

12.

more fine than  
air, and called  
ether. The sun  
is full of ether  
also. Now the  
sun is a world

## INDEX.

	PAGE
A BRASION of cornea . . . . .	284
Abscess of cornea . . . . .	250
"  eyelids . . . . .	86, 125
"  frontal sinus . . . . .	71
"  globe of eye . . . . .	365
"  inner angle of eye . . . . .	144
"  iris . . . . .	305, 307
"  lachrymal sac. . . . .	136
"  Meibomian glands . . . . .	125
"  orbit . . . . .	50
Abscission of eyeball . . . . .	269
Absorption, cure of cataract by . . . . .	492
Accommodation of the eye, mechanism of . . . . .	14
"  "  paralysis of . . . . .	586
"  "  range of . . . . .	556
Acuteness of vision . . . . .	556
Albinism . . . . .	432, 591
Albuminuria in retinitis . . . . .	402
Alcoholism a cause of amblyopia . . . . .	454
Amaurosis . . . . .	451
Amblyopia . . . . .	451, 459
"  colour blindness in . . . . .	457
"  from hæmorrhage . . . . .	460
"  "  disease of the brain . . . . .	460
"  "  "  heart . . . . .	459
"  "  over-suckling, diabetes, and lead poisoning . . . . .	453
"  "  uræmic poisoning, tobacco, quinine, alcohol . . . . .	453, 458
"  general considerations regarding . . . . .	451
"  prognosis and causes of . . . . .	453, 462
"  state of the pupil in . . . . .	456
Anæsthesia of the cornea (in glaucoma) . . . . .	371
Anchyloblepharon . . . . .	588
Aneurism by anastomosis (orbital). . . . .	66
"  of ophthalmic artery . . . . .	67, 69

	PAGE
Angles of squinting . . . . .	535
Anterior chamber, diseases of . . . . .	346
"    filaria in . . . . .	475
"    foreign bodies in . . . . .	346
"    pus in . . . . .	305, 346
"    " . . . . .	567
Aphakia . . . . .	366
Apoplexy of the choroid . . . . .	435
"    "    optic nerve . . . . .	394, 401, 404
"    "    retina . . . . .	253
Aqua chlori . . . . .	298, 346
Aqueous chamber, alterations in contents of . . . . .	248, 282
"    "    dropsy of . . . . .	276, 282
Aquo-capsulitis . . . . .	292
Arcus senilis . . . . .	88
Artery, central, of retina, appearances of . . . . .	4, 149, 298
Arthritic ring . . . . .	77
Artificial eyes, adaptation of . . . . .	335
"    pupil . . . . .	336
"    "    by excision . . . . .	338
"    "    iridectomy . . . . .	337
"    "    iridesis . . . . .	336
"    "    Tyrrell's hook . . . . .	522
"    "    in zonular cataract . . . . .	346
"    "    position of . . . . .	343
"    "    selection of operation for . . . . .	343
"    "    state of eye requiring . . . . .	535
Assumed blindness . . . . .	586
Asthenopia, accommodatory . . . . .	583
"    motor . . . . .	576
Astigmatism . . . . .	578
"    diagnosis . . . . .	577
"    irregular . . . . .	581
"    treatment of . . . . .	230
Atrophy of conjunctiva . . . . .	447
"    optic disc (consecutive) . . . . .	450
"    "    (progressive) . . . . .	419
"    retina . . . . .	571
Atropine in hypermetropia . . . . .	315, 320
"    iritis . . . . .	317
"    poisoning by . . . . .	502
<b>B</b> ANDAGES (see Compress)	
"    in extraction . . . . .	254
"    keratitis . . . . .	317
Belladonna, use of, in iritis . . . . .	535
Binocular vision . . . . .	126
Blepharitis . . . . .	502

	PAGE
Blepharospasmus, clonic . . . . .	102
"    "    tonic . . . . .	102
Blood effused into choroid . . . . .	366
"    "    conjunctiva . . . . .	232
"    "    eyelids . . . . .	82
"    "    retina . . . . .	401
"    "    vitreous . . . . .	473
Blows inflicted on the cornea . . . . .	283
"    "    eyelids . . . . .	83
"    "    sclerotic . . . . .	156
Brain, acute disease of . . . . .	462
"    diseases of, in amaurosis . . . . .	460
"    meningitis . . . . .	461
"    periostitis . . . . .	461
"    tumours . . . . .	461
<b>C</b> ALABAR bean in mydriasis . . . . .	
Calcareous concretions in canaliculus . . . . .	334
"    "    choroid . . . . .	143
"    "    elastic lamina . . . . .	382
"    "    Meibomian ducts . . . . .	443
"    "    " . . . . .	96
Calomel in pustular conjunctivitis . . . . .	217
Canaliculi, stricture of . . . . .	132
Cancer of choroid . . . . .	385.
"    conjunctiva . . . . .	233
"    eyelids . . . . .	96
"    iris . . . . .	328
"    orbit . . . . .	54
"    retina . . . . .	420
Capsule of lens in capsular cataract . . . . .	523
"    Tenon, anatomy of . . . . .	1
"    "    inflammation of . . . . .	53
Caries of orbit . . . . .	49
Caruncle, hypertrophy of . . . . .	234
Cataract . . . . .	473
"    capsular . . . . .	523
"    causes of . . . . .	479
"    chloroform in extraction . . . . .	489
"    considerations before operation for . . . . .	485
"    cortical . . . . .	481
"    diagnosis of forms of . . . . .	480
"    extent of lens involved . . . . .	481
"    extraction of, iridectomy in . . . . .	522
"    flap extraction of . . . . .	494
"    "    accidents in . . . . .	497
"    "    after-treatment . . . . .	502
"    "    iritis . . . . .	503

	PAGE
Corelysis . . . . .	320
Cornea, abrasions of . . . . .	283
" abscess of . . . . .	250
" anæsthesia of (in glaucoma) . . . . .	371
" anatomy of . . . . .	5
" arthritic ring round . . . . .	4, 149, 298
" conical . . . . .	278
" contusion of . . . . .	284
" fistula of . . . . .	271
" foreign substance on . . . . .	288
"   " imbedded in . . . . .	289
"   "   " . . . . .	264

THE END.

London: Savill, Edwards and Co., Printers, Chandos Street.

FIRST EDITION OF  
A MANUAL OF THE DISEASES OF THE EYE.

By C. MACNAMARA,

Surgeon to the Mayo and Calcutta Ophthalmic Hospital.

OPINIONS OF THE PRESS.

"A complete, well-arranged, clear, and condensed manual, which is at present without a rival."—*British Medical Journal*.

"Mr. Macnamara's manual is a welcome addition to the list of English educational works, and affords a gratifying proof that it is possible to lay before the student, in a small and readable volume, a complete account of the principles and practice of modern Ophthalmic Surgery."—*Medical Times and Gazette*.

"The therapeutics of the work is its main feature, and the sections devoted to this subject embrace a consideration of almost everything that has of late years been suggested upon points of Ophthalmic treatment."—*The Practitioner*.

"Professor Macnamara's work contains a vast quantity of information compressed into a small space, and is, we consider, the best manual on diseases of the eye now existing; although specially adapted for students, it will be found reliable and serviceable by the busy practitioner. Its marginal notes on the contents of the paragraphs will greatly facilitate reference."—*Dublin Quarterly Journal of Medical Sciences*.

"Mr. Macnamara has spared no pains in making the book thoroughly representative of modern ophthalmology; and though he has given reference to nearly everything of practical importance which has been done within the past few years, he has been most successful in avoiding that diffuseness, and that want of well arranged sequence, which to so many writers are veritable stumbling-blocks."—*Indian Medical Gazette*.

"It is well and clearly written, embraces all subjects of much importance to the practitioner, and sustains the reputation which its author gained by the publication of his 'Lectures.'"—*British and Foreign Medico-Chirurgical Review*.

A TREATISE ON ASIATIC CHOLERA.

By C. MACNAMARA.

8vo, 16s.

OPINIONS OF THE PRESS.

"Dr. Macnamara entirely adopts the view that cholera is communicated by 'an organic infecting matter passed with the evacuations of those affected.' He argues this point, as well as many others connected with the disease, with great acumen.—I cannot spare space to extract any more from this admirable work, but recommend strongly its perusal by all."—*Dr. E. A. Parkes. Army Medical Department Report for 1863, London; 1870.*
