CENTURIA PRIMA.

*De carminis Heroici artificio dispositi, & distributi
per duodecim pedes legitimos.*

Heroes, proceres laudant heroica Clus
Carmina, quæ pedibus sex constant arte canoræ
vel Digiitæ mixtis Spondeo, aut omnibus equis,
Ut quinta regione sonet sic *Dactylus*: inde
Spondeus regione simul sit carmine sextus.
Materiæ gravitas solet & regione locata
Spondeum quintæ pariter: pede *Dispondeo*
Insonat, & pulchritudinis si *Dactylus* adsit,
Cui quasi continuo *Choriambus* in ordine iunctus
Sit, velut ingenio datus, ut comes ipse pedestre:
Postea si que sonans *Anapestus*, syllaba longa:
Dactylus inde sopans breviter, sed dulciter auri:
Sive *Molossus* ibi prior, at *Anapestus*, & inde
Spondeus; sequitur post syllaba longa vetusse,
Unde pedes mixti: quintus sed *Dactylus*, & post

DUÆ ET TRIGINTA FIGURÆ HEROICI.

Spondens claudens in versibus omnia luce.
 Clauditur & versus pomposus dulciter arte.
 Sepe cadit cæstura bene in regione secunda,
 Mensura versus, numeris necti, atque coagi:
Pyrrhichius sequitur, post syllaba longa videtur,
 Atque *Anapæstus* erit: *Spondeus* & inde sonabit
 Festivi seno pede, & *Hemistichia* cantus.
 Dulciter hos versus cantabit amici amicis:
 Nunc adverterat, amansque poesios undique cantans:
 Vincula ne rumpat, liger ipse fed arte catenam,
 Quaque catenentur sic ipsa Vocabula lingua.
 Carmine peccat cantor, si non nomina texat.
 Captivos redimens Vates sermone soluto,
 Voce Redemptor erit lingua, non corde Redemptor:
 Christicolas solvat, non nomina voce Poeta
 Verba ligata sonent: sic captus amore solutus.

*Quo artificio duæ & triginta Figuræ Heroici in tabellis
 describantur.*

EX Spondei, & Dactyli legitimorum pedum variatione versus Heroici recipit duas & triginta figuras: quarum tres sunt modi. Primus modus est *Monoschematicus*, id est, unus figura: habet figuras duas: alteram, ex spondeis omnibus: ex quinque *Dactylis* alteram. Secundus modus est *Pentaschematicus*, id est, figurarum quinque: habet figuras decem: quinque cum unus spondeas, quatuor inter *Dactylis* variatur: & item quinque cum unus *Dactylus* inter quatuor *Spondeas*. Tertius modus est *Decaschematicus*, id est, figurarum decem: habet figuras viginti. Decem, cum duo *Spondei* inter tres, *Dactylis* variatur: totidem cum contra duo *Dactylis* inter *Spondeos* tres. Erunt itaque figurae Heroici versus primi modi duæ: Secundi decem: Tertiij viginti, atque omnes simul duæ & triginta. Quod ut commodius fiat, in singulis versibus Paradigmata appoluimus ad eorum intellectum.

ARTIFICIOSA VOCABULARIA
POETICA.

Manuductionis tabellis respondentia: Poetis, & metris tantum perutinata: ad spatiā Syllabārum declaranda, & ad idoneam Itagogen sufficientia: disposita per octa partes orationis cum pedis accidentibus ordine alphabeti descriptas.

In quibus quidquid veterissimi Scriptores de syllabæ ratione precipiunt: argu adeo omnia, que ad prosodiā percipiendam, & proportionem inter ars, & thesēm penitus intelligendam, pertinent: Epithetorum, omniumque vocum, vñā cum Nominiū, Pronominū, & Participiorū casib⁹, Verborumque Personis faciliter exponuntur.

VOCABULARIUM PRIMUM:

Continet Pyrrhichium, qui accentu acuto in priori parte prolatus per aquilitatem cæditur.

PRÆFATIO AD LECTOREM.

Pyrrhichius confat diuibus syllabis brevibus, totidemque temporibus: habet proportionem equam. Aequa divisio est, quoties sublatio pedis in temporibus per est positioni. Diitus est a Pyrrhicha, quia hoc sono milites sub armis per ludum ytebantur. Dicitur etiam Dibrachus: à Dis, duo, & brachis, brevis, quasi diuibus brevibus confans.
