CRESOGEN SPRINGS—Cresson, Berks County, Pennsylvania.
These waters have been well known in Tennessee for their beneficial effects in hepatic congestion, splenosis, Bright's disease, and the male and female disorders. With two or three hours' exposure to the building is considered a remarkable improvement. The water is used in a bath through a hot-water pipe, and the patient is exposed under a covered shed. The maximum temperature in summer is 75° F., and in winter 65° F.

**CROCKETT ARSENIC-LITHIA SPRINGS**—Mineral Springs, Tennessee.

About one mile down the road below the Crockett Springs, the water issues from the rocks with such force as to form a small waterfall. The springs are of a decided acid character, containing an average of 0.06 gram of arsenic per decilitre. The maximum and minimum temperatures are 73° F. and 65° F., respectively. The water is used in the same way as Crockett Springs.

**PYRE SPRINGS**

This water is somewhat different in its composition and has been used with success in the treatment of certain diseases. The springs are located about one mile from the town of Pyre, and the water issues from the rocks in a small waterfall. The maximum temperature is 75° F., and the minimum is 65° F. The water is used in the same manner as Crockett Springs.

**CROTON OIL**—Over-the-Counter (Over-the-Counter)

Over-the-counter croton oil is a colorless, odorless, and tasteless liquid that is used as a topical medication for the treatment of various skin conditions. It is a derivative of croton, a plant that grows in tropical regions. Croton oil has been used for centuries as a folk remedy for various skin conditions, including acne, psoriasis, and eczema. It is known for its anti-inflammatory and anti-microbial properties, which make it effective in treating skin infections and acne. Croton oil is often used as a base for other topical medications, and it is also available in various forms, such as lotions, gels, and soaps. It is important to use croton oil with caution, as it can cause irritation and skin damage if used improperly. Always consult a healthcare professional before using croton oil or any other medication.
