

CARPENTER'S NEW WORK.

A MANUAL, OR ELEMENTS OF PHYSIOLOGY, INCLUDING PHYSIOLOGICAL ANATOMY, FOR THE USE OF THE MEDICAL STUDENT.

BY WILLIAM B. CARPENTER, M.D., F.R.S.,
FULLERIAN PROFESSOR OF PHYSIOLOGY IN THE ROYAL INSTITUTION OF GREAT BRITAIN, ETC.

With one hundred and eighty illustrations. In one octavo volume of 566 pages. Elegantly printed to match his "Principles of Human Physiology."

This work, though but a very short time published, has attracted much attention from all engaged in teaching the science of medicine, and has been adopted as a text-book by many schools throughout the country. The clearness and conciseness with which all the latest investigations are enunciated render it peculiarly well suited for those commencing the study of medicine. It is profusely illustrated with beautiful wood engravings, and is confidently presented as among the best elementary text-books on Physiology in the language.

The merits of this work are of so high an order, and its arrangement and discussion of subjects so admirably adapted to the wants of students, that we unhesitatingly commend it to their favorable notice. This work studied first, and then followed by the more elaborate treatise of Dunglison, or Muller, or others of similar character, is decidedly the best course for the student of physiology.—*The Western Lancet*.

CARPENTER'S HUMAN PHYSIOLOGY.

PRINCIPLES OF HUMAN PHYSIOLOGY,

WITH THEIR CHIEF APPLICATIONS TO

PATHOLOGY, HYGIENE, AND FORENSIC MEDICINE.

BY WILLIAM B. CARPENTER, M.D., F.R.S., &c.

Second American, from a New and Revised London Edition.

WITH NOTES AND ADDITIONS,

BY MEREDITH CLYMER, M.D., &c.

With Two Hundred and Sixteen Wood-cuts and other Illustrations.

In one octavo volume, of about 650 closely and beautifully printed pages. The very rapid sale of a large impression of the first edition is an evidence of the merits of this valuable work and that it has been duly appreciated by the profession of this country. The publishers hope that the present edition will be found still more worthy of approbation, not only from the additions of the author and editor, but also from its superior execution, and the abundance of its illustrations. No less than eighty-five wood-cuts and another lithographic plate will be found to have been added, affording the most material assistance to the student.

"We have much satisfaction in declaring our opinion that this work is the best systematic treatise on physiology in our own language, and the best adapted for the student existing in any language."—*Medico-Chirurgical Review of London*.

"The work as it now stands is the only Treatise on Physiology in the English language which exhibits a clear and connected, and comprehensive view of the present condition of that science."—*London and Edinburgh Monthly Journal*.

SUPPLEMENT TO THE ENCYCLOPÆDIA AMERICANA, UP TO THE YEAR 1847.

ENCYCLOPÆDIA AMERICANA—Supplementary Vol.

A POPULAR DICTIONARY

OF ARTS, SCIENCES, LITERATURE, HISTORY, POLITICS AND BIOGRAPHY.

VOL. XIV.

EDITED BY HENRY VETHAKE, LL.D.,

Vice-Provost and Professor of Mathematics in the University of Pennsylvania, Author of "A Treatise on Political Economy."

In One large Octavo Volume of over Six Hundred and Fifty double columned pages.

The numerous subscribers who have been waiting the completion of this volume can now perfect their sets, and all who want a Register of the Events of the last Fifteen Years, for the Whole World, particularly embracing interesting scientific investigations and discoveries, can obtain this volume separately, price Two Dollars uncut in cloth, or Two Dollars and Fifty Cents in leather, to match the styles in which the publishers have been selling sets.

Subscribers in the large cities can be supplied on application at any of the principal bookstores; and persons residing in the country can have their sets matched by sending a volume in charge of friends visiting the city.

Complete sets furnished at very low prices in various bindings.

"The Conversations Lexicon (Encyclopædia Americana) has become a household book in all the intelligent families in America, and is undoubtedly the best depository of biographical, historical, geographical and political information of that kind which discriminating readers require. There is in the present volume much matter purely scientific, which was all the more acceptable to us that it was unexpected."—*Silliman's Journal*.

FOWNES' CHEMISTRY FOR STUDENTS.

ELEMENTARY CHEMISTRY, THEORETICAL AND PRACTICAL.

BY GEORGE FOWNES, PH. D.,

Chemical Lecturer in the Middlesex Hospital Medical School, &c. &c.

With Numerous Illustrations. Edited, with Additions,

BY ROBERT BRIDGES, M.D.,

Professor of General and Pharmaceutical Chemistry in the Philadelphia College of Pharmacy, &c. &c.

In one large duodecimo volume, sheep or extra cloth.

Though this work has been so recently published, it has already been adopted as a text-book by many of the Medical Institutions throughout the country. As a work for the first class student, and as an introduction to the larger systems of Chemistry, such as Graham's, there has been but one opinion expressed concerning it, and it may now be considered as

THE TEXT-BOOK FOR THE CHEMICAL STUDENT.

"An admirable exposition of the present state of chemical science, simply and clearly written, and displaying a thorough practical knowledge of its details as well as a profound acquaintance with its principles. The illustrations, and the whole getting-up of the book, merit our highest praise."—*British and Foreign Medical Review*.

"Remarkable for its clearness, and the most concise and perspicuous work of the kind we have seen, admirably calculated to prepare the student for the more elaborate treatises."—*Pharmaceutical Journal*.

This work of Fownes, while not enlarging on the subject as much as Graham, is far more lucid and expanded, than the usual small introductory works. Persons using it may rely upon its being kept up to the day by frequent revisions.

GRAHAM'S CHEMISTRY.

THE ELEMENTS OF CHEMISTRY.

INCLUDING THE APPLICATION OF THE SCIENCE TO THE ARTS.

With Numerous Illustrations.

By THOMAS GRAHAM, F.R.S.L. and E.D.,

Professor of Chemistry in University College, London, &c. &c.

WITH NOTES AND ADDITIONS,

By ROBERT BRIDGES, M.D., &c. &c.

In one volume octavo.

SIMON'S CHEMISTRY OF MAN.

ANIMAL CHEMISTRY,

WITH REFERENCE TO THE PHYSIOLOGY AND PATHOLOGY OF MAN.

BY DR. J. FRANZ SIMON.

TRANSLATED AND EDITED BY

GEORGE E. DAY, M.A. & L.M. CANTAB., &c.

With plates. In one octavo volume, of over seven hundred pages, sheep, or in two parts, boards.

This important work is now complete and may be had in one large octavo volume. Those who obtained the first part can procure the second separate.

"No treatise on physiological chemistry approaches, in fulness and accuracy of detail, the work which stands at the head of this article. It is the production of a man of true German assiduity, who has added to his own researches the results of the labors of nearly every other inquirer in this interesting branch of science. The death of such a laborer, which is mentioned in the preface to the work as having occurred prematurely in 1842, is indeed a calamity to science. He had hardly reached the middle term of life, and yet had made himself known all over Europe, and in our country, where his name has been familiar for several years as among the most successful of the cultivators of the Chemistry of Man. . . . It is a vast repository of facts to which the teacher and student may refer with equal satisfaction."—*The Western Journal of Medicine and Surgery*.

"The merits of the work are so universally known and acknowledged, as to need no further commendation at our hands."—*N. Y. Journal of Medicine and Surgery*.

THE CHEMISTRY OF THE FOUR SEASONS—A NEW WORK.

THE CHEMISTRY OF THE FOUR SEASONS,

SPRING, SUMMER, AUTUMN AND WINTER.

AN ESSAY PRINCIPALLY CONCERNING NATURAL PHENOMENA ADMITTING OF ILLUSTRATION BY CHEMICAL SCIENCE, AND ILLUSTRATING PASSAGES OF SCRIPTURE.

BY THOMAS GRIFFITHS,

Professor of Chemistry in the Medical College of St. Bartholomew's Hospital, &c.

In One very neat Volume, royal 12mo., of Four Hundred and Fifty large Pages, extra cloth, illustrated with numerous Wood-cuts.

"We would especially recommend it to youths commencing the study of medicine, both as an incentive to their natural curiosity and an introduction to several of those branches of science which will necessarily soon occupy their attention. We would notice further, and with commendation, that a sound and rational natural theology is spread through the whole work."—*The British and Foreign Medical Review*.

"This interesting and attractive volume is designed to illustrate by easy and familiar experiments, and in popular language, many of the phenomena going on in the realm of nature through the ever-varying year, and to exemplify and explain many beautiful scriptural allusions involving the play of chemical and philosophical laws. Nor has the gifted author failed in accomplishing his laudable purpose. His agreeable style, the correctness of his philosophical views, and especially the high moral and religious bearing of his work, cannot but secure for him the commendation and patronage of the intelligent and virtuous."—*Southern Medical and Surgical Journal*.

BY FRANCIS H. RAMSBOTHAM, M. D., &c.

A NEW EDITION, FROM THE ENLARGED AND REVISED LONDON EDITION.

In one large imperial octavo volume, well bound.

Philadelphia, August 6th, 1845.

Messrs. LEA & BLANCHARD.

GENTLEMEN:—I have looked over the proofs of Ramsbotham on Human Parturition, with its important improvements, from the new London edition.

This Work needs no commendation from me, receiving, as it does, the unanimous recommendation of the British periodical press, as the standard work on Midwifery; "chaste in language, classical in composition, happy in point of arrangement, and abounding in most interesting illustrations."

To the American public, therefore, it is most valuable—from its intrinsic undoubted excellence, and as being the best authorized exponent of British Midwifery. Its circulation will, I trust, be extensive throughout our country.

There is, however, a portion of Obstetric Science to which sufficient attention, it appears to me, has not been paid. Through you, I have promised to the public a work on this subject, and although the continued occupation of my time and thoughts in the duties of a teacher and practitioner have as yet prevented the fulfilment of the promise, the day, I trust, is not distant, when, under the hope of being useful, I shall prepare an account of the MECHANISM OF LABOR, illustrated by suitable engravings, which may be regarded as an *addendum* to the standard works of Ramsbotham, and our own Dewees.

Very respectfully, yours,

HUGH L. HODGE, M. D.,

Professor of Obstetrics, &c. &c., in the University of Pennsylvania.

LANDRETH'S JOHNSON'S GARDENERS' DICTIONARY.

JUST READY.

A DICTIONARY OF MODERN GARDENING.

BY GEORGE WILLIAM JOHNSON, Esq.,

Fellow of the Horticultural Society of India, &c. &c.

With One Hundred and Eighty Wood-Cuts.

EDITED, WITH NUMEROUS ADDITIONS,

BY DAVID LANDRETH, OF PHILADELPHIA.

In the American edition, many modifications and additions have been made, so as to render the work a complete and satisfactory book of reference upon every subject connected with modern gardening in its most extended sense; while great care has been exercised in adapting it to the practice of every section of this country. Numerous wood-cut illustrations have been added, and the publishers present a beautiful volume of near 650 pages, in a clear but small type, well done up in extra cloth, and at a very low price. Such a work has long been needed by the many persons who cannot afford to purchase the large expensive work of London.

Sold by all Booksellers, Nurserymen and Seedsmen in the United States.

Philadelphia, May, 1847

Two Medical Periodicals for Five Dollars a Year.
ONE GIVEN GRATIS.

THE
AMERICAN JOURNAL OF THE MEDICAL SCIENCES.
 EDITED BY ISAAC HAYS, M. D.,
 IS PUBLISHED QUARTERLY, ON THE FIRST OF JANUARY, APRIL,
 JULY AND OCTOBER.

The number for January last contained over THREE HUNDRED large octavo pages, with two plates; that for April consisted of two hundred and seventy-two pages. Illustrations on copper, stone, wood, &c. are freely given, wherever required, and the whole is printed on fine white paper, with clear type.

ALSO,

THE MEDICAL NEWS AND LIBRARY,

A MONTHLY PERIODICAL OF THIRTY-TWO LARGE OCTAVO PAGES,
 WITH NUMEROUS WOOD-CUTS,

Is given gratis to subscribers to the Journal, who pay in advance Five Dollars, free of expense to the publishers.

It will thus be seen that subscribers obtain about FIFTEEN HUNDRED large sized and solid octavo pages per annum, illustrated with fine engravings on wood, &c., for the low price of Five Dollars a year; rendering these altogether among the CHEAPEST MEDICAL PERIODICALS PUBLISHED.

The Medical Journal is now in the twenty-ninth year of its existence, during the whole of which time it has commanded the approbation of the profession at home and abroad. Appearing quarterly, its object is to furnish its readers with a full and accurate resumé of all interesting investigations and discoveries made during the intervals, together with a choice selection of original papers. To this end, its pages are first devoted to

ORIGINAL COMMUNICATIONS,

from correspondents in all parts of the Union, among whom it has numbered a large proportion of the prominent members of the profession for many years past; it then furnishes REVIEWS and BIBLIOGRAPHICAL NOTICES of all new works of interest; and lastly, it presents a very full and extended QUARTERLY SUMMARY, consisting of a

**RETROSPECT AND ABSTRACT
 OF THE PROGRESS OF THE MEDICAL SCIENCES,**
 CAREFULLY COLLECTED FROM ALL THE
FOREIGN AND DOMESTIC JOURNALS.

This department is considered so practically useful, that no exertion is spared to render it as complete as possible, so that both in extent and variety it may compare with any publications of a similar kind. The shorter periods at which this journal appears, enables us to anticipate, by several months, from the original sources, a large portion of the intelligence contained in the semi-annual publications of BRAITHWAITE and RANKING, and the Annual Reports in the BRITISH AND FOREIGN MEDICAL REVIEW, DUBLIN MEDICAL JOURNAL, &c., and whatever of value is found in them, of which the original accounts have not reached us, is at once taken and laid before our readers; besides much AMERICAN INTELLIGENCE, which is not likely to find its way across the Atlantic. The arrangements of the publishers for the supply of this department, by purchase and exchange, are very extensive, embracing the principal Periodicals of GREAT BRITAIN, FRANCE, GERMANY, DENMARK, ITALY, the EAST INDIES, &c., besides

ALL THE AMERICAN JOURNALS:

And especial attention will be given to make it as complete a digest as possible, of all the
IMPROVEMENTS AND DISCOVERIES IN MEDICAL SCIENCE.

Besides this, subscribers have the advantage of

THE MONTHLY NEWS,

Which furnishes the lighter and floating information, and embraces important books for

The Library Department.

The work now passing through its columns is

**TODD AND BOWMAN'S
 PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN,**
 WITH NUMEROUS LARGE AND BEAUTIFUL WOOD-CUTS.

Each work in the Library is regularly pagged, so as to be bound separately.
