POPULAR SCIENCE MONTHLY.

CONDUCTED BY E. L. AND W. J. YOUMANS.

THE POPULAR SCIENCE MONTHLY was established thirteen years ago to bring before the general public the results of scientific thought on many large and important questions which could find no expression in the current periodicals. Scientific inquiry was penetrating many new fields, extending important knowledge, and profoundly affecting opinion upon numberless questions of speculative and practical interest. It was the policy of this magazine at the outset, and has been constantly adhered to since, to obtain the ablest statements from the most distinguished scientific men of all countries in their bearing upon the higher problems of investigation. Leaving the dry and technical details of science, which are of chief concern to specialists, to the journals devoted to them, THE POPULAR SCIENCE MONTHLY has dealt with those more general and practical subjects which are of the greatest interest and importance to the people at large.

That which was at first a dubious experiment has now become an assured and permanent success. Our MONTHLY is the acknowledged organ of progressive scientific ideas in this country. Received with favor at the outset, it has gone on increasing in circulation and in influence, until its power is felt and acknowledged in the highest departments of intellectual activity, and its leadership is recognized in the great work of liberalizing and educating the popular mind.

Making neither sensational appeals nor flaring announcements, we may now refer to its course in the past as a sufficient guarantee that it will continue to discuss in the same earnest and fearless, but always respectful manner, the various important questions falling within its scope that are entitled to the intelligent consideration of thinking people.

Science is the great agency of improvement in this age, private and public, individual, social, professional, and industrial. In its irresistible progress it touches everywhere, and affects everybody. It gives law to the material interests of the community, and modifies its ideas, opinions, and beliefs, so that all have an interest in being informed of its advancement. Those, therefore, who desire to know what is going on in the world of thought in these stirring times, when new knowledge is rapidly extending, and old errors are giving way, will find that they can keep informed only by subscribing for THE POPULAR SCIENCE MONTHLY.

"This is one of the very best periodicals of its kind published in the world. Its corps of contributors comprise many of the ablest minds known to science and literature."—*American Medical Journal* (St. Louis).

"No scientific student can dispense with this monthly, and it is difficult to understand how any one making literary pretensions fails to become a regular reader of this journal. 'The Popular Science Monthly' meets a want of the medical profession not otherwise met. It keeps full pace with the progress of the times in all the departments of scientific pursuit."—*Virginia Medical Monthly*.

"Every physician's table should bear this valuable monthly, which we believe to be one of the most interesting and instructive of the periodicals now published, and one which is destined to play a large part in the mental development of the laity of this country."—*Canadian Journal of Medical Science*.

"Outside of medical journals, there is no periodical published in America as well worthy of being placed upon the physician's library-table and regularly read by him as 'The Popular Science Monthly.'"—*St. Louis Clinical Record*.

TERMS: \$5.00 per Annum, in advance.

The New York Medical Journal and The Popular Science Monthly to the same address, \$9.00 per Annum (full price, \$10.00).

THE
NEW YORK MEDICAL JOURNAL,
A Weekly Review of Medicine.

PUBLISHED BY
D. APPLETON & CO.

EDITED BY
FRANK P. FOSTER, M. D.

THE NEW YORK MEDICAL JOURNAL, now in the twentieth year of its publication, is published every Saturday, each number containing twenty-eight large, double-columned pages of reading matter. By reason of the condensed form in which the matter is arranged, it contains more reading matter than any other journal of its class in the United States. It is also more freely illustrated, and its illustrations are generally better executed, than is the case with other weekly journals.

The special departments of the JOURNAL are as follows:

LECTURES AND ADDRESSES.—The effort is made to present didactic and clinical lectures, each in due proportion, and to give under this head only such lectures as are of interest to the great body of the profession.

ORIGINAL COMMUNICATIONS.—These articles cover the whole range of the medical sciences, and include only those that are actually contributed by authors, and those that have been read before societies with which the JOURNAL has a special arrangement (including the New York Surgical Society, the New York Obstetrical Society, the New York Clinical Society, and the Medical Society of the County of Kings).

CLINICAL REPORTS.—These include reports of interesting cases in hospital practice.

BOOK NOTICES.—In this department books are noticed strictly in accordance with their merits.

CORRESPONDENCE.—Under this head we include only letters from the regular correspondents of the JOURNAL, chance communications being given under a separate heading.

LEADING ARTICLES.—Under this head we class the longer and more formal editorial articles. They consist either of *résumés* of scientific contributions, or of comments on matters of interest to the profession as a class, its welfare and its dignity.

MINOR PARAGRAPHS. NEWS ITEMS.

OBITUARY NOTES refer for the most part to well-known members of the profession, both in this country and abroad.

LETTERS TO THE EDITOR embrace short communications from others than our regular correspondents.

PROCEEDINGS OF SOCIETIES.—The JOURNAL gives the proceedings of all the leading societies, national, State, and local, in a condensed form, but with a degree of fullness commensurate with their interest to the profession.

REPORTS ON THE PROGRESS OF MEDICINE include abstracts of the better part of current literature, prepared by a staff of gentlemen specially employed for the purpose. These reports cover the whole range of medicine.

MISCELLANY.—Under this head will be found abstracts which it is thought desirable to give in advance of the regular time for their appearance in the formal reports, especially *Therapeutical Notes*, which, published in nearly every number, furnish the reader with the therapeutical novelties of the day.

The volumes begin with January and July of each year. Subscriptions can be arranged to begin with the volume.

TERMS, PAYABLE IN ADVANCE.

One Year	\$5 00		Six Months	\$2 50
(No subscriptions received for less than Six Months.)				
Binding Cases, Cloth.				50
