THE JOURNAL OF PSYCHOLOGICAL MEDICINE,

A QUARTERLY REVIEW

OF

DISEASES OF THE NERVOUS SYSTEM,
MEDICAL JURISPRUDENCE,
AND ANTHROPOLOGY.

EDITED BY

WILLIAM A. HAMMOND, M. D.,

Professor of Diseases of the Mind and Nervous System in the Bellevue Hospital Medical College; Physician-in-Chief to the New York State Hospital for Diseases of the Nervous System, etc., etc.

Each Number contains not less than 203 pages, making one large Volume annually.

THE VOLUME BEGINS WITH THE JANUARY NUMBER.

Every Physician and Lawyer should read it.

This Journal is not designed for medical readers only, but for lawyers and literary men generally. We have the honor to have now on our subscription-books the name of nearly every Superintendent of an institution for the treatment of mental diseases, besides a great many prominent District Attorneys. In fact, to this class, whose especial duty it should be to study mental aberrations and idiosyncrasies, the PSYCHOLOGICAL JOURNAL is invaluable.

By a change of type, the publishers have been enabled to add almost one-half the former amount of matter to each number, without advancing the subscription price.

NOTICES OF THE PRESS.

"Contains able essays on medical questions of importance and general interest. Under the management of Dr. William A. Hammond, this periodical has taken very high rank among medical journals."—*N. Y. Times*.

"We looked with great expectations upon the project of this journal at its first announcement, because we were pretty well acquainted with the qualities of the gentleman who assumed to stand as the conductor of the large enterprise. . . . We will add that it has, from its first number, been printed superbly in all particulars; that it has been enlarged, and is now the most elegantly-printed quarterly in America."—*National Intelligencer*.

"A Quarterly that does honor to the professions to whom it is chiefly addressed."—*New York World*.

ANSTIE.

Neuralgia, and Diseases which resemble it.

By FRANCIS E. ANSTIE, M. D., F. R. C. P.,

Senior Assistant Physician to Westminster Hospital; Lecturer on Materia Medica in Westminster Hospital School; and Physician to the Belgrave Hospital for Children: Editor of "The Practitioner" (London), etc.

1 vol., 12mo. Cloth, \$2.50.

"It is a valuable contribution to scientific medicine."—*The Lancet (London)*.
"His work upon Neuralgia is one of the most interesting, instructive, and practical, we have seen for a long time. We have given it careful reading and thoughtful study, and, for a treatise of its size, we are free to say that we have never met one that gives more practical information and is fuller of useful suggestions."—*Medical Record*.

BARKER.

On Sea-sickness.

By FORDYCE BARKER, M. D.,

Clinical Professor of Midwifery and the Diseases of Women in the Bellevue Hospital Medical College, etc.

1 vol., 16mo. 36 pp. Flexible Cloth, 75 cents.

Reprinted from the NEW YORK MEDICAL JOURNAL. By reason of the great demand for the number of that journal containing the paper, it is now presented in book form, with such prescriptions added as the author has found useful in relieving the suffering from sea-sickness.

BARNES.

Obstetric Operations, including the Treatment
of Hemorrhage.

By ROBERT BARNES, M. D., F. R. C. P., LONDON,

Obstetric Physician to and Lecturer on Midwifery and the Diseases of Women and Children at St. Thomas's Hospital; Examiner on Midwifery to the Royal College of Physicians and to the Royal College of Surgeons; formerly Obstetric Physician to the London Hospital, and late Physician to the Eastern Division of the Royal Maternity Charity.

WITH ADDITIONS, by BENJAMIN F. DAWSON, M. D.,

Late Lecturer on Uterine Pathology in the Medical Department of the University of New York; Assistant to the Clinical Professor of Diseases of Children in the College of Physicians and Surgeons, New York; Physician for the Diseases of Children to the New York Dispensary; Member of the New York Obstetrical Society, of the Medical Society of the County of New York, etc., etc.

Second American Edition. 1 vol., 8vo. 503 pp. Cloth, \$4.50.

To the student and practitioner this work will prove of the greatest value, being, as it is, a most perfect text-book on "Obstetric Operations," by one who has fairly earned the right to assume the position of a teacher.

"Such a work as Dr. Barnes's was greatly needed. It is calculated to elevate the practice of the obstetric art in this country, and to be of great service to the practitioner."—*Lancet*.

Bellevue and Charity Hospital Reports.

The volume of Bellevue and Charity Hospital Reports for 1870, containing valuable contributions from

ISAAC E. TAYLOR, M. D., WILLIAM A. HAMMOND, M. D.,
AUSTIN FLINT, M. D., T. GAILLARD THOMAS, M. D.,
LEWIS A. SAYRE, M. D., FRANK H. HAMILTON, M. D.,
and others.

1 vol., 8vo. Cloth, \$4.00.

"These institutions are the most important, as regards accommodations for patients and variety of cases treated, of any on this continent, and are surpassed by but few in the world. The gentlemen connected with them are acknowledged to be among the first in their profession, and the volume is an important addition to the professional literature of this country."—*Psychological Journal*.

BENNET

Winter and Spring on the Shores of the Mediterranean; or, the Riviera, Mentone, Italy, Corsica, Sicily, Algeria, Spain, and Biarritz, as Winter Climates.

By J. HENRY BENNET, M. D.,

Member of the Royal College of Physicians, London; late Physician-Accoucher to the Royal Free Hospital; Doctor of Medicine of the University of Paris; formerly Resident Physician to the Paris Hospitals (ex-Interne des Hôpitaux de Paris), etc.

This work embodies the experience of ten winters and springs passed by Dr. Bennet on the shores of the Mediterranean, and contains much valuable information for physicians in relation to the health-restoring climate of the regions described.

1 vol., 12mo. 621 pp. Cloth, \$3.50.

"Exceedingly readable, apart from its special purposes, and well illustrated."—*Evening Commercial*.

"It has a more substantial value for the physician, perhaps, than for any other class or profession. . . . We commend this book to our readers as a volume presenting two capital qualifications—it is at once entertaining and instructive."—*N. Y. Medical Journal*.

On the Treatment of Pulmonary Consumption, by Hygiene, Climate, and Medicine, in its Connection with Modern Doctrines.

By JAMES HENRY BENNET, M. D.,

Member of the Royal College of Physicians, London; Doctor of Medicine of the University of Paris, etc., etc.

1 vol., thin 8vo. Cloth, \$1.50.

An interesting and instructive work, written in the strong, clear, and lucid manner which appears in all the contributions of Dr. Bennet to medical or general literature.

"We cordially commend this book to the attention of all, for its practical common-sense views of the nature and treatment of the scourge of all temperate climates, pulmonary consumption."—*Detroit Review of Medicine*.

BILLROTH.

General Surgical Pathology and Therapeutics, in Fifty Lectures. A Text-book for Students and Physicians.

By Dr. THEODOR BILLROTH,
Professor of Surgery in Vienna.

Translated from the Fourth German Edition, with the special permission of the Author, by

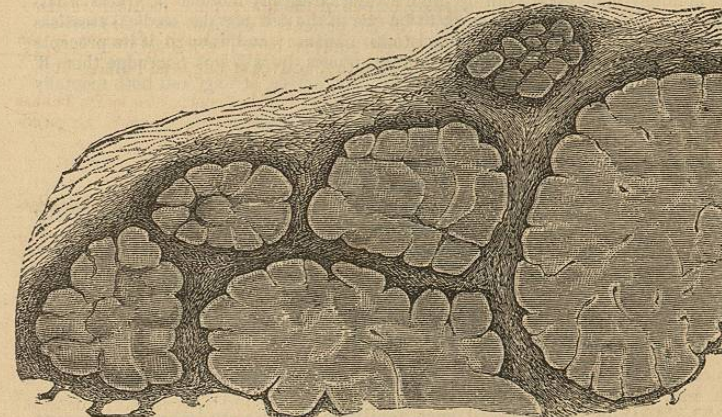

CHARLES E. HACKLEY, A. M., M. D.,

Surgeon to the New York Eye and Ear Infirmary; Physician to the New York Hospital; Fellow of the New York Academy of Medicine, etc.

1 vol., 8vo. 676 pp., and 152 Woodcuts. Cloth, \$5.00.

Professor Theodor Billroth, one of the most noted authorities on Surgical Pathology, gives in this volume a complete *résumé* of the existing state of knowledge in this branch of medical science. The fact of this publication going through four editions in Germany, and having been translated into French, Italian, Russian, and Hungarian, should be some guarantee for its standing.

SPECIMEN OF ILLUSTRATIONS.

Mammary Cancer, acinous form, magnified 50 diameters.

"The want of a book in the English language, presenting in a concise form the views of the German pathologists, has long been felt; and we venture to say no book could more perfectly supply that want than the present volume. . . . We would strongly recommend it to all who take any interest in the progress of thought and observation in surgical pathology and surgery."—*The Lancet*.

"A great addition to our literature."—*N. Y. Medical Journal*.

"We can assure our readers that they will consider neither money wasted in its purchase, nor time in its perusal."—*The Medical Investigator*.

COMBE.

The Management of Infancy, *Physiological and Moral. Intended chiefly for the Use of Parents.*

By ANDREW COMBE, M. D.

REVISED AND EDITED

By SIR JAMES CLARK, K. C. B., M. D., F. R. S.,
Physician-in-ordinary to the Queen.

First American from the Tenth London Edition. 1 vol., 12mo. 302 pp.
Cloth, \$1.50.

"In the following pages I have addressed myself chiefly to parents and to the younger members of the medical profession; but it is not to them alone that the subject ought to prove attractive. The study of infancy, considered even as an element in the history and philosophy of man, abounds in interest, and is fertile in truths of the highest practical value and importance."—*Extract from Author's Preface.*

"This excellent little book should be in the hand of every mother of a family; and if some of our lady friends would master its contents, and either bring up their children by the light of its teachings, or communicate the truths it contains to the poor by whom they are surrounded, we are convinced that they would effect infinitely more good than by the distribution of any number of tracts whatever . . . We consider this work to be one of the few popular medical treatises that any practitioner may recommend to his patients; and, though, if its precepts are followed, he will probably lose a few guineas, he will not begrudge them if he sees his friends' children grow up healthy, active, strong, and both mentally and physically capable."—*The Lancet.*

DAVIS.

Conservative Surgery, *as exhibited in remedying some of the Mechanical Causes that operate injuriously both in Health and Disease. With Illustrations.*

By HENRY G. DAVIS, M. D.,
Member of the American Medical Association, etc., etc.

1 vol., 8vo. 315 pp. Cloth, \$3.00.

The Author has enjoyed rare facilities for the study and treatment of certain classes of disease, and the records here presented to the profession are the gradual accumulation of over thirty years' investigation.

"Dr. Davis, bringing, as he does to his specialty, a great aptitude for the solution of mechanical problems, takes a high rank as an orthopedic surgeon, and his very practical contribution to the literature of the subject is both valuable and opportune. We deem it worthy of a place in every physician's library. The style is unpretending, but trenchant, graphic, and, best of all, quite intelligible."—*Medical Record.*

FLINT.

The Physiology of Man. *Designed to represent the Existing State of Physiological Science as applied to the Functions of the Human Body.*

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology and Microscopy in the Bellevue Hospital Medical College, and in the Long Island College Hospital; Fellow of the New York Academy of Medicine; Microscopist to Bellevue Hospital.

In Five Volumes. 8vo. Tinted Paper.

Volume I.—*The Blood; Circulation; Respiration.*

8vo. 502 pp. Cloth, \$4.50.

SPECIMEN OF ILLUSTRATIONS.

Ducts and Acini of the Mammary Organs.

"If the remaining portions of this work are compiled with the same care and accuracy, the whole may vie with any of those that have of late years been produced in our own or in foreign languages."—*British and Foreign Medico-Chirurgical Review.*

"As a book of general information it will be found useful to the practitioner, and, as a book of reference, invaluable in the hands of the anatomist and physiologist."—*Dublin Quarterly Journal of Medical Science.*

"The complete work will prove a valuable addition to our systematic treatises on human physiology."—*The Lancet.*

"To those who desire to get in one volume a concise and clear, and at the same time sufficiently full *résumé* of 'the existing state of physiological science,' we can heartily recommend Dr. Flint's work. Moreover, as a work of typographical art it deserves a prominent place upon our library-shelves. Messrs. Appleton & Co. deserve the thanks of the profession for the very handsome style in which they issue medical works. They give us hope of a time when it will be very generally believed by publishers that physicians' eyes are worth saving."—*Medical Gazette.*

Flint's Physiology. Volume II.—*Alimentation; Digestion; Absorption; Lymph and Chyle.*

8vo. 556 pp. Cloth, \$4.50.

"The second instalment of this work fulfils all the expectations raised by the perusal of the first. . . . The author's explanations and deductions bear evidence of much careful reflection and study. . . . The entire work is one of rare interest. The author's style is as clear and concise as his method is studious, careful, and elaborate."—*Philadelphia Inquirer*.

"We regard the two treatises already issued as the very best on human physiology which the English or any other language affords, and we recommend them with thorough confidence to students, practitioners, and laymen, as models of literary and scientific ability."—*N. Y. Medical Journal*.

"We have found the style easy, lucid, and at the same time terse. The practical and positive results of physiological investigation are succinctly stated, without, it would seem, extended discussion of disputed points."—*Boston Medical and Surgical Journal*.

"It is a volume which will be welcome to the advanced student, and as a work of reference."—*The Lancet*.

"The leading subjects treated of are presented in distinct parts, each of which is designed to be an exhaustive essay on that to which it refers."—*Western Journal of Medicine*.

Volume III.—*Secretion; Excretion; Ductless Glands; Nutrition; Animal Heat; Movements; Voice and Speech.*

8vo. 526 pp. Cloth, \$4.50.

"Dr. Flint's reputation is sufficient to give a character to the book among the profession, where it will chiefly circulate, and many of the facts given have been verified by the author in his laboratory and in public demonstrations."—*Chicago Courier*.

"The author bestows judicious care and labor. Facts are selected with discrimination, theories critically examined, and conclusions enunciated with commendable clearness and precision."—*American Journal of the Medical Sciences*.

"The work is calculated to attract other than professional readers, and is written with sufficient clearness and freedom from technical pedantry to be perfectly intelligible to any well-informed man."—*London Saturday Review*.

"From the extent of the author's investigations into the best theory and practice of the present day, the world over, and the candor and good judgment which he brings to bear upon the discussion of each subject, we are justified in regarding his treatises as standard and authoritative, so far as in this disputed subject authority is admissible."—*New York Times*.

Volume IV.—*The Nervous System.*

This volume is now ready. It is a work of great interest, and, in conjunction with the "Treatise on Diseases of the Nervous System," by Dr. Wm. A. Hammond, constitutes a complete work on "The Physiology and Pathology of the Nervous System."

Volume V.—*Generation. (In press.)*

FLINT.

Manual of Chemical Examination of the Urine in Disease. With Brief Directions for the Examination of the most Common Varieties of Urinary Calculi.

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology and Microscopy in the Bellevue Hospital Medical College; Fellow of the New York Academy of Medicine; Member of the Medical Society of the County of New York; Resident Member of the Lyceum of Natural History in the City of New York, etc.

Third Edition, revised and corrected. 1 vol., 12mo. 77 pp. Cloth, \$1.00.

The chief aim of this little work is to enable the busy practitioner to make for himself, rapidly and easily, all ordinary examinations of Urine; to give him the benefit of the author's experience in eliminating little difficulties in the manipulations, and in reducing processes of analysis to the utmost simplicity that is consistent with accuracy.

"We do not know of any work in English so complete and handy as the Manual now offered to the profession by Dr. Flint, and the high scientific reputation of the author is a sufficient guarantee of the accuracy of all the directions given."—*Journal of Applied Chemistry*.

"We can unhesitatingly recommend this Manual."—*Psychological Journal*.

"Eminently practical."—*Detroit Review of Medicine*.

On the Physiological Effects of Severe and Protracted Muscular Exercise. With Special Reference to its Influence upon the Excretion of Nitrogen.

By AUSTIN FLINT, JR., M. D.,

Professor of Physiology in the Bellevue Hospital Medical College, New York, etc., etc.

1 vol., 8vo. 91 pp. Cloth, \$2.00.

This monograph on the relations of Urea to Exercise is the result of a thorough and careful investigation made in the case of Mr. Edward Payson Weston, the celebrated pedestrian. The chemical analyses were made under the direction of R. O. Doremus, M. D., Professor of Chemistry and Toxicology in the Bellevue Hospital Medical College, by Mr. Oscar Loew, his assistant. The observations were made with the coöperation of J. C. Dalton, M. D., Professor of Physiology in the College of Physicians and Surgeons; Alexander B. Mott, M. D., Professor of Surgical Anatomy; W. H. Van Buren, M. D., Professor of Principles of Surgery; Austin Flint, M. D., Professor of the Principles and Practice of Medicine; W. A. Hammond, M. D., Professor of Diseases of the Mind and Nervous System—all of the Bellevue Hospital Medical College.

"This work will be found interesting to every physician. A number of important results were obtained valuable to the physiologist."—*Cin. Med. Repertory*.

HAMMOND.

A Treatise on Diseases of the Nervous System.

By WILLIAM A. HAMMOND, M. D.,

Professor of Diseases of the Mind and Nervous System, and of Clinical Medicine, in the Bellevue Hospital Medical College; Physician-in-Chief to the New York State Hospital for Diseases of the Nervous System, etc., etc.

SECOND EDITION, REVISED AND CORRECTED.

With Forty-five Illustrations. 1 vol., 8vo. 750 pp. Cloth, \$5.00.

The treatise embraces an introductory chapter, which relates to the instruments and apparatus employed in the diagnosis and treatment of diseases of the nervous system, and five sections. Of these, the first treats of diseases of the brain; the second, diseases of the spinal cord; the third, cerebro-spinal diseases; the fourth, diseases of nerve-cells; and the fifth, diseases of the peripheral nerves. One feature which may be claimed for the work is, that it rests, to a great extent, upon the personal observation and experience of the author, and is therefore no mere compilation.

"The author's clear and terse style of diction renders the book exceedingly readable, and the cases reported and cited add much to the interest of the text. . . . There is so much that is entertaining in the mental and other manifestations of nervous disorder, especially when presented as they are here, that a work of this kind will find many readers outside the profession; and, it may be hoped, will serve not only to interest and amuse, but to induce a closer observance of those hygienic laws upon whose violation many of the ailments here treated of depend."—*New York Medical Journal*.

"The work is replete with useful knowledge, and every physician who expects to be called on, as an expert, to testify in cases of supposed insanity, after the commission of crimes, should give the book a thorough perusal."—*Leavenworth Medical Herald*.

"That a treatise by Prof. Hammond would be one of a high order was what we anticipated, and it affords us pleasure to state that our anticipations have been realized."—*Cincinnati Medical Repertory*.

"It affords a vast amount of information, is captivating, and worth reading."—*Cincinnati Lancet and Observer*.

"This is unquestionably the most complete treatise on the diseases to which it is devoted that has yet appeared in the English language; and its value is much increased by the fact that Dr. Hammond has mainly based it on his own experience and practice, which, we need hardly remind our readers, have been very extensive."—*London Medical Times and Gazette*.

"Free from useless verbiage and obscurity, it is evidently the work of a man who knows what he is writing about, and knows how to write about it."—*Chicago Medical Journal*.

HOLLAND.

Recollections of Past Life,

By SIR HENRY HOLLAND, Bart., M. D., F. R. S., K. C. B., etc.,
President of the Royal Institution of Great Britain, Physician-in-Ordinary to the Queen,
etc., etc.

1 vol., 12mo, 351 pp. Price, Cloth, \$2.00.

A very entertaining and instructive narrative, partaking somewhat of the nature of autobiography and yet distinct from it, in this, that its chief object, as alleged by the writer, is not so much to recount the events of his own life, as to perform the office of chronicler for others with whom he came in contact and was long associated.

The "Life of Sir Henry Holland" is one to be recollected, and he has not erred in giving an outline of it to the public."—*The Lancet*.

"His memory was—is, we may say, for he is still alive and in possession of all his faculties—stored with recollections of the most eminent men and women of this century. . . . A life extending over a period of eighty-four years, and passed in the most active manner, in the midst of the best society, which the world has to offer, must necessarily be full of singular interest; and Sir Henry Holland has fortunately not waited until his memory lost its freshness before recalling some of the incidents in it."—*The New York Times*.

HOWE.

Emergencies, and How to Treat Them.

The Etiology, Pathology, and Treatment of Accidents, Diseases, and Cases of Poisoning, which demand Prompt Attention. Designed for Students and Practitioners of Medicine.

By JOSEPH W. HOWE, M. D.,

Visiting Surgeon to Charity Hospital; Lecturer on Surgery in the Medical Department of the University of New York, etc.

1 vol., 8vo. 265 pp. Cloth, \$3.00.

This volume is designed as a guide in the treatment of cases of emergency occurring in medical, surgical, or obstetrical practice. It combines all the important subjects, giving special prominence to points of practical interest in preference to theoretical considerations, and uniting, with the results of personal observation, the latest views of European and American authorities.

"The style is concise, perspicuous, and definite. Each article is written as though that particular emergency were present; there is no waste of words, nor temporizing with remedies of doubtful efficacy. The articles on oedema glottidis, asphyxia, and strangulated hernia, are particularly clear and practical, and furnish all the information required in the management of those urgent cases.

"It will be found invaluable to students and young practitioners, in supplying them with an epitome of useful knowledge obtainable from no other single work; while to the older members of the profession it will serve as a reliable and 'ready remembrancer.'"—*The Medical Record*.

HUXLEY AND YOUMANS.
The Elements of Physiology and
Hygiene. With Numerous Illustrations.

By THOMAS H. HUXLEY, LL. D., F. R. S., and
WILLIAM JAY YOUMANS, M. D.

1 vol., 12mo. 420 pp. \$1.75.

A text-book for educational institutions, and a valuable elementary work for students of medicine. The greater portion is from the pen of Professor Huxley, adapted by Dr. Youmans to the circumstances and requirements of American education.

"A valuable contribution to anatomical and physiological science."—*Religious Telescope.*

"A clear and well-arranged work, embracing the latest discoveries and accepted theories."—*Buffalo Commercial.*

"Teeming with information concerning the human physical economy."—*Evening Journal.*

HUXLEY.

The Anatomy of Vertebrated Animals,

By THOMAS HENRY HUXLEY, LL. D., F. R. S.,

Author of "Man's Place in Nature," "On the Origin of Species," "Lay Sermons and Addresses," etc.

1 vol., 12mo. Cloth, \$2.00.

The former works of Prof. Huxley leave no room for doubt as to the importance and value of his new volume. It is one which will be very acceptable to all who are interested in the subject of which it treats.

SPECIMEN OF ILLUSTRATIONS.

The Alligator Terrapene (*Chelydra Serpentina*).

"This long-expected work will be cordially welcomed by all students and teachers of Comparative Anatomy as a compendious, reliable, and, notwithstanding its small dimensions, most comprehensive guide on the subject of which it treats. To praise or to criticise the work of so accomplished a master of his favorite science would be equally out of place. It is enough to say that it realizes, in a remarkable degree, the anticipations which have been formed of it; and that it presents an extraordinary combination of wide, general views, with the clear, accurate, and succinct statement of a prodigious number of individual facts."—*Nature.*

JOHNSON.

The Chemistry of Common Life.
Illustrated with numerous Wood Engravings.

By JAMES F. JOHNSON, M. A., F. R. S., F. G. S., ETC., ETC.,

Author of "Lectures on Agricultural Chemistry and Geology," "A Catechism of Agricultural Chemistry and Geology," etc.

2 vols., 12mo. Cloth, \$3.00.

It has been the object of the author in this work to exhibit the present condition of chemical knowledge, and of matured scientific opinion, upon the subjects to which it is devoted. The reader will not be surprised, therefore, should he find in it some things which differ from what is to be found in other popular works already in his hands or on the shelves of his library.

LETTERMAN.

Medical Recollections of the Army of
the Potomac.

By JONATHAN LETTERMAN, M. D.,

Late Surgeon U. S. A., and Medical Director of the Army of the Potomac.

1 vol., 8vo. 194 pp. Cloth, \$1.00.

"This account of the medical department of the Army of the Potomac has been prepared, amid pressing engagements, in the hope that the labors of the medical officers of that army may be known to an intelligent people, with whom to know is to appreciate; and as an affectionate tribute to many, long my zealous and efficient colleagues, who, in days of trial and danger, which have passed, let us hope never to return, evinced their devotion to their country and to the cause of humanity, without hope of promotion or expectation of reward."—*Preface.*

"We venture to assert that but few who open this volume of medical annals, pregnant as they are with instruction, will care to do otherwise than finish them at a sitting."—*Medical Record.*

"A graceful and affectionate tribute."—*N. Y. Medical Journal.*

LEWES.

The Physiology of Common Life.

By GEORGE HENRY LEWES,

Author of "Seaside Studies," "Life of Goethe," etc.

2 vols., 12mo. Cloth, \$3.00.

The object of this work differs from that of all others on popular science in its attempt to meet the wants of the student, while meeting those of the general reader, who is supposed to be wholly unacquainted with anatomy and physiology.
