### CHAPTER I.

THERE IS NO DEATH.

LIFE AFTER PHYSICAL DEATH IS A FACT SCIENTIFICALLY DEMONSTRABLE.

LIFE HERE AND HEREAFTER HAS A COMMON DEVELOPMENT AND A COMMON PURPOSE.

These propositions are laid down with due appreciation of their importance. They are presented as facts of Nature clearly demonstrable by scientific methods.

The writer is aware that these statements directly challenge both dogmatic theology and scientific skepticism. It is possible that they may provoke the hostility of the one and the ridicule of the other. If, however, such hostility and ridicule finally pave the way to honest investigation, the object of the writer will have been accomplished.

These positive initial declarations, be it understood, foreshadow the positive character of the philosophy to be presented. The authority to state these truths in unconditional terms is derived from a school of science which transcends in scope and investigation that school commonly known as the school of modern physical science. This authority is reinforced by direct teaching and a personal experience covering a period of more than ten years.

Having made this statement, any further discussion as to the relation of the writer to her authority is obviously out of place.
