CHAPTER LXVII.

ON DIAGNOSIS.

Definition of Term—Ease the Normal Condition—Dis expressive of the Reverse of Ease—Disease a Generic Term—Manner of Pursuing Diagnoses—The Process of <i>Exclusion</i> —Illustrative Suggestion	999
---	-----

LIST OF ILLUSTRATIONS.

FIG.	PAGE	FIG.	PAGE
1. View of skull	27	41. Dental pulp magnified	84
2. Superior maxillary bone	29	42. Nerves of dental pulp	84
3. Superior maxillary bone	29	43. Tubuli of dentine and enamel	84
4. Inferior maxillary bone	34	44. Vertical section of canine tooth	85
5. Inferior maxillary bone	36	45. Enamel columns magnified	85
6. Section of face	37	46. Section of enamel magnified	85
7. Palate bone	37	47. Interglobular spaces	86
8. Palate bone	37	48. Vertical section of molar tooth	86
9. Vomer	39	49. Transverse section of molar tooth	86
10. Articular relations of vomer	39	50. Deciduous teeth	87
11. Turbinated bones	40	51. Teeth of upper jaw	88
12. Ethmoid bone	42	52. Teeth of lower jaw	88
13. Sphenoid bone	43	53. Lateral view of teeth	91
14. Sphenoid bone	43	54. Illustrations in dentition	95
15. Nasal bone	46	55. Illustrations in dentition	98
16. Malar bone	47	56. Illustrations in gum lancing	103
17. Lachrymal bone	48	57. Illustrations in gum lancing	103
18. Hyoid bone	48	58. Illustrations in gum lancing	103
19. Section of cranium	49	59. Illustrations in gum lancing	103
20. View of right half of base of skull	49	60. Illustrations in gum lancing	108
21. Muscles of the face	51	61. Fused teeth	131
22. Arteries of the face	52	62. Warty teeth	131
23. The common carotid artery	53	63. Odontoma'	131
24. Internal maxillary artery	54	64. Microscopic diagram	132
25. Veins of face	56	65. Intramaxillary bone	132
26. Nerves of face	57	66. Tumor of lower jaw	132
27. Sectional view of the nose, mouth, and pharynx	59	67. Osseous cyst in jaw	133
28. Side view of muscles of tongue	60	68. Intramaxillary osseous tumor	133
29. Upper surface of the tongue	62	69. Microscopic diagram	133
30. Papillæ of the tongue	63	70. Dental arch	158
31. Papillæ of the tongue	63	71. Dental arch	159
32. Vertical section of temporo-maxillary articulation	67	72. Calcified tooth	178
33. Vertical section of temporo-maxillary articulation	67	73. Filed tooth	183
34. Fifth pair of nerves	69	74. Illustrations in filing	185
35. Division in ganglia of fifth nerve	70	75. Illustrations in filing	185
36. Superior maxillary nerve	74	76. Illustrations in filing	186
37. Inferior maxillary nerve	75	77. Illustrations in filing	186
38. Ophthalmic ganglion	78	78. Separating disks	186
39. Spheno-palatine ganglion	78	79. Illustrations in filing	186
40. Vertical section of cuspid tooth	83	80. Bur instruments	201
		81. Section of tooth	213
		82. Section of tooth	213
		83. Section of tooth	214

FIG.	PAGE	FIG.	PAGE
84. Nodular dentine	215	132. Cavities on buccal face of molars	283
85. Nodular dentine	215	133. Cavities on buccal face of molars	284
86. Ringed tooth	222	134. Carious denture	284
87. Metal cap	223	135. Carious incisors	285
88. Sae of dental abscess	225	136. Irregular incisors	286
89. Opening of dental abscess	227	137. Jarvis's separators	287
90. Imprisoned tooth	234	138. Approximal cavities	288
91. Imprisoned tooth	235	139. Inferior anterior teeth	288
92. Imprisoned tooth	236	140. Excavators	289
93. Imprisoned tooth	236	141. Flagg's tongue-holder	294
94. Imprisoned tooth	236	142. Morrison's compressor	294
95. Imprisoned tooth	237	143. Saliva-pump	295
96. Nerve extractors	240	144. McQuillen's extension-finger	295
97. Nerve extractors	240	145. Rich's duct-compressor	296
98. Nerve-canal pluggers	243	146. Taft's thimble	296
99. Pulp caps	246	147. Depressed rubber dam	297
100. Fixation of replanted tooth	252	148. Rubber dam mirror	297
101. Instruments for removing tartar from teeth	265	149. Rubber dam punchings	297
102. Denudation of teeth	266	150. Rubber dam applier	298
103. Denudation of teeth	266	151. Rubber dam clamps	298
104. Superior dental arch	268	152. Rubber dam clamps	298
105. Superior dental arch	269	153. Rubber dam clamps	299
106. Hoe excavators and modifications	269	154. Rubber dam clamps	299
107. Hatchet excavators and modifica- tions	270	155. Rubber dam clamps	299
108. Rose drills and spear drills	270	156. Rubber dam forceps	299
109. Merry's drill	271	157. Rubber dam weight	300
110. Bur thimble	271	158. Rubber dam holder	300
111. The White dental engine	272	159. Gum-forcing instruments	300
112. The Bonwill instrument	272	160. Rubber dam applied	301
113. Hand-piece of dental engine	273	161. Hot-air syringe	302
114. Obtuse attachment of dental en- gine	273	162. Amalgam cups	309
115. Some forms of chisels used in den- tistry	275	163. File flat	309
116. Jack's double-end enamel chisels	275	164. Amalgam pluggers	309
117. Gauges and paraboloid chisels	276	165. Smith's plastic fillers	315
118. Separating files	276	166. Cylinders	219
119. Plug-finishing files	277	167. Mats and blocks of gold	320
120. Files for separating molar teeth	278	168. Introduction of cylinders	320
121. Forbes's file carrier	278	169. Introduction of mats	320
122. Miller's file carrier	279	170. The wedge principle	320
123. Knife-edge saws	279	171. Foil-carrier	321
124. Side view of corundum disks	279	172. Redman's pluggers	322
125. Disks of corundum	279	173. Loop matrices	324
126. Herrick's fountain drip-point	280	174. Jack's matrix	325
127. Water-syringe	280	175. Jack's matrix	325
128. Cavities on grinding face of molars	282	176. Jack's matrix	325
129. Cavities on posterior face of inci- sors	283	177. Jack's matrix	325
130. Cavities at neck (anterior face) of incisors	283	178. Jack's matrix	325
131. Cavities among imperfect enamel	283	179. The Atkinson pluggers	328
		180. Burnishers	329
		181. Butler's pluggers	329
		182. Smith's pluggers	330
		183. Abbott's pluggers	331
		184. Plugging mallets	333
		185. Tooth cavity	335

FIG.	PAGE	FIG.	PAGE
186. Teeth prepared for contouring	337	240. Irregular teeth	374
187. Teeth contoured and prepared	337	241. Correcting apparatus	374
188. Teeth contoured	338	242. Corrected denture	374
189. Dental illustrations	338	243. Metal tooth-cap	375
190. Dental illustrations	338	244. Protrusion of lower jaw	375
191. Illustrations in contour work	338	245. Maxillary angles	375
192. Illustrations in contour work	338	246. Occipito-mental sling	376
193. Illustrations in contour work	338	247. Corrected denture	377
194. Illustrations in contour work	339	248. Correcting plate	377
195. Illustrations in contour work	339	249. Wedged denture	378
196. Dental illustration	339	250. Double screw	378
197. Dental illustration	339	251. Protruding jaw	379
198. Contour operation	339	252. Jack-screw plate	379
199. Hand mallet	340	253. Correcting plate	379
200. Electro-magnetic mallet	340	254. Farrar's correcting apparatus	380
201. Buckingham mallet	341	255. Farrar's correcting apparatus	380
202. Finishing files	342	256. Farrar's correcting apparatus	381
203. Bur and wheel files	343	257. Farrar's correcting apparatus	381
204. Set of burnishers	343	258. Farrar's correcting apparatus	381
205. Porte polishers	344	259. Farrar's correcting apparatus	382
206. Corundum points	345	260. Farrar's correcting apparatus	382
207. Finishing stones	345	261. Farrar's correcting apparatus	382
208. Polishing wheel	346	262. Farrar's correcting apparatus	383
209. Wood polishing-points	346	263. Farrar's correcting apparatus	383
210. White's head-rest	348	264. Permanent teeth of upper jaw	385
211. Artificial tooth crowns	351	265. Permanent teeth of lower jaw	385
212. The Talbot tooth crown	351	266. Upper incisor forceps	386
213. The Bing gold crown	351	267. Upper lateral incisor forceps	386
214. Pivot tooth	352	268. Lower incisor, hawk-bill forceps	386
215. Excising forceps	353	269. Lower incisor and bicuspid forceps	387
216. Excising saw	353	270. Hawk-bill forceps	387
217. Pivot files	354	271. Upper and lower root forceps	388
218. Hand-lathe	355	272. Lower root forceps	388
219. Foot-lathe	356	273. Upper and lower bicuspid forceps	388
220. Pivot teeth	359	274. Universal lower forceps	388
221. Pivot teeth	359	275. Half-curve lower forceps	389
222. Pivot teeth	359	276. Upper bicuspid and canine forceps	389
223. Pivot teeth	360	277. Upper bicuspid and incisor forceps	390
224. Pivot teeth	360	278. Lower bicuspid and canine forceps	390
225. Forked screw-driver	360	279. Lower bicuspid and canine forceps	391
226. Amalgam crowns	360	280. Upper bicuspid and canine forceps	391
227. Pivot teeth	361	281. Upper molar forceps	391
228. Pivot teeth	362	282. Upper molar forceps	392
229. Porcelain facing	363	283. Upper molar forceps	392
230. Porcelain facing	363	284. Upper molar forceps	393
231. Porcelain facing	364	285. Cow-horn forceps	393
232. Irregular denture	368	286. Cow-horn forceps	394
233. Irregular denture	368	287. Lower molar forceps	394
234. White's correcting plate	370	288. Lower cow-horn forceps	395
235. Westcott's appliance	370	289. Lower cow-horn forceps	395
236. Irregular teeth	372	290. Lower cow-horn forceps	395
237. Correcting plates	372	291. Wolverton's lower molar forceps	396
238. Irregular tooth	373	292. Hutchinson's lower molar for- ceps	396
239. Irregular teeth	373		

FIG.	PAGE	FIG.	PAGE
293. Forceps for wisdom-teeth	397	346. Studies in obturators	451
294. Physick's forceps	397	347. Studies in obturators	452
295. Elevators used in extracting teeth	398	348. Studies in obturators	452
296. Lower dentes sapientiæ forceps	399	349. Studies in obturators	454
297. Jones's forceps	399	350. Studies in obturators	454
298. Perrine's forceps	399	351. Face without nose	456
299. Lower molar forceps	400	352. Internal view of superior arch	457
300. Upper molar forceps	400	353. Nose with attachments	459
301. Relation of fractured roots to alveolar line	401	354. Attachment of nose	459
302. Stellwagen's incising forceps	401	355. Artificial nose	460
303. Stellwagen's incising forceps	401	356. Face without nose or lip	461
304. Dental screw	402	357. Lip operation	461
305. Dubs's screw forceps	403	358. A surgico-mechanical correction	461
306. Hullihen's screw forceps	403	359. Artificial nose	462
307. Straight tooth forceps	404	360. Artificial palate	463
308. Half-curve tooth forceps	404	361. Artificial palate	463
309. Full-curve tooth forceps	404	362. Palatine defect	464
310. Bayonet forceps	404	363. Obturator	465
311. Long beak forceps	404	364. Obturator and velum	465
312. Molar root forceps	405	365. Obturator and velum	466
313. Anomalous teeth	405	366. Kingsley's velum	466
314. Anomalous teeth	405	367. Kingsley's velum	466
315. Anomalous teeth	405	368. Kingsley's velum	467
316. Spray apparatus	412	369. Kingsley's velum	467
317. Spray apparatus	413	370. Baker's velum	469
318. Impression trays	416	371. Baker's velum	470
319. Impression trays	416	372. Transverse section of obturator	470
320. Impression trays	417	373. Transverse section of obturator	471
321. Teeth articulation	425	374. View of gums inflamed by vulcanite plate	484
322. Articulator	427	375. General hypertrophy	486
323. Arches in articular relation	427	376. Chronic ulitis with recession	486
324. Study in denture	428	377. Knotted bandage	513
325. Study in denture	428	378. Cicatrix of neck	532
326. Study in denture	428	379. Tonsil glands	535
327. Study in denture	428	380. Hypertrophied tonsil	538
328. Study in denture	429	381. Tonsil laid open	539
329. Study in denture	429	382. Physick's tonsillotome	541
330. Study in denture	429	383. Kolbe's tonsillotome	541
331. Study in denture	430	384. View of the air-tubes	545
332. Teeth used with vulcanite	431	385. Microscopic view of cancer-cells	559
333. Moulding flask	432	386. Cystic tumor of tongue	562
334. Moulding flask	432	387. Illustration in strangulation	579
335. Vulcanizer	434	388. Strangulating ligature	579
336. Boiler and lamp of vulcanizer	434	389. Chassaignac's éraseur	580
337. New mode heater	436	390. Ligaturé extemporanée	580
338. Sectional view of new mode heater	437	391. Ablation of tongue by éraseur	581
339. Case ready for gum	439	392. Ablation of tongue by éraseur	581
340. Celluloid blank rim	440	393. Regnoli's operation for removal of tongue	582
341. Metal plate with celluloid gum	441	394. Syme's operation for removal of tongue	582
342. Studies in obturators	448	395. Nunneley's operation for removal of tongue	583
343. Studies in obturators	448		
344. Studies in obturators	450		
345. Studies in obturators	450		

FIG.	PAGE	FIG.	PAGE
396. Paget's operation for removal of tongue	583	444. Dermatolysis	670
397. Division of lingual frænum	586	445. Sebaceous tumor	676
398. Amputation of uvula	588	446. Keloid of neck	678
399. Uvula scissors	588	447. Arterial nævus	682
400. Superficial ranula	594	448. Venous nævus	682
401. Hygroma of the neck	597	449. Venous varix	682
402. Deep-seated ranula	601	450. Nævus of lip	683
403. Side view of pharynx and its muscles	602	451. Transfixing ligatures	685
404. Posterior view of muscles of pharynx	602	452. Transfixing ligatures	685
405. Bond's œsophagus forceps	608	453. Illustration of parasitic growth, oidium albicans	690
406. Bristle probang	609	454. Horns growing on nose and face	692
407. Bristle probang	609	455. Section of horn	692
408. Œsophagus bougie	610	456. Lupus erythematosus	693
409. Electric illuminator	611	457. Lupus vulgaris	694
410. Rhinoscopic view of posterior nares	612	458. Epithelioma of lip	700
411. Uranoplasty	617	459. Epithelioma of lip	700
412. Staphyloraphy	625	460. Epithelioma of jaw	701
413. Curved needles	625	461. Epithelioma of lip and chin	702
414. Palate instruments	628	462. Epithelioma of eyelid	705
415. Kolbe's screw lever	629	463. Flap operations	706
416. Goodwillie's screw lever	629	464. Flap operation	707
417. View of nasal septum	631	465. Flap operation	707
418. Lateral view of nose	632	466. Microscopic view of epithelial cancer	707
419. Belloc's canula	635	467. Hare-lip	713
420. Kolbe's powder insufflator	640	468. Hainsby's compressor	715
421. The Areling-Hodge polyptrite	640	469. Study in hare-lip	718
422. Gooch's canula	640	470. Study in hare-lip	718
423. Torsion forceps	641	471. Study in hare-lip	719
424. Polypus forceps	641	472. Study in hare-lip	723
425. Frog-face	642	473. Study in hare-lip	723
426. Polypus related with turbinated bone	642	474. Study in hare-lip	723
427. Removal of polypi with forceps and the canula and loop	642	475. Study in hare-lip	724
428. Frankel's nasal speculum	655	476. Study in hare-lip	724
429. Tobold's illuminating apparatus	655	477. Study in hare-lip	724
430. Study in rhinoplasty	660	478. Figure-of-8 tie	725
431. Study in rhinoplasty	660	479. Mouth-stretcher	727
432. Study in rhinoplasty	660	480. Study in lip operation	733
433. Study in rhinoplasty	660	481. Study in lip operation	733
434. Study in rhinoplasty	661	482. Study in lip operation	733
435. Study in rhinoplasty	661	483. Study in lip operation	733
436. Belloc's canula applied	662	484. Study in lip operation	733
437. Removal of polypi	662	485. Study in lip operation	734
438. Adam's forceps for straightening nasal septum	662	486. Study in lip operation	735
439. Adam's screw plates	662	487. Study in lip operation	736
440. Study in rhinoplasty	664	488. Study in lip operation	736
441. Study in rhinoplasty	665	489. Study in lip operation	736
442. Use of nasal douche	666	490. Study in lip operation	736
443. Naso-pharyngeal syringe	666	491. Study in lip operation	737
		492. Study in lip operation	737
		493. Study in lip operation	737
		494. Study in lip operation	737
		495. Surgical anatomy of face	742

FIG.	PAGE	FIG.	PAGE
496. Ligation of arteries	743	544. Neuroma of nasal bone	874
497. Surgical anatomy of neck	744	545. Exsection of nasal bone	875
498. Surgical anatomy of anterior cervical triangles	746	546. Pancoast's operation for exsection of the trifacial nerve	876
499. Salivary fistule	760	547. Author's operation for exsection of superior maxillary nerve at base of skull	878
500. Illustration in treatment of salivary fistule	761	548. Exposure of infra-orbital nerve	881
501. Tent for treatment of salivary fistule	762	549. Auricularis magnus nerve exposed	882
502. Tent for treatment of salivary fistule	762	550. Line of incision for exposing auricular and occipital nerves	882
503. Diagram of tooth nutrition	778	551. Exposure of occipital nerve and artery	882
504. Necrosis of skull	782	552. Exposure of supra-orbital nerve	883
505. Sequestrum after measles	787	553. Dental fungoid tumors	893
506. Phosphor-necrosis	791	554. Odonto-periosteal growth	894
507. Appearance of patient in phosphor-necrosis	795	555. Ullie tumor	894
508. Dislocation of jaw	797	556. Epulic tumor	898
509. Reduction of dislocated jaw	800	557. Epulic tumor	898
510. Vertico-mental sling	800	558a. Epulic tumor	898
511. Jaw fracture	802	558b. Epulic tumor	898
512. Jaw fracture	802	559. Epulic tumors	899
513. Compound fracture of jaw	805	560. Epulic tumors	899
514. Compound fracture of jaw	805	561. Resections of bone	901
515. Barton's bandage	806	562. Odontoma	906
516. Gibson's bandage	807	563. Odontoma	906
517. Author's bandage	808	564. Microscopic section	906
518. Bean's interdental splint	809	565. Hyperostosis	909
519. Bean's splint applied	809	566. Osseous tumor	911
520. Sudduth's mento-dental splint	810	567. Hyperostosis of tuberosity of maxilla	912
521. Interdental splint	814	568. Microscopic section	913
522. Dental splint	814	569. Cystic tumor	917
523. Interdental splint	814	570. Cystic tumor uncovered	917
524. Excision of upper maxilla	819	571. Odontocoele	918
525. Lion forceps	821	572. Odontoma	921
526. Cutting bone forceps	822	573. Microscopic section	922
527. Mouth-stretcher applied	824	574. Hypertrophied periodontem	922
528. Mouth-stretcher	824	575. Odontoma	923
529. Exsection of lower jaw	826	576. Odontoma	925
530. Exsection of lower jaw	826	577. Odontoma	925
531. Exsection of lower jaw	827	578. Microscopic section	926
532. Exsection of lower jaw	827	579. Antral cyst	934
533. Exsection of lower jaw	827	580. Secondary cyst of antrum	935
534. Surgical engine and appliances	829	581. Meningocele	936
535. Operculum excising forceps	847	582. Fibrous tumor	938
536. Kolbe's jaw dilator	851	583. Microscopic section of fibroma	939
537. Wedge of Scultetus	852	584. Microscopic section of fibro-recurring tumor	940
538. Modified wedge of Scultetus	852	585. Sarcomatous tumor	941
539. Cicatricial expander	852	586. Microscopic section of sarcoma	942
540. Expander applied	853	587. Osteo-sarcomatous tumor	948
541. View of inferior maxillary nerve	871	588. Cysto-sarcoma	948
542. Garretson's operation for exposure of inferior maxillary nerve	872	589. Scirrhus nodules	949
543. Garretson's operation for exposure of maxillary nerve at base of skull	874		

FIG.	PAGE	FIG.	PAGE
590. Hard cancer-cells	950	604. Nitrous oxide gas apparatus	974
591. Microscopic appearance of scirrhusma	950	605. Mouth-piece for use of gas	976
592. Encephaloid tumor	951	606. Holder for liquid nitrous oxide	976
593. Encephaloid tumor	951	607. Illustration in inflammation	981
594. Encephaloid tumor	952	608. Illustration in inflammation	981
595. Encephaloid disease of face	953	609. Illustration in inflammation	982
596. Microscopic appearance of encephaloid cancer	953	610. Illustration in inflammation	982
597. Medullary cancer-cells	954	611. Illustration in inflammation	983
598. Medullary cancer-cells	954	612. Anatomy of bend of arm	987
599. Medullary cancer-cells	954	613. Thumb lancet	987
600. Medullary cancer-cells	954	614. Spring lancet	989
601. Medullary cancer-cells	954	615. Position of blood-corpuscles in inflammation	996
602. Medullary cancer-cells	954	616. Nutritional pabulum exuding through the walls of vessels	998
603. Ether inhaler	957
