THE END.

THE  
NEW YORK MEDICAL JOURNAL.  
*THE LEADING JOURNAL OF AMERICA.*

EDITED BY FRANK P. FOSTER, M. D.

Containing twenty-eight double-columned pages of reading-matter, consisting of Lectures, Original Communications, Clinical Reports, Correspondence, Book Notices, Leading Articles, Minor Paragraphs, News Items, Letters to the Editor, Proceedings of Societies, Reports on the Progress of Medicine, and Miscellany.

By reason of the condensed form in which the matter is arranged, the JOURNAL contains more reading-matter than any other of its class in the United States. Its pages contain an average of 1,300 words; each volume has at least 748 pages, giving an aggregate of 972,400 words, or more than double the amount of reading-matter contained in a \$5.00 octavo volume of 800 pages, averaging 500 words to the page. It is also more freely illustrated, and its illustrations are generally better executed, than is the case with other weekly journals.

The articles contributed to the JOURNAL are of a high order of excellence, for authors know that through its columns they address the better part of the profession; a consideration which has not escaped the notice of advertisers, as shown by its increasing advertising patronage.

The volumes begin with January and July of each year. Subscriptions can be arranged to begin with the volume.

**TERMS, PAYABLE IN ADVANCE.**

THE POPULAR SCIENCE MONTHLY and THE NEW YORK MEDICAL JOURNAL to the same address, \$9.00 per annum (full price, \$10.00).

D. APPLETON & CO., Publishers,  
1, 3, & 5 Bond Street, New York.

THE  
POPULAR SCIENCE MONTHLY.

CONDUCTED BY E. L. AND W. J. YOUMANS.

THE POPULAR SCIENCE MONTHLY will continue, as heretofore, to supply its readers with the results of the latest investigation and the most valuable thought in the various departments of scientific inquiry.

Leaving the dry and technical details of science, which are of chief concern to specialists, to the journals devoted to them, the MONTHLY deals with those more general and practical subjects which are of the greatest interest and importance to the public at large. In this work it has achieved a foremost position, and is now the acknowledged organ of progressive scientific ideas in this country.

The wide range of its discussions includes, among other topics:

The bearing of science upon education;

Questions relating to the prevention of disease and the improvement of sanitary conditions;

Subjects of domestic and social economy, including the introduction of better ways of living, and improved applications in the arts of every kind;

The phenomena and laws of the larger social organizations, with the new standard of ethics, based on scientific principles;

The subjects of personal and household hygiene, medicine, and architecture, as exemplified in the adaptation of public buildings and private houses to the wants of those who use them;

Agriculture and the improvement of food products;

The study of man, with what appears from time to time in the departments of anthropology and archæology that may throw light upon the development of the race from its primitive conditions.

Whatever of real advance is made in chemistry, geography, astronomy, physiology, psychology, botany, zoölogy, paleontology, geology, or such other department as may have been the field of research, is recorded monthly.

Special attention is also called to the biographies, with portraits, of representative scientific men, in which are recorded their most marked achievements in science, and the general bearing of their work indicated and its value estimated.

Terms: \$5.00 per Annum, in advance.

The New York Medical Journal and The Popular Science Monthly to the same address, \$9.00 per Annum (full price, \$10.00).

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

DR. W. H. VAN BUREN'S WORKS.

LECTURES ON THE PRINCIPLES OF SURGERY.

*Delivered at Bellevue Hospital Medical College,*

By W. H. VAN BUREN, M. D., LL. D. (YALEN.),  
Formerly Professor of the Principles and Practice of Surgery in the Bellevue Hospital Medical College; one of the Consulting Surgeons of the New York Hospital, etc.

EDITED BY LEWIS A. STIMSON, M. D.,  
Professor of Physiology and Clinical Surgery in the Medical Department of the University of the City of New York.

1 vol., 8vo, 588 pages.

LECTURES UPON DISEASES OF THE RECTUM AND THE SURGERY OF THE LOWER BOWEL.

*Delivered at the Bellevue Hospital Medical College,*

By W. H. VAN BUREN, M. D.,  
Late Professor of the Principles and Practice of Surgery in the Bellevue Hospital Medical College, etc.

Second edition, revised and enlarged. 1 vol., 8vo, 412 pages, with 27 Illustrations and complete Index. Cloth, \$3.00; sheep, \$4.00.

"These lectures are twelve in number, and may be taken as an excellent epitome of our present knowledge of the diseases of the parts in question. The work is full of practical matter, but it owes not a little of its value to the original thought, labor, and suggestions as to the treatment of disease, which always characterize the productions of the pen of Dr. Van Buren."—*Philadelphia Medical Times*.

A PRACTICAL TREATISE ON THE SURGICAL DISEASES OF THE GENITO-URINARY ORGANS, INCLUDING SYPHILIS.

*Designed as a Manual for Students and Practitioners.*

WITH ENGRAVINGS AND CASES.

By W. H. VAN BUREN, A. M., M. D.,  
Late Professor of Principles of Surgery, with Diseases of the Genito-Urinary System and Clinical Surgery, in Bellevue Hospital Medical College, etc.; and

E. L. KEYES, A. M., M. D.,  
Professor of Dermatology in Bellevue Hospital Medical College; Surgeon to the Charity Hospital, Venereal Diseases, etc.

1 vol., 8vo, 672 pages. Cloth, \$5.00; sheep, \$6.00.

"The authors appear to have succeeded admirably in giving to the world an exhaustive and reliable treatise on this important class of diseases."—*Northwestern Medical and Surgical Journal*.

New York: D. APPLETON & CO., 1, 3, & 5 Bond Street.

# A DICTIONARY OF MEDICINE,

INCLUDING

GENERAL PATHOLOGY, GENERAL THERAPEUTICS, HYGIENE,  
AND THE DISEASES PECULIAR TO WOMEN AND  
CHILDREN.

BY VARIOUS WRITERS.

EDITED BY

RICHARD QUAIN, M.D., F.R.S.,

Fellow of the Royal College of Physicians, and Physician to the Hospital for Diseases of  
the Chest, at Brompton, etc.

In one large 8vo volume of 1,834 pages with 138 Illustrations. Half  
morocco, price, \$8.00. Sold only by Subscription.

This work is primarily a Dictionary of Medicine, in which the several diseases are fully discussed in alphabetical order. The description of each includes an account of its etiology and anatomical characters; its symptoms, course, duration, and termination; its diagnosis, prognosis, and, lastly, its treatment. General Pathology comprehends articles on the origin, characters, and nature of disease.

General Therapeutics includes articles on the several classes of remedies, their modes of action, and on the methods of their use. The articles devoted to the subject of Hygiene treat of the causes and prevention of disease, of the agencies and laws affecting public health, of the means of preserving the health of the individual, of the construction and management of hospitals, and of the nursing of the sick.

Lastly, the diseases peculiar to women and children are discussed under their respective headings, both in aggregate and in detail.

"A goodly volume of an extremely interesting and important character. Dr. Quain has succeeded in bringing together and conducting a work numbering a body of contributors of whose co-operation any editor might feel proud, and whose combined work could not fail to produce a book of the highest authority and practical value. It is noticeable that the most recent questions are dealt with, and are all treated according to the most recent researches and knowledge."—*British Medical Journal*.

"This new Medical Dictionary contains an immense mass of information, the aggregate value of which it is difficult to estimate, but which may fairly be expected to satisfy the most industrious student of medical science. A very wide and liberal meaning has been given to the word Medicine. To the general practitioner we can most heartily recommend the work; and it will find many readers outside the pale of the medical profession. It should have a place in at least every public, if not in every good private, library."—*Saturday Review*.

"The articles we have read have struck us as models of clear and fluent scientific English. The volume contains many articles on matters of general interest to the public at large, though not less important on that account to the practitioner."—*London Spectator*.
