MITCHELL'S

LARGE

MAP OF THE WORLD.

DRAWN ON MERCATOR'S PROJECTION.

Size, 4 feet 6 inches in Length, by 6 feet 3 inches in Width.

Mounted on Rollers. Price, \$12.00.

Folded in Case. " "

This Map comprises a surface of about 4000 square inches, with a geographical extent, from east to west, of 360 degrees of longitude, and from 82° 30' of latitude north, to the 70th degree south. It exhibits the most correct view of the earth, in the map form, hitherto published in this country; the researches of the most distinguished explorers, both by sea and land; the sailing-tracks of the principal navigators, from the time of Columbus to that of the Exploring Expedition commanded by Commodore Wilkes; the Routes and Discoveries of Dr. Kane's Arctic Expedition; the Steam-packet and Overland Route to India; the Various Routes of Travel by Sea and Land; the Atlantic and Pacific Railroad Routes, and, in fact, embodies all the Recent Discoveries.

One important feature, and an entirely new one, is the marking of the residences of the Consular and Diplomatic Officers of the United States throughout the whole world.

The particular attention of shipping firms and shipmasters is invited to this Map. It supplies a want long felt by them, and only needs examination to convince any one of its undoubted superiority over any and every map of the world yet published.

RECOMMENDATIONS.

This is the most perfect map, of its kind, that has yet been published in any country.—*N. Y. Herald.*

It is conformed to the latest discoveries in Africa, and in the Arctic and the Antarctic circles; it shows all the great pathways across the several oceans, with that of the Atlantic Telegraph, that is to be; the nations are distinguished by well-contrasted colors; and no labor or expense, apparently, is grudged, to make this the most lucid and trustworthy map of the world in existence.—*N. Y. Tribune.*
