

SAYRE.

A Practical Manual on the Treatment of Club-Foot.

By LEWIS A. SAYRE, M. D.,
Professor of Orthopedic Surgery in Bellevue Hospital Medical College; Surgeon to Bellevue
and Charity Hospitals, etc.

1 vol., 12mo. New and Enlarged Edition. Cloth. \$1.00.

"The object of this work is to convey, in as concise a manner as possible, all the practical information and instruction necessary to enable the general practitioner to apply that plan of treatment which has been so successful in my own hands."—*Preface.*

"The book will very well satisfy the wants of the majority of general practitioners, for whose use, as stated, it is intended."—*New York Medical Journal.*

SMITH.

On Foods.

By EDWARD SMITH, M. D., LL. B., F. R. S.,
Fellow of the Royal College of Physicians of London, etc., etc.

1 vol., 12mo. Cloth. Price, \$1.75.

Since the issue of the author's work on "Practical Dietary," he has felt the want of another, which would embrace all the generally-known and less-known foods, and contain the latest scientific knowledge respecting them. The present volume is intended to meet this want, and will be found useful for reference, to both scientific and general readers. The author extends the ordinary view of foods, and includes water and air, since they are important both in their food and sanitary aspects.

STROUD.

The Physical Cause of the Death of Christ, and its Relations to the Principles and Prac- tice of Christianity.

By WILLIAM STROUD, M. D.

With a Letter on the Subject,

By SIR JAMES Y. SIMPSON, BART., M. D.

1 vol., 12mo. 422 pp. Cloth, \$2.00.

This important and remarkable book is, in its own place, a masterpiece, and will be considered as a standard work for many years to come.

The principal point insisted upon is, that the death of Christ was caused by rupture or laceration of the heart. Sir James Y. Simpson, who had read the author's treatise and various comments on it, expressed himself very positively in favor of the views maintained by Dr. Stroud.—*Psychological Journal.*

SIMPSON.

The Posthumous Works of Sir James Young Simpson, Bart., M. D. In Three Volumes.

Volume I.—*Selected Obstetrical and Gynecological Works of Sir James Y. Simpson, Bart., M. D., D. C. L., late Professor of Midwifery in the University of Edinburgh. Containing the substance of his Lectures on Midwifery. Edited by J. WATT BLACK, A. M., M. D., Member of the Royal College of Physicians, London; Physician-Accoucheur to Charing Cross Hospital, London; and Lecturer on Midwifery and Diseases of Women and Children in the Hospital School of Medicine.*

1 vol., 8vo. 852 pp. Cloth, \$3.00.

This volume contains all the more important of the contributions of Sir James Y. Simpson to the study of obstetrics and diseases of women, with the exception of his clinical lectures on the latter subject, which will shortly appear in a separate volume. This first volume contains many of the papers reprinted from his Obstetric Memoirs and Contributions, and also his Lecture Notes, now published for the first time, containing the substance of the practical part of his course of midwifery. It is a volume of great interest to the profession, and a fitting memorial of its renowned and talented author.

"To many of our readers, doubtless, the chief of the papers it contains are familiar. To others, although probably they may be aware that Sir James Simpson has written on the subjects, the papers themselves will be new and fresh. To the first class we would recommend this edition of Sir James Simpson's works, as a valuable volume of reference; to the latter, as a collection of the works of a great master and improver of his art, the study of which cannot fail to make them better prepared to meet and overcome its difficulties."—*Medical Times and Gazette.*

Volume II.—*Anæsthesia, Hospitalism, etc. Edited by Sir WALTER SIMPSON, Bart.*

1 vol., 8vo. 560 pp. Cloth, \$3.00.

"We say of this, as of the first volume, that it should find a place on the table of every practitioner; for, though it is patchwork, each piece may be picked out and studied with pleasure and profit."—*The Lancet (London).*

Volume III.—*The Diseases of Women. Edited by ALEX. SIMPSON, M. D., Professor of Midwifery in the University of Edinburgh.*

1 vol., 8vo. Cloth, \$3.00.

One of the best works on the subject extant. Of inestimable value to every physician.

SWETT.

A Treatise on the Diseases of the Chest. Being a Course of Lectures delivered at the New York Hospital.

By JOHN A. SWETT, M. D.,

Professor of the Institutes and Practice of Medicine in the New York University; Physician to the New York Hospital; Member of the New York Pathological Society.

1 vol., 8vo. 587 pp. \$3.50.

Embodied in this volume of lectures is the experience of ten years in hospital and private practice.

SCHROEDER.

A Manual of Midwifery. *Including the Pathology of Pregnancy and the Puerperal State.*

By Dr. KARL SCHROEDER.

Professor of Midwifery and Director of the Lying-in Institution in the University of Erlangen.

Translated from the Third German Edition,

By CHAS. H. CARTER, B. A., M. D., B. S. Lond.,

Member of the Royal College of Physicians, London, and Physician Accoucheur to St. George's, Hanover Square, Dispensary.

With Twenty-six Engravings on Wood. 1 vol., 8vo. Cloth.

"The translator feels that no apology is needed in offering to the profession a translation of Schroeder's Manual of Midwifery. The work is well known in Germany and extensively used as a text-book; it has already reached a third edition within the short space of two years, and it is hoped that the present translation will meet the want, long felt in this country, of a manual of midwifery embracing the latest scientific researches on the subject.

TILT.

A Hand-Book of Uterine Therapeutics and of Diseases of Women.

By EDWARD JOHN TILT, M. D.,

Member of the Royal College of Physicians; Consulting Physician to the Farringdon General Dispensary; Fellow of the Royal Medical and Chirurgial Society, and of several British and foreign societies.

1 vol., 8vo. 345 pp. Cloth, \$3.50.

Second American edition, thoroughly revised and amended.

"In giving the result of his labors to the profession the author has done a great work. Our readers will find its pages very interesting, and, at the end of their task, will feel grateful to the author for many very valuable suggestions as to the treatment of uterine diseases."—*The Lancet*.

"Dr. Tilt's 'Hand-Book of Uterine Therapeutics' supplies a want which has often been felt. . . . It may, therefore, be read not only with pleasure and instruction, but will also be found very useful as a book of reference."—*The Medical Mirror*.

"Second to none on the therapeutics of uterine disease."—*Journal of Obstetrics*.

VAN BUREN.

Lectures upon Diseases of the Rectum.

Delivered at the Bellevue Hospital Medical College. Session of 1869-'70.

By W. H. VAN BUREN, M. D.,

Professor of the Principles of Surgery with Diseases of the Genito-Urinary Organs, etc., in the Bellevue Hospital Medical College; one of the Consulting Surgeons of the New York Hospital, of the Bellevue Hospital; Member of the New York Academy of Medicine, of the Pathological Society of New York, etc., etc.

1 vol., 12mo. 164 pp. Cloth, \$1.50.

"It seems hardly necessary to more than mention the name of the author of this admirable little volume in order to insure the character of his book. No one in this country has enjoyed greater advantages, and had a more extensive field of observation in this specialty, than Dr. Van Buren, and no one has paid the same amount of attention to the subject. . . . Here is the experience of years summed up and given to the professional world in a plain and practical manner."—*Psychological Journal*.

VAN BUREN AND KEYES.

A Practical Treatise on the Surgical

Diseases of the Genito-Urinary Organs, including Syphilis. Designed as a Manual for Students and Practitioners. With Engravings and Cases.

By W. H. VAN BUREN, A. M., M. D.,

Professor of Principles of Surgery, with Diseases of the Genito-Urinary System and Clinical Surgery, in Bellevue Hospital Medical College; Consulting Surgeon to the New York Hospital, the Charity Hospital, etc.; and

E. L. KEYES, A. M., M. D.,

Professor of Dermatology in Bellevue Hospital Medical College; Surgeon to the Charity Hospital, Venereal Division; Consulting Dermatologist to the Bureau of Out-Door Relief, Bellevue Hospital, etc.

1 vol., 8vo. Cloth, \$5.00; Sheep, \$6.00.

This work is really a compendium of, and a book of reference to, all modern works treating in any way of the surgical diseases of the genito-urinary organs. At the same time, no other single book contains so large an array of original facts concerning the class of diseases with which it deals. These facts are largely drawn from the extensive and varied experience of the authors.

Many important branches of genito-urinary diseases, as the cutaneous maladies of the penis and scrotum, receive a thorough and exhaustive treatment that the professional reader will search for elsewhere in vain.

Both to the specialist and the general practitioner the work commends itself as one of inestimable value.

The work is a marvel of conciseness, and very rarely is so much condensation accomplished without loss of any valuable points of detail. A glance at the table of contents will give an idea of the scope of the volume, but only a careful perusal of the work will convince the reader that full justice has been done to all the various branches of this highly-interesting class of diseases.

The work is elegantly and profusely illustrated, and enriched by fifty-five original cases, setting forth obscure and difficult points in diagnosis and treatment.

"The first part is devoted to the Surgical Diseases of the Genito-Urinary Organs; and part second treats of Chancroid and Syphilis. The authors appear to have succeeded admirably in giving to the world an exhaustive and reliable treatise on this important class of diseases."—*Northwestern Medical and Surgical Journal*.

"It is a most complete digest of what has long been known, and of what has been more recently discovered in the field of syphilitic and genito-urinary disorders. It is perhaps not an exaggeration to say that no single work upon the same subject has yet appeared, in this or any foreign language, which is superior to it."—*Chicago Medical Examiner*.

"The commanding reputation of Dr. Van Buren in this specialty and of the great school and hospital from which he has drawn his clinical materials, together with the general interest which attaches to the subject-matter itself, will, we trust, lead very many of those for whom it is our office to cater, to possess themselves at once of the volume and form their own opinions of its merit."—*Atlanta Medical and Surgical Journal*.

VOGEL.

A Practical Treatise on the Diseases
of Children. Second American from the Fourth
German Edition. Illustrated by Six Lithographic
Plates.

By ALFRED VOGEL, M. D.,

Professor of Clinical Medicine in the University of Dorpat, Russia.

TRANSLATED AND EDITED BY

H. RAPHAEL, M. D.,

Late House Surgeon to Bellevue Hospital; Physician to the Eastern Dispensary for the Diseases
of Children, etc., etc.

1 vol., 8vo. 611 pp. Cloth, \$4.50.

The work is well up to the present state of pathological knowledge; complete without unnecessary prolixity; its symptomatology accurate, evidently the result of careful observation of a competent and experienced clinical practitioner. The diagnosis and differential relations of diseases to each other are accurately described, and the therapeutics judicious and discriminating. All polypharmacy is discarded, and only the remedies which appeared useful to the author commended.

It contains much that must gain for it the merited praise of all impartial judges, and prove it to be an invaluable text-book for the student and practitioner, and a safe and useful guide in the difficult but all-important department of Pædiatrica.

"Rapidly passing to a fourth edition in Germany, and translated into three other languages, America now has the credit of presenting the first English version of a book which must take a prominent, if not the leading, position among works devoted to this class of disease."—*N. Y. Medical Journal*.

"The profession of this country are under many obligations to Dr. Raphael for bringing, as he has done, this truly valuable work to their notice."—*Medical Record*.

"The translator has been more than ordinarily successful, and his labors have resulted in what, in every sense, is a valuable contribution to medical science."—*Psychological Journal*.

"We do not know of a compact text-book on the diseases of children more complete, more comprehensive, more replete with practical remarks and scientific facts, more in keeping with the development of modern medicine, and more worthy of the attention of the profession, than that which has been the subject of our remarks."—*Journal of Obstetrics*.

WALTON.

The Mineral Springs of the United
States and Canada, with Analyses and Notes on the
Prominent Spas of Europe, and a List of Sea-side
Resorts. An enlarged and revised edition.

By GEORGE E. WALTON, M. D.,

Lecturer on Materia Medica in the Miami Medical College, Cincinnati.

1 vol., 12mo. 390 pages, with Maps. Price, \$2.00.

The author has given the analyses of all the springs in this country and those of the principal European spas, reduced to a uniform standard of one wine-pint, so that they may readily be compared. He has arranged the springs of America and Europe in seven distinct classes, and described the diseases to which mineral waters are adapted, with references to the class of waters applicable to the treatment, and the peculiar characteristics of each spring as near as known are given—also, the location, mode of access, and post-office address of every spring are mentioned. In addition, he has described the various kinds of baths and the appropriate use of them in the treatment of disease.

EXTRACTS FROM OPINIONS OF THE PRESS.

"... Precise and comprehensive, presenting not only reliable analyses of the waters, but their therapeutic value, so that physicians can hereafter advise their use as intelligently and beneficially as they can other valuable alterative agents."—*Sanitarian*.

"... Will tend to enlighten both the profession and the people on this question."—*N. Y. Medical Journal*.

"... Contains in brief space a vast amount of important and interesting matter, well arranged and well presented. Nearly every physician needs just such a volume."—*Richmond and Louisville Medical Journal*.

"... Fills this necessity in a scientific and pleasing manner, and can be read with advantage by the physician as well as layman."—*American Jour. of Obstetrics*.

UNIVERSITY OF VIRGINIA, June 9, 1873.

GENTLEMEN: I have received by mail a copy of Dr. Walton's work on the Mineral Springs of the United States and Canada. Be pleased to accept my thanks for a work which I have been eagerly looking for ever since I had the pleasure of meeting the author in the summer of 1871. He satisfied me that he was well qualified to write a reliable work on this subject, and I doubt not he has met my expectations. Such a work was greatly needed, and, if offered for sale at the principal mineral springs of the country, will, I believe, command a ready sale. Very respectfully yours,

J. L. CABELL, M. D.

WELLS.

Diseases of the Ovaries; *Their Diagnosis and Treatment.*

By T. SPENCER WELLS,

Fellow and Member of Council of the Royal College of Surgeons of England; Honorary Fellow of the King and Queen's College of Physicians in Ireland; Surgeon in Ordinary to the Queen's Household; Surgeon to the Samaritan Hospital for Women; Member of the Imperial Society of Surgery of Paris, of the Medical Society of Paris, and of the Medical Society of Sweden; Honorary Member of the Royal Society of Medical and Natural Science of Brussels, and of the Medical Societies of Pesh and Helsingfors; Honorary Fellow of the Obstetrical Societies of Berlin and Leipzig.

1 vol., 8vo. 478 pp. Illustrated. Cloth, Price, \$4.50.

In 1865 the author issued a volume containing reports of one hundred and fourteen cases of Ovariectomy, which was little more than a simple record of facts. The book was soon out of print, and, though repeatedly asked for a new edition, the author was unable to do more than prepare papers for the Royal Medical and Chirurgical Society, as series after series of a hundred cases accumulated. On the completion of five hundred cases he embodied the results in the present volume, an entirely new work, for the student and practitioner, and trusts it may prove acceptable to them and useful to suffering women.

"Arrangements have been made for the publication of this volume in London on the day of its publication in New York." French and German translations are already in press.

WAGNER.

A Hand-book of Chemical Technology.

By RUDOLPH WAGNER, Ph. D.,

Professor of Chemical Technology at the University of Wurtzburg.

Translated and edited, from the eighth German edition, with extensive additions,

By WILLIAM CROOKES, F. R. S.

With 336 Illustrations. 1 vol., 8vo. 761 pages. Cloth, \$5.00.

Under the head of Metallurgical Chemistry, the latest methods of preparing Iron, Cobalt, Nickel, Copper, Copper Salts, Lead and Tin, and their Salts, Bismuth, Zinc, Zinc Salts, Cadmium, Antimony, Arsenic, Mercury, Platinum, Silver, Gold, Manganates, Aluminum, and Magnesium, are described. The various applications of the Voltaic Current to Electro-Metallurgy follow under this division. The preparation of Potash and Soda Salts, the manufacture of Sulphuric Acid, and the recovery of Sulphur from Soda Waste, of course occupy prominent places in the consideration of chemical manufactures. It is difficult to over-estimate the mercantile value of Mond's process, as well as the many new and important applications of Bisulphide of Carbon. The manufacture of Soap will be found to include much detail. The Technology of Glass, Stone-ware, Limes, and Mortars, will present much of interest to the Builder and Engineer. The Technology of Vegetable Fibres has been considered to include the preparation of Flax, Hemp, Cotton, as well as Paper-making; while the applications of Vegetable Products will be found to include Sugar-boiling, Wine and Beer Brewing, the Distillation of Spirits, the Baking of Bread, the Preparation of Vinegar, the Preservation of Wood, etc.

Dr. Wagner gives much information in reference to the production of Potash from Sugar residues. The use of Baryta Salts is also fully described, as well as the preparation of Sugar from Beet-roots. Tanning, the Preservation of Meat, Milk, etc., the Preparation of Phosphorus and Animal Charcoal, are considered as belonging to the Technology of Animal Products. The Preparation of Materials for Dyeing has necessarily required much space; while the final sections of the book have been devoted to the Technology of Heating and Illumination.

BIBLIOTECA

000446

NEW MEDICAL WORKS IN PRESS.

Hand-Book of the Histology and Histology of Man. By Dr. HEINRICH FREY, of Zurich. Illustrated with 500 Woodcuts.

Clinical Lectures on Diseases of the Nervous System. Delivered at the Bellevue Hospital Medical College, by WM. A. HAMMOND, M. D. Edited, with Notes, by T. M. B. Cross, M. D.

Acne; its Pathology, Etiology, Prognosis, and Treatment. By L. DUNCAN BULKLEY, A. M., M. D., New York Hospital.

A monograph of about seventy pages, illustrated, founded on an analysis of two hundred cases of various forms of acne.

Compendium of Children's Diseases, for Students and Physicians. By Dr. JOHN STEINER.

Diseases of the Nerves and Spinal Cord. By Dr. H. CHARLTON BASTIAN.

D. APPLETON & CO.,
549 & 551 BROADWAY, NEW YORK.

THE NEW YORK MEDICAL JOURNAL.

JAMES B. HUNTER, M. D., Editor.

Published Monthly. Volumes begin in January and July.

"Among the numerous records of Medicine and the collateral sciences published in America, the above Journal occupies a high position, and deservedly so."—*The Lancet (London)*.
"One of the best medical journals, by-the-by, published on the American Continent."—*London Medical Times and Gazette*.
"A very high-class journal."—*London Medical Mirror*.
"The editor and the contributors rank among our most distinguished medical men, and each number contains matter that does honor to American medical literature."—*Boston Journal of Chemistry*.
"Full of valuable original papers, abounding in scientific ability."—*Chicago Medical Times*.
"We know no other periodical that we would rather present as a specimen of American skill and intelligence than the NEW YORK MEDICAL JOURNAL."—*Franklin Repository*.

Terms, \$4 per Annum. Specimen Copies, 25 Cents.

THE POPULAR SCIENCE MONTHLY.

Conducted by Prof. E. L. YOUMANS.

Each Number contains 128 pages, with numerous Descriptive and Attractive Illustrations.

Published Monthly. Volumes begin in May and November.

Terms, \$5 per Annum, or Fifty Cents per Number.

THE POPULAR SCIENCE MONTHLY was started to promote the diffusion of valuable scientific knowledge, in a readable and attractive form, among all classes of the community, and has thus far met a want supplied by no other periodical in the United States.

The great feature of the magazine is, that its contents are not what science *was* ten or more years since, but what it *is* to-day, fresh from the study, the laboratory, and the experiment: clothed in the language of the authors, inventors, and scientists themselves, which comprise the leading minds of England, France, Germany, and the United States. Among popular articles, covering the whole range of NATURAL SCIENCE, we have the latest thoughts and words of Herbert Spencer, and Professors Huxley, Tyndall, and R. A. Proctor. Since the start, it has proved a gratifying success to every friend of scientific progress and universal education; and those who believed that science could not be made any thing but dry study, are disappointed.

The press all over the land is warmly commending it. We subjoin a few encomiums from those recently given:

"A journal which promises to be of eminent value to the cause of popular education in this country."—*New York Tribune*.

"It is, beyond comparison, the best attempt at journalism of the kind ever made in this country."—*Home Journal*.

"The initial number is admirably constituted."—*Evening Mail*.

"In our opinion, the right idea has been happily hit in the plan of this new monthly."—*Buffalo Courier*.

"Just the publication needed at the present day."—*Montreal Gazette*.
