS, A. M., M. D., Lecturer in Anatomy in the University of Pennsylvania. In one 16mo. vol. of 198 pages. Limp cloth, 75 cents.

WÖHLER'S OUTLINES OF ORGANIC CHEMISTRY. Edited by FRIEDRICH. Translated by ISA REAGAN, M. D., Ph. D. In one 12mo. volume of 550 pages. Cloth, \$3.

LEHMANN'S MANUAL OF CHEMICAL PHYSIOLOGY. In one octavo volume of 327 pages, with 41 illustrations. Cloth, \$2.25.

CARPENTER'S HUMAN PHYSIOLOGY. Edited by HENRY POWER. In one octavo volume.
CARPENTER'S PRIZE ESSAY ON THE USE AND ABUSE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE. With explanations of scientific words. Small 12mo. 178 pages. Cloth, 60 cents.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Foster's Physiology.—New (5th) American Ed. Just Ready.

Text-Book of Physiology. By MICHAEL FOSTER, M. D., F. R. S., Prelector in Physiology and Fellow of Trinity College, Cambridge, England. New (fifth) and enlarged American from the fifth and revised English edition, with notes and additions. In one handsome octavo vol. of 1064 pages, with 316 illus. Cloth, \$4.50; leather, \$5.50.

It is unquestionably the standard text book on physiology for students and practitioners. The moderate price of this well-issued book at once shows how popular the work has become. The style is plain enough even for the beginner; the details are sufficient for the teacher; and the manner of dealing with the topics are well-arranged for the advantage of the practitioner.—*Virginia Medical Monthly*, January, 1894.

We have nothing but words of the highest praise for the classical and thorough manner in which the work is written, as well as the liberality of the publishers for selling such a large work, and one which must necessarily be very costly to produce, for an extremely moderate price.—*The Canada Medical Record*, March, 1894.

One cannot read a single chapter without being impressed with the care that the author has be-

stowed upon it. Apparently nothing that is known up to the present year concerning vital processes has escaped his painstaking attention. The details receive the fullest consideration. The additions which have been made to this last edition are caused by an effort to explain more fully and at greater length what seemed to be the most fundamental and important topics. The publishers have subjected it to the searching revision of one of the foremost American professors of physiology. We have nothing but words of the highest praise for the classical and thorough manner in which the work is written, as well as for the liberality of the publishers for selling such a large work, and one which must necessarily be very costly to produce, for an extremely moderate price.—*The Canada Medical Record*, March, 1894.

Dalton's Physiology.—Seventh Edition.

A Treatise on Human Physiology. Designed for the use of Students and Practitioners of Medicine. By JOHN C. DALTON, M. D., Professor of Physiology in the College of Physicians and Surgeons, New York, etc. Seventh edition, thoroughly revised and rewritten. In one very handsome octavo volume of 722 pages, with 252 beautiful engravings on wood. Cloth, \$5.00; leather, \$6.00.

From the first appearance of the book it has been a favorite, owing as well to the author's renown as an oral teacher as to the charm of simplicity with which, as a writer, he always succeeds in investing even intricate subjects. It must be gratifying to him to observe the frequency with which his work, written for students and practitioners, is quoted by other writers on physiology. This fact attests its value, and, in great measure, its originality. It now needs no such seal of approbation, however, for the thousands who have studied it in its various editions

have never been in any doubt as to its sterling worth.—*N. Y. Medical Journal*, Oct. 1882.

Professor Dalton's well-known and deservedly-appreciated work has long passed the stage at which it could be reviewed in the ordinary sense. The work is eminently one for the medical practitioner, since it treats most fully of those branches of physiology which have a direct bearing on the diagnosis and treatment of disease. The work is one which we can highly recommend to all our readers.—*Dublin Journal of Medical Science*, Feb. '83.

Chapman's Human Physiology.

A Treatise on Human Physiology. By HENRY C. CHAPMAN, M. D., Professor of Institutes of Medicine in the Jefferson Medical College of Philadelphia. In one octavo volume of 925 pages, with 605 engravings. Cloth, \$5.50; leather, \$6.50.

It represents very fully the existing state of physiology. The present work has a special value to the student and practitioner as devoted more to the practical application of well-known truths which the advance of science has given to the profession in this department, which may be considered the foundation of rational medicine.—*Buffalo Medical and Surgical Journal*, Dec. 1887.

Matters which have a practical bearing on the practice of medicine are lucidly expressed; tech-

nical matters are given in minute detail; elaborate directions are stated for the guidance of students in the laboratory. In every respect the work fulfils its promise, whether as a complete treatise for the student or for the physician; for the former it is so complete that he need look no farther, and the latter will find entertainment and instruction in an admirable book of reference.—*North Carolina Medical Journal*, Nov. 1887.

Schofield's Elementary Physiology.

Elementary Physiology for Students. By ALFRED T. SCHOFIELD, M. D., Late House Physician London Hospital. In one 12mo. volume of 380 pages, with 227 engravings and 2 colored plates containing 30 figures. Cloth, \$2.00.

Frankland & Japp's Inorganic Chemistry.

Inorganic Chemistry. By E. FRANKLAND, D. C. L., F. R. S., Professor of Chemistry in the Normal School of Science, London, and F. R. JAPP, F. I. C., Assistant Professor of Chemistry in the Normal School of Science, London. In one handsome octavo volume of 677 pages with 51 woodcuts and 2 plates. Cloth, \$3.75; leather, \$4.75.

Clowes' Qualitative Analysis.—Third Edition.

An Elementary Treatise on Practical Chemistry and Qualitative Inorganic Analysis. Specially adapted for use in the Laboratories of Schools and Colleges and by Beginners. By FRANK CLOWES, D. Sc., London, Senior Science-Master at the High School, Newcastle-under-Lyme, etc. Third American from the fourth and revised English edition. In one 12mo. vol. of 387 pages, with 55 illus. Cloth, \$2.50.

CLASSEN'S ELEMENTARY QUANTITATIVE ANALYSIS. Translated, with notes and additions, by EDGAR F. SMITH, Ph. D., Assistant Pro-

fessor of Chemistry in the Towne Scientific School, University of Penna. In one 12mo. volume of 324 pages, with 86 illus. Cloth, \$2.00.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Attfeld's Chemistry.—New (14th) Edition. Just Ready.

Chemistry, General, Medical and Pharmaceutical; Including the Chemistry of the U. S. Pharmacopoeia. A Manual of the General Principles of the Science, and their Application to Medicine and Pharmacy. By JOHN ATTFIELD, M. A., Ph. D., F. I. C., F. R. S., etc., Professor of Practical Chemistry to the Pharmaceutical Society of Great Britain, etc. Fourteenth edition, specially revised by the Author for America, to accord with the new U. S. Pharmacopoeia. In one 12mo. volume of 794 pages, with 88 illustrations. Cloth, \$2.75; leather, \$3.25.

A notice of the previous issue is appended.

Attfeld's Chemistry is the most popular book among students of medicine and pharmacy. This popularity rests upon real merits. Attfeld's work combines in the happiest manner a clear exposition of the theory of chemistry with the practical application of this knowledge to the everyday dealings of the physician and pharmacist. His book is precisely what the title claims for it. The admirable arrangement of the text enables a reader to get a good idea of chemistry without the aid of experiments, and again it is a good

laboratory guide, and finally it contains such a mass of well-arranged information that it will always serve as a handy book of reference. He does not allow any unutilizable knowledge to slip into his book; his long years of experience have produced a work which is both scientific and practical, and which shuts out everything in the nature of a superfluity, and therein lies the secret of its success. This last edition shows the marks of the latest progress made in chemistry and chemical teaching.—*New Orleans Med. and Surg. Jour.*

Simon's Chemistry.—New (4th) Edition.

Manual of Chemistry. A Guide to Lectures and Laboratory work for Beginners in Chemistry. A Text-book, specially adapted for Students of Pharmacy and Medicine. By W. SIMON, Ph. D., M. D., Professor of Chemistry and Toxicology in the College of Physicians and Surgeons, Baltimore, and Professor of Chemistry in the Maryland College of Pharmacy. New (4th) edition. In one 8vo. vol. of 490 pp., with 44 woodcuts and 7 colored plates illustrating 56 of the most important chemical tests. Cloth, \$3.25.

A work which rapidly passes to its fourth edition needs no further proof of having achieved a success. In the present case the claims to favor are obvious. Emanating from an experienced teacher of medical and pharmaceutical students the volume is closely adapted to their needs. This is shown not only by the careful selection and clear presentation of its subject matter, but by the colored plates of reactions, which form a unique feature. Every teacher will appreciate the saving of his own time, and the advantages accruing to the student from a permanent and accurate stan-

dard of comparison for tests depending on colors, and frequently upon their changes. To the practitioner, who is likely to be confronted at any time with important pathological or toxicological questions to be answered by the test-tube, the volume will be of the utmost value. Such it has proved in the past, and the author has accordingly been enabled, through frequent and thorough revisions to keep his work constantly in touch with the progress of its science and the best methods of its presentation.—*Kansas City Medical Index*, May, 1893.

Fownes' Chemistry.—Twelfth Edition.

A Manual of Elementary Chemistry; Theoretical and Practical. By GEORGE FOWNES, Ph. D. Embodying WATTS' *Physical and Inorganic Chemistry*. New American from the twelfth English edition. In one large royal 12mo. volume of 1061 pages, with 168 engravings and a colored plate. Cloth, \$2.75; leather, \$3.25.

Fownes' Chemistry has been a standard text-book upon chemistry for many years. Its merits are very fully known by chemists and physicians everywhere in this country and in England. As the science has advanced by the making of new discoveries, the work has been revised so as to keep it abreast of the times. It has steadily maintained its position as a text-book with medi-

cal students. In this work are treated fully: Heat, Light and Electricity, including Magnetism. The influence exerted by these forces in chemical action upon health and disease, etc., is of the most important kind, and should be familiar to every medical practitioner. We can commend the work as one of the very best text-books upon chemistry extant.—*Cincinnati Med. News*, Oct. '85.

Bloxam's Chemistry.—Fifth Edition.

Chemistry, Inorganic and Organic. By CHARLES L. BLOXAM, Professor of Chemistry in King's College, London. New American from the fifth London edition, thoroughly revised and much improved. In one very handsome octavo volume of 727 pages, with 292 illustrations. Cloth, \$2.00; leather, \$3.00.

Comment from us on this standard work is almost superfluous. It differs widely in scope and aim from that of Attfeld, and in its way is equally beyond criticism. It adopts the most direct methods in stating the principles, hypotheses and facts of the science. Its language is so terse and lucid, and its arrangement of matter so logical in sequence that the student never has occasion to

complain that chemistry is a hard study. Much attention is paid to experimental illustrations of chemical principles and phenomena, and the mode of conducting these experiments. The book maintains the position it has always held as one of the best manuals of general chemistry in the English language.—*Detroit Lancet*, Feb. 1884.

Luff's Manual of Chemistry.

A Manual of Chemistry. For the use of students of medicine. By ARTHUR P. LUFF, M. D., B. Sc., Lecturer on Medical Jurisprudence and Toxicological Chemistry, St. Mary's Hospital Medical School, London. In one 12mo. vol. of 522 pages, with 86 engravings. Cloth, \$2.00. See *Students' Series of Manuals*, page 30.

Greene's Manual of Medical Chemistry. For the use of Students. By WILLIAM H. GREENE, M. D., Demonstrator of Chemistry in the University of Pennsylvania. In one 12mo. volume of 310 pages, with 74 illus. Cloth, \$1.75.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Caspari's Pharmacy.—In Press for Early Issue.

A Text-Book on Pharmacy, for Students and Pharmacists. By CHARLES CASPARI, JR., Ph. G., Professor of the Theory and Practice of Pharmacy in the Maryland College of Pharmacy, Joint Editor of *The National Dispensatory* of 1894. In one very handsome octavo volume, richly illustrated.

The author is widely known as joint editor of *The National Dispensatory* (see next page) and as Professor of Pharmacy in one of the foremost pharmaceutical colleges in America. He is therefore exceptionally qualified to prepare a work of the highest merit, both as a text-book for students, and as a practical reference for pharmacists in all the multifarious details of their operations. Modern in every particular; convenient in size through avoidance of obsolete and unnecessary matter, richly illustrated and issued at a reasonable price. *Caspari's Pharmacy* is equally assured of immediate popularity with pharmacists and of adoption as the standard text-book for pharmaceutical students. It will be issued in ample season for the fall terms of the colleges.

Vaughan & Novy on Ptomaines and Leucomaines.—2d Edition.

Ptomaines, Leucomaines and Bacterial Proteids; or the Chemical Factors in the Causation of Disease. By VICTOR C. VAUGHAN, Ph. D., M. D., Professor of Physiological and Pathological Chemistry, and Associate Professor of Therapeutics and Materia Medica in the University of Michigan, and FREDERICK G. NOVY, M. D., Instructor in Hygiene and Physiological Chemistry in the University of Michigan. New (second) edition. In one handsome 12mo. vol. of 389 pages. Cloth, \$2.25.

This book is one that is of the greatest importance, and the modern physician who accepts bacterial pathology cannot have a complete knowledge of this subject unless he has carefully perused it. To the toxicologist the subject is alike of great import, as well as to the hygienist

and sanitarian. It contains information which is not easily obtained elsewhere, and which is of a kind that no medical thinker should be without.—*The American Journal of the Medical Sciences*, April, 1892.

Remsen's Theoretical Chemistry.—Fourth Edition.

Principles of Theoretical Chemistry, with special reference to the Constitution of Chemical Compounds. By IRA REMSEN, M. D., Ph. D., Professor of Chemistry in the Johns Hopkins University, Baltimore. Fourth and thoroughly revised edition. In one handsome royal 12mo. volume of 325 pages. Cloth, \$2.00.

The fourth edition of Professor Remsen's well-known book comes again, enlarged and revised. Each edition has enhanced its value. We may say without hesitation that it is a standard work on the theory of chemistry, not excelled and scarcely equalled by any other in any language. Its trans-

lation into German and Italian speaks for its exalted position and the esteem in which it is held by the most prominent chemists. We claim for this little work a leading place in the chemical literature of this country.—*The American Journal of the Medical Sciences*, July, 1893.

Charles' Physiological and Pathological Chemistry.

The Elements of Physiological and Pathological Chemistry. A Handbook for Medical Students and Practitioners. Containing a general account of Nutrition, Foods and Digestion, and the Chemistry of the Tissues, Organs, Secretions and Excretions of the Body in Health and in Disease. Together with the methods for preparing or separating their chief constituents, as also for their examination in detail, and an outline syllabus of a practical course of instruction for students. By T. CRANSTOWN CHARLES, M. D., F. R. S., M. S., formerly Assistant Professor and Demonstrator of Chemistry and Chemical Physics, Queen's College, Belfast. In one handsome octavo volume of 463 pages, with 38 woodcuts and 1 colored plate. Cloth, \$3.50.

Dr. Charles is fully impressed with the importance and practical reach of his subject, and he has treated it in a competent and instructive manner. We cannot recommend a better book than the present. In fact, it fills a gap in medical text-books, and that is a thing which can rarely be said

nowadays. Dr. Charles has devoted much space to the elucidation of urinary mysteries. He does this with much detail, and yet in a practical and intelligible manner. In fact, the author has filled his book with many practical hints.—*Medical Record*, December 20, 1884.

Hoffmann and Powers' Medicinal Analysis.

A Manual of Chemical Analysis, as applied to the Examination of Medicinal Chemicals and their Preparations. Being a Guide for the Determination of their Identity and Quality, and for the Detection of Impurities and Adulterations. For the use of Pharmacists, Physicians, Druggists and Manufacturing Chemists, and Pharmaceutical and Medical Students. By FREDERICK HOFFMANN, A. M., Ph. D., Public Analyst to the State of New York, and FREDERICK B. POWER, Ph. D., Professor of Analytical Chemistry in the Philadelphia College of Pharmacy. Third edition, entirely rewritten and much enlarged. In one octavo volume of 621 pages, with 179 illustrations. Cloth, \$4.25.

Ralfe's Clinical Chemistry.

Clinical Chemistry. By CHARLES H. RALFE, M. D., F. R. C. P., Assistant Physician at the London Hospital. In one pocket-size 12mo. volume of 314 pages, with 16 illus. Limp cloth, red edges, \$1.50. See *Students' Series of Manuals*, page 30.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

JUST READY—NEW AND THOROUGHLY REVISED EDITION.

The National Dispensatory.

Containing the Natural History, Chemistry, Pharmacy, Actions and Uses of Medicines, including those recognized in the Pharmacopœias of the United States, Great Britain and Germany, with numerous references to the French Codex. By ALFRED STILLÉ, M. D., LL. D., Professor Emeritus of the Theory and Practice of Medicine and of Clinical Medicine in the University of Pennsylvania, JOHN M. MAISCH, Ph. D., late Professor of Materia Medica and Botany in Philadelphia College of Pharmacy, Secretary to the American Pharmaceutical Association, CHARLES CASPARI, JR., Ph. G., Professor of Pharmacy in the Maryland College of Pharmacy, Baltimore, and HENRY C. C. MAISCH, Ph. G., Ph. D. New (fifth) edition, thoroughly revised in accordance with the new U. S. Pharmacopœia (Seventh Decennial Revision, 1894). In one magnificent imperial octavo volume of 1910 pages, with 320 engravings. Cloth, \$7.25; leather, \$8.00. With Ready Reference Thumb letter Index, cloth, \$7.75; leather, \$8.50.

ON the first appearance of *The National Dispensatory* fifteen years ago it was at once recognized by the pharmaceutical and medical professions as satisfying the need for a work affording all necessary information upon its subject, with authoritative accuracy, and with a completeness and convenience attainable only by the exclusion of obsolete matter. Its success in filling this want is fully attested by the rapid demand for five editions, and the opportunity thus afforded has been well used in successive revisions, each placing it abreast of the day and maintaining the characteristics which had won for it a leading position.

Of all its issues the present embodies the results of the most exhaustive revision. The sweeping changes in the new United States Pharmacopœia are thoroughly incorporated, with official authorization of the Committee of Revision, and full use has been made of all valuable material in the latest issues of foreign Pharmacopœias. The volume is accordingly rich in pharmaceutical and chemical information, with data, formulas, tables, etc., gathered from all official sources, but this constitutes only a single department of its usefulness. As an encyclopædia of the latest and best therapeutical knowledge it deals not only with all official drugs, but also with all the new synthetic remedies of value and with the unofficial preparations now so largely in use. Pharmacists will appreciate its systematic descriptions of the materia medica, its clear explanations of chemical and pharmaceutical processes and tests, and its illustrations of important drugs and of the most improved apparatus. Physicians will readily perceive the indispensable assistance offered by its authoritative statements as to the efficacy of drugs in the light of the most recent medical advances. Arranged alphabetically in the text, this information is placed most suggestively at command by the recommendations grouped under the various Diseases in the Therapeutical Index. Together with the General Index this covers more than one hundred treble-columned pages containing 25,000 references. The immensity of detail comprised in this single volume of 1900 pages is thus most forcibly indicated. Though the present edition contains far more matter than its predecessor it is maintained at the same price in view of the ever-increasing demand. Weights and Measures are given in both Ordinary and Metric Systems.

In brief the new edition of *The National Dispensatory* is presented to the medical and pharmaceutical professions as the equivalent of a whole library of pharmaceutical and therapeutical information; it is the standard of accuracy, the embodiment of completeness without inconvenient bulk, and a marvel of cheapness owing to the widespread demand for it as the authority.

The careful examination of this large volume will strike the reader with surprise at the great number of new articles added, and the amount of useful and accurate information regarding their properties, methods of preparation and therapeutical effects. The large number of new articles containing all the latest synthetic remedies and unofficial remedies, compass the entire range of available information in the line of the work. A number of very complete tables together with all the official re-agents and solutions for qualitative and quantitative tests, appear in the appendix. Altogether this work maintains its previous high reputation for accuracy, practical usefulness and encyclopædic scope, and is indispensable alike to the pharmacist and physician. Every druggist knows of it and uses it, and almost every physician properly consults it when desirous of settling all doubtful questions regarding the properties, preparation and uses of drugs.—*Medical Record*, April 7, 1894.

The descriptions of materia medica are clear, thorough and systematic, as are also the explanations of chemical and pharmaceutical processes

and tests. The therapeutical portion has been revised with equal care and the statements of the action and uses have been arranged not only alphabetically under the various drugs, but for practical medical usefulness have also been placed at the instant command of those seeking information in the treatment of special diseases by being arranged under the various diseases in a therapeutical index. The readiness with which any of the vast amount of information contained in this work is made available is indicated by the twenty-five thousand references in the two indexes at the end of the volume.—*Boston Medical and Surgical Journal*, April, 1894.

It is the official guide for the medical and pharmaceutical professions.—*Buffalo Medical and Surgical Journal*, March, 1894.

The book is recommended most highly as a book of reference for the physician and is invaluable to the druggist in his every-day work.—*The Therapeutic Gazette*, March, 1894.

This edition of the Dispensatory should be recognized as a national standard.—*The North American Practitioner*, March, 1894.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Hare's Text-Book of Practical Therapeutics.—New (4th) Edition.

A Text-Book of Practical Therapeutics; With Especial Reference to the Application of Remedial Measures to Disease and their Employment upon a Rational Basis. By HOBART AMORY HARE, M. D., Professor of Therapeutics and Materia Medica in the Jefferson Medical College of Philadelphia; Sec. of Convention for Revision of U. S. Pharmacopoeia of 1890. With special chapters by Drs. G. E. DE SCHWEINITZ, EDWARD MARTIN and BARTON C. HIRST. New (4th) and revised edition. In one octavo volume of 740 pages. Cloth, \$3.75; leather, \$4.75. Just ready.

A notice of the previous issue is appended.

The student of other works, has often, indeed, very often, longed for less of the abstract materia medica and more of the practical application of drugs to disease. In this work that want is filled. The drugs are arranged alphabetically, which enables one to find any name quickly, and, with the excellent index at the end of the volume, naught is left to be desired in the way of quick reference. Each drug, including all the newer remedies which have been proved to possess true merit, is considered in a rational and scientific manner. This work also presents us with nearly 250 pages of practical therapeutics, as applied to the individual diseases. The subjects are arranged alphabetically. It is in the chapter on Diseases that the student finds the rationale of therapeutics. This section is properly the complement of the former, in which each drug was

presented with notes as to its usefulness in numerous diseases, while in the latter each disease is considered very fully from a therapeutical standpoint, the applications and special indications of the different remedies in the different phases of that particular affection being given. It is not a wonder that this work was quickly adopted by many colleges as a text-book and so liberally purchased as to necessitate the publication of a third edition within two years. The student will find its pages filled with the choicest therapeutical lore, systematically arranged and clearly and forcibly presented: the practitioner will appreciate its rationality and its general utility as an elbow consultant. It contains, without question, the best exposition of modern therapeutics of any text-book with which we are acquainted.—*The Chicago Clinical Review.*

A System of Practical Therapeutics

BY AMERICAN AND FOREIGN AUTHORS.

Edited by HOBART AMORY HARE, M. D.

Professor of Therapeutics and Materia Medica in the Jefferson Medical College of Philadelphia.

In a series of contributions by seventy-eight eminent authorities. In three large octavo volumes of 3544 pages, with 434 illustrations. Price, per volume: Cloth, \$5.00; leather, \$6.00; half Russia, \$7.00. For sale by subscription only. Address the Publishers. Full prospectus free to any address on application.

The various divisions have been elaborated by men selected in view of their special fitness. In every case there is to be found a clear and concise description of the disease under consideration, corresponding with the most recent and well-established views of the subject, embracing appropriate pictorial illustrations where these are necessary. In treating of the employment of remedies and therapeutical measures, the writers have been singularly happy in giving in a definite way the exact methods employed and the results obtained, both by themselves and others, so that one might venture with confidence to use remedies with which he was previously entirely unfamiliar. The practitioner could hardly desire a book on practical therapeutics which he could consult with more interest and profit.—*The North American Practitioner*, September, 1892.

The scope of this work is beyond that of any previous one on the subject. The goal, after all,

is the treatment of disease, and a work which contributes to its successful management is to be looked upon as of vast use to humanity. It cannot be denied that therapeutic resources, whether the treatment be confined to the mere administration of drugs, or allowed its more extended application to the management of disease, have so greatly multiplied within the last few years as to render previous treatises of little value. Herein will be found the great value of Hare's encyclopedic work, which groups together within a single series of volumes the most modern methods known in the management of disease, and especially deals with important subjects comprehensively, which could not be done in a more limited treatise. We cannot commend Hare's *System of Practical Therapeutics* too highly; it stands out first and foremost as a work to be consulted by authors, teachers, and physicians, throughout the world.—*Buffalo Med. and Surg. Jour.*, Aug. 1892.

Maisch's Materia Medica.—Fifth Edition.

A Manual of Organic Materia Medica; Being a Guide to Materia Medica of the Vegetable and Animal Kingdoms. For the Use of Students, Druggists, Pharmacists and Physicians. By JOHN M. MAISCH, Phar. D., Prof. of Materia Medica and Botany in the Philadelphia College of Pharmacy. New (fifth) edition, thoroughly revised. In one very handsome 12mo. volume of 544 pages, with 270 engravings. Cloth, \$3.00.

This is an excellent manual of organic materia medica, as are all the works that emanate from the skilful pen of such a successful teacher as John M. Maisch. The book speaks for itself in the most forcible language. In the edition before us which is the fifth one published within the comparatively short space of eight years (and this is the best proof of the great value of the work and the just favor with which it has been received and accepted), the original contents have been thoroughly revised and much good and new matter has been incorporated. We have nothing but praise for Professor Maisch's work. It presents no weak

point, even for the most severe critic. The book fully sustains the wide and well-earned reputation of its popular author. In the special line of work of which it treats it is fully up to the most recent observations and investigations. After a careful perusal of the book, we do not hesitate to recommend Maisch's *Manual of Organic Materia Medica* as one of the best, if not the best work on the subject thus far published. Its usefulness cannot well be dispensed with, and students, druggists, pharmacists and physicians should all possess a copy of such a valuable book.—*Medical News*, December 31, 1892.

Edes' Therapeutics and Materia Medica.

A Text-Book of Therapeutics and Materia Medica. Intended for the Use of Students and Practitioners. By ROBERT T. EDES, M. D., Jackson Professor of Clinical Medicine in Harvard University. Octavo, 544 pp. Cloth, \$3.50; leather, \$4.50.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

NEW (7TH) EDITION. JUST READY.

FLINT'S PRACTICE OF MEDICINE

A Treatise on the Principles and Practice of Medicine. Designed for the use of Students and Practitioners of Medicine. By AUSTIN FLINT, M. D., LL. D., Professor of the Principles and Practice of Medicine, and of Clinical Medicine in Bellevue Hospital Medical College, N. Y. New (7th) edition, thoroughly revised by FRANK ERICK P. HENRY, M. D., Professor of Principles and Practice of Medicine in the Woman's Medical College of Pennsylvania, Philadelphia. In one very handsome octavo volume of 1143 pages, with illustrations. Cloth, \$5.00; leather, \$6.00.

A notice of the previous edition is appended.

No text-book on the principles and practice of medicine has ever met in this country with such general approval by medical students and practitioners as the work of Professor Flint. In all the medical colleges of the United States it is the favorite work upon Practice; and, as we have stated before in alluding to it, there is no other medical work that can be so generally found in the libraries of physicians. In every state and territory of this vast country the book that will be most likely to be found in the office of a medical man, whether

in city, town, village, or at some cross-roads, is Flint's *Practice*. We make this statement to a considerable extent from personal observation, and it is the testimony also of others. An examination shows that very considerable changes have been made in the sixth edition. The work may undoubtedly be regarded as fairly representing the present state of the science of medicine, and as reflecting the views of those who exemplify in their practice the present stage of progress of medical art.—*Cincinnati Medical News.*

Hartshorne's Essentials of Practice.—Fifth Edition.

Essentials of the Principles and Practice of Medicine. A Handbook for Students and Practitioners. By HENRY HARTSHORNE, M. D., LL. D., lately Professor of Hygiene in the University of Pennsylvania. Fifth edition, thoroughly revised and rewritten. In one 12mo. vol. of 669 pages, with 144 illus. Cloth, \$2.75; half leather, \$3.

Farquharson's Therapeutics and Materia Medica.—4th Ed.

A Guide to Therapeutics and Materia Medica. By ROBERT FARQUHARSON, M. D., F. R. C. P., LL. D., Lecturer on Materia Medica at St. Mary's Hospital Medical School, London. Fourth American, from the fourth English edition. Enlarged and adapted to the U. S. Pharmacopoeia. By FRANK WOODBURY, M. D., Professor of Materia Medica and Therapeutics and Clinical Medicine in the Medico-Chirurgical College of Philadelphia. In one handsome 12mo. vol. of 581 pp. Cloth, \$2.50.

It may correctly be regarded as the most modern work of its kind. It is concise, yet complete. Containing an account of all remedies that have a place in the British and United States Pharma-

copias, as well as considering all non-official but important new drugs, it becomes in fact a miniature dispensatory.—*Pacific Medical Journal*, June, 1893.

Bruce's Materia Medica and Therapeutics.—Fifth Edition.

Materia Medica and Therapeutics. An Introduction to Rational Treatment. By J. MITCHELL BRUCE, M. D., F. R. C. P., Physician and Lecturer on Materia Medica and Therapeutics at Charing-Cross Hospital, London. Fifth edition. In one 12mo. volume of 591 pages. Cloth, \$1.50. See *Students' Series of Manuals*, page 30.

The pharmacology and therapeutics of each drug are given with great fulness, and the indications for its rational employment in the practical treatment of disease are pointed out. The *Materia Medica* proper contains all that is necessary for a medical student to know at the present day. The third

part of the book contains an outline of general therapeutics, each of the symptoms of the body being taken in turn, and the methods of treatment illustrated. A lengthy notice of a book so well known is unnecessary.—*Med. Chronicle*, May, 1891.

COHEN'S HANDBOOK OF APPLIED THERAPEUTICS. Being a Study of Principles Applicable and an Exposition of Methods Employed in the Management of the Sick. By SOLOMON SOLIS COHEN, M. D., Professor of Clinical Medicine and Applied Therapeutics in the Philadelphia Polytechnic. In one large 12mo. volume, with illustrations. *Preparing.*

REYNOLDS' SYSTEM OF MEDICINE. With notes and additions by HENRY HARTSHORNE, A. M., M. D. Three octavo volumes, containing 3056 double-columned pages, with 317 illustrations. Price per volume, cloth, \$5.00; sheep, \$6.00; half Russia, \$6.50. *Subscription only.*

WATSON'S LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC. Edited with additions, and 196 illustrations, by HENRY HARTSHORNE, A. M., M. D. In two large octavo volumes of 1840 pages. Cloth, \$9.00; leather, \$11.00.

FLINT'S PRACTICAL TREATISE ON THE DIAGNOSIS, PATHOLOGY AND TREATMENT OF DISEASES OF THE HEART. Second revised and enlarged edition. In one octavo volume of 550 pages, with a plate. Cloth, \$4.

FLINT ON PHTHISIS. In one octavo volume of 442 pages. Cloth, \$3.50.

FLINT'S ESSAYS ON CONSERVATIVE MEDICINE AND KINDRED TOPICS. In one very handsome royal 12mo. volume of 210 pages. Cloth, \$1.33.

LYONS' TREATISE ON FEVER. In one 8vo. volume of 324 pages. Cloth, \$2.25.

HUDSON'S LECTURES ON THE STUDY OF FEVER. In one octavo volume of 308 pages. Cloth, \$2.50.

LA ROCHE ON YELLOW FEVER, in its Historical, Pathological, Etiological and Therapeutical Relations. Two octavo vols., 1468 pp. Cloth, \$7.00.

BRUNTON'S PHARMACOLOGY, THERAPEUTICS AND MATERIA MEDICA. Octavo, 1305 pages, 230 illustrations.

HERMANN'S EXPERIMENTAL PHARMACOLOGY. A Handbook of Methods for Determining the Physiological Action of Drugs. Translated, with the Author's permission, and with extensive additions, by R. M. SMITH, M. D. 12mo., 199 pages, with 32 illustrations. Cloth, \$1.50.

STILLE'S THERAPEUTICS AND MATERIA MEDICA. A Systematic Treatise on the Action and Uses of Medicinal Agents, including their Description and History. Fourth edition, revised and enlarged. In two octavo volumes, containing 1933 pages. Cloth, \$10.00; leather, \$12.00.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Lyman's Practice of Medicine.

The Principles and Practice of Medicine. For the Use of Medical Students and Practitioners. By HENRY M. LYMAN, M.D., Professor of the Principles and Practice of Medicine, Rush Medical College, Chicago. In one very handsome octavo volume of 925 pages, with 170 illustrations. Cloth, \$4.75; leather, \$5.75.

Professor Lyman's valued and extensive experience here reduced in text-book form, is indeed very valuable both to college students and physicians. In this work we have an excellent treatise on the practice of medicine, written by one who is not only familiar with his subject, but who has also learned through practical experience in teaching what are the needs of the student and how to present the facts to his mind in the most readily assimilable form. Each subject is taken up in order, treated clearly but briefly, and dismissed when all has been said that need be said in order to give the reader a clear-cut picture of the disease under discussion. The reader is not confused by having presented to him a variety of different methods of treatment, among which he is left to choose the one most easy of execution, but the author describes the one which is, in his judgment, the best. This is as it should be. The student and even the practitioner, should be taught the most approved method of treatment. The practical and busy physician, who wants to

ascertain in a short time all the necessary facts concerning the pathology or treatment of any disease will find here a safe and convenient guide.—*The Charlotte Medical Journal*, February, 1894.

The reader of the above volume will be at once struck with its excellence. Its contents are complete and concise, it is fully abreast with the times, and is such a book as is needed by students and practitioners. The average doctor has neither the time nor the patience to read through the pages of an encyclopedia to gain the points he desires. This practice will give him all the necessary information in a form easily grasped. The parts of chapters relating to differential diagnosis leave nothing to be desired; they show the author's familiarity with his subjects, and his methods as a teacher. Evidently the points are not culled from other volumes; they bear the stamp of originality. In a word, the volume is up to date, is readable and instructive, and is far superior to the majority of books of the kind.—*University Medical Magazine*, April, 1893.

The Year-Book of Treatment for 1894.—Just Ready.

A Comprehensive and Critical Review for Practitioners of Medicine and Surgery. In one 12mo. vol. of 501 pages. Cloth, \$1.50.

** For special commutations with periodicals see pages 1 and 2.

This is the tenth year of this valuable work, which comes to hand with unerring regularity. It would be difficult indeed to imagine a book more nearly suited to the every-day needs of the medical practitioner or writer than this. The contributors to this volume are among the most prominent and well-known writers and teachers of the day, and their articles and opinions will be appreciated by all who are fortunate and wise

enough to secure them. It is the very book the busy practitioner needs. He can find anything pertaining to any subject in a moment's time, and he may rest assured that it is the most modern and reliable view now accepted. It, year by year, keeps him apprised of important advances in all branches of medicine, and presents them in a well-condensed and classified form.—*The Charlotte Medical Journal*, April, 1894.

The Year-Books of Treatment for 1891, 1892 and 1893.

12mos., 485 pages. Cloth, \$1.50 each.

The Year-Books of Treatment for 1886 and 1887.

Similar to above. 12mos., 320-341 pages. Cloth, \$1.25 each.

A System of Practical Medicine.

BY AMERICAN AUTHORS.

EDITED BY WILLIAM PEPPER, M. D., LL. D.,

PROVOST AND PROFESSOR OF THE THEORY AND PRACTICE OF MEDICINE AND OF CLINICAL MEDICINE IN THE UNIVERSITY OF PENNSYLVANIA.

The complete work, in five volumes, containing 5573 pages, with 198 illus., is now ready. Price per vol., cloth, \$5; leather, \$6; half Russia, \$7. Subscription only. Apply to the Publishers.

Habershon on the Abdomen.

On the Diseases of the Abdomen; Comprising those of the Stomach, and other parts of the Alimentary Canal, Oesophagus, Cæcum, Intestines and Peritoneum. By S. O. HABERSHON, M. D., Senior Physician to and late Lecturer on Principles and Practice of Medicine at Guy's Hospital, London. Second American from third enlarged and revised English edition. In one handsome octavo vol. of 554 pages, with illus. Cloth, \$3.50.

This valuable treatise on diseases of the stomach and abdomen will be found a cyclopaedia of information, systematically arranged, on all diseases of the alimentary tract, from the mouth to the

rectum. A fair proportion of each chapter is devoted to symptoms, pathology, and therapeutics.—*New York Medical Journal*, April, 1879.

TANNER'S MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS. Third American from the second London edition. Revised and enlarged by TILBURY FOX, M. D. In one 12mo. volume of 362 pp. with illus. Cloth, \$1.50.

DAVIS' CLINICAL LECTURES ON VARIOUS IMPORTANT DISEASES. By N. S. DAVIS, M. D. Edited by FRANK H. DAVIS, M. D. Second edition. 12mo. 287 pages. Cloth, \$1.75.

TODD'S CLINICAL LECTURES ON CERTAIN ACUTE DISEASES. In one octavo volume of 320 pages. Cloth, \$2.50.

FLINT'S PRACTICAL TREATISE ON THE PHYSICAL EXPLORATION OF THE CHEST AND THE DIAGNOSIS OF DISEASES AFFECTING THE RESPIRATORY ORGANS. Second and revised edition. In one handsome octavo volume of 591 pages. Cloth, \$4.50.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Musser's Medical Diagnosis.—Just Ready.

A Practical Treatise on Medical Diagnosis For the Use of Students and Practitioners. By JOHN H. MUSSER, M. D., Assistant Professor of Clinical Medicine, University of Pennsylvania, Philadelphia. In one very handsome octavo volume of 873 pages, with 162 illustrations and 2 colored plates. Cloth, \$5; leather, \$6.

The aim of the author has been to make the work eminently practical. Dr. Musser has succeeded in bringing together a large and valuable collection of clinical data drawn from his own extended experience and from exhaustive literary research, and has presented them in an unusually clear and concise manner. In brief, the book is thoroughly modern, readable and instructive, and, we believe, superior to any work of the kind before the profession.—*University Medical Magazine*, March, 1894.

Modern methods of medical teaching and study have rendered treatises like the present an absolute necessity. The present work is to be commended alike for its logical arrangement, accurate observation and clearness of expression. The chapter on bacteriology is especially commendable, because it contains everything practically necessary for clinical work.—*Med. Rec.*, Apr. 21, '94. The book should receive a hearty reception from students and medical men; it contains much in-

formation essential to good, scientific medical work. It is with pleasure that we can state that the work has been adopted as a text-book at the Johns Hopkins Medical School and Harvard University, and that it has met with marked approval in other teaching centres.—*International Medical Magazine*, April, 1894.

The whole book impresses one as being the concentration of a very thorough knowledge of all the facts resorted to in the making of a careful diagnosis by means of modern methods. Dr. Musser's book will at once take a prominent and permanent position among the text-books of the medical schools of the country, and we recommend it most highly to those practitioners who wish not only to get the views of the general profession in regard to important points of diagnosis, but who also desire a work in which the author expresses his own opinions, based upon careful observation and wide experience.—*The Therapeutic Gazette*, April, 1894.

Flint on Auscultation and Percussion.—Fifth Edition.

A Manual of Auscultation and Percussion; Of the Physical Diagnosis of Diseases of the Lungs and Heart, and of Thoracic Aneurism. By AUSTIN FLINT, M. D., LL. D., Professor of the Principles and Practice of Medicine in Bellevue Hospital Medical College, New York. Fifth edition. Edited by James C. Wilson, M. D., Lecturer on Physical Diagnosis in the Jefferson Medical College, Philadelphia. In one handsome royal 12mo. volume of 274 pages, with 12 illustrations. Cloth, \$1.75.

Whitla's Dictionary of Treatment.

A Dictionary of Treatment; or Therapeutic Index, including Medical and Surgical Therapeutics. By WILLIAM WHITLA, M. D., Professor of Materia Medica and Therapeutics in the Queen's College, Belfast. Revised and adapted to the United States Pharmacopœia. In one square, octavo vol. of 917 pp. Cloth, \$4.00.

We have already dictionaries of medicine and dictionaries of surgery; Dr. Whitla now provides us with a dictionary of treatment. And reference to the volume shows that it really is what it professes to be. The several diseased conditions are arranged in alphabetical order, and the methods—medical, surgical, dietetic, and climatic—by which they may be met, considered. On every page we find clear and detailed directions for treatment supported by the author's personal authority and experience whilst the recommendations of other competent observers are also critically examined. The book abounds with useful, practical hints and suggestions, and

the younger practitioner will find in it exactly the help he so often needs in the treatment both of those who are ill, and those who are ailing. At the same time the most experienced members of the profession may usefully consult its pages for the purpose of learning what is really trustworthy in the later therapeutic developments. The Dictionary is, in short, the recorded experience of a practical scientific therapist, who has carefully studied diseases and disorders at the bedside and in the consulting-room, and has earnestly addressed himself to the cure and relief of his patients.—*The Glasgow Medical Journal*, April, 1892.

Fothergill's Handbook of Treatment.—Third Edition.

The Practitioner's Handbook of Treatment; Or, The Principles of Therapeutics. By J. MILNER FOTHERGILL, M. D., Edin., M. R. C. P., Lond., Physician to the City of London Hospital for Diseases of the Chest. Third edition. In one 8vo. volume of 661 pages. Cloth, \$3.75; leather, \$4.75.

This is a wonderful book. If there be such a thing as "medicine made easy," this is the work to accomplish this result.—*Va. Med. Month.*, June, '87.

To have a description of the normal physiological processes of an organ and of the methods of treatment of its morbid conditions brought together in a single chapter, and the relations between the two clearly stated, cannot fail to prove

a great convenience to many thoughtful but busy physicians. The practical value of the volume is greatly increased by the introduction of many prescriptions. That the profession appreciates that the author has undertaken an important work and has accomplished it is shown by the demand for this third edition.—*N. Y. Med. Jour.*, June 11, '87.

Broadbent on the Pulse.

The Pulse. By W. H. BROADBENT, M. D., F. R. C. P., Physician to and Lecturer on Medicine at St. Mary's Hospital, London. In one 12mo. volume of 312 pages. Cloth, \$1.75. See *Series of Clinical Manuals*, page 30.

WALSHE ON THE DISEASES OF THE HEART AND GREAT VESSELS. Third American edition. In 1 vol. 8vo., 416 pp. Cloth, \$3.00.

HOLLAND'S MEDICAL NOTES AND REFLECTIONS. 1 vol. 8vo., pp. 492. Cloth, \$3.50.

STURGES' INTRODUCTION TO THE STUDY OF CLINICAL MEDICINE. Being a Guide to the Investigation of Disease. In one handsome 12mo. volume of 127 pages. Cloth, \$1.25.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Yeo's Medical Treatment.

A Manual of Medical Treatment or Clinical Therapeutics. By I. BURNEY YEO, M. D., F. R. C. P., Prof. of Clinical Therapeutics in King's Coll., London. In two 12mo. volumes containing 1275 pages, with illustrations. Cloth, \$5.50.

This work is devoted entirely to the treatment of disease, being the first we have ever seen of the kind. Only so much of the pathology and etiology of disease is introduced as is necessary to arrive at the rational indications, without which the administration of a drug can hardly be called scientific. Half a dozen choice formulæ by leading physicians are appended to each chapter. The index is so arranged that one can find disease and the various remedies at a glance. Without exaggeration, we can say that one could hardly read anything affording at the same time so much pleasure and profit as this elegantly written and beautifully printed book.—*The Canada Medical Record*, November, 1893.

In Dr. Yeo's book the study of the treatment of disease is approached, not from the side of the drug or remedy as in works on therapeutics, but "from the side of the disease." The various diseases are grouped together, a short account is given of the clinical history, course and pathology of each, and from a consideration thereof, indications for treatment are arrived at; then follows a full dis-

ussion of the best methods of carrying out these indications. Each section contains a number of prescriptions which the author has found most useful, and at the end of every chapter is added a selection of formulæ from the writings of various well-known physicians. The work is exceedingly practical, and the details of the various methods of treatment are always given. Full directions are given with regard to diet, mode of life, and general treatment, which are often as important as the treatment by drugs.—*Med. Chronicle*, January, 1894.

The discussion of the different ailments has a distinctly practical turn toward the main purpose of the book. Standard formulæ are introduced from eminent practitioners, and all the drugs of recognized value are grouped in the order of their importance. The dosage receives careful attention, which is a feature that cannot be too highly commended. It cannot fail to be an exceedingly useful, suggestive and instructive work to the physician who wishes to be well up in the present advanced and scientific therapeutics of the day.—*Medical Record*, November 25, 1893.

Yeo on Food in Health and Disease.

Food in Health and Disease. By I. BURNEY YEO, M. D., F. R. C. P., Professor of Clinical Therapeutics in King's College, London. In one 12mo. volume of 590 pages. Cloth, \$2.00. See *Series of Clinical Manuals*, page 30.

Dr. Yeo supplies in a compact form nearly all that the practitioner requires to know on the subject of diet. The work is divided into two parts—food in health and food in disease. Dr. Yeo has gathered together from all quarters an immense amount of useful information within a comparatively small

compass, and he has arranged and digested his materials with skill for the use of the practitioner. We have seldom seen a book which more thoroughly realizes the object for which it was written than this little work of Dr. Yeo.—*British Medical Journal*, Feb. 8, 1890.

Bartholow on Electricity in Medicine and Surgery.—3d Ed.

Medical Electricity. A Practical Treatise on the Applications of Electricity to Medicine and Surgery. By ROBERTS BARTHOLOW, A. M., M. D., LL. D., Emeritus Professor of Materia Medica and General Therapeutics in the Jefferson Med. Coll. of Philadelphia, etc. Third edition. In one octavo volume of 308 pp., with 110 illus.

Bartholow on Cholera.—Just Ready.

Cholera: Its Causes, Symptoms, Pathology and Treatment. By ROBERTS BARTHOLOW, M. D., LL. D., Emeritus Professor of Materia Medica, General Therapeutics and Hygiene in the Jefferson Medical College of Philadelphia. In one 12mo. volume of 127 pages, with 9 illustrations. Cloth, \$1.25.

The most scientific work on cholera extant. Broad yet comprehensive, concise but explicit, it treats the subject in a way to invite but little criticism. The most valuable chapter is the one on treatment, which, considering the author's therapeutic experience, and the great improvements made in practice, is indeed, a contribution to medical literature worthy of more than passing notice.—*The Medical Fortnightly*, July 15, 1893.

The author has sought to make a practical book in the smallest compass. The symptoms and

pathology of the disease are described separately in a brief and comprehensive manner. The final chapter, on the treatment of cholera, gives the prophylactic measures, including quarantine and the latest therapeutic methods in vogue in India, Europe and America. The volume is written in the author's usual pleasant style, and will satisfy the desire of any one that wishes to obtain the most recent information on the subject.—*The New York Medical Journal*, July 20, 1893.

Richardson's Preventive Medicine.

Preventive Medicine. By E. W. RICHARDSON, M. D., LL. D., F. R. S., Fellow of the Royal Coll. of Phys., London. In one 8vo. vol. of 729 pp. Cloth, \$4; leather, \$5.

There is perhaps no similar work written for the general public that contains such a complete, reliable and instructive collection of data upon the diseases common to the race, their origins, causes, and the measures for their prevention. The descriptions of diseases are clear, chaste and

scholarly; the discussion of the question of disease is comprehensive, masterly and fully abreast with the latest and best knowledge on the subject, and the preventive measures advised are accurate, explicit and reliable.—*The American Journal of the Medical Sciences*, April, 1884.

SCHREIBER'S MANUAL OF TREATMENT BY MASSAGE AND METHODOLOGICAL MUSCLE EXERCISE. Translated by WALTER MENDELSON, M. D., of New York. In one 8vo. volume of 274 pp., with 117 engravings.

CHAMBERS' MANUAL OF DIET AND REGIMEN IN HEALTH AND SICKNESS. In one handsome octavo volume of 802 pp. Cloth, \$2.75.

STILLÉ ON CHOLERA: Its Origin, History, Causation, Symptoms, Lesions, Prevention and Treatment. In one handsome 12mo. volume of 163 pages, with a chart. Cloth, \$1.25.

PAVY'S TREATISE ON THE FUNCTION OF DIGESTION; its Disorders and their Treatment. From the second London edition. In one octavo volume of 238 pages. Cloth, \$2.00.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.

Seiler on the Throat and Nose.—Fourth Edition.

A Handbook of Diagnosis and Treatment of Diseases of the Throat, Nose and Naso-Pharynx. By CARL SEILER, M. D., Lecturer on Laryngoscopy in the University of Pennsylvania. Fourth edition. In one handsome 12mo. volume of 414 pages, with 107 illustrations and 2 colored plates. Cloth, \$2.25.

This little book is eminently practical, and will prove of interest not only to the specialist, but to the general practitioner as well. It deals with the subject in a clear and distinct manner, and the text is copiously illustrated with diagrams and colored plates. So little attention is paid ordinarily to the examination of the larynx that the need of such a book has long been felt. By consulting its pages anyone can learn the necessary manipulations, and, by a little practice, soon become expert in the use of the laryngeal mirror, a method of examination too often neglected. The anatomy of the larynx is explained with especial care, and the operative procedures for various diseases of the throat, tonsils, etc., are carefully explained. Approved methods of treatment are dealt with in a very satisfactory way, and all the most useful remedial agents are described.—

International Medical Magazine, November, 1893.

As a guide to the practitioner and a text-book for the student, it is unexcelled, being plain, accurate, comprehensive and pleasantly written.—*Atlanta Medical and Surgical Journal*, August, 1893.

It is needless to say that it is brought up to date in the fullest possible sense of the term. Rarely has any treatise on any specialty met with a more cordial reception than the one under consideration. A most generous recognition is given to the work of American laryngologists. The main feature of the present edition has been the expansion of that portion which deals with the diseases of the nose. The author is to be commended on the excellence of his work, and congratulated that a new edition has been so speedily called for.—*Medical Record*, November 25, 1893.

Browne on the Throat and Nose.—Fourth Edition.

The Throat and Nose and Their Diseases. By LENNOX BROWNE, F. R. C. S., E., Senior Physician to the Central London Throat and Ear Hospital. Fourth and enlarged edition. In one imperial octavo volume of 751 pages, with 120 illustrations in color, and 235 engravings on wood. Cloth, \$6.50.

Although quite complete enough for the use of specialists, it is at the same time so clear as to be of daily value to the general practitioner, who will find at the end of the volume a number of well-tried formulas most in vogue at the London hospitals for diseases of the throat.—*The Canada Medical Record*, November, 1893.

It is an admirable presentation of its subject in the light of the large clinical experience of a careful observer. It is a book that no specialist can afford not to have, and that the general physician can rely upon as a safe guide and practical adviser.—*The Medical News*, Oct. 14, 1893.

Tuke on the Influence of the Mind on the Body.

Illustrations of the Influence of the Mind upon the Body in Health and Disease. Designed to elucidate the Action of the Imagination. By DANIEL HACK TUKE, M. D., Joint Author of the *Manual of Psychological Medicine*, etc. New edition. Thoroughly revised and rewritten. In one 8vo. volume of 467 pages, with 2 colored plates. Cloth, \$3.00.

It is impossible to peruse these interesting chapters without being convinced of the author's perfect sincerity, impartiality, and thorough mental grasp. Dr. Tuke has exhibited the requisite amount of scientific address on all occasions, and the more intricate the phenomena the more firmly has he adhered to a physiological and rational

method of interpretation. Guided by an enlightened deduction, the author has reclaimed for science a most interesting domain in psychology, previously abandoned to charlatans and empirics. This book, well conceived and well written, must commend itself to every thoughtful understanding.—*New York Medical Journal*, September 6, 1884.

Clouston on Mental Diseases.

Clinical Lectures on Mental Diseases. By THOMAS S. CLOUSTON, M. D., Lecturer on Mental Diseases in the University of Edinburgh. With an Appendix, containing an Abstract of the Statutes of the United States and of the Several States and Territories relating to the Custody of the Insane. By CHARLES F. FOLSOM, M. D., Ass't Professor of Mental Diseases, Med. Dep. of Harvard Univ. In one octavo volume of 541 pages, with eight lithographic plates, four of which are colored. Cloth, \$4.

Dr. Folsom's *Abstract* also separate, in one 8vo. vol. of 108 pages. Cloth, \$1.50, and descriptions given as to the practical management and care of the cases. We can heartily recommend it to the student and busy general practitioner. Dr. Folsom's work greatly increases the value of Dr. Clouston's book for the American practitioner.—*Archives of Medicine*, June, 1884.

The descriptions of the diseases and cases are simple and practical, but true; and one sees as he reads that they are given by one perfectly familiar from daily observation with the cases and diseases he is speaking of. One feature of the book which commends it highly, and which is not to be found in any other work on mental diseases, is the hints

Playfair on Nerve Prostration and Hysteria.

The Systematic Treatment of Nerve Prostration and Hysteria. By W. S. PLAYFAIR, M. D., F. R. C. P. In one 12mo. volume of 97 pages. Cloth, \$1.00.

BROWNE ON KOCH'S REMEDY IN RELATION TO THROAT CONSUMPTION. In one octavo volume of 121 pages, with 45 illustrations, 4 of which are colored, and 17 charts. Cloth, \$1.50.

FULLER ON DISEASES OF THE LUNGS AND AIR-PASSAGES. Their Pathology, Physical Diagnosis, Symptoms and Treatment. From the second and revised English edition. In one octavo volume of 475 pages. Cloth, \$3.50.

SLADE ON DIPHTHERIA; its Nature and Treatment, with an account of the History of its Pre-

valence in various Countries. Second and revised edition. In one 12mo. vol., 158 pp. Cloth, \$1.25.

SMITH ON CONSUMPTION; its Early and Remediable Stages. 1 vol. 8vo., 263 pp. Cloth, \$2.25.

LA ROCHE ON PNEUMONIA. 1 vol. 8vo. of 490 pages. Cloth, \$3.00.

WILLIAMS ON PULMONARY CONSUMPTION; its Nature, Varieties and Treatment. With an analysis of one thousand cases to exemplify its duration. In one 8vo. vol. of 303 pp. Cloth, \$2.50.

Lea Brothers & Co., Publishers, 706, 708 & 710 Sansom Street, Philadelphia.
