# APÉNDICE A.

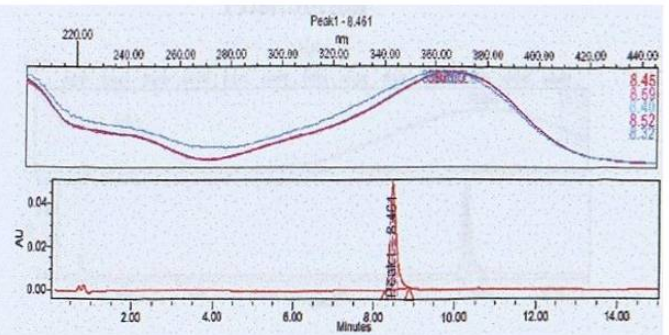

## Verificación de pureza

### a. Compuestos puros UV-Vis

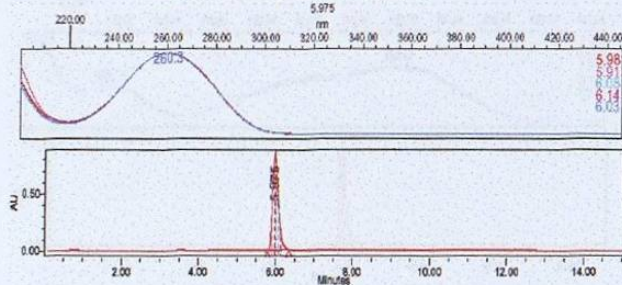

Santonina

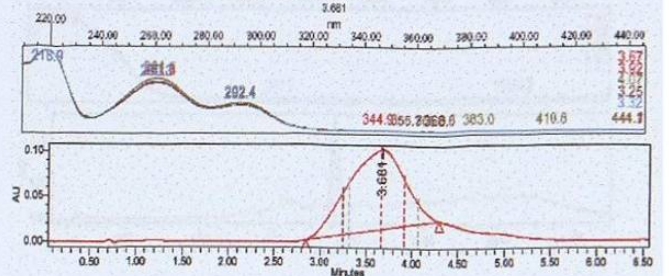

Kukulkanina A

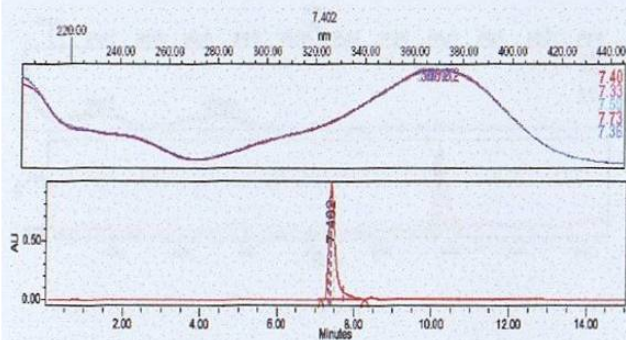

Desacetato matricarina

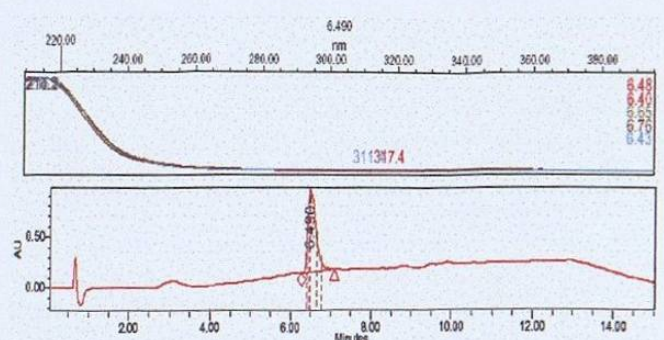

Ácido vainílico

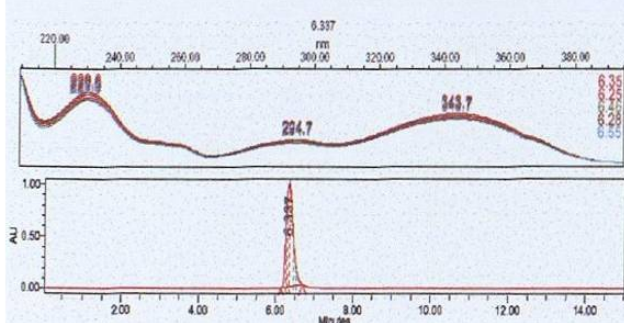

Kukulkanina B

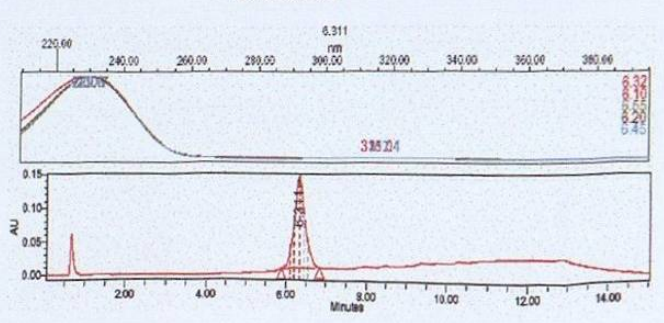

Partenina

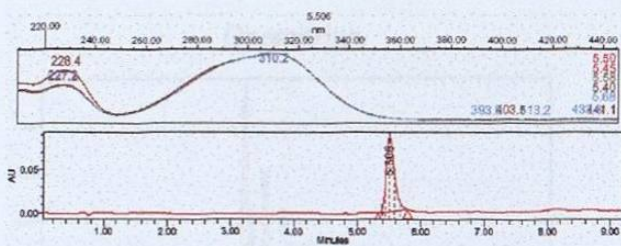

Kokusagenina

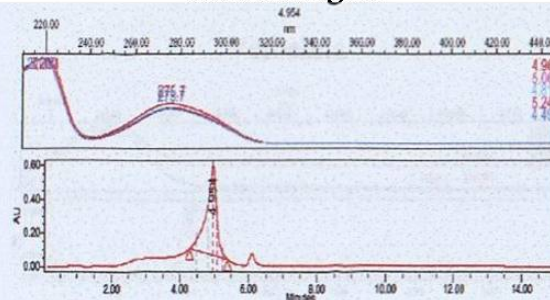

Tenulina

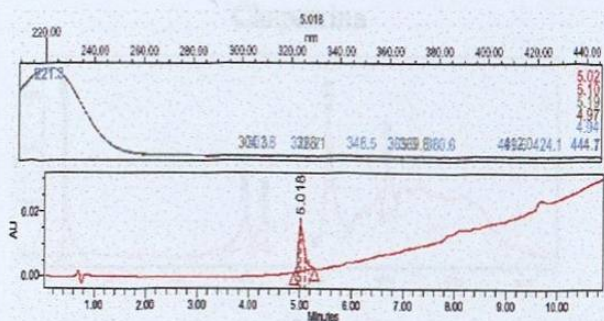

### Ácido p-cumárico

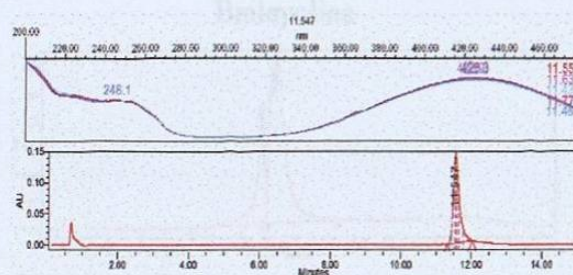

### Ácido siríngico

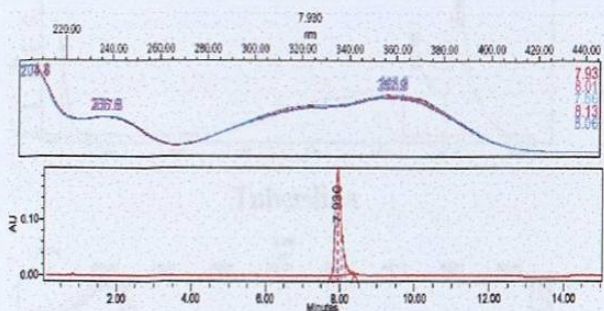

### Ouabaina

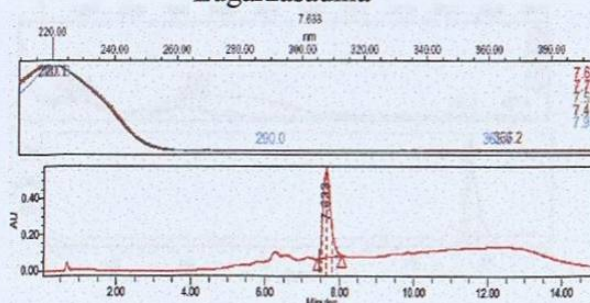

### Pristimirina

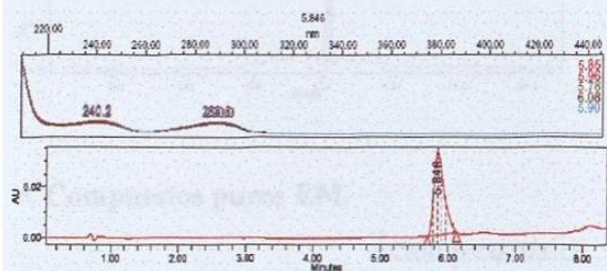

### Bonducelina

### Eugarzasadina

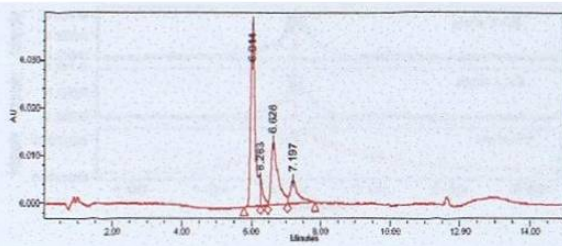

### Protopina

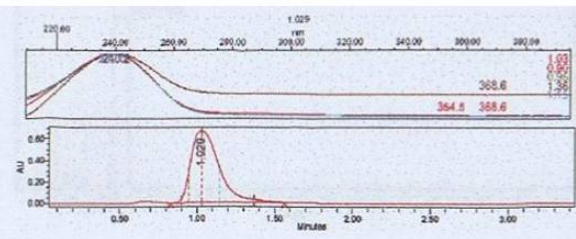

## b. Compuestos impuros UV-Vis.

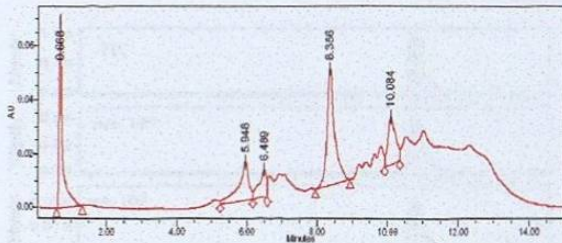

Quercitrina

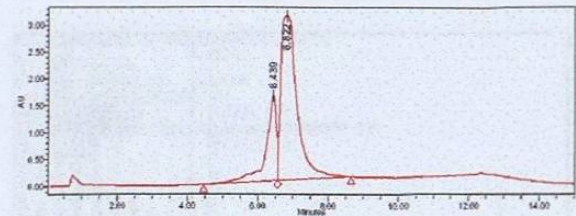

Verbelina

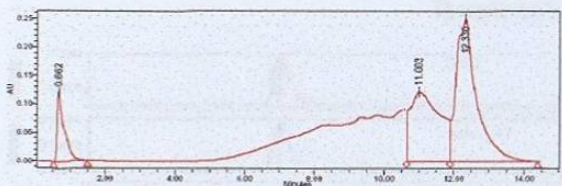

Chaparrina

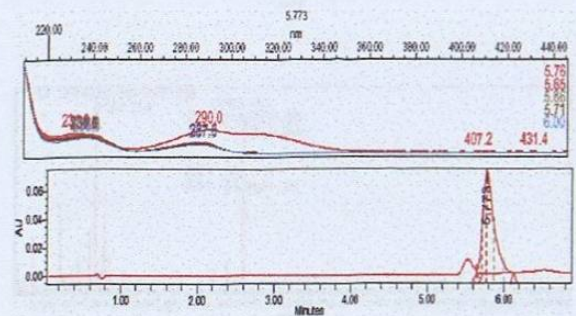

Baileyolona

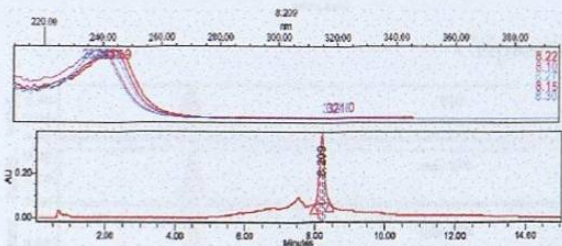

Acetato  $\beta$ -amirina

Criptopina

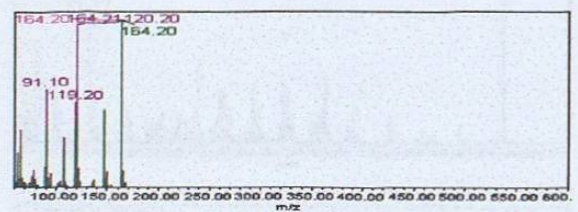

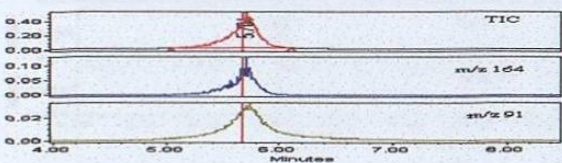

Tuberilina

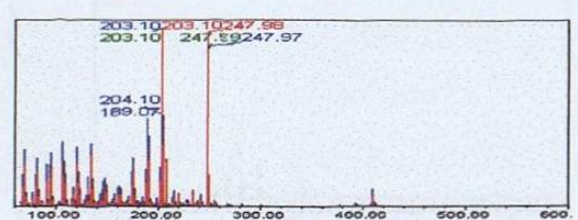

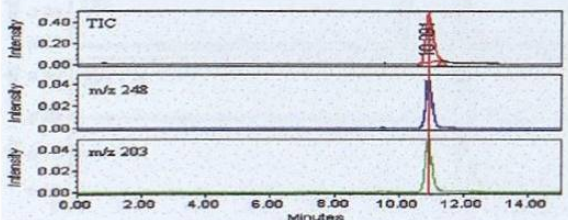

## c. Compuestos puros EM.

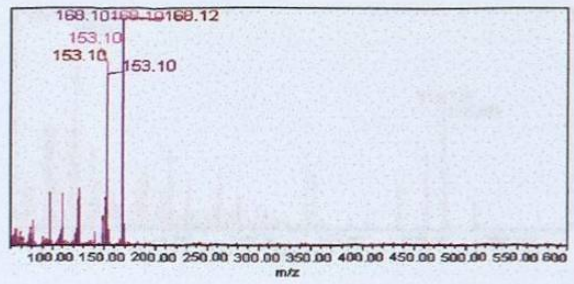

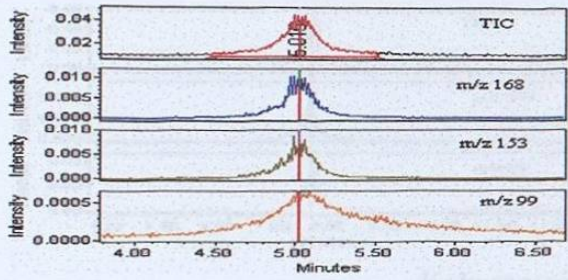

Ácido p-cumárico

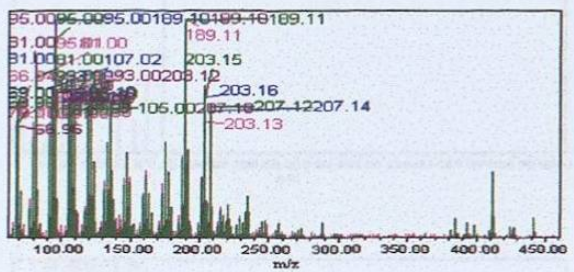

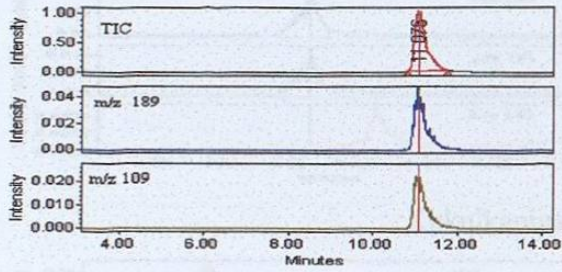

Ácido ursólico

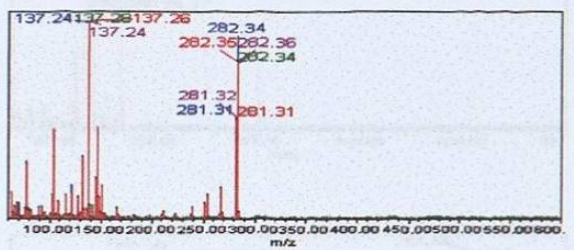

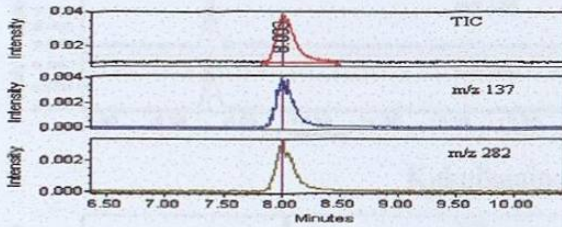

### Ácido vainílico

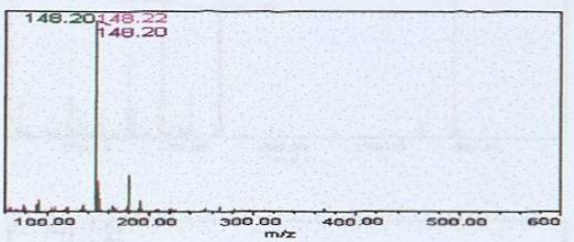

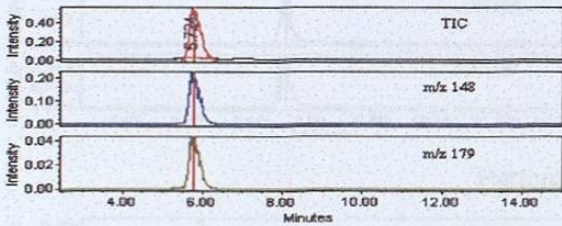

### Betulina

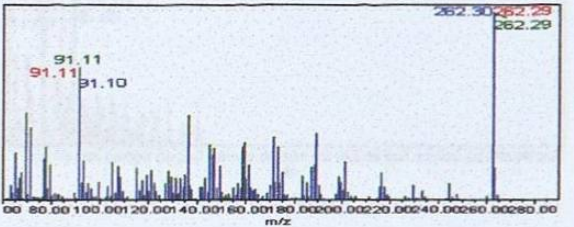

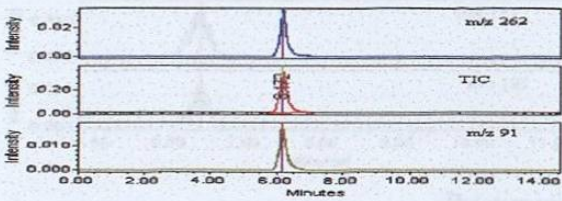

### Bonducelina

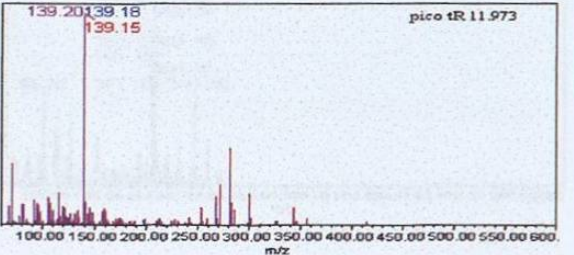

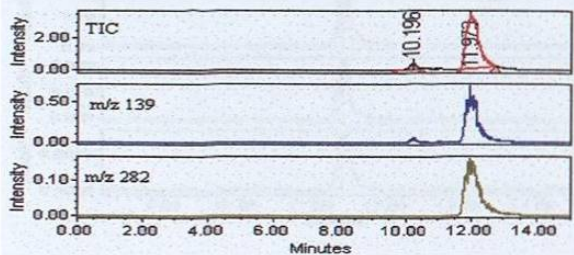

### Criptopina

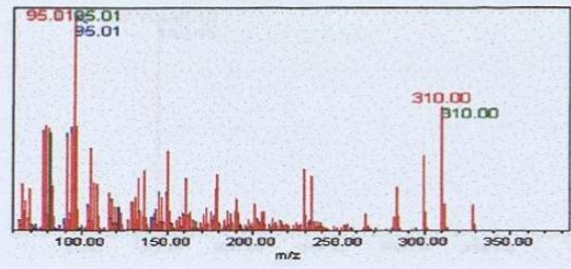

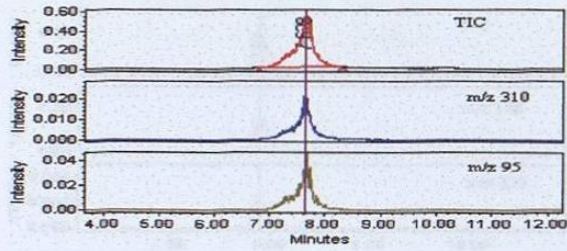

### Desacetato matricarina

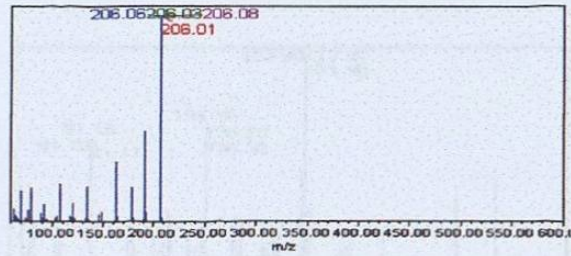

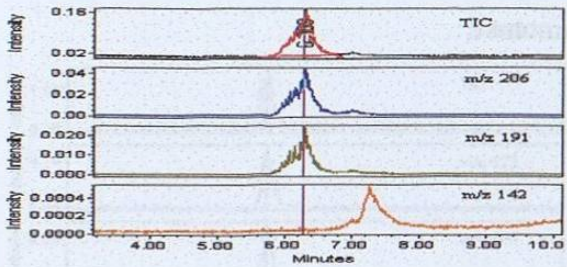

### Diosgenina

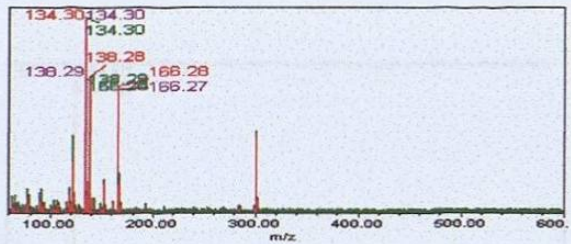

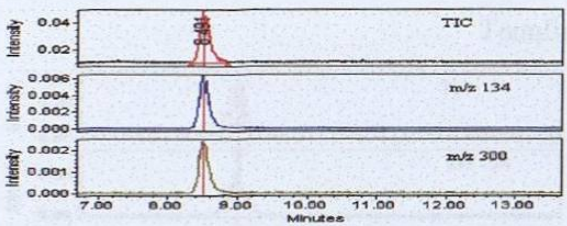

### Eugarzasadina

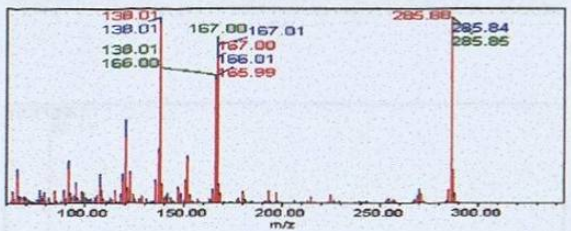

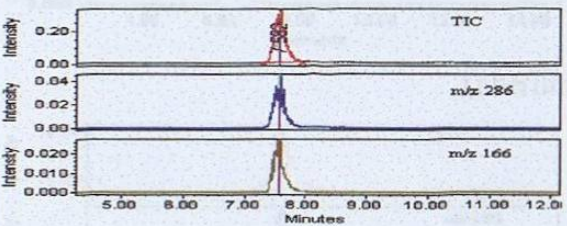

### Kokusagenina

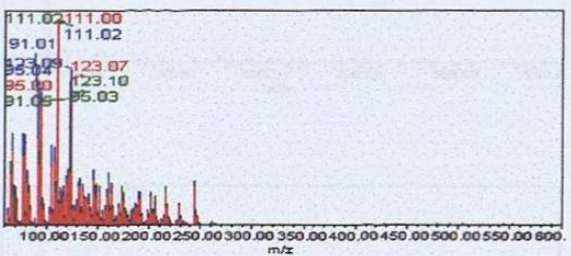

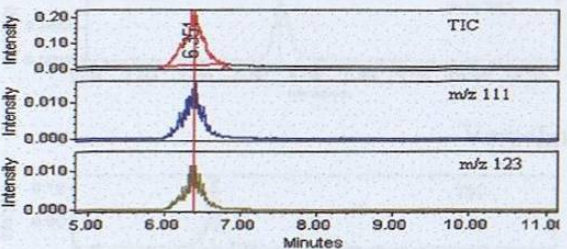

### Kukulkanina A

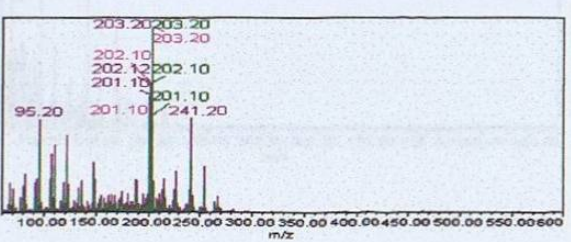

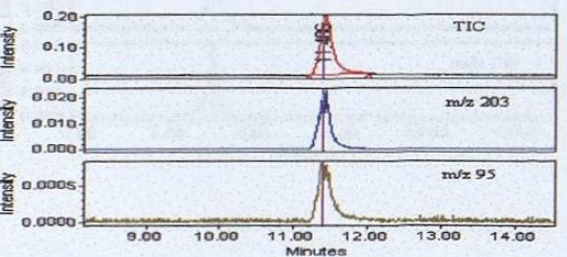

### Kukulkanina B

### Partenina

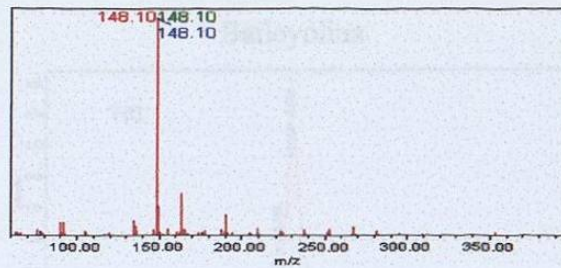

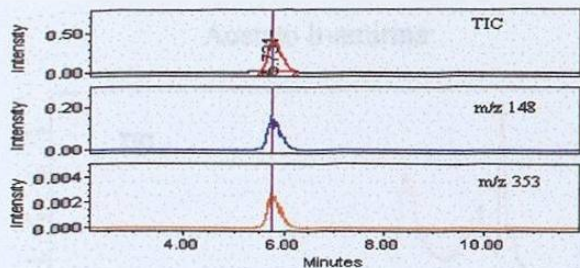

### Pristimirina

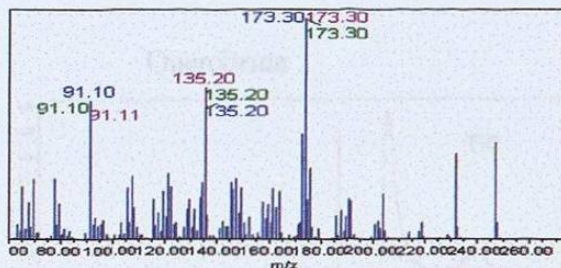

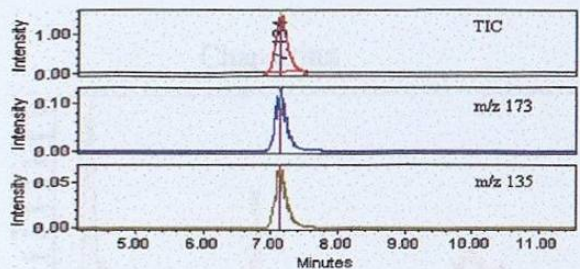

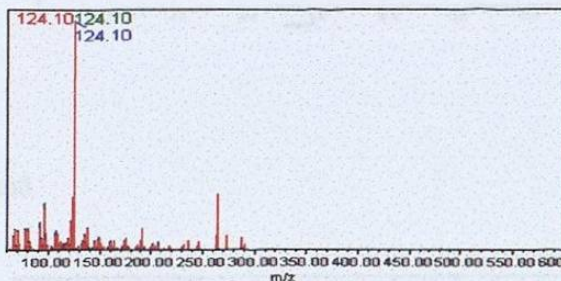

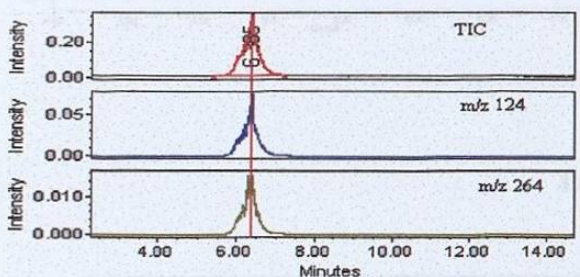

### Protopina

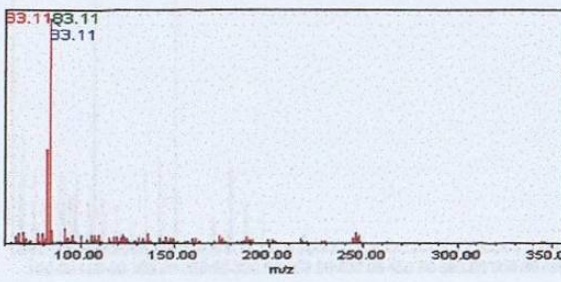

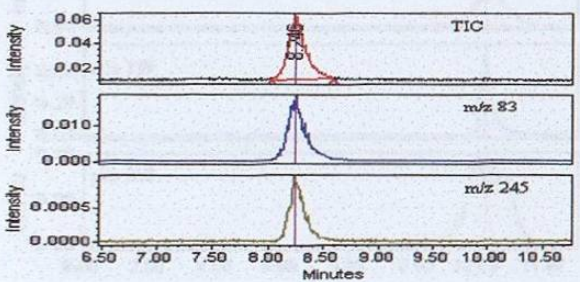

### Santonina

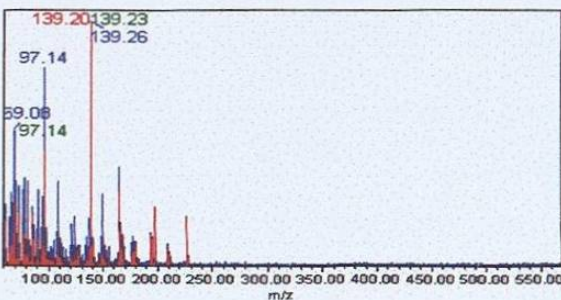

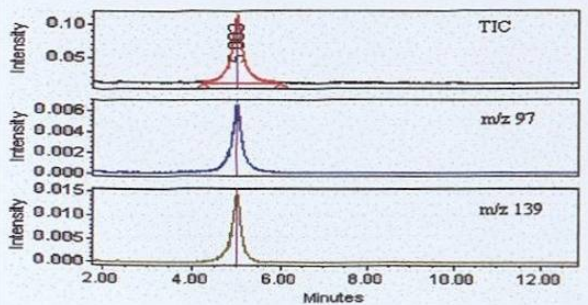

### Tenulina

### Tuberilina

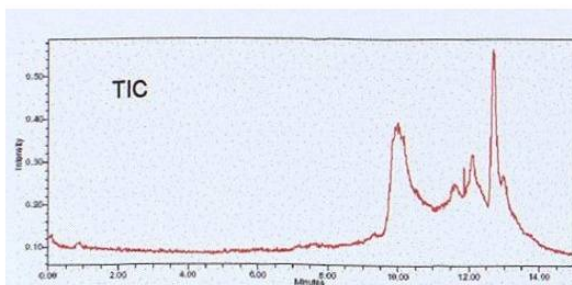

### Verbelina

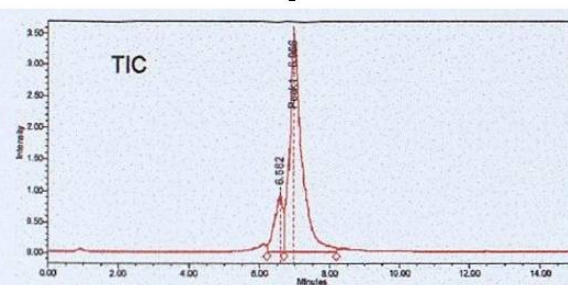

## d. Compuestos impuros EM

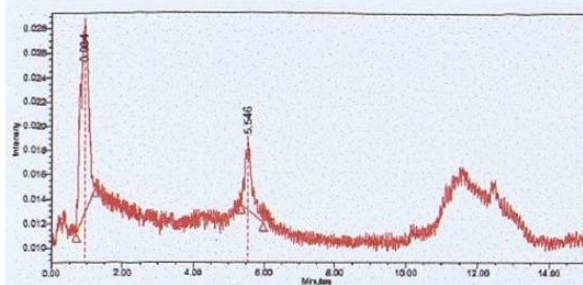

### Acetato b-amirina

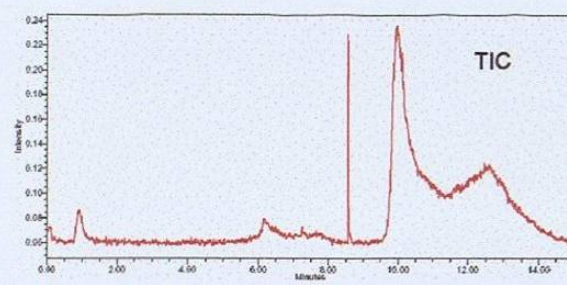

### Baileyolona

### Chaparrina

### Quercitrina

### Esmilagenina
