

- Tarso-metatarsal articulation, disease of, 181; case of disease of, 183.
 Taylor, Dr. C. Fayette, brace for Pott's disease, 370.
 Temperature, lowering of, in shortening limbs, 12.
 Tendons, displacement of, 144.
 Tendon, displaced, case of, 144.
 Tendo-Achillis, treatment of rupture of, 54; case of division of, treated by Dr. Yale, 54.
 Tenotomy in talipes, origin and history of, 95; when to perform, 27; in talipes, dressing after, 97; method of performing, 28.
 Tension, elastic, 32.
 Thermoscope, Dr. Seguin's, value of, 188.
 Toes and fingers, supernumerary, 143.
 Torticollis, or wry-neck, 451; treatment of, 458.
 Treatment of congenital deformities, importance of early, 25; of deformities, general principles of, 25.
 Trochanter, periostitis of, 339.
- Trochanter, cases of periostitis of, 339, 341.
- V.
- Vaginismus in lead-palsy, 463.
 Van Bibber, elastic bands of, 470.
 Varo-equinus, 51; case of double congenital, 134; of left, and varo-calcaneus of right foot, case of, 131.
 Venery, excessive, as a cause of paralysis, 15.
- W.
- Webber, Prof. E. W., experiments of, on hip-joint, 243.
 White-swelling, 191.
 Wrist-drop, 468; case of, 460.
 Wrist-joint, disease of, 457; case of disease of, 457.
 Wyeth, Dr. J. A., on excision of hip-joint, 259.

THE END.

APPLETONS'
AMERICAN CYCLOPÆDIA.

NEW REVISED EDITION.

Entirely rewritten by the ablest writers on every subject. Printed from new type, and illustrated with Several Thousand Engravings and Maps.

The work originally published under the title of THE NEW AMERICAN CYCLOPÆDIA was completed in 1863, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of science, literature, and art, have induced the editors and publishers to submit it to an exact and thorough revision, and to issue a new edition entitled THE AMERICAN CYCLOPÆDIA.

Within the last ten years the progress of discovery in every department of knowledge has made a new work of reference an imperative want.

The movement of political affairs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to our geographical knowledge have been made by the indefatigable explorers of Africa.

The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in permanent and authentic history.

In preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the latest possible dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in literature, and the newest inventions in the practical arts, as well as to give a succinct and original record of the progress of political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a successful termination.

None of the original stereotype plates have been used, but every page has been printed on new type, forming in fact a new Cyclopædia, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been suggested by longer experience and enlarged knowledge.

The illustrations, which are introduced for the first time in the present edition, have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and of natural history, and depict the most famous and remarkable features of scenery, architecture, and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence: the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopædia, and worthy of its high character.

This work is sold to subscribers only, payable on delivery of each volume. It will be completed in sixteen large octavo volumes, each containing about 800 pages, fully illustrated with several thousand Wood Engravings, and with numerous colored Lithographic Maps.

Price and Style of Binding.

In extra cloth, per vol.	\$5.00	In half russia, extra gilt, per vol.	\$8.00
In library leather, per vol.	6.00	In full morocco antique, gilt edges, per vol.	10.00
In half turkey morocco, per vol.	7.00	In full russia, per vol.	10.00

Fourteen volumes now ready. Succeeding volumes, until completion, will be issued once in three months.

. Specimen pages of the AMERICAN CYCLOPÆDIA, showing type, illustrations, etc., will be sent gratis, on application.

THE
POPULAR SCIENCE MONTHLY.

Published in a large octavo, handsomely printed on clear type,

AND, WHEN THE SUBJECTS ADMIT,

FULLY ILLUSTRATED.

Each Number contains 128 pages.

Conducted by PROFESSOR E. L. YOUMANS.

TERMS, \$5.00 per Annum, or 50 Cents per Number.

THE POPULAR SCIENCE MONTHLY was started to promote the diffusion of valuable scientific knowledge in a readable and attractive form among all classes of the community. It has met with unexampled success, and it is universally admitted that its plan has been faithfully carried out, and that it meets a want supplied by no other periodical in the United States.

It contains instructive and attractive articles, and abstracts of articles, original, selected, translated, and illustrated, from the leading scientific men of different countries, giving the latest interpretations of natural phenomena, explaining the applications of science to the practical arts, and to the operations of domestic life. It will also contain accounts of all the new scientific discoveries, and its pages will form a complete record of the progress of the age.

It is designed to give especial prominence to those branches of science which help to a better understanding of the nature of man; to present the claims of scientific education; and the bearings of science upon questions of society and government. How the various subjects of current opinion are affected by the advance of scientific inquiry will also be considered.

In its literary character, this periodical aims to be popular, without being superficial, and appeals to the intelligent reading-classes of the community. It seeks to procure authentic statements from men who know their subjects, and who will address the non-scientific public for purposes of exposition and explanation.

THE POPULAR SCIENCE MONTHLY is the organ of no sect, party, or school, but will be devoted to the broad interests of advancing knowledge, as it is expounded by the eminent thinkers of England, France, Germany, and the United States, each writer being responsible for his own views.

OPINIONS OF THE PRESS.

- "Just the publication needed at the present day."—*Montreal Gazette*.
- "It is, beyond comparison, the best attempt at journalism of the kind ever made in this country."—*Home Journal*.
- "The initial number is admirably constituted."—*Evening Mail*.
- "In our opinion, the right idea has been happily hit in the plan of this new monthly."—*Buffalo Courier*.
- "A journal which promises to be of eminent value to the cause of popular education in this country."—*N. Y. Tribune*.

IMPORTANT TO CLUBS.

THE POPULAR SCIENCE MONTHLY will be supplied at reduced rates with any periodical published in this country or Europe.

Payment, in all cases, must be in advance.

D. APPLETON & CO.,

MIND:
A QUARTERLY REVIEW
 OF
PSYCHOLOGY AND PHILOSOPHY,

EDITED BY
GEORGE CROOM ROBERTSON, M. A.,
 Professor of Philosophy of Mind and Logic in University College, London.

MIND will be an organ for the publication of original researches, and a critical record of the progress made, in Psychology and Philosophy.

Psychology, while drawing its fundamental data from subjective consciousness, will be understood in the widest sense, as covering all related lines of objective inquiry. Due prominence will be given to the physiological investigation of Nerve-structures. At the same time, Language and all other natural expressions or products of mind, Insanity and all other abnormal mental phases, the Manners and Customs of Races as evincing their mental nature, mind as exhibited in Animals generally—much of what is meant by Anthropology, and all that is meant by Comparative Psychology—will come within the scope of the Review.

The practical application of psychological theory to Education will receive the attention it so urgently claims at the present time.

Beyond Psychology, account will be taken of Logic, Aesthetics, and Ethics, the theory of mental functions being naturally followed by the doctrine of their regulation.

For the rest, MIND will be occupied with general Philosophy. Even as a scientific journal, it cannot evade ultimate questions of the philosophical order, suggested as these are with peculiar directness by psychological inquiry. There is, also, a function truly philosophical which only the investigator of mind is in a position to discharge, the task, namely, of collating and sifting the results of the special sciences with a view alike to insight and conduct. But MIND will, further, expressly seek to foster thought of bold sweep—sweep that can never be too bold, so be that it starts from a well-ascertained ground of experience, and looks to come again there to rest.

Nor, in this connection, will the History of Philosophy be overlooked; whether as it involves the critical appreciation of the systems of thought, more or less speculative, which eager minds in every age have been impelled to frame; or as it seeks to understand important thinkers in the record of their lives; or, finally, as it may take note of what is being done or left undone in the present day at the intellectual centres where thought and inquiry should be most active.

MIND will include among its contributors some of the foremost workers in psychology and philosophy on the Continent and in America.

Writers will sign and be alone responsible for their contributions. MIND will not be the organ of any philosophical school, unless it be held the mark of a school to give prominence to psychological inquiry.

Correspondence will be printed if it communicates new facts of scientific importance, or expresses *reasoned* opinions.

N. B.—The Review will not generally extend beyond 128 pages. Price, \$4.00 per year.

CATALOGUE
OF
MEDICAL WORKS.

ANSTIE.

Neuralgia, and Diseases which resemble it.

By FRANCIS E. ANSTIE, M. D., F. R. C. P.,

Senior Assistant Physician to Westminster Hospital; Lecturer on Materia Medica in Westminster Hospital School; and Physician to the Belgrave Hospital for Children; Editor of "The Practitioner" (London), etc.

1 vol., 12mo. Cloth, \$2.50.

"It is a valuable contribution to scientific medicine."—*The Lancet* (London).

BARKER.

The Puerperal Diseases. *Clinical Lectures*
delivered at Bellevue Hospital.

By FORDYCE BARKER, M. D.,

Clinical Professor of Midwifery and the Diseases of Women in the Bellevue Hospital Medical College; Obstetric Physician to Bellevue Hospital; Consulting Physician to the New York State Woman's Hospital; Fellow of the New York Academy of Medicine; formerly President of the Medical Society of the State of New York; Honorary Fellow of the Obstetrical Societies of London and Edinburgh; Honorary Fellow of the Royal Medical Society of Athens, Greece, etc., etc., etc.

Third Edition. 1 vol., 8vo. Cloth. 526 pages. Price, \$5; Sheep, \$6.

"For nearly twenty years it has been my duty, as well as my privilege, to give clinical lectures at Bellevue Hospital, on midwifery, the puerperal and the other diseases of women. This volume is made up substantially from phonographic reports of the lectures which I have given on the puerperal diseases. Having had rather exceptional opportunities for the study of these diseases, I have felt it to be an imperative duty to utilize, so far as lay in my power, the advantages which I have enjoyed for the promotion of science, and, I hope, for the interests of humanity. In many subjects, such as albuminuria, convulsions, thrombosis, and embolism, septicaemia, and pyæmia, the advance of science has been so rapid as to make it necessary to teach something new every year. Those, therefore, who have formerly listened to my lectures on these subjects, and who now do me the honor to read this volume, will not be surprised to find, in many particulars, changes in pathological views, and often in therapeutical teaching, from doctrines before inculcated. At the present day, for the first time in the history of the world, the obstetric department seems to be assuming its proper position, as the highest branch of medicine, if its rank be graded by its importance to society, or by the intellectual culture and ability required, as compared with that demanded of the physician or the surgeon. A man may become eminent as a physician, and yet know very little of obstetrics; or he may be a successful and distinguished surgeon, and be quite ignorant of even the rudiments of obstetrics. But no one can be a really able obstetrician unless he be both physician and surgeon. And, as the greater includes the less, obstetrics should rank as the highest department of our profession."—*From Author's Preface.*

On Sea-sickness.

By FORDYCE BARKER, M. D.

1 vol., 16mo. 36 pp. Flexible Cloth, 75 cents.

Reprinted from the NEW YORK MEDICAL JOURNAL. By reason of the great demand for the number of that journal containing the paper, it is now presented in book form, with such pre-
scriptions added as the author has found useful in relieving the suffering from sea-sickness.

D. Appleton & Co.'s Medical Publications.

3

BARNES.

Obstetric Operations, including the Treatment of
Hæmorrhage, and forming a Guide to the Management
of Difficult Labor.

By ROBERT BARNES, M. D., London, F. R. C. P.,

Obstetric Physician and Lecturer on Obstetrics and the Diseases of Women and Children to St. George's Hospital; Examiner in Obstetrics to the Royal College of Physicians and the Royal College of Surgeons; President of the Metropolitan Branch of the British Medical Association; late Examiner to the University of London; formerly Obstetric Physician to the London and to St. Thomas Hospitals; and late Physician to the Eastern Division of the Royal Maternity Charity.

Third Edition. Revised and extended. 1 vol., 8vo. 606 pages. Cloth, \$4.50.

"Such a work as Dr. Barnes's was greatly needed. It is calculated to elevate the practice of the obstetric art in this country, and to be of great service to the practitioner."—*Lancet.*
"The book of Dr. Barnes is not, properly speaking, a dogmatic treatise on obstetric operations. It is a series of original lectures, comprising, at one and the same time, a practical analysis of the serious accidents in parturition, the reasoned-out indications for, and the most judicious researches in the manner of operating, the method to choose, the instrument to prefer, and the details of the manoeuvres required to insure success. The clearness of the style is perfect. The order, without being altogether rigorous, is what it is able to be generally in a series of clinical lectures. The description of the instruments, the application of the forceps, cephalotripsy, embryotomy, Cæsarean section, the practical reflections on narrowing and malformation of the pelvis, ruptures of the uterus, placenta prævia, hæmorrhage, and, in fact, all the grand questions in obstetrics are treated with accurate good sense. At each instant, by some remark or other, is revealed a superior mind, ripened by having seen much and meditated much."—*From Preface to the French Edition by Prof. Pajot.*

BASTIAN.

Paralysis from Brain Disease in its
Common Forms.

By H. CHARLTON BASTIAN, M. A., M. D., F. R. S.,

Fellow of the Royal College of Physicians; Professor of Pathological Anatomy in University College, London; Physician to University College Hospital; and Senior Assistant Physician to the National Hospital for the Paralyzed and Epileptic.

With Illustrations. 1 vol., 12mo. Cloth. \$1.75.

PREFACE.

These Lectures were delivered in University College Hospital last year, at a time when I was doing duty for one of the senior physicians, and during the same year—after they had been reproduced from very full notes taken by my friend Mr. John Tweedy—they appeared in the pages of *The Lancet*.

They are now republished at the request of many friends, though only after having undergone a very careful revision, during which a considerable quantity of new matter has been added. It would have been easy to have very much increased the size of the book by the introduction of a larger number of illustrative cases, and by treatment of many of the subjects at greater length, but this the author has purposely abstained from doing, under the belief that in its present form it is likely to prove more acceptable to students, and also perhaps more useful to busy practitioners.

Notwithstanding its defects and many shortcomings, the author is not without a hope that this little book may be considered in some measure to supply a deficiency which has long existed in medical literature. No department of medicine stands more in need of being represented in a text book of moderate compass; so that, imperfect as it is, this small work may perhaps be of some service till it is superseded by something better. In it the author has endeavored to treat the subject with more precision than has hitherto been customary, and, while the lectures contain some novelties in method and mode of exposition, he hopes they may also be found not unfaithfully to embody the principal facts at present known concerning this very important class of diseases.

BENNET.

On the Treatment of Pulmonary Consumption, by Hygiene, Climate, and Medicine, in its Connection with Modern Doctrines.

BY JAMES HENRY BENNET, M. D.

Member of the Royal College of Physicians, London; Doctor of Medicine of the University of Paris, etc., etc.

1 vol., thin 8vo. Cloth, \$1.50.

An interesting and instructive work, written in the strong, clear, and lucid manner which appears in all the contributions of Dr. Bennet to medical or general literature.

"We cordially commend this book to the attention of all, for its practical common-sense views of the nature and treatment of the scourge of all temperate climates, pulmonary consumption."—*Detroit Review of Medicine*.

Winter and Spring on the Shores of the Mediterranean; or, the Riviera, Mentone, Italy, Corsica, Sicily, Algeria, Spain, and Biarritz, as Winter Climates.

This work embodies the experience of ten winters and springs passed by Dr. Bennet on the shores of the Mediterranean, and contains most valuable information for physicians in relation to the health restoring climate of the regions described.

1 vol., 12mo. 621 pp. Cloth, \$3.50.

"Exceedingly readable, apart from its special purpose, and well illustrated."—*Evening Commercial*.
 "It has a more substantial value for the physician, perhaps, than for any other class or profession. . . . We commend this book to our readers as a volume presenting two capital qualifications—it is at once entertaining and instructive."—*N. Y. Medical Journal*.

BILLROTH.

General Surgical Pathology and Therapeutics, in Fifty Lectures. A Text-book for Students and Physicians.

BY DR. THEODOR BILLROTH.

Translated from the Fifth German Edition, with the special permission of the Author, by

CHARLES E. HACKLEY, A. M., M. D.,

Surgeon to the New York Eye and Ear Infirmary; Physician to the New York Hospital; Fellow of the New York Academy of Medicine, etc.

1 vol., 8vo, 714 pp., and 162 Woodcuts. Cloth, \$5.00; Sheep, \$3.00.

Professor Theodor Billroth, one of the most noted authorities on Surgical Pathology, gives in this volume a complete résumé of the existing state of knowledge in this branch of medical science. The fact of this publication going through four editions in Germany, and having been translated into French, Italian, Russian, and Hungarian, should be some guarantee for its standing.

"The want of a book in the English language, presenting in a concise form the views of the German pathologists, has long been felt; and we venture to say no book could more perfectly supply that want than the present volume. . . . We would strongly recommend it to all who take any interest in the progress of thought and observation in surgical pathology, and surgery."—*The Lancet*.

"We can assure our readers that they will consider neither money wasted in its purchase, nor time in its perusal."—*The Medical Investigator*.

CARPENTER.

Principles of Mental Physiology, with their Applications to the Training and Discipline of the Mind and the Study of its Morbid Conditions.

BY WM. B. CARPENTER, M. D., LL. D., F. R. S., F. L. S., F. G. S.,

Registrar of the University of London; Corresponding Member of the Institute of France and of the American Philosophical Society, etc.

1 vol., 8vo. Price, \$3.00.

"Among the numerous eminent writers this country has produced, none are more deserving of praise for having attempted to apply the results of Physiological Research to the explanation of the natural relations of the mind and body than Dr. Carpenter. To him belongs the merit of having scientifically studied and of having in many instances supplied a rational explanation of those phenomena which, under the names of mesmerism, spirit-rapping, electro-biology, and hypnotism, have attracted so large an amount of attention during the last twenty years. . . . We must conclude by recommending Dr. Carpenter's work to the members of our own profession as applying many facts, that have hitherto stood isolated, to the explanation of the functions of the brain and to psychological processes generally."—*The Lancet*.

COMBE.

The Management of Infancy, Physiological and Moral. Intended chiefly for the Use of Parents.

BY ANDREW COMBE, M. D.

REVISED AND EDITED

BY SIR JAMES CLARK, K. C. B., M. D., F. R. S.,

Physician-in-ordinary to the Queen.

First American from the Tenth London Edition. 1 vol., 12mo. 302 pp. Cloth, \$1.50.

"This excellent little book should be in the hand of every mother of a family; and, if some of our lady friends would master its contents, and either bring up their children by the light of its teachings, or communicate the truths it contains to the poor by whom they are surrounded, we are convinced that they would effect infinitely more good than by the distribution of any number of tracts whatever. . . . We consider this work to be one of the few popular medical treatises that any practitioner may recommend to his patients; and, though, if its precepts are followed, he will probably lose a few guineas, he will not begrudge them if he sees his friend's children grow up healthy, active, strong, and both mentally and physically capable."—*The Lancet*.

CHAUVEAU.

The Comparative Anatomy of the Domesticated Animals.

BY A. CHAUVEAU,

PROFESSOR AT THE LYONS VETERINARY SCHOOL.

Second edition, revised and enlarged, with the coöperation of S. ARLOING, late Principal of Anatomy at the Lyons Veterinary School; Professor at the Toulouse Veterinary School. Translated and edited by GEORGE FLEMING, F. R. G. S., M. A. I., Veterinary Surgeon, Royal Engineers.

1 vol., 8vo. Cloth, 957 pp., with 450 Illustrations. Price, \$6.00.

OPINIONS OF THE PRESS.

"This is a valuable work, well conceived and well executed by the authors, MM. Chauveau and Arloing, and well translated by Mr. Fleming. It is rather surprising how few works exist, in any language, in which the anatomy of the commoner animals, domestic and otherwise, is given with any approach to detail. Systematic works there are in abundance, but, if the student be desirous of ascertaining any particular point, such as the position and branches of the pneumogastric or sympathetic nerves, or the homologue of a given muscle in several different animals, he may search all day ere he find it. The work before us appears to be well adapted to meet this difficulty.

"The illustrations are very numerous, and Mr. Fleming has introduced a large number that are not contained in the original work.

"Taking it altogether, the book is a very welcome addition to English literature, and great credit is due to Mr. Fleming for the excellence of the translation, and the many additional notes he has appended to Chauveau's treatise."—*Lancet (London)*.

"The want of a text-book on the Comparative Anatomy of the Domesticated Animals has long been felt. . . . The descriptions of the text are illustrated and assisted by no less than 450 excellent woodcuts. In a work which ranges over so vast a field of anatomical detail and description, it is difficult to select any one portion for review, but our examination of it enables us to speak in high terms of its general excellence. . . . The care and attention with which hippotony has been cultivated on the Continent are illustrated by every page in M. Chauveau's work."—*Medical Times and Gazette (London)*.

DAVIS.

Conservative Surgery, as exhibited in remedying some of the Mechanical Causes that operate injuriously both in Health and Disease. With Illustrations.

By HENRY G. DAVIS, M. D.,
Member of the American Medical Association, etc., etc.

1 vol., 8vo. 315 pp. Cloth, \$3.00.

The author has enjoyed rare facilities for the study and treatment of certain classes of disease, and the records here presented to the profession are the gradual accumulation of over thirty years' investigation.

"Dr. Davis, bringing, as he does to his specialty, a great aptitude for the solution of mechanical problems, takes a high rank as an orthopedic surgeon, and his very practical contribution to the literature of the subject is both valuable and opportune. We deem it worthy of a place in every physician's library. The style is unpretending, but trenchant, graphic, and, best of all, quite intelligible."—*Medical Record*.

ECKER.

The Cerebral Convulsions of Man, represented according to Personal Investigations, especially on their Development in the Fœtus, and with reference to the Use of Physicians.

By ALEXANDER ECKER,
Professor of Anatomy and Comparative Anatomy in the University of Freiburg.

Translated from the German by Robert T. Edes, M. D.

1 vol., 8vo. 87 pp. \$1.25.

"The work of Prof. Ecker is noticeable principally for its succinctness and clearness, avoiding long discussions on undecided points, and yet sufficiently furnished with references to make easy its comparisons with the labors of others in the same direction.

"Entire originality in descriptive anatomy is out of the question, but the facts verified by our author are here presented in a more intelligible manner than in any other easily-accessible work.

"The knowledge to be derived from this work is not furnished by any other text-book in the English language."—*Boston Medical and Surgical Journal*, January 20, 1878.

ELLIOT.

Obstetric Clinic. A Practical Contribution to the Study of Obstetrics, and the Diseases of Women and Children.

By the late GEORGE T. ELLIOT, M. D.,
Late Professor of Obstetrics and Diseases of Women and Children in the Bellevue Hospital Medical College; Physician to Bellevue Hospital and to the New York Lying-in Asylum; Consulting Physician to the Nursery and Child's Hospital; Consulting Surgeon to the State Woman's Hospital; Corresponding Member of the Edinburgh Obstetrical Society and of the Royal Academy of Havana; Fellow of the N. Y. Academy of Medicine; Member of the County Medical Society, of the Pathological Society, etc., etc.

1 vol., 8vo. 438 pp. Cloth, \$4.50.

This work is, in a measure, a *résumé* of separate papers previously prepared by the late Dr. Elliot; and contains, besides, a record of nearly two hundred important and difficult cases in midwifery, selected from his own practice. It has met with a hearty reception, and has received the highest encomiums both in this country and in Europe.

FREY.

The Histology and Histo-Chemistry of Man. A Practical Treatise on the Elements of Composition and Structure of the Human Body.

By HEINRICH FREY,
Professor of Medicine in Zurich.

Translated from the Fourth German Edition, by Arthur E. J. Barker,
Surgeon to the City of Dublin Hospital; Demonstrator of Anatomy, Royal College of Surgeons, Ireland; Visiting Surgeon, Convalescent Home, Stillorgan; and revised by the Author.
With 680 Engravings.

1 vol., 8vo. Cloth, \$5.00; Sheep, \$6.00.

CONTENTS.

The Elements of Composition and of Structure of the Body: Elements of Composition—Albuminous or Protein Compounds, Hemoglobin, Histogenic Derivatives of the Albuminous Substances or Albuminoids, the Fatty Acids and Fats, the Carbohydrates, Non-Nitrogenous Acids, Nitrogenous Acids, Amides, Amido-Acids, and Organic Bases, Animal Coloring Matters, Cyanogen Compounds, Mineral Constituents; Elements of Structure—the Cell, the Origin of the Remaining Elements of Tissue; the Tissues of the Body—Tissues composed of Simple Cells, with Fluid Intermediate Substance, Tissues composed of Simple Cells, with a small amount of Solid Intermediate Substance, Tissues belonging to the Connective-Substance Group, Tissues composed of Transformed, and, as a rule, Covering Cells, with Homogeneous, Scanty, and more or less Solid Intermediate Substance, Composite Tissues: The Organs of the Body—Organs of the Vegetative Type, Organs of the Animal Group.

FLINT.

Manual of Chemical Examination of the Urine in Disease. With Brief Directions for the Examination of the most Common Varieties of Urinary Calculi.

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology and Microscopy in the Bellevue Hospital Medical College; Fellow of the New York Academy of Medicine; Member of the Medical Society of the County of New York; Resident Member of the Lyceum of Natural History in the City of New York, etc.

Third Edition, revised and corrected. 1 vol., 12mo. 77 pp. Cloth, \$1.00.

"The chief aim of this little work is to enable the busy practitioner to make for himself, rapidly and easily, all ordinary examinations of Urine; to give him the benefit of the author's experience in eliminating little difficulties in the manipulations, and in reducing processes of analysis to the utmost simplicity that is consistent with accuracy.

"We do not know of any work in English so complete and handy as the Manual now offered to the Profession by Dr. Flint, and the high scientific reputation of the author is a sufficient guarantee of the accuracy of all the directions given."—*Journal of Applied Chemistry*.

"We can unhesitatingly recommend this Manual."—*Psychological Journal*.

"Eminently practical."—*Detroit Review of Medicine*.

FLINT.

The Physiology of Man. *Designed to represent the Existing State of Physiological Science as applied to the Functions of the Human Body.*

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology and Microscopy in the Bellevue Hospital Medical College, and in the Long Island College Hospital; Fellow of the New York Academy of Medicine; Microscopist to Bellevue Hospital.

New and thoroughly revised Edition. In Five Volumes. 8vo. Tinted Paper.

Volume I.—*The Blood; Circulation; Respiration.*

8vo. 502 pp. Cloth, \$4.50.

"If the remaining portions of this work are compiled with the same care and accuracy, the whole may vie with any of those that have of late years been produced in our own or in foreign languages."—*British and Foreign Medico-Chirurgical Review.*

"As a book of general information it will be found useful to the practitioner, and, as a book of reference, invaluable in the hands of the anatomist and physiologist."—*Dublin Quarterly Journal of Medical Science.*

"The complete work will prove a valuable addition to our systematic treatises on human physiology."—*The Lancet.*

"To those who desire to get in one volume a concise and clear, and at the same time sufficiently full *résumé* of 'the existing state of physiological science,' we can heartily recommend Dr. Flint's work. Moreover, as a work of typographical art it deserves a prominent place upon our library-shelves. Messrs. Appleton & Co. deserve the thanks of the profession for the very handsome style in which they issue medical works. They give us hope of a time when it will be very generally believed by publishers that physicians' eyes are worth saving."—*Medical Gazette.*

Volume II.—*Alimentation; Digestion; Absorption; Lymph and Chyle.*

8vo. 556 pp. Cloth, \$4.50.

"The second instalment of this work fulfils all the expectations raised by the perusal of the first. . . . The author's explanations and deductions bear evidence of much careful reflection and study. . . . The entire work is one of rare interest. The author's style is as clear and concise as his method is studious, careful, and elaborate."—*Philadelphia Inquirer.*

"We regard the two treatises already issued as the very best on human physiology which the English or any other language affords, and we recommend them with thorough confidence to students, practitioners, and laymen, as models of literary and scientific ability."—*N. Y. Medical Journal.*

"We have found the style easy, lucid, and at the same time terse. The practical and positive results of physiological investigation are succinctly stated, without, it would seem, extended discussion of disputed points."—*Boston Medical and Surgical Journal.*

"It is a volume which will be welcome to the advanced student, and as a work of reference."—*The Lancet.*

"The leading subjects treated of are presented in distinct parts, each of which is designed to be an exhaustive essay on that to which it refers."—*Western Journal of Medicine.*

Flint's Physiology. Volume III.—*Secretion; Excretion; Ductless Glands; Nutrition; Animal Heat; Movements; Voice and Speech.*

8vo. 526 pp. Cloth, \$4.50.

"Dr. Flint's reputation is sufficient to give a character to the book among the profession, where it will chiefly circulate, and many of the facts given have been verified by the author in his laboratory and in public demonstration."—*Chicago Courier.*

"The author bestows judicious care and labor. Facts are selected with discrimination, theories critically examined, and conclusions enunciated with commendable clearness and precision."—*American Journal of the Medical Sciences.*

Volume IV.—*The Nervous System.*

8vo. Cloth, \$4.50.

This volume embodies the results of exhaustive study, and of a long and laborious series of experiments, presented in a manner remarkable for its strength and clearness. No other department of physiology has so profound an interest for the modern and progressive physician as that pertaining to the nervous system. The diseases of this system are now engaging the study and attention of some of the greatest minds in the medical world, and in order to follow their brilliant discoveries and developments, especially in connection with the science of electrology, it is absolutely necessary to obtain a clear and settled knowledge of the anatomy and physiology of the nervous system. It is the design of this work to impart that knowledge free from the perplexing speculations and uncertainties that have no real value for the practical student of medicine. The author boldly tests every theory for himself, and asks his readers to accept nothing that is not capable of demonstration. The properties of the cerebro-spinal, nervous, and sympathetic systems are treated of in a manner at once lucid, thorough, and interesting.

Although this volume is one, perhaps the most important one, of the author's admirable series in the Physiology of Man, it is nevertheless complete in itself, and may be safely pronounced indispensable to every physician who takes a pride and interest in the progress of medical science.

Volume V.—*Special Senses; Generation.*

8vo. Cloth, \$4.50.

"The present volume completes the task, begun eleven years ago, of preparing a work, intended to represent the existing state of physiological science, as applied to the functions of the human body. The kindly reception which the first four volumes have received has done much to sustain the author in an undertaking, the magnitude of which he has appreciated more and more as the work has progressed.

"In the fifth and last volume, an attempt has been made to give a clear account of the physiology of the special senses and generation, a most difficult and delicate undertaking. . . .

"Finally, as regards the last, as well as the former volumes, the author can only say that he has spared neither time nor labor in their preparation; and the imperfections in their execution have been due to deficiency in ability and opportunity. He indulges the hope, however, that he has written a book which may assist his fellow-workers, and interest, not only the student and practitioner of medicine, but some others who desire to keep pace with the progress of Natural Science."—*Extracts from Preface.*

Flint's Text-Book of Human Physiology, for the Use of Students and Practitioners of Medicine.

In one large octavo volume of 978 pages, elegantly printed on fine paper, and profusely illustrated with three Lithographic Plates and 313 Engravings on Wood. Price, in cloth, \$6.00; sheep, \$7.00.

While Prof. Flint's "Physiology of Man," in five octavo volumes, also published by D. Appleton & Co., is invaluable as a book of reference, giving an epitome of the literature of physiology, with copious references to other authors, the publishers have appreciated the necessity for a new text-book, for the use of students and practitioners of medicine.

This new work is intended to meet this pressing want, and it contains most of the facts presented in the larger treatise, without historical references or discussions of minor and controverted questions. The high reputation of the author as a public teacher, and the success of the larger treatise, render it certain that the "Text-book" will be admirably adapted to the wants of medical students.

In the "Text-book," all important points connected with Human Physiology are treated of fully and clearly, and many subjects, such as the Nervous System, the Special Senses, etc., the treatment of which is barren and unsatisfactory in many works written or republished in this country, are brought fully up to the requirements of the day.

The publishers have given great attention to the execution of the illustrations, few of which are familiar to American readers. It being almost impossible to reproduce some of the cuts taken from foreign works, they have succeeded in obtaining abroad about one hundred electrotypes from the original engravings contained in Sappey's great work upon Anatomy, which are unequalled in their mechanical execution. The subject of Generation is also illustrated by lithographic plates taken from Haeckel.

The great care necessary in the printing of the elaborate illustrations has caused an unavoidable delay in the appearance of the work; but the publishers feel confident that it will fully meet their expectations, and justify the reputation of its author.

"In preparing this text-book for the use of students and practitioners of medicine, I have endeavored to adapt it to the wants of the profession, as they have appeared to me after a considerable experience as a public teacher of human physiology. My large treatise in five volumes is here condensed, and I have omitted bibliographical citations and matters of purely historical interest. Many subjects, which were considered rather elaborately in my larger work, are here presented in a much more concise form. I have added, also, numerous illustrations, which I hope may lighten the labors of the student. A few of these are original, but by far the greatest part has been selected from reliable authorities. I have thought it not without historical interest to reproduce exactly some of the classical engravings from the works of great discoverers, such as illustrations contained in the original editions of Fabricius, Harvey, and Aesculapius. In addition, I have reproduced a few of the beautiful microscopical photographs taken at the United States Army Medical Museum, under the direction of Dr. J. J. Woodward, to whom I here express my grateful acknowledgments. I have also to thank M. Sappey for his kindness in furnishing electrotypes of many of the superb engravings with which his great work upon Anatomy is illustrated.

"My work in five volumes was intended as a book of reference, which I hope will continue to be useful to those who desire an account of the literature of physiology, as well as a statement of the facts of the science. I have always endeavored, in public teaching, to avoid giving undue prominence to points in which I might myself be particularly interested, from having made them subjects of special study or of original research. In my text-book I have carried out the same idea, striving to teach, systematically and with uniform emphasis, what students of medicine are expected to learn in physiology, and avoiding elaborate discussions of subjects not directly connected with practical medicine, surgery, and obstetrics. While I have referred to my original observations upon the location of the sense of want of air in the general system, the new excretory function of the liver, the function of glycogenesis, the influence of muscular exercise upon the elimination of urea, etc., I have not considered these subjects with great minuteness, and have generally referred the reader to monographs for the details of my experiments.

"Finally, in presenting this work to the medical profession, I cannot refrain from an expression of my acknowledgments to the publishers, who have spared nothing in carrying out my views, and have devoted special pains to the mechanical execution of the illustrations."—*Author's Preface.*

FLINT.

On the Physiological Effects of Severe and Protracted Muscular Exercise. With special reference to its Influence upon the Excretion of Nitrogen.

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology in the Bellevue Hospital Medical College, New York, etc., etc.

1 vol., 8vo. 91 pp. Cloth, \$2.00.

This monograph on the relations of Urea to Exercise is the result of a thorough and careful investigation made in the case of Mr. Edward Payson Weston, the celebrated pedestrian. The chemical analyses were made under the direction of R. O. Doernum, M. D., Professor of Chemistry and Toxicology in the Bellevue Hospital Medical College, by Mr. Oscar Loew, his assistant. The observations were made with the cooperation of J. C. Dalton, M. D., Professor of Physiology in the College of Physicians and Surgeons; Alexander B. Mott, M. D., Professor of Surgical Anatomy; W. H. Van Buren, M. D., Professor of Principles of Surgery; Austin Flint, M. D., Professor of the Principles and Practice of Medicine; W. A. Hammond, M. D., Professor of Diseases of the Mind and Nervous System—all of the Bellevue Hospital Medical College.

"This work will be found interesting to every physician. A number of important results were obtained valuable to the physiologist."—*Cincinnati Medical Repository.*

HAMILTON.

Clinical Electro-Therapeutics. (Medical and Surgical.) A Manual for Physicians for the Treatment more especially of Nervous Diseases.

By ALLAN McLANE HAMILTON, M. D.,

Physician in charge of the New York State Hospital for Diseases of the Nervous System; Member of the New York Neurological and County Medical Societies, etc., etc.

With Numerous Illustrations. 1 vol., 8vo. Cloth, \$2.00.

This work is the compilation of well-tryed measures and reported cases, and is intended as a simple guide for the general practitioner. It is as free from confusing theories, technical terms, and unproved statements, as possible. Electricity is indorsed as a very valuable remedy in certain diseases, and as an invaluable therapeutical means in nearly all forms of NERVOUS DISEASE; but not as a specific for every human ill, mental and physical.

HAMMOND.

Insanity in its Relations to Crime. A Text and a Commentary.

By WILLIAM A. HAMMOND, M. D.

1 vol., 8vo. 77 pp. Cloth, \$1.00.

"A part of this essay, under the title 'Society versus Insanity,' was contributed to *Putnam's Magazine*, for September, 1870. The greater portion is now first published. The importance of the subject considered can scarcely be over-estimated, whether we regard it from the standpoint of science or social economy; and, if I have aided in its elucidation, my object will have been attained."—*From Author's Preface.*

Clinical Lectures on Diseases of the Nervous System. Delivered at the Bellevue Hospital Medical College.

By WILLIAM A. HAMMOND, M. D.,

Professor of Diseases of the Mind and Nervous System, etc. Edited with Notes, by T. M. B. CROSS, M. D., Assistant to the Chair of Diseases of the Mind and Nervous System, etc.

In one handsome volume of 300 pages. Price, \$3.50.

HAMMOND.

A Treatise on Diseases of the Nervous System.

By WILLIAM A. HAMMOND, M. D.,

Professor of Diseases of the Mind and Nervous System in the Medical Department of the University of the City of New York; President of the New York Neurological Society, etc., etc.

Sixth Edition. 1 vol., 8vo. Strong Cloth Binding, \$6.00; Sheep, \$7.00.

The remarkable success attendant on the issue of the five previous editions of this work in less than four years has encouraged the author and publishers to attempt to make the work still more worthy the confidence of the medical profession. A great part of the treatise has been entirely rewritten, and several new chapters have been added. By a change in type, and enlarging the page, the new matter, amounting to one-half of the original work, has been added without increasing materially the bulk of the volume. Many new illustrations have been incorporated in the text, and the whole treatise has been brought fully up to the present time. In addition to the fund of personal observation and experience adduced by Prof. Hammond, the labors of English, French, and German writers have received due attention.

Among the diseases considered in the present edition, which were not treated of in the former editions, are: Chronic Vertical Meningitis; Chronic Basilar Meningitis; Cervical Pschy-Meningitis; Spinal Paralysis of Adults; Amyotrophic Lateral Spinal Sclerosis; Facial Atrophy; Organic Diseases of Nerves; Chronic Alcoholic Intoxication; Delirium Tremens; Exophthalmic Goitre; and Anaphratic Paralysis—paralysis induced by a frequent repetition of certain muscular actions. Besides which, extensive alterations and additions have been made to the remarks on other affections—the departments of Morbid Anatomy, Pathology, and Treatment, being especially amplified.

NOTICES OF FORMER EDITIONS.

"Free from useless verbiage and obscurity, it is evidently the work of a man who knows what he is writing about, and knows how to write about it."—*Chicago Medical Journal*.

"Unquestionably the most complete treatise on the diseases to which it is devoted which has yet appeared in the English language."—*London Medical Times and Gazette*.

"This is a valuable and comprehensive book; it embraces many topics, and extends over a wide sphere. One of the most valuable parts of it relates to the Diseases of the Brain; while the remaining portion of the volume treats of the Diseases of the Spinal Cord, the Cerebro-spinal System, the Nerve-Cells, and the Peripheral Nerves."—*British Medical Journal*.

"The work before us is unquestionably the most exhaustive treatise, on the diseases to which it is devoted, that has yet appeared in English. And its distinctive value arises from the fact that the work is no mere *ragliamento* of old observations, but rests on his own experience and practice, which, as we have before observed, have been very extensive."—*American Journal of Syphilography*.

"The author of this work has attained a high rank among our brethren across the Atlantic from previous labors in connection with the disorders of the nervous system, as well as from various other contributions to medical literature, and he now holds the official appointments of Physician to the New York State Hospital for the Diseases of the Nervous System, and Professor of the same department in the Bellevue Hospital Medical College. The present treatise is the fruit of the experience thus acquired, and we have no hesitation in pronouncing it a most valuable addition to our systematic literature."—*Glasgow Medical Journal*.

HOFFMANN.

Manual of Chemical Analysis, as applied to the Examination of Medicinal Chemicals and their Preparations. A Guide for the Determination of their Identity and Quality, and for the Detection of Impurities and Adulterations. For the use of Pharmacologists, Physicians, Druggists, and Manufacturing Chemists, and Pharmaceutical and Medical Students.

By FRED. HOFFMANN, PHIL. D.

One vol., 8vo. Richly illustrated. Cloth. Price, \$3.

SPECIMEN OF ILLUSTRATIONS.

"This volume is a carefully-prepared work, and well up to the existing state of both the science and art of modern pharmacy. It is a book which will find its place in every medical and pharmaceutical laboratory and library, and is a safe and instructive guide to medical students and practitioners of medicine."—*American Journal of Science and Arts*.

In America this work has already met with general and unqualified approval; and in Europe is now being welcomed as one of the best and most important additions to modern pharmaceutical literature.

Send for descriptive circular. Address

D. APPLETON & CO., 549 & 551 Broadway, N. Y. City.

HOLLAND.

Recollections of Past Life,

By SIR HENRY HOLLAND, Bart., M. D., F. R. S., K. C. B., etc.,
President of the Royal Institution of Great Britain, Physician-in-Ordinary to the Queen,
etc., etc.

1 vol., 12mo, 351 pp. Price, Cloth, \$2.00.

A very entertaining and instructive narrative, partaking somewhat of the nature of autobiography and yet distinct from it, in this, that its chief object, as alleged by the writer, is not so much to recount the events of his own life, as to perform the office of chronicler for others with whom he came in contact and was long associated.

The "Life of Sir Henry Holland" is one to be recollected, and he has not erred in giving an outline of it to the public.—*The Lancet*.

"His memory was—is, we may say, for he is still alive and in possession of all his faculties—stored with recollections of the most eminent men and women of this century. . . . A life extending over a period of eighty-four years, and passed in the most active manner, in the midst of the best society, which the world has to offer, must necessarily be full of singular interest; and Sir Henry Holland has fortunately not waited until his memory lost its freshness before recalling some of the incidents in it."—*The New York Times*.

HOWE.

Emergencies, and How to Treat Them.

The Etiology, Pathology, and Treatment of Accidents, Diseases, and Cases of Poisoning, which demand Prompt Attention. Designed for Students and Practitioners of Medicine.

By JOSEPH W. HOWE, M. D.,

Clinical Professor of Surgery in the Medical Department of the University of New York
Visiting Surgeon to Charity Hospital; Fellow of the New York Academy
of Medicine, etc., etc.

1 vol., 8vo. Cloth, \$3.00.

"This work has a tiding title, and was written by a gentleman of acknowledged ability, to fill a void in the profession. . . . To the general practitioner in towns, villages, and in the country, where the aid and moral support of a consultation cannot be availed of, this volume will be recognized as a valuable help. We commend it to the profession.—*Cincinnati Lancet and Observer*.

"This work is certainly novel in character, and its usefulness and acceptability are as marked as its novelty. . . . The book is confidently recommended."—*Richmond and Louisville Medical Journal*.

"This volume is a practical illustration of the positive side of the physician's life, a constant reminder of what he is to do in the sudden emergencies which frequently occur in practice. . . . The author wastes no words, but devotes himself to the description of each disease as if the patient were under his hands. Because it is a good book we recommend it most heartily to the profession."—*Boston Medical and Surgical Journal*.

"This work bears evidence of a thorough practical acquaintance with the different branches of the profession. The author seems to possess a peculiar aptitude for imparting instruction as well as for simplifying tedious details. . . . A careful perusal will amply repay the student and practitioner."—*New York Medical Journal*.

"This is the best work of the kind we have ever seen."—*New York Journal of Psychological Medicine*.

HOWE.

The Breath, and the Diseases which give it a Fetid Odor. With Directions for Treatment.

By JOSEPH W. HOWE, M. D.,

Author of "Emergencies," "Winter Homes," etc.; Clinical Professor of Surgery in the Medical Department of the University of New York; Visiting Surgeon to Charity and St. Francis Hospitals; Fellow of the New York Academy of Medicine, etc.

"It is somewhat remarkable that the subject of fetid breath, which occasions so much annoyance. . . . should have attracted so little attention from authors and investigators. Hence a thoroughly scientific exposition of the whole subject, such as Dr. Howe has given us, has long been a desideratum. . . . This little volume well deserves the attention of physicians, to whom we commend it most highly."—*Chicago Medical Journal*.

"To any one suffering from the affection, either in his own person or in that of his intimate acquaintances, we can commend this volume as containing all that is known concerning the subject, set forth in a pleasant style."—*Philadelphia Medical Times*.

"This little work is on a subject that has heretofore been almost entirely ignored by medical authors, yet its importance is well known by every practitioner. . . . The author gives a succinct account of the diseased conditions in which a fetid breath is an important symptom, with his method of treatment. We consider the work a real addition to medical literature."—*Cincinnati Medical Journal*.

HUXLEY AND YOUMANS.

The Elements of Physiology and Hygiene. With Numerous Illustrations.

By THOMAS H. HUXLEY, LL. D., F. R. S., and
WILLIAM JAY YOUMANS, M. D.

New and Revised Edition. 1 vol., 12mo. 420 pp. \$1.75.

A text-book for educational institutions, and a valuable elementary work for students of medicine. The greater portion is from the pen of Professor Huxley, adapted by Dr. Youmans to the circumstances and requirements of American education. The eminent claim of Professor Huxley's "Elementary Physiology" is that, while up to the times, it is trustworthy in its presentation of the subject; while rejecting discredited doctrines and doubtful speculations, it embodies the latest results that are established, and represents the present actual state of physiological knowledge.

"A valuable contribution to anatomical and physiological science."—*Religious Telescope*.

"A clear and well arranged work, embracing the latest discoveries and accepted theories."—*Buffalo Commercial*.

"Teeming with information concerning the human physical economy."—*Evening Journal*.

HUXLEY.

The Anatomy of Vertebrated Animals.

By THOMAS HENRY HUXLEY, LL. D., F. R. S.,

Author of "Man's Place in Nature," "On the Origin of Species," "Lay Sermons and Addresses," etc.

1 vol., 12mo. Cloth, \$2.50.

The former works of Prof. Huxley leave no room for doubt as to the importance and value of his new volume. It is one which will be very acceptable to all who are interested in the subject of which it treats.

"This long-expected work will be cordially welcomed by all students and teachers of Comparative Anatomy as a compendious, reliable, and, notwithstanding its small dimensions, most comprehensive guide on the subject of which it treats. To praise or to criticize the work of so accomplished a master of his favorite science would be equally out of place. It is enough to say that it realizes, in a remarkable degree, the anticipations which have been formed of it; and that it presents an extraordinary combination of wide, general views, with the clear, accurate, and succinct statement of a prodigious number of individual facts."—*Nature*.

JOHNSON.

The Chemistry of Common Life.

Illustrated with numerous Wood Engravings.

By JAMES F. JOHNSON, M. A., F. R. S., F. G. S., ETC., ETC.,

Author of "Lectures on Agricultural Chemistry and Geology," "A Catechism of Agricultural Chemistry and Geology," etc.

2 vols., 12mo. Cloth, \$3.00.

It has been the object of the author in this work to exhibit the present condition of chemical knowledge, and of matured scientific opinion, upon the subjects to which it is devoted. The reader will not be surprised, therefore, should he find in it some things which differ from what is to be found in other popular works already in his hands or on the shelves of his library.

LETTERMAN.

Medical Recollections of the Army of the Potomac.

By JONATHAN LETTERMAN, M. D.,

Late Surgeon U. S. A., and Medical Director of the Army of the Potomac.

1 vol., 8vo. 194 pp. Cloth, \$1.00.

"This account of the medical department of the Army of the Potomac has been prepared, amid pressing engagements, in the hope that the labors of the medical officers of that army may be known to an intelligent people, with whom to know is to appreciate; and as an affectionate tribute to many, long my zealous and efficient colleagues, who, in days of trial and danger, which have passed, let us hope never to return, evinced their devotion to their country and to the cause of humanity, without hope of promotion or expectation of reward."—*Preface.*

"We venture to assert that but few who open this volume of medical annals, pregnant as they are with instruction, will care to do otherwise than finish them at a sitting."—*Medical Record.*

"A graceful and affectionate tribute."—*N. Y. Medical Journal.*

LEWES.

The Physiology of Common Life.

By GEORGE HENRY LEWES,

Author of "Sensate Studies," "Life of Goethe," etc.

2 vols., 12mo. Cloth, \$3.00.

The object of this work differs from that of all others on popular science in its attempt to meet the wants of the student, while meeting those of the general reader, who is supposed to be wholly unacquainted with anatomy and physiology.

MAUDSLEY.

The Physiology and Pathology of the Mind.

By HENRY MAUDSLEY, M. D., LONDON,

Fellow of the Royal College of Physicians; Professor of Medical Jurisprudence in University College, London; President-elect of the Medico-Psychological Association; Honorary Member of the Medico-Psychological Society of Paris, of the Imperial Society of Physicians of Vienna, and of the Society for the Promotion of Psychiatry and Forensic Psychology of Vienna; formerly Resident Physician of the Manchester Royal Lunatic Asylum, etc., etc.

1 vol., 8vo. 422 pp. Cloth, \$3.00.

This work aims, in the first place, to treat of mental phenomena from a physiological rather than from a metaphysical point of view; and, secondly, to bring the manifold instructive instances presented by the unsound mind to bear upon the interpretation of the obscure problems of mental science.

"Dr. Maudsley has had the courage to undertake, and the skill to execute, what is, at least in English, an original enterprise."—*London Saturday Review.*

"It is so full of sensible reflections and sound truths that their wide dissemination could not but be of benefit to all thinking persons."—*Psychological Journal.*

"Unquestionably one of the ablest and most important works on the subject of which it treats that has ever appeared, and does credit to his philosophical acumen and accurate observation."—*Medical Record.*

"We lay down the book with admiration, and we commend it most earnestly to our readers as a work of extraordinary merit and originality—one of those productions that are evolved only occasionally in the lapse of years, and that serve to mark actual and very decided advantages in knowledge and science."—*N. Y. Medical Journal.*

Body and Mind: An Inquiry into their Connection and Mutual Influence, especially in reference to Mental Disorders; an enlarged and revised edition to which are added Psychological Essays.

By HENRY MAUDSLEY, M. D., LONDON,

Author of "The Physiology and Pathology of the Mind."

1 vol., 12mo. 155 pp. Cloth, \$1.00.

The general plan of this work may be described as being to bring man, both in his physical and mental relations, as much as possible within the scope of scientific inquiry.

"A representative work, which every one must study who desires to know what is doing in the way of real progress, and not mere chatter, about mental physiology and pathology."—*Lancet.*

"It distinctly marks a step in the progress of scientific psychology."—*The Practitioner.*

Responsibility in Mental Diseases.

By HENRY MAUDSLEY, M. D., LONDON,

Author of "Body and Mind," "Physiology and Pathology of the Mind."

1 vol., 12mo. 313 pp. Cloth, \$1.50.

"This book is a compact presentation of those facts and principles which require to be taken into account in estimating human responsibility—not legal responsibility merely, but responsibility for conduct in the family, the school, and all phases of social relation in which obligation enters as an element. The work is new in plan, and was written to supply a wide-felt want which has not hitherto been met."—*The Popular Science Monthly.*

ROBERTSON.

Mind: *A Quarterly Review of Psychology and Philosophy.*

Price, \$4.00 per Year.

This new and important periodical, devoted to the science of mind in its modern aspects, has a broad claim upon the thoughtful classes of the community—teachers, professors, physicians, lawyers, clergymen, students, and all interested in the general advance of ideas.

"Mind" is edited by Prof. Croom Robertson, of University College, London, assisted by Prof. Bain and a large number of the ablest psychologists of England; and it will be an organ for the publication of original researches, and a critical record of the progress made in psychology and philosophy in England, on the Continent, and in the United States. Mental phenomena will be taken up on the physiological side, as well as on the side of consciousness, as displayed in the inferior races of mankind, and in the lower animals; in its abnormal phases, as insanity and idiocy; in its relation to language, and in its bearing upon the subject of education. It will also give careful reports of the state and progress of psychological study in the universities of different countries.

MARKOE.

A Treatise on Diseases of the Bones.

By THOMAS M. MARKOE, M. D.,

Professor of Surgery in the College of Physicians and Surgeons, New York, etc.

WITH NUMEROUS ILLUSTRATIONS.

1 vol., 8vo. Cloth, \$4.50.

This valuable work is a treatise on Diseases of the Bones, embracing their structural changes as affected by disease, their clinical history and treatment, including also an account of the various tumors which grow in or upon them. None of the *injuries* of bone are included in its scope, and no *joint* diseases, excepting where the condition of the bone is a prime factor in the problem of disease. As the work of an eminent surgeon of large and varied experience, it may be regarded as the best on the subject, and a valuable contribution to medical literature.

"The book which I now offer to my professional brethren contains the substance of the lectures which I have delivered during the past twelve years at the college. . . . I have followed the leadings of my own studies and observations, dwelling more on those branches where I had seen and studied most, and perhaps too much neglecting others where my own experience was more barren, and therefore to me less interesting. I have endeavored, however, to make up the deficiencies of my own knowledge by the free use of the materials scattered so richly through our periodical literature, which scattered leaves it is the right and the duty of the systematic writer to collect and to embody in any account he may offer of the state of a science at any given period."—*Extract from Author's Preface.*

MEYER.

Electricity in its Relations to Practical
*Medicine.*By DR. MORITZ MEYER,
Royal Counsellor of Health, etc.Translated from the Third German Edition, with Notes and Additions,
A New and Revised Edition.

By WILLIAM A. HAMMOND, M. D.,

Professor of Diseases of the Mind and Nervous System, and of Clinical Medicine, in the Bellevue
Hospital Medical College; Vice-President of the Academy of Mental Sciences, National
Institute of Letters, Arts, and Sciences; late Surgeon-General U. S. A., etc.

1 vol., 8vo. 497 pp. Cloth, \$4.50.

"It is the duty of every physician to study the action of electricity, to become acquainted with its value in therapeutics, and to follow the improvements that are being made in the apparatus for its application in medicine, that he may be able to choose the one best adapted to the treatment of individual cases, and to test a remedy fairly and without prejudice, which already, especially in nervous diseases, has been used with the best results, and which promises to yield an abundant harvest in a still broader domain."—*From Author's Preface.*

SPECIMEN OF ILLUSTRATIONS.

Saxton-Eittinghausen Apparatus.

"Those who do not read German are under great obligations to William A. Hammond, who has given them not only an excellent translation of a most excellent work, but has given us much valuable information and many suggestions from his own personal experience."—*Medical Record.*

"Dr. Moritz Meyer, of Berlin, has been for more than twenty years a laborious and conscientious student of the application of electricity to practical medicine, and the results of his labors are given in this volume. Dr. Hammond, in making a translation of the third German edition, has done a real service to the profession of this country and of Great Britain. Plainly and concisely written, and simply and clearly arranged, it contains just what the physician wants to know on the subject."—*N. Y. Medical Journal.*

"It is destined to fill a want long felt by physicians in this country."—*Journal of Obstetrics.*

NIEMEYER.

A Text-Book of Practical Medicine.

With Particular Reference to Physiology and Pathological Anatomy.

By the late Dr. FELIX VON NIEMEYER,

Professor of Pathology and Therapeutics; Director of the Medical Clinic of the University of Tübingen.

Translated from the Eighth German Edition, by special permission of the Author,

By GEORGE H. HUMPHREYS, M. D.,

Late one of the Physicians to the Bureau of Medical and Surgical Relief at Bellevue Hospital for the Out-door Poor; Fellow of the New York Academy of Medicine, etc.,

and

CHARLES E. HACKLEY, M. D.,

One of the Physicians to the New York Hospital; one of the Surgeons to the New York Eye and Ear Infirmary; Fellow of the New York Academy of Medicine, etc.

Revised Edition. 2 vols., 8vo. 1,528 pp. Cloth, \$9.00; Sheep, \$11.00.

The author undertakes, first, to give a picture of disease which shall be as lifelike and faithful to nature as possible, instead of being a mere theoretical scheme; secondly, so to utilize the more recent advances of pathological anatomy, physiology, and physiological chemistry, as to furnish a clearer insight into the various processes of disease.

The work has met with the most flattering reception and deserved success; has been adopted as a text-book in many of the medical colleges both in this country and in Europe; and has received the very highest encomiums from the medical and secular press.

"It is comprehensive and concise, and is characterized by clearness and originality."—*Dublin Quarterly Journal of Medicine.*

"Its author is learned in medical literature; he has arranged his materials with care and judgment, and has thought over them."—*The Lancet.*

"As a full, systematic, and thoroughly practical guide for the student and physician, it is not excelled by any similar treatise in any language."—*Appletons' Journal.*

"The author is an accomplished pathologist and practical physician; he is not only capable of appreciating the new discoveries, which during the last ten years have been unusually numerous and important in scientific and practical medicine, but, by his clinical experience, he can put these new views to a practical test, and give judgment regarding them."—*Edinburgh Medical Journal.*

"From its general excellence, we are disposed to think that it will soon take its place among the recognized text-books."—*American Quarterly Journal of Medical Sciences.*

"The first inquiry in this country regarding a German book generally is, 'Is it a work of practical value?' Without stopping to consider the justness of the American idea of the 'practical,' we can unhesitatingly answer, 'It is!'"—*New York Medical Journal.*

"The author has the power of sifting the tares from the wheat—a matter of the greatest importance in a text-book for students."—*British Medical Journal.*

"Whatever exalted opinion our countrymen may have of the author's talents of observation and his practical good sense, his text-book will not disappoint them, while those who are so unfortunate as to know him only by name, have in store a rich treat."—*New York Medical Record.*

NEUMANN.

Hand-Book of Skin Diseases.

By Dr. ISIDOR NEUMANN,

Lecturer on Skin Diseases in the Royal University of Vienna.

Translated from advanced sheets of the second edition, furnished by the Author; with Notes,

By LUCIUS D. BULKLEY, A. M., M. D.,

Surgeon to the New York Dispensary, Department of Venereal and Skin Diseases; Assistant to the Skin Clinic of the College of Physicians and Surgeons, New York; Member of the New York Dermatological Society, etc., etc.

1 vol., 8vo. About 450 pages and 66 Woodcuts. Cloth, \$4.00.

Prof. Neumann ranks second only to Hebra, whose assistant he was for many years and his work may be considered as a fair exponent of the German practice of Dermatology. The book is abundantly illustrated with plates of the histology and pathology of the skin. The translator has endeavored, by means of notes from French, English, and American sources, to make the work valuable to the student as well as to the practitioner.

"It is a work which I shall heartily recommend to my class of students at the University of Pennsylvania, and one which I feel sure will do much toward enlightening the profession on this subject."—*Louis A. Dühring.*

"I know it to be a good book, and I am sure that it is well translated; and it is interesting to find it illustrated by references to the views of co-laborers in the same field."—*Braunus Wilson.*

"So complete as to render it a most useful book of reference."—*T. McGill Anderson.*

"There certainly is no work extant which deals so thoroughly with the Pathological Anatomy of the Skin as does this hand-book."—*N. Y. Medical Record.*

"The original notes by Dr. Bulkley are very practical, and are an important adjunct to the text. . . . I anticipate for it a wide circulation."—*Shas Durkee, Boston.*

"I have already twice expressed my favorable opinion of the book in print, and am glad that it is given to the public at last."—*James C. White, Boston.*

"More than two years ago we noticed Dr. Neumann's admirable work in its original shape; and we are therefore absolved from the necessity of saying more than to repeat our strong recommendation of it to English readers."—*Practitioner.*

NEFTTEL.

Galvano-Therapeutics. *The Physiological and Therapeutical Action of the Galvanic Current upon the Acoustic, Optic, Sympathetic, and Pneumogastric Nerves.*

By WILLIAM B. NEFTTEL.

1 vol., 12mo. 161 pp. Cloth, \$1.50.

This book has been republished at the request of several aural surgeons and other professional gentlemen, and is a valuable treatise on the subjects of which it treats. Its author, formerly visiting physician to the largest hospital of St. Petersburg, has had the very best facilities for investigation.

"This little work shows, as far as it goes, full knowledge of what has been done on the subjects treated of, and the author's practical acquaintance with them."—*New York Medical Journal.*

"Those who use electricity should get this work, and those who do not should peruse it to learn that there is one more therapeutical agent that they could and should possess."—*The Medical Investigator.*

NIGHTINGALE.

Notes on Nursing: *What it is, and what it is not.*

By FLORENCE NIGHTINGALE.

1 vol., 12mo. 140 pp. Cloth, 75 cents.

Every-day sanitary knowledge, or the knowledge of nursing, or, in other words, of how to put the constitution in such a state as that it will have no disease or that it can recover from disease, takes a higher place. It is recognized as the knowledge which every one ought to have—distinct from medical knowledge, which only a profession can have.

PAGET.

Clinical Lectures and Essays.

By SIR JAMES PAGET, BART.

F. E. S., D. C. L., Oxon., LL. D., Cantab.; Sergeant-Surgeon Extraordinary to her Majesty the Queen; Surgeon to H. R. H. the Prince of Wales; Consulting Surgeon to St. Bartholomew's Hospital.

EDITED BY HOWARD MARSH,

Assistant Surgeon to St. Bartholomew's Hospital, and to the Hospital for Sick Children.

1 vol., 8vo. Cloth. Price, \$5.00.

CONTENTS.

THE VARIOUS RISKS OF OPERATIONS—THE CALAMITIES OF SURGERY—STAMMERING WITH OTHER ORGANS THAN THOSE OF SPEECH—CASES THAT BONE-SETTERS CURE—STRANGULATED HERNIA—CHRONIC PYEMIA—NERVOUS MIMICRY—TREATMENT OF CARBUNCLE—SEXUAL HYPOCHONDRIASIS—GOUTY PHLEBITIS—RESIDUAL ABSCESS—DISSECTION-POISONS—QUIET NECROSIS—SENILE SCROFULA—SCARLET FEVER AFTER OPERATIONS—NOTES FOR THE STUDY OF SOME CONSTITUTIONAL DISEASES—NOTES—INDEX.

PEREIRA.

Dr. Pereira's Elements of Materia Medica and Therapeutics. *Abridged and adapted for the Use of Medical and Pharmaceutical Practitioners and Students, and comprising all the Medicines of the British Pharmacopœia, with such others as are frequently ordered in Prescriptions, or required by the Physician.*

EDITED BY ROBERT BENTLEY AND THEOPHILUS REDWOOD.

New Edition. Brought down to 1872. 1 vol., Royal 8vo. Cloth, \$7.00; Sheep, \$8.00.

PEASLEE.

Ovarian Tumors; *Their Pathology, Diagnosis, and Treatment, with Reference especially to Ovariectomy.*

By E. R. PEASLEE, M.D.,

Professor of Diseases of Women in Dartmouth College; one of the Consulting Physicians to the New York State Woman's Hospital; formerly Professor of Obstetrics and Diseases of Women in the New York Medical College; Corresponding Member of the Obstetrical Society of Berlin, etc.

1 vol., 8vo. Illustrated with many Woodcuts, and a Steel Engraving of Dr. E. McDowell, the "Father of Ovariectomy." Price, Cloth, \$5.00.

This valuable work, embracing the results of many years of successful experience in the department of which it treats, will prove most acceptable to the entire profession; while the high standing of the author and his knowledge of the subject combine to make the book the best in the language. It is divided into two parts; the first treating of Ovarian Tumors, their anatomy, pathology, diagnosis, and treatment, except by extirpation; the second of Ovariectomy, its history and statistics, and of the operation. Fully illustrated, and abounding with information, the result of a prolonged study of the subject, the work should be in the hands of every physician in the country.

The following are some of the opinions of the press, at home and abroad, of this great work, which has been justly styled, by an eminent critic, "the most complete medical monograph on a practical subject ever produced in this country."

"His opinions upon what others have advised are clearly set forth, and are as interesting and important as are the propositions he has himself advanced; while there are a freshness, a vigor, an authority about his writing, which great practical knowledge alone can confer."—*The Lancet*.

"Both Wells's and Peaslee's works will be received with the respect due to the great reputation and skill of their authors. Both exist not only as masters of their art, but as clear and graceful writers. In either work the student and practitioner will find the fruits of rich experience, of earnest thought, and of steady, well-balanced judgment. As England is proud of Wells, so may America well be proud of Peaslee, and the great world of science may be proud of both."—*British Medical Journal*.

"This is an excellent work, and does great credit to the industry, ability, science, and learning of Dr. Peaslee. Few works issue from the medical press so complete, so exhaustively learned, so imbued with a practical tone, without losing other substantial good qualities."—*Edinburgh Medical Journal*.

"In closing our review of this work, we cannot avoid again expressing our appreciation of the thorough study, the careful and honest statements, and candid spirit, which characterize it. For the use of the student we should give the preference to Dr. Peaslee's work, not only from its completeness, but from its more methodical arrangement."—*American Journal of Medical Sciences*.

"Dr. Peaslee brings to the work a thoroughness of study, a familiarity with the whole field of histology, physiology, pathology, and practical gynecology, not excelled, perhaps, by those of any man who ever performed the operation."—*Medical Record*.

"We deem its careful perusal indispensable to all who would treat ovarian tumors with a good conscience."—*American Journal of Obstetrics*.

"It shows prodigious industry, and embodies within its five hundred and odd pages pretty much all that seems worth knowing on the subject of ovarian diseases."—*Philadelphia Medical Times*.

"Great thoroughness is shown in Dr. Peaslee's treatment of all the details of this very admirable work."—*Boston Medical and Surgical Journal*.

"Indispensable to the American student of gynecology."—*Pacific Medical and Surgical Journal*.

Reports. *Bellevue and Charity Hospital Reports for 1870, containing valuable contributions from*

ISAAC B. TAYLOR, M.D., AUSTIN FLEET, M.D., LEWIS A. SAYRE, M.D., WILLIAM A. HAMMOND, M.D., T. GAILLARD THOMAS, M.D., FRANK H. HAMILTON, M.D., and others.

1 vol., 8vo. Cloth, \$4.00.

"These institutions are the most important, as regards accommodations for patients and variety of cases treated, of any on this continent, and are surpassed by but few in the world. The gentlemen connected with them are acknowledged to be among the first in their profession, and the volume is an important addition to the professional literature of this country."—*Psychological Journal*.

RICHARDSON. Diseases of Modern Life.

By Dr. B. W. RICHARDSON, F. R. S.

1 vol., 12mo. \$2.00.

PART THE FIRST.—PHENOMENA OF DISEASE, INCIDENTAL AND GENERAL.

- Chap. I.—Natural Life to Natural Death. Euthanasia.
 " II.—Phenomena of Disease, Classification and Distribution.
 " III.—Disease Antecedent to Birth.
 " IV.—External Origins and Causes of Disease.
 " V.—Phenomena of Disease, from Causes External and Uncontrollable.
 " VI.—Phenomena of Disease, from Causes External and Communicable.
 " VII.—Phenomena of Disease, incidental to Old Age and Natural Decay.

PART THE SECOND.—PHENOMENA OF DISEASE, INDUCED AND SPECIAL.

- Chap. I.—Definition and Classification of Induced Diseases.
 " II.—Disease from Worry and Mental Strain (Broken Heart).
 " III.—Disease from Worry and Mental Strain, continued (Paralysis).
 " IV.—Disease from Physical Strain.
 " V.—Disease from Combined Physical and Mental Strain.
 " VI.—Disease from the Influence of the Passions.
 " VII.—Disease from Alcohol. Physiological Proem.
 " VIII.—Phenomena of Disease from Alcohol. The Functional Type.
 " IX.—Organic Disease from Alcohol.
 " X.—Disease from Tobacco. Physiological Phenomena.
 " XI.—Disease from Tobacco, continued (of the Heart and Lungs).
 " XII.—Disease from Tobacco, continued (of the Brain and Nervous System).
 " XIII.—Disease from the Use of Narcotics (from Opium, Chloral, and Absinthe).
 " XIV.—Disease from Misuse of Foods.
 " XV.—Disease incident to some Occupations.
 " XVI.—Disease from Late Hours and Deficient Sleep.
 " XVII.—Disease from Imperfect Supply of Air.
 " XVIII.—Disease from Imitation and Moral Contagion.

PART THE THIRD.—SUMMARY OF PRACTICAL APPLICATIONS.

STEINER.

Compendium of Children's Diseases.

A Hand-book for Practitioners and Students.

By Dr. JOHANN STEINER,

Professor of the Diseases of Children in the University of Prague, and Physician to the Francis-Joseph Hospital for Sick Children.

Translated from the Second German Edition by Lawson Tait, F. R. C. S.,

Surgeon to the Birmingham Hospital for Women; Consulting Surgeon to the West Bromwich Hospital; Lecturer on Physiology at the Midland Institute.

1 vol., 8vo. Cloth, \$3.50.

TRANSLATOR'S PREFACE.

Dr. Steiner's book has met with such marked success in Germany that a second edition has already appeared, a circumstance which has delayed the appearance of its English form, in order that I might be able to give his additions and corrections.

In Germany the use of the metric system has not yet entirely superseded the local measures; but it is rapidly doing so, as in England. I have, therefore, rendered all thermometric observations in the Centigrade scale, and all measurements in centi- and millimètres.

I have added as an Appendix the "Rules for Management of Infants" which have been issued by the staff of the Birmingham Sick Children's Hospital, because I think that they have set an example by freely distributing these rules among the poor for which they cannot be sufficiently commended, and which it would be wise for other sick children's hospitals to follow.

I have also added a few notes, chiefly, of course, relating to the surgical ailments of children.

BIRMINGHAM, October, 1874.

LAWSON TAIT.

STROUD.

The Physical Cause of the Death of Christ, and its Relations to the Principles and Practice of Christianity.

By WILLIAM STROUD, M. D.

With a Letter on the Subject, by Sir James Y. Simpson, Bart., M. D.

1 vol., 12mo. 422 pp. Cloth, \$2.00.

This important and remarkable book is, in its own place, a masterpiece, and will be considered as a standard work for many years to come.

"The principal point insisted on is, that the death of Christ was caused by rupture or incercion of the heart. Sir James Y. Simpson, who had read the author's treatise and various comments on it, expressed himself very positively in favor of the views maintained by Dr. Stroud."—*Psychological Journal*.

SIMPSON.

The Posthumous Works of Sir James Young Simpson, Bart., M. D. In Three Volumes.

Volume I.—*Selected Obstetrical and Gynecological Works of Sir James Y. Simpson, Bart., M. D., D. C. L.*, late Professor of Midwifery in the University of Edinburgh. Containing the substance of his Lectures on Midwifery. Edited by J. WATT BLACK, A. M., M. D., Member of the Royal College of Physicians, London; Physician-Accoucheur to Charing Cross Hospital, London; and Lecturer on Midwifery and Diseases of Women and Children in the Hospital School of Medicine.

1 vol., 8vo. 862 pp. Cloth, \$3.00.

This volume contains all the more important contributions of Sir James Y. Simpson to the study of obstetrics and diseases of Women, with the exception of his clinical lectures on the latter subject, which will shortly appear in a separate volume. This first volume contains many of the papers reprinted from his *Obstetric Memoirs and Contributions*, and also his *Lecture Notes*, now published for the first time, containing the substance of the practical part of his course of midwifery. It is a volume of great interest to the profession, and a fitting memorial of its renowned and talented author.

"To many of our readers, doubtless, the chief of the papers it contains are familiar. To others, although probably they may be aware that Sir James Simpson has written on the subjects, the papers themselves will be new and fresh. To the first class we would recommend this edition of Sir James Simpson's works, as a valuable volume of reference; to the latter, as a collection of the works of a great master and improver of his art, the study of which cannot fail to make them better prepared to meet and overcome its difficulties."—*Medical Times and Gazette*.

Volume II.—*Anæsthesia, Hæmiplegia, etc.* Edited by Sir WALTER SIMPSON, Bart.

1 vol., 8vo. 560 pp. Cloth, \$3.00.

"We say of this, as of the first volume, that it should find a place on the table of every practitioner; for, though it is patchwork, each piece may be picked out and studied with pleasure and profit."—*The Lancet (London)*.

Volume III.—*The Diseases of Women.* Edited by ALEX. SIMPSON, M. D., Professor of Midwifery in the University of Edinburgh.

1 vol., 8vo. Cloth, \$3.00.

One of the best works on the subject extant. Of inestimable value to every physician.

SWETT.

A Treatise on the Diseases of the Chest.

Being a Course of Lectures delivered at the New York Hospital.

By JOHN A. SWETT, M. D.,

Professor of the Institutes and Practice of Medicine in the New York University; Physician to the New York Hospital; Member of the New York Pathological Society.

1 vol., 8vo. 587 pp. \$3.50.

Embodied in this volume of lectures is the experience of ten years in hospital and private practice.

SAYRE.

A Practical Manual on the Treatment of Club-Foot.

By LEWIS A. SAYRE, M. D.,

Professor of Orthopedic Surgery in Bellevue Hospital Medical College; Surgeon to Bellevue and Charity Hospitals, etc.

1 vol., 12mo. New and Enlarged Edition. Cloth, \$1.00.

"The object of this work is to convey, in as concise a manner as possible, all the practical information and instruction necessary to enable the general practitioner to apply that plan of treatment which has been so successful in my own hands."—*Preface.*

"The book will very well satisfy the wants of the majority of general practitioners, for whose use, as stated, it is intended."—*New York Medical Journal.*

SMITH.

On Foods.

By EDWARD SMITH, M. D., LL. B., F. R. S.,

Fellow of the Royal College of Physicians of London, etc., etc.

1 vol., 12mo. Cloth. Price, \$1.75.

"Since the issue of the author's work on 'Practical Dietary,' he has felt the want of another, which would embrace all the generally-known and less-known foods, and contain the latest scientific knowledge respecting them. The present volume is intended to meet this want, and will be found useful for reference, to both scientific and general readers. The author extends the ordinary view of foods, and includes water and air, since they are important both in their food and sanitary aspects.

SCHROEDER.

A Manual of Midwifery. Including the Pa- thology of Pregnancy and the Puerperal State.

By Dr. KARL SCHROEDER,

Professor of Midwifery and Director of the Lying-in Institution in the University of Erlangen.

TRANSLATED FROM THE THIRD GERMAN EDITION

By CHARLES H. CARTER, B. A., M. D., B. S. London,

Member of the Royal College of Physicians, London, and Physician Accoucheur to St. George's, Hanover Square, Dispensary.

With Twenty-six Engravings on Wood. 1 vol., 8vo. Cloth.

"The translator feels that no apology is needed in offering to the profession a translation of Schroeder's Manual of Midwifery. The work is well known in Germany and extensively used as a text-book; it has already reached a third edition within the short space of two years, and it is hoped that the present translation will meet the want, long felt in this country, of a manual of midwifery embracing the latest scientific researches on the subject.

TILT.

A Hand-Book of Uterine Therapeu- tics and of Diseases of Women.

By EDWARD JOHN TILT, M. D.,

Member of the Royal College of Physicians; Consulting Physician to the Farringdon General Dispensary; Fellow of the Royal Medical and Chirurgical Society, and of several British and foreign societies.

1 vol., 8vo. 345 pp. Cloth, \$3.50.

Second American edition, thoroughly revised and amended.

"In giving the result of his labors to the profession the author has done a great work. Our readers will find its pages very interesting, and, at the end of their task, will feel grateful to the author for many very valuable suggestions as to the treatment of uterine diseases."—*The Lancet.*

"Dr. Tilt's 'Hand-Book of Uterine Therapeutics' supplies a want which has often been felt. It may, therefore, be read not only with pleasure and instruction, but will also be found very useful as a book of reference."—*The Medical Mirror.*

"Second to none on the therapeutics of uterine disease."—*Journal of Obstetrics.*

VAN BUREN AND KEYES

A Practical Treatise on the Surgical Diseases of the Genito-Urinary Organs, including Syphi- lis. Designed as a Manual for Students and Practition- ers. With Engravings and Cases.

By W. H. VAN BUREN, A. M., M. D.,

Professor of Principles of Surgery, with Diseases of the Genito-Urinary System and Clinical Surgery, in Bellevue Hospital Medical College; Consulting Surgeon to the New York Hospital, the Charity Hospital, etc.; and

E. L. KEYES, A. M., M. D.,

Professor of Dermatology in Bellevue Hospital Medical College; Surgeon to the Charity Hospital, Venereal Diseases; Consulting Dermatologist to the Bureau of Out-Door Relief, Bellevue Hospital, etc.

1 vol., 8vo. Cloth, \$5.00; Sheep, \$6.00.

This work is really a compendium of, and a book of reference to, all modern works treating in any way of the surgical diseases of the genito-urinary organs. At the same time, no other single book contains so large an array of original facts concerning the class of diseases with which it deals. These facts are largely drawn from the extensive and varied experience of the authors.

Many important branches of genito-urinary diseases, as the cutaneous maladies of the penis and scrotum, receive a thorough and exhaustive treatment that the professional reader will search for elsewhere in vain.

The work is elegantly and profusely illustrated, and enriched by fifty-five original cases, setting forth obscure and difficult points in diagnosis and treatment.

"The first part is devoted to the Surgical Diseases of the Genito-Urinary Organs; and part second treats of Chaneroid and Syphilis. The authors appear to have succeeded admirably in giving to the world an exhaustive and reliable treatise on this important class of diseases."—*Northwestern Medical and Surgical Journal.*

"It is a most complete digest of what has long been known, and of what has been more recently discovered, in the field of syphilitic and genito-urinary disorders. It is perhaps not an exaggeration to say that no single work upon the same subject has yet appeared, in this or any foreign language, which is superior to it."—*Chicago Medical Examiner.*

"The commanding reputation of Dr. Van Buren in this specialty and of the great school and hospital from which he has drawn his clinical materials, together with the general interest which attaches to the subject-matter itself, will, we trust, lead very many of those for whom it is our office to enter, to possess themselves at once of the volume and form their own opinions of its merit."—*Atlanta Medical and Surgical Journal.*

Lectures upon Diseases of the Rectum.

Delivered at the Bellevue Hospital Medical College.
Session of 1869-'70.

By W. H. VAN BUREN, M. D.,

1 vol., 12mo. 164 pages. Cloth, \$1.50.

"It seems hardly necessary to more than mention the name of the author of this admirable little volume in order to insure the character of his book. No one in this country has enjoyed greater advantages, and had a more extensive field of observation in this specialty, than Dr. Van Buren; and no one has paid the same amount of attention to the subject. . . . Here is the experience of years summed up and given to the professional world in a plain and practical manner."—*Psychological Journal.*

VOGEL.

A Practical Treatise on the Diseases
of Children. Second American from the Fourth
German Edition. Illustrated by Six Lithographic
Plates.

By ALFRED VOGEL, M. D.,

Professor of Clinical Medicine in the University of Dorpat, Russia.

TRANSLATED AND EDITED BY

H. RAPHAEL, M. D.,

Late House Surgeon to Bellevue Hospital; Physician to the Eastern Dispensary for the Diseases
of Children, etc., etc.

1 vol., 8vo. 611 pp. Cloth, \$4.50.

The work is well up to the present state of pathological knowledge; complete without unnecessary prolixity; its symptomatology accurate, evidently the result of careful observation of a competent and experienced clinical practitioner. The diagnosis and differential relations of diseases to each other are accurately described, and the therapeutics judicious and discriminating. All polypharmacy is discarded, and only the remedies which appeared useful to the author commended.

It contains much that must gain for it the merited praise of all impartial judges, and prove it to be an invaluable text-book for the student and practitioner, and a safe and useful guide in the difficult but all-important department of Pædiatrica.

"Rapidly passing to a fourth edition in Germany, and translated into three other languages, America now has the credit of presenting the first English version of a book which must take a prominent, if not the leading, position among works devoted to this class of disease."—*N. Y. Medical Journal*.

"The profession of this country are under many obligations to Dr. Raphael for bringing, as he has done, this truly valuable work to their notice."—*Medical Record*.

"The translator has been more than ordinarily successful, and his labors have resulted in what, in every sense, is a valuable contribution to medical science."—*Psychological Journal*.

"We do not know of a compact text-book on the diseases of children more complete, more comprehensive, more replete with practical remarks and scientific facts, more in keeping with the development of modern medicine, and more worthy of the attention of the profession, than that which has been the subject of our remarks."—*Journal of Obstetrics*.

WALTON.

The Mineral Springs of the United
States and Canada, with Analyses and Notes on the
Prominent Spas of Europe, and a List of Sea-side
Resorts. An enlarged and revised edition.

By GEORGE E. WALTON, M. D.,

Lecturer on Materia Medica in the Miami Medical College, Cincinnati.

Second Edition, revised and enlarged. 1 vol., 12mo. 390 pp., with Maps. \$2.00.

The author has given the analyses of all the springs in this country and those of the principal European spas, reduced to a uniform standard of one wine-pint, so that they may readily be compared. He has arranged the springs of America and Europe in seven distinct classes, and described the diseases to which mineral waters are adapted, with references to the class of waters applicable to the treatment, and the peculiar characteristics of each spring as near as known are given—also, the location, mode of access, and post-office address of every spring are mentioned. In addition, he has described the various kinds of baths and the appropriate use of them in the treatment of disease.

EXTRACTS FROM OPINIONS OF THE PRESS.

"... Precise and comprehensive, presenting not only reliable analyses of the waters, but their therapeutic value, so that physicians can hereafter advise their use as intelligently and beneficially as they can other valuable alterative agents."—*Sanitarian*.

"... Will tend to enlighten both the profession and the people on this question."—*N. Y. Medical Journal*.

"... Contains in brief space a vast amount of important and interesting matter, well arranged and well presented. Nearly every physician needs just such a volume."—*Richmond and Louisville Medical Journal*.

"... Fills this necessity in a scientific and pleasing manner, and can be read with advantage by the physician as well as layman."—*American Jour. of Obstetrics*.

UNIVERSITY OF VIRGINIA, June 9, 1873.

GENTLEMEN: I have received by mail a copy of Dr. Walton's work on the Mineral Springs of the United States and Canada. Be pleased to accept my thanks for a work which I have been eagerly looking for ever since I had the pleasure of meeting the author in the summer of 1871. He satisfied me that he was well qualified to write a reliable work on this subject, and I doubt not he has met my expectations. Such a work was greatly needed, and, if offered for sale at the principal mineral springs of the country, will, I believe, command a ready sale. Very respectfully yours,

J. L. CABELL, M. D.

WELLS.

Diseases of the Ovaries; *Their Diagnosis and Treatment.*

By T. SPENCER WELLS,

Fellow and Member of Council of the Royal College of Surgeons of England; Honorary Fellow of the King and Queen's College of Physicians in Ireland; Surgeon in Ordinary to the Queen's Household; Surgeon to the Samaritan Hospital for Women; Member of the Imperial Society of Surgery of Paris, of the Medical Society of Paris, and of the Medical Society of Sweden; Honorary Member of the Royal Society of Medical and Natural Science of Brussels, and of the Medical Societies of Pesh and Helsingfors; Honorary Fellow of the Obstetrical Societies of Berlin and Leipzig.

1 vol., 8vo. 478 pp. Illustrated. Cloth, Price, \$4.50.

In 1865 the author issued a volume containing reports of one hundred and fourteen cases of Ovariectomy, which was little more than a simple record of facts. The book was soon out of print, and, though repeatedly asked for a new edition, the author was unable to do more than prepare papers for the Royal Medical and Chirurgical Society, as series after series of a hundred cases accumulated. On the completion of five hundred cases he embodied the results in the present volume, an entirely new work, for the student and practitioner, and trusts it may prove acceptable to them and useful to suffering women.

"Arrangements have been made for the publication of this volume in London on the day of its publication in New York." French and German translations are already in press.

WAGNER.

A Hand-book of Chemical Technology.

By RUDOLPH WAGNER, Ph. D.,

Professor of Chemical Technology at the University of Wurzburg.

Translated and edited, from the eighth German edition, with extensive additions.

By WILLIAM CROOKES, F. R. S.

With 336 Illustrations. 1 vol., 8vo. 761 pages. Cloth, \$5.00.

Under the head of Metallurgic Chemistry, the latest methods of preparing Iron, Cobalt, Nickel, Copper, Copper Salts, Lead and Tin, and their Salts, Bismuth, Zinc, Zinc Salts, Cadmium, Antimony, Arsenic, Mercury, Platinum, Silver, Gold, Manganese, Aluminum, and Magnesium, are described. The various applications of the Voltaic Current to Electro-Metallurgy follow under this division. The preparation of Potash and Soda Salts, the manufacture of Sulphuric Acid, and the recovery of Sulphur from Soda Waste, of course occupy prominent places in the consideration of chemical manufactures. It is difficult to over-estimate the mercantile value of Mond's process, as well as the many new and important applications of Bisulphide of Carbon. The manufacture of Soap will be found to include much detail. The Technology of Glass, Stone-ware, Limes, and Mortars, will present much of interest to the Builder and Engineer. The Technology of Vegetable Fibres has been considered to include the preparation of Flax, Hemp, Cotton, as well as Paper-making; while the applications of Vegetable Products will be found to include Sugar-boiling, Wine and Beer Brewing, the Distillation of Spirits, the Baking of Bread, the Preparation of Vinegar, the Preservation of Wood, etc.

Dr. Wagner gives much information in reference to the production of Potash from Sugar residues. The use of Baryta Salts is also fully described, as well as the preparation of Sugar from Beet-roots. Tanning, the Preservation of Meat, Milk, etc., the Preparation of Phosphorus and Animal Charcoal, are considered as belonging to the Technology of Animal Products. The Preparation of Materials for Dyeing has necessarily required much space; while the final sections of the book have been devoted to the Technology of Heating and Illumination.

NEW MEDICAL WORKS IN PRESS.

BARTHOLOW'S TREATISE ON THERAPEUTICS.

CONTRIBUTIONS TO REPARATIVE SURGERY, showing its Application to the Treatment of Deformities, produced by Destructive Disease or Injury; Congenital Defects from Arrest or Excess of Development; and Cicatricial Contractions following Burns. Illustrated by Thirty Cases and fine Engravings. By GURDON BUCK, M. D.

ACNE; its Pathology, Etiology, Prognosis, and Treatment. By L. DUNCAN BULKLEY, A. M., M. D., New York Hospital. A monograph of about seventy pages, illustrated, founded on an analysis of two hundred cases of various forms of Acne.

LECTURES ON ORTHOPEDIC SURGERY AND DISEASES OF THE JOINTS, delivered at Bellevue Hospital Medical College during the Winter Session of 1874-1875, by LEWIS A. SAYRE, M. D., Professor of Orthopedic Surgery, Fractures and Dislocations, and Clinical Surgery, in Bellevue Hospital Medical College; Surgeon to Bellevue Hospital; Consulting Surgeon to Charity Hospital; Consulting Surgeon to St. Elizabeth's Hospital; Consulting Surgeon to North-western Dispensary; Member of the American Medical Association; Permanent Member of the New York State Medical Society; Fellow of the New York Academy of Medicine; Member of the New York County Medical Society, of the New York Pathological Society, of the Society of Neurology, of the Medical-Legal Society; Honorary Member of the New Brunswick Medical Society; Honorary Member of the Medical Society of Norway; Knight of the Order of Wasa, by His Majesty the King of Sweden, etc., etc. Illustrated by Numerous Wood-Engravings. 1 vol., 8vo. Cloth, \$5.00; Sheep, \$6.00.

The publishers take pleasure in announcing that the above work is now passing through the press, and will be ready by the 20th of April, 1876. It is being published at the request of medical gentlemen of the highest standing, in different sections of our country, as well as many abroad, who are anxious to have Dr. Sayre's peculiar views and extended experience in this specialty given to the profession in a plain and practical manner. The book contains the substance of his course of lectures delivered at Bellevue Hospital Medical College, as well as many important cases from his note-book, and from the hospital records. He has also added a number of cases before presented by him to the profession in medical journals, or at the different medical societies, which are considered worthy of permanent record.

The work is enriched by beautiful and excellent illustrations, engraved from original drawings and photographs prepared expressly therefor. The author having enjoyed exceptional opportunities for the study and treatment of these diseases, the results of his labors cannot fail to be of inestimable value to every student and practitioner, and of service to suffering humanity.

Students desiring early copies will please send their orders direct to the publishers,

D. APPLETON & CO., Publishers,

549 & 551 BROADWAY, NEW YORK.

THE NEW YORK MEDICAL JOURNAL.

JAMES B. HUNTER, M. D., Editor.

Published Monthly. Volumes begin in January and July.

"Among the numerous records of Medicine and the collateral sciences published in America, the above Journal occupies a high position, and deservedly so."—*The Lancet (London)*.

"One of the best medical journals, by-the-by, published on the American Continent."—*London Medical Times and Gazette*.

"A very high-class journal."—*London Medical Mirror*.

"The editor and the contributors rank among our most distinguished medical men, and each number contains matter that does honor to American medical literature."—*Boston Journal of Chemistry*.

"Full of valuable original papers, abounding in scientific ability."—*Chicago Medical Times*.

"We know no other periodical that we would rather present as a specimen of American skill and intelligence than the NEW YORK MEDICAL JOURNAL."—*Franklin Repository*.

"The NEW YORK MEDICAL JOURNAL, edited by Dr. James B. Hunter, is one of the sterling periodicals of this country. The present editor has greatly improved the work, and evinces a marked aptitude for the responsible duties so well discharged. The contents of this journal are always interesting and instructive; its original matter is often classic in value, and the selected articles are excellent exponents of the progress and truth of medical science."—*Richmond and Louisville Medical Journal*.

Terms, \$4.00 per Annum; or 40 Cents per Number.

THE POPULAR SCIENCE MONTHLY.

Conducted by Prof. E. L. YOUMANS.

Each Number contains 128 pages, with numerous Descriptive and Attractive Illustrations.

Published Monthly. Volumes begin in May and November.

Terms, \$5 per Annum, or Fifty Cents per Number

THE POPULAR SCIENCE MONTHLY was started to promote the diffusion of valuable scientific knowledge, in a readable and attractive form, among all classes of the community, and has thus far met a want supplied by no other periodical in the United States.

The great feature of the magazine is, that its contents are not what science was ten or more years since, but what it is to-day, fresh from the study, the laboratory, and the experiment; clothed in the language of the authors, inventors, and scientists themselves, which comprise the leading minds of England, France, Germany, and the United States. Among popular articles, covering the whole range of NATURAL SCIENCE, we have the latest thoughts and words of Herbert Spencer, and Professors Huxley, Tyndall, and R. A. Proctor. Since the start, it has proved a gratifying success to every friend of scientific progress and universal education; and those who believed that science could not be made any thing but dry study, are disappointed.

The press all over the land is warmly commending it. We subjoin a few encomiums from those recently given:

"A journal which promises to be of eminent value to the cause of popular education in this country."—*New York Tribune*.

"It is, beyond comparison, the best attempt at journalism of the kind ever made in this country."—*Home Journal*.

"The initial number is admirably constituted."—*Evening Mail*.

"In our opinion, the right idea has been happily hit in the plan of this new monthly."—*Buffalo Courier*.

"Just the publication needed at the present day."—*Montreal Gazette*.

Payment, in all cases, must be made in advance.

Remittances should be made by postal money-order or check to the Publishers,
